VII

Semester

	_	VII Semester		
No.	Course Code	Rural Agricultural Work Experience industrial Attachment (AIA)		
		Activites	No. of weeks	Credit Hours
		General orientation & On campus training by different faculties	1	
		Village attachment	8	14
1		Unit attachment in Univ./ College. KVK/ Research Station Attachment	5	
		Plant clinic	2	02
		Agro-Industrial Attachment	3	04
		Project Report Preparation, Presentation and Evaluation	1	02
	L	Total weeks for RAWE & AIA	20	20

- **Agro-Industrial Attachment:** The students would be attached with the agro-industries for a period of 3 weeks to get an experience of the industrial environment and working.
- Educational tour will be conducted in break between IV & V Semester or VI & VIISemester

RAWE Component-I

Village Attachment Training Programme

Sl.	Activity	Duration
No.		
1	Orientation and Survey of Village	1 week
2	Agronomical Interventions	1 week
3	Plant Protection Interventions	1 week
4	Soil Improvement Interventions (Soil sampling and testing)	1 week
5	Fruit and Vegetable production interventions	1 week
6	Food Processing and Storage interventions	
7	Animal Production Interventions	1 week
8	Extension and Transfer of Technology activities	1 week

RAWE Component-II

Agro Industrial Attachment

- Students shall be placed in Agro-and Cottage industries and Commodities Boards for03 weeks.
- Industries include Seed/Sapling production, Pesticides-insecticides, Post harvest-processing-value addition, Agri-finance institutions, etc.

Activities and Tasks during Agro-Industrial Attachment Programme

- Acquaintance with industry and staff
- Study of structure, functioning, objective and mandates of the industry

- Study of various processing units and hands-on trainings under supervision of industry staff
- Ethics of industry
- Employment generated by the industry
- Contribution of the industry promoting environment
- Learning business network including outlets of the industry
- Skill development in all crucial tasks of the industry
- Documentation of the activities and task performed by the students
- Performance evaluation, appraisal and ranking of students **Modules for Skill Development and Entrepreneurship:** A student has to register 20 credits opting for two modules of (0+10) credits each (total 20 credits) from the package of modules in the **VIII Semester**.

	VIII	Semester	
S. No.	Course Code	Course Title	Credit Hours
1	18 EXP 401	Experiential Learning - Module I	<mark>0+10</mark>
2	18 EXP 402	Experiential Learning - Module II	<mark>0+10</mark>

Experiential Learning: A student can select two experiential learning out of the followingand offer during 8th semester.

S. No.	Title of the	Credits
	module	
1	Production Technology for Bioagents and Biofertilizer	0+10
2	Seed Production and Technology	0+10
3	Mushroom Cultivatiuon Technology	0+10
4	Soil, Plant, Water and Seed Testing	0+10
5	Commercial Beekeeping	0+10
6	Poultry Production Technology	0+10
7	Commercial Horticulture	0+10
8	Floriculture and Landscaping	0+10
9	Food Processing	0+10
10	Agriculture Waste Management	0+10
11	Organic Production Technology	0+10
12	Commercial Sericulture	0+10

Elective Courses: A student can select three elective courses out of the following and offerduring 4th, 5th and 6th semesters.

S. No.	Courses	Credit Hours
1	Agribusiness Management	3(2+1)
2	Agrochemicals	3(2+1)
3	Commercial Plant Breeding	3(1+2)
4	Landscaping	3(2+1)
5	Food Safety Issues	3(2+1)
6	Biopesticides & Biofertilizers	3(2+1)
7	Protected Cultivation	3(2+1)
8	Micro propagation Technologies	3(1+2)
9	Hi-tech. Horticulture	3(2+1)
10	Weed Management	3(2+1)
11	System Simulation and Agro-advisory	3(2+1)
12	Agricultural Journalism	3(2+1)

FUNDAMENTALS OF HORTICULTURE 2 (1+1)

*18 HOR 101 Course outlines Theory

Horticulture-Its definition and branches, Importance and scope of horticulture, Horticultural and botanical classification, Climate and soil for horticultural crops, Plantpropagation-methods (sexual & asexual), propagating structures; separation, division, grafting, budding, layering), High density planting; Use of rootstocks; Orchard establishment; (Principles & Layout) Principles and methods of training and pruning, Juvenility and flower bud differentiation; Unfruitfulness; pollination, pollinizers andpollinators; fertilization and parthenocarpy; Vegetable gardens & ornamental garden types and parts; Lawn making, Use of plant bio-regulators in horticulture, Irrigation methods in horticulture crops, Fertilizers application-methods.

Practical

Identification of garden tools, Identification of horticultural crops, Preparation of seed bed/nursery bed, Practice of sexual and asexual methods of propagation, Layout and planting of orchard plants, Training and pruning of fruit trees, Transplanting and care of vegetable seedlings, Making of herbaceous and shrubbery borders, Preparation of potting mixture, potting andrepotting, Fertilizer application different Visits in crops, to commercial nurseries/orchard.

Lecture outlines

Theory

1. Horticulture – Definition - Divisions of horticulture with suitable examples.

2. Scope and importance of horticulture - Importance of horticulture in terms of income, employment generation, industry, religious, aesthetic, food & nutritive value and export.

3. Horticultural classification based on soil, climate and botanical classification.

4. Climate and soil for horticultural crops - Influence of environmental factors on horticultural crop production – Temperature, humidity, wind, rainfall and solar radiation – Influence of soil factors – Soil type, pH, EC.

5. Propagating structures- Plant propagation- Methods - Sexual and asexual – Propagation by cuttings – Definition of cutting – Stem cuttings – Leaf cuttings – Root cuttings.

6. Propagation by Layering - Types of layering (tip, simple, compound, mound, trench, air layering) - Natural modifications of layering (runners, suckers, stolon, offset)- Propagation by separation - Bulbs, corms; division (rhizome, stem tuber, tuberous roots).

7. Grafting, budding -Rootstock and scion selection – Grafting methods – Attached scion methods of grafting, simple or approach grafting, detached scion methods of grafting (side grafting - Veneer grafting, apical grafting- epicotyl grafting, double, soft wood grafting, cleft grafting, tongue grafting, whip grafting) – Graft incompatibility – Types – Translocated and localized incompatibility; Budding – Methods of budding – T-budding, inverted T- budding, patch budding and ring budding - Top working.

Principles of orchard establishment – Points to be kept in mind while selecting site for the establishment of orchards - Principles and steps in orchard establishment - Layout of orchards – Systems of planting - Square, rectangle, quincunx, hexagonal and contour systems of planting-their merits and demerits.
 Principles and methods of training and pruning - Definition of training, objectives and training, principles and methods of training of fruit crops - Open centre, closed centre and modified leader systems their merits and demerits - Definition of pruning, objectives of pruning, principles and methods of pruning of fruit crops.
 Juvenility and flower bud differentiation – Methods for shortening juvenility - Application of growth regulators (Gibberellins, Auxins, cytokinins, Abscissic acid, Ethylene), environmental methods (photoperiod, temperature) – Cultivation techniques (grafting, pruning, girdling, irrigation, nutrition) - Bearing habits of fruit trees.

11. Unfruitfulness, factors (physiological, phylogenical, management, parasitical, climatological) pollination - Self and Cross pollination, pollinizers and pollinators - Fertilization and parthenocarpy – Types.

12. Types of vegetables Gardens – Kitchen Garden, market garden, truck garden, vegetable forcing, garden for processing, seed production garden and floating garden. Ornamental garden types – Formal – Informal – Wild Garden – Parts/ features of an ornamental garden.

13. Lawn making – Selection of Grass – Bermuda grass – Korean grass – Poa grass
– Fescue grass – Kentucky blue grass - Grasses for shady areas – Site Selection – Soil
- Preparation of soil – Drainage – Digging – Manuring and grading – Methods of planting – Sowing of seeds – Dibbling – Turfing – Maintenance of lawn – Mowing – Rolling – Sweeping –Scraping – Raking – Weeding – Irrigation – Top dressing with compost and fertilizers - Diseases and other problems – Fairy ring – Pale Yellow Laws.

14. Use of plant bio-regulators (PBR) in horticulture – Introduction – Applications of PBR in fruit crops.

15. Irrigation methods in horticulture crops - Different methods followed in horticultural crops (check basin, furrow, ring basin, basin, flood, pitcher, funnel, drip and sprinkler).

16. Fertilizer application- Different methods of application to horticultural crops- Broad casting, top dressing, localized placement, contact placement Band placement, row placement, pellet, foliar application, starter solution, fertigation.

Practical

1. Identification of garden tools.

- 2. Identification of horticultural crops.
- 3. Layout of different planting systems.
- 4. Layout of kitchen garden.
- 5. Preparation of nursery bed (raised and flat beds) and sowing of seeds.
- 6. Practice of different asexual methods by divisions.
- 7. Practice of different asexual methods by cuttings.
- 8. Practice of different asexual methods by grafting.
- 9. Practice of different asexual methods by budding.
- 10. Practice of different asexual methods by layering.
- 11. Training and pruning of fruit trees.
- 12. Transplanting and care of vegetable seedlings.
- 13. Making of herbaceous and shrubbery borders.
- 14. Preparation of potting mixture, potting and repotting.
- 15. Fertilizer application in different crops.
- 16. Visits to commercial nurseries/orchard.

*18 BIC 101 FUNDAMENTALS OF PLANT BIOCHEMISTRY AND BIOTECHNOLOGY 3 (2+1)

Course outlines Theory

Importance of Biochemistry - Properties of Water, pH and Buffer – Carbohydrate, Importance and classification - Structures of Monosaccharides -Reducing and oxidizing properties of Monosaccharides -Mutarotation,Structure of Disaccharides and Polysaccharides – Lipid, Importance and classification -Structures and properties of fatty acids - Storage lipids and membrane lipids – Proteins, Importance of proteins and classification, Structures - titration and zwitterions nature of amino acids – Structural organization of proteins – Enzymes, General properties and classification –Mechanism of action - Michaelis & Menten and Line Weaver Burk equation & plots - Introduction to allosteric enzymes - Nucleic acids - Importance and classification - Structure of Nucleotides, A, B & Z DNA – RNA, Types and Secondary & Tertiary structure – Metabolism of carbohydrates - Glycolysis, TCA cycle, Glyoxylate cycle, Electron transport chain - Metabolism of lipids - Beta oxidation, Biosynthesis of fatty acids.

Concepts and applications of plant biotechnology - Scope, organ culture, embryo culture, cell suspension culture, callus culture, anther culture, pollen culture and ovule culture and their applications - Micro-propagation methods; organogenesis and embryogenesis - Synthetic seeds and their significance - Embryo rescue and its significance - Somatic hybridization and cybrids - Somaclonal variation and its use in crop improvement - Cryo-preservation - Introduction to recombinant DNA methods - Physical (Gene gun method), Chemical (PEG mediated) and Agrobacterium mediated gene transfer methods - Transgenics and its importance in crop improvement – PCR techniques and its applications - RFLP, RAPD, SSR - Marker Assisted Breeding in crop improvement - Biotechnology regulations.

Practical

Preparation of solution, pH & buffers - Qualitative tests of carbohydrates and amino acids - Quantitative estimation of glucose/ proteins - Titration methods for estimation of amino acids/lipids - Effect of pH, temperature and substrate concentration on enzyme action, Paper chromatography/ TLC demonstration for separation of amino acids/ Monosaccharides - Sterilization techniques. Composition of various tissue culture media and preparation of stock solutions for MS nutrient medium - Callus induction from various explants - Micropropagation, hardening and acclimatization - Demonstration on isolation ofDNA - Demonstration of gel electrophoresis techniques and DNA finger printing.

Lecture outlines

Introduction – Historical aspects of Biochemistry– Scope, impact and importance of Biochemistry in plant sciences -Properties of water – PH – Buffers. 2 Carbohydrates– Classification - Structures – Monosacharides – Structural aspects – mutarotation - Reducing and oxidizing properties. 3 Oligosaccharides and polysaccharides-Funtions of carbohydrates 4 Lipids – Fatty acids – Structures and properties – Functions of lipids 5 Lipids - Classification – Storage lipids and membrane lipids – Saponification, hydrogenation, Iodine number and Acid value. 6 Amino acids – Structures - Classification – Zwitterions – Titration Peptides – Oligopeptides – Cyclic peptides - Malformin, and acyclic Glutathione, Gramicidin – Functions of peptides. 8 Proteins – Importance - Classification - Properties of proteins – Isoelectric PH – Denaturation - Protein sequencing – Edman degradation method Proteins – Structural organization – Primary, secondary, tertiary and quaternary structures and forces involved in stabilizing proteins 10 Enzymes – Characteristics of enzymes – Chemical nature, speed, specificity, active site - activation energy – Mechanism of enzyme action. 11 Classification of enzymes - Isoenzymes – Multienzyme complex – Allosteric enzymes and coenzymes. 12 Measurement of enzyme activity – Factors effecting enzyme activity – Enzyme Inhibition – MM & LB plots 13 Nucleic acids – Functions – Structures of nitrogen bases – Nucleosides – Nucleotides in RNA and DNA. 14 Various types of DNA and RNA – Secondary structure of B-DNA and t-RNA. 15 Metabolism – Anabolism and Catabolism – Stages of respiration – Overall metabolic view of carbohydrates, proteins and lipids. 16 Metabolism of carbohydrates – Glycolysis – Aerobic and anaerobic. 17 Tricarboxylic Acid (TCA) cycle— Glyoxalate cycle – Electron transport chain 18 Metabolism of lipids –Biosynthesis of fatty acids and tri acyl glycerol 19 Catabolism of lipids α , β & γ oxidation of fatty acids in brief and α oxidation in detail. 20 Protein Biosynthesis and post translational modifications 21 Secondary metabolites – Terpenoids – Alkaloids - Phenolics – Importance 22 Biotechnology – Major – Concepts and importance – Applications of plant biotechnology. 23 Introduction to plant tissue culture – History – Scientists - Terminology – Steps in general tissue culture – Types of sterilization and nutrient media – Types of cultures – Organ cultures, cell suspension culture, callus culture, pollen culture and their applications. 24 Micropropagation – Procedure _ techniques Organogenesis and embryogenesis – Problems – Advantages – Limitations.

25 Anther culture – embryo culture – Ovule culture – Somatic embryogenesis -Synthetic seeds and its applications.

26 Protoplast isolation and fusion – Somatic hybridization – Cybrids – Somaclonal variations and applications in crop improvement – Cryo preservation

27 Recombinant DNA methods - Introduction to genetic engineering – Definitions
 – Gene cloning - Vectors.

28 & 29Gene transfer methods – Indirect methods (Agrobacterium) and direct methods (physical-gene gun method; chemical-PEG mediated and other methods) with case studies / examples.

30 Transgenic plants – Present status - Applications in crop improvement – Limitations – biotechnology regulations.

31 Polymerase chain reaction (PCR) – Procedure and applications.

32 Markers - Morphological, biochemical and molecular markers – RFLP, RAPD and SSR – Marker assisted selection for crop improvement.

Practical

1 Preparation of solutions, pH and buffers.

- 2 Qualitative tests for carbohydrates.
- 3 Qualitative tests amino acids.
- 4 Estimation of amylose in rice.
- 5 Estimation of reducing sugar/Total soluble sugars.
- 6 Estimation of proteins by Lowrys method.
- 7 Extraction of oil from oil seeds by soxhlet apparatus.
- 8 Effect of PH, temperature and substrate concentration on enzyme action.
- 9 Paper chromatography / TLC demonstration for seperation of amino acids.

10 Sterilization techniques.

11 Composition of various tissues culture media and preparation of stock solutions for MS nutrient medium.

12 Callus induction from various explants.

13 Micropropagation – Hardening and acclimatization.

14 Demonstration of isolation of DNA and of gel electrophoresis technique.

15 Demonstration of PCR Technique.

16 Demonstration of DNA finger printing –RAPD and Restriction digestion.

*18 AGR 103 INTRODUCTION TO FORESTRY 2(1+1)

Course outlines

Theory

Introduction, definitions of basic terms related to forestry; Objectives of silviculture, forest classification, salient features of Indian forest policies; Forest regeneration, natural regeneration from seed and vegetative parts, coppicing, pollarding, root suckers; Artificial regeneration, objectives, choice between natural and artificial regeneration, essential preliminary considerations. Crown classification. Tending operations, weeding, cleaning, thinning, mechanical, ordinary, crown and advance thinning; Forest mensuration, objectives, diameter measurement, instruments used in diameter measurement; Non instrumental methods of height measurement, shadow and single pole method, instrumental methods of height measurement, geometric and trigonometric principles, instruments used in height measurement, tree stem form, form factor, form quotient, measurement of volume of felled and standing trees, age determination of trees; Agroforestry, definitions, importance, criteria of selection of trees in agroforestry, different agroforestry systems prevalent in the country, shifting cultivation, taungya, alley cropping, wind breaks and shelter belts, home gardens; Cultivation practices of two important fast growing tree species of the region.

Practical

Identification of tree-species, diameter measurements using calipers and tape, diameter measurements of forked, buttressed, fluted and leaning trees; Height measurement of standing trees by shadow method, single pole method and hypsometer; Volume measurement of logs using various formulae; Nursery lay out, seed sowing, vegetative propagation techniques; Forest plantations and their management, visits to nearby forest based industries.

Lecture outlines

Theory

1. Introduction – definitions of basic terms related to forestry, Indian forest, target area, productivity

2. Influence of forest on climate, soil, floods, erosion, human health and recreation.

3. Objectives of silviculture, forest classification, salient features of Indian forest policies.

4. Forest regeneration, Naturals regeneration - natural regeneration from seed and vegetative parts, coppicing, pollarding, root suckers.

5. Artificial regeneration – objectives, choice between natural and artificial regeneration, planting methods, essential preliminary considerations. Crown classification.

6. Tending operations – weeding, cleaning, thinning – mechanical, ordinary, crown and advance thinning.

7. Principles and practices of social forestry nurseries- types of nurseries success in nursery production.

8. Afforestation in different sites - shifting sand dunes, saline soils, ravine lands, wet lands, lateritic soils, dry rocky soils, canal banks, road sides and watershed areas.

9. Village wood lots, selection of species - measures for shortage of fuel wood-Properties of fuel wood- management and advantages of energy plantations-Suitable tree species

10. Forest mensuration – objectives, diameter measurement, instruments used in diameter measurement; Non instrumental methods of height measurement shadow and single pole method;

11. Instrumental methods of height measurement - geometric and trigonometric principles, instruments used in height measurement;

12. Tree stem form, form factor, form quotient, measurement of volume of felled and standing trees, age determination of trees.

13. Major and minor forest products

14. Agroforestry – definitions, importance, criteria of selection of trees in agroforestry

15. Different agroforestry systems prevalent in the country, shifting cultivation, taungya, alley cropping, wind breaks and shelter belts, home gardens.

16. Cultivation practices of Subabul, Eucalyptus and Casuarina tree species.

Practical

1. Identification of tree-species.

2. Diameter measurements using calipers and tape, diameter measurements of forked, buttressed, fluted and leaning trees.

3. Height measurement of standing trees by shadow method, single pole method and hypsometer.

4. Volume measurement of logs using various formulae.

5. Biomass estimation in energy plantations

6. Nursery lay out, seed sowing,

7. Application of pre-sowing seed treatments

8. Vegetative propagation techniques.

9. Field planting techniques

10. Forest plantations and their management.

11. Identification of important major and minor forest products

12. Visits of nearby forest based industries.

13. Visit to social nurseries of forest department

14. Visit to energy plantations and forest research centres.

15. Visits to nearby forest based industries.

16. Collection and maintenance of forest products and herbarium

*18 SAC 101 FUNDAMENTALS OF SOIL SCIENCE 3(2+1) Course outlines Theory

Soil as a natural body, Pedological and edaphological concepts of soil; Soil genesis: soil forming rocks and minerals; weathering, processes and factors of soil formation; Soil Profile, components of soil; Soil physical properties: Soil-texture, structure, density and porosity, Soil colour, consistence and plasticity; Elementary knowledge of soil taxonomy classification and soils of India; Soil water retention, movement and availability; soil air, composition, gaseous exchange, problem and plant growth; Soil reaction-pH, soil acidity and alkalinity, buffering, effect of pH on nutrient availability; Soil colloids - inorganic and organic; silicate clays: constitution and properties; sources of charge ion exchange, cation exchange capacity, base saturation; Soil organic matter: composition, properties and its influence on soil properties; humic substances - nature and properties; Soil organisms: macro and micro organisms, their beneficial and harmful effects; Soil pollution - behaviour of pesticides and inorganic contaminants, prevention and mitigation of soil pollution.

Practical

Study of soil profile in field. Study of soil sampling tools, collection of representative soil sample, its processing and storage. Determination of soil density, moisture content and porosity. Determination of soil texture by feel and Bouyoucos Methods. Studies of capillary rise phenomenon of water in soil column and water movement in soil, Infiltration rate. Determination of soil pH and electrical conductivity. Determination of cation exchange capacity of soil. Study of soil map. Determination of soil colour. Demonstration of heat transferin soil. Estimation of organic matter content of soil.

Lecture outlines

Theory

1. Introduction - Spheres of the earth atmosphere, hydrosphere and lithosphere – Their characteristics – Origin of soil – Soil and soil components – Mineral matter, organic matter, water and air – Definition of soil and various concepts of soil – Branches of soil science.

 Rocks – Classification of rocks based on mode of origin –ligneous rocks, sedimentary rocks and metamorphic rocks – Classification of rocks based on silica content – Weatherability of rocks.

 Minerals – Primary, secondary, essential and accessory minerals – Primary minerals – Quartz, feldspar, micas, pyroxenes, amphiboles and olivines – Weatherability of primary minerals.

4. Non-silicate minerals – P, Ca, Mg, S and micronutrient containing minerals – Secondary silicate minerals – Basic structural units. 5. Weathering – Types of weathering – Physical weathering of rocks – Agents of physical weathering and their role- Biological weathering – Role of flora and fauna in weathering process.

6. Chemical weathering – Solution, hydration, hydrolysis, carbonation, oxidation and reduction.

7. Parent material – Classification of parent materials based on their mode of transport by different agents - Soil formation – Soil forming factors – Classification and their role in soil formation – Catena – Definition.

8. Pedogenic processes – Eluviation, illuviation, humification, calcification, laterization, podzolisation, melanisation, salinization and alkalization.

9. Soil profile –Detailed description of a theoretical soil profile – Differences between surface soil and sub soil.

10. Soil physical properties – Soil texture – Definition – Various inorganic components in soil and their properties – Various textural classes in soil and their properties.

11. Particle size analysis –Stoke's Law – Assumptions and limitations – significance of soil texture.

Soil consistence – Consistence of wet and dry soils – Soil crusting – Soil plasticity
 Atterberg's plastic limits – Factors affecting plastic limits – Significance of soil consistence.

13. Soil structure – Classification – Types, classes and grades of soil structure – Importance of soil structure and its management.

14. Soil density – Bulk density and particle density – Factors affecting density parameters – Importance of bulk density of soil – Soil compaction – Iits importance – Calculation of porosity.

15. Soil strength and its importance – Soil colour – Components – Significance of soil colour.

16. Soil water – Forces of soil water retention – pF concept – Soil moisture characteristic curves – Importance of soil water.

17. Soil water potential - Components of water potentials - Soil moisture

constants – Field capacity, wilting coefficient, hygroscopic water and saturation – Available water and methods for determining soil moisture constants –Pressure plate and pressure membrane apparatus.

18. Soil water content – Soil water movement – Darcy's Law – Saturated, unsaturated and vapour flows – Infiltration, percolation and permeability – Distribution of water in profile in different soils – Soil drainage and its importance.
19. Soil temperature – Sources of heat – Heat capacity and conductivity – factors influencing soil temperature – Modification of soil thermal regimes – Measurement of soil temperature – Importance of soil temperature on crop growth –Management of soil temperature and importance.

20. Soil air – Compositions of atmospheric air and soil air – Gaseous exchange –Influence of soil air on plant growth, soil properties and nutrient availability – Measurement of oxygen diffusion rate – Measures to improve soil aeration. 21. Soil reaction, pH, soil acidity and alkalinity, buffering, effect of pH on nutrient availability.

22. Soil colloids – Definition – General properties – Shape, surface area, electrical charge, adsorption, flocculation, deflocculation, plasticity, cohesion, swelling, shrinkage, Tyndall effect and Brownian movement.

23. Secondary silicate clay minerals of different types – Kaolinite, illite, montmorillonite and chlorite – Properties – Allophones.

24. Origin of charge in organic and inorganic colloids – Negative and positive charges – Differences between organic and inorganic soil colloids.

25. Adsorption of ions – Types of ion exchange – Cation and anion exchange – Cation and anion exchange capacities of soil – Base saturation – Factors affecting ion

exchange capacity of soils – Importance of Cation Exchange Capacity (CEC) of soils – Calculation of base exchange capacity and exchangeable acidity.

26. Soil biology – Biomass – Flora and fauna – Their important characteristics – Role of beneficial organisms – Organic matter decomposition, mineralization and immobilization.

27. Nitrogen fixation, denitrification , solubilization of phosphorus and biological control of plant diseases – Promotion of plant growth promoting substances – Harmful

activities of soil organisms.

28. Soil organic matter – Various sources – Composition – Compounds in plant residues – Their decomposability – Humus – Definition – Synthesis of humus.
29. Soil organic matter and humus – Importance - Fractionation of soil humus – Carbon cycle – Carbon : nitrogen (C:N) ratio of commonly available organic residues – Significance of C:N ratio in soil fertility.

30. Soil classification – Early system of soil classification – Diagnostic horizons. 31. Soil taxonomy – Order, sub order, great group and family series – Nomenclature according to soil taxonomy.

32. Soil groups of India – Alluvial soils, black soils, red soils, laterite soils and coastal sands.

Practicals

1. Methods of chemical analysis, principles, techniques and calculations

2. Study of soil sampling tools, collection of representative soil sample, its Processing and storage.

3. Description of soil profile in the field.

4. Studies of capillary rise phenomenon of water in soil column and water movement in soil.

5. Determination of texture by feel method.

6. Determination of mechanical composition of soil using Bouyoucos Hydrometer.

7. Determination of bulk density and particle density of soil and porosity.

- 8. Determination of soil moisture content by gravimetric method.
- 9. Determination of infiltration rate.
- 10. Determination of soil strength by cone penetrometer.
- 11. Aggregate analysis by wet sieving method.
- 12. Determination of soil pH & EC of soil.
- 13. Determination of cation exchange capacity of soil.
- 14. Determination of soil colour & study of soil map.
- 15. Estimation of organic matter content in soil.
- 16. Determination of heat transfer in soils.

*18 ENG 101 COMPREHENSION AND COMMUNICATION SKILLS IN ENGLISH 2 (1 + 1)

Lecture outlines

Theory

1. War minus shooting – A lesson from the text book "The Sporting Spirit" by George Orwell - Comprehension pertaining to the textual grammar - Fill in the blanks, matching and vocabulary.

2. War Minus Shooting – A lesson from the text book, "The Sporting Spirit" by George Orwell - Comprehension pertaining to the textual grammar - Fill in the blanks, matching and vocabulary.

3. Synonyms- List of synonyms - Choose the synonyms - Exercises - Practice and implementation.

4. Antonyms – Fill in the blanks - Choose the correct antonyms - Exercises Practice and implementation.

5. Verbal ability – A list of words often confused and misused - Practice and implementation.

6. A Dilemma – A lesson from the text book, "Layman looks at Science" by Raymond - B. Fosdick - Comprehension pertaining to the textual Grammar - Fill in the blanks, matching, vocabulary and reading comprehension.

7. A Dilemma – A Layman looks at Science - Reading comprehension and answering the questions.

8. Homonynms - Homonyms are distinct words with quite different meanings using the words in two ways - More words at a glance and exercises related to GRE and TO EFL.

9. Homophones – A list of homophones - Fill in the blanks, underline the correct word and exercises related to GRE and TOEFL.

10. You and Your English – A lesson from the text book," A Spoken English and Broken English" by G. B. Shaw – Answering the questions related to the text - Fill in the blanks, matching and vocabulary and reading comprehension.

11. You and Your English – Reading comprehension and answering the questions.

12. Functional Grammar – Tenses - Active voice and passive voice - Degrees of comparison and types of sentences - Direct and indirect speech and agreementof verb with subject functional grammar – Articles – Prepositions - Parts of speech and agreement verb with subject - Glossary.

13 Business correspondence - Principles of letter – Writing - Courtesy and consideration - Directness and conciseness, avoid – Verbosity and participial endings - Clarity and precision - Negative and roundabout - Structure and layout of letters - Planning a letter quotations, orders, tenders, sales letters, claim and adjustment letters, job application letters - Social correspondence – Personal correspondence and *curriculum vitae*.

14 The style - Importance of professional writing - Choice of words and phrases, clichés - Jargons - Foreign words and phrases.

15. Precise writing- Summarizing – The essential features of a good precise – Important points while making a precise - Some don'ts - Make a precise of the following paragraph and suggest suitable title - Figurative language – Figurative language associated with literature and with poetry - The figures of speech usually used in writing and conversation.

16. Interviews – The screening interview- The informational interview- The directive style - The meandering style - The stress interview - The behavioural interview - The audition - The tag team interview - The meal time interview - The follow-up interview - Fermi interview - Preparing for the interview - Body language and interview - Types of interview questions - Idiomatic language.

Practical

1. Effective listening – Developing listening skills – Honing listening skills.

2. Listening to short talks and lectures from the cassettes of EFL University.

3. Spoken english – Vowels – Consonants - Monophthongs, diphthongs, triphthongs.

4. Stress – Intonation - Phonetic transcription.

5. Seminars – Conferences - Preparation and demonstration.

6. Oral presentation by students - Articulation and delivery – Evaluation sheet for oral presentation.

7. Communication skills – Verbal communication - Written communication.

8. Telephonic conversation.

9. Reading skills - Skimming, scanning - Extensive reading - Intensive reading and examples.

10. Meeting - Purpose, procedure, participation, physical arrangements.

11. Presentation of reports by using power point and L.C.D.

12. Interviews – Mock interviews

13. Debate and Group discussion.

14. Using a dictionary effectively.

15. Vocabulary.

16. Pronunciation practice.

*18 AGR 101 FUNDAMENTALS OF AGRONOMY

3(2+1)

Course outlines Theory

Agronomy and its scope; Seeds and sowing, tillage and tilth, crop density and geometry; Crop nutrition, manures and fertilizers, nutrient use efficiency; Water resources, soil plant water relationship, crop water requirement, water use efficiency; Irrigation, scheduling criteria, methods, quality of irrigation water and water logging. Weeds, importance, classification, crop weed competition, concepts of weed management, principles and methods; Herbicides, classification, selectivity, resistance, allelopathy; Growth and development of crops, factors affecting growth and development, plant ideotypes; Crop rotation and its principles; Adaptation and distribution of crops, crop management technologies in problematic areas; Harvesting and threshing of crops.

Practical

Identification of crops, seeds, fertilizers, pesticides and tillage implements; Effect of sowing depth on germination and seedling vigour; Identification of weeds in crops, methods of herbicide and fertilizer application; Study of yieldcontributing characters, yield estimation, seed germination and viability test; Numerical exercises on fertilizer requirement, plant population, herbicides and water requirement: Use of tillage implements, reversible plough, one way plough, harrow, leveler and seed drill; Study of soil moisture measuring devices, measurement of field capacity, bulk density and infiltration rate and measurement of irrigation water.

Lecture outlines

Theory

1 Agriculture - Agronomy and its scope- Role of Agronomists in resource management for crop production

2 Tillage and tilth - Objectives of tillage- Characteristics of ideal seed bed-Effect of tillage on soil properties

3 Types of tillage- Factors affecting tillage and seed bed preparation - After cultivation- Puddling.

4 Concepts of tillage – Minimum tillage, zero tillage, strip tillage, conservationtillage and their advantages and limitations.

5 Seeds and sowing- Characteristics of good quality of seed, seed treatment, agronomic significance of seed purity and quality - Methods of sowing, importance of time and depth of sowing.

6 Crop density and geometry - Crop stand establishment, factors affecting optimum stand establishment.

7 Plant population – Competition, types of competition, intra and inter plant competition - Effect of plant population on growth and yield,optimum plant density and planting pattern.

8 Soil fertility and soil productivity – Soil organic matter and its importance -Loss of soil fertility and its maintenance.

9 Crop nutrition – Essential plant nutrients- Primary, secondary and micro nutrients – Nutrient uptake – Nutrient use efficiency

10 Manures and fertilizers- Types of manures and fertilizers - Factors influencing methods and time of fertilizer application - Bio-fertilizers..

11 Irrigation - Importance of Irrigation - Objectives of irrigation - Methods of irrigation and water use efficiency

12 Crop growth and development - Factors affecting growth and development - Agronomic manipulation of crop growth and development.

13 Plant ideotypes – Concept, definition-Morphological and physiological characteristics of new plant types.

14 Cropping pattern, Cropping system (navadhanya concept) - Crop rotation – Principles of crop rotation - Mono cropping and its disadvantages – Types of cropping systems-Mixed, multiple, intercropping, relay and multistoried cropping

15 Crop adaptation and distribution in India and Andhra Pradesh - Factors influencing crop adaptation and distribution.

16 Common problems in crop production related to climate, soil, pest and disease incidence - Crop management technologies to overcome the problems identified.

17 Dryfarming, dryland farming and rainfed farming – Classification of climate – Problems of crop production in dry areas.

18 Soil moisture conservation and water harvesting measures – Watershed: Objectives and components – Watershed management

19 Weed –Definition – Importance- Harmful and beneficial effects of weeds – Aquatic weeds

20 Classification of weeds - Based on morphology, life cycle, habitat, origin, association and special features with examples

21 Propagation of weeds – Sexual – Asexual- Vegetative (Rhizomes, root stocks, runners, stolons, suckers, offsets, tubers, bulbs, bulbils, stems and roots)

22 Weed biology- Characteristic features of weeds, weed ecology – Persistence of weeds, climatic, edaphic and biotic factors.

23 Crop weed association – Factors affecting crop weed competition- Common weeds associated with major crops like rice, maize, wheat, sorghum, pulses, groundnut, sugarcane, cotton, and tobacco

24 Crop-weed-competition - Critical period of crop weed competition – Allelopathy.

25 Methods of weed management - Prevention, control and eradication – Physical, mechanical and cultural methods - Chemical and biological methods of weed control – Integrated weed management 26 Herbicides- Definition, advantages and limitations of herbicide usage in India.- Bioherbicides

27 Classification of herbicides based on chemical nature, time and method of application

28 Herbicidal formulations – active ingredient- Acid equivalent- Nomenclature of herbicides.

29 Adjuvants and their use in herbicide application –Types of adjuvants with examples.

30 Mode of action of herbicides - Important biochemical modes of action of herbicides (especially interfering with photosynthesis and respiration).

31 Selectivity and resistance- Selectivity of herbicides - Fundamental principles of selectivity- Differences in morphology and growth habit of plants – Differential absorption and translocation of herbicides.

32 Harvesting and threshing of crops - Maturity symptoms of major crops - Time and methods of harvesting - Threshing and winnowing, drying and post harvesting storage of grains -Harvest index and BC ratio.

Practical

1. Visit to college farm and identification of major crops and varieties

2. Practice of primary tillage implements and puddling

3. Practice of secondary tillage implements

4. Practice of seeding equipment , inter cultivation implements

5. Seed germination and viability test - Study of sowing depth on germination and seedlingvigour

6. Identification of manures, fertilizers and green manure crops/seeds.

7. Practice of manure and fertilizer application

8. Participation in ongoing field operations

9. Participation in ongoing field operations

10. Identification of weeds in field crops and other habitats

11. Study of weed flora in different weed management practices and calculation of herbicide efficiencies (WI & WCE)

12. Herbicide label information and computation of herbicide doses

13. Study of herbicide application equipment and calibration

14. Herbicide application and precautionary measures

15. Study of herbicide phytotoxicity symptoms in different crops

16. Identification of maturity symptoms of different crops

INTRODUCTORY BIOLOGY

*18 AGR 103 Course outlines Theory

Introduction to the living world. Diversity and characteristics of life,Origin of life, Evolution and Eugenics. Binomial nomenclature and classification, Cell and cell division. Morphology of flowing plants. Seed and seed germination. Plant systematic-viz; Brassicaceae, Fabaceae and Poaceae. Role of animals in agriculture.

Practical

Morphology off lowering plants - root, stem and leaf and their modifications. Inflorescence, flower and fruits. Cell. Tissues & cell division. Internal structure of root, stem and leaf. Study of specimens and slides. Description of plants-Brassicaceae, Fabaceae and Poaceae.

Lecture outlines

Theory

1. Introduction to living world - Properties of life or living things – Growth,

development and reproduction, regulation and homoeostasis - Diversity of Life – Major domains/ kingdoms of living beings – Bacteria (Eubacteria), Archaea (Archebacteria) and Eukarya (Protista, fungi, plantae, animalia) - Concepts of prokaryotes and eukaryotes, unicellular and multicellular organisms, plants and animals, sporophyte and gametophyte, monocots and dicots - Salient features, classification and alternation of generations of the plants of the following groups

 Algae, Bryophytes, Pteridophytes, Gymnosperms and Angiosperms -Evolutionary relationships and differences among different kingdoms, viruses, viroids, prions and lichens and their special features.

2. Origin of life – Theories of origin of life - Special creation, extra-terrestrial and spontaneous - Location of origin of life - Miller-Urey's experiment, Path of evolution of chemical molecules of living beings, theories of origin of cells – Endosymbiotic theory, Bubble theory.

3. Evolution and eugenics – Theories of evolution, eugenics - History, meanings and types.

 Nomenclature of living beings - Basics in biological classification, need for classification, importance of classification, nomenclature – Polynomial, binomial and trinomial systems of nomenclature - Rules of binomial nomenclature, hierarchy of classification.

5. Cells – Cell structure and organization of plants and animals - Cell theory and cell as the basic unit of life - Overview of the cell. Prokaryotic cells, ultra structure of plant cell (structure in detail and functions in brief) - Cellmembrane, cell wall, cell organelles - Morphology and function: Endoplasmic reticulum, mitochondria, plastids, ribosomes, golgi bodies, vacuoles, lysosomes, microbodies, centrosome and centriole, cilia, flagella, cytoskeleton and nucleus.

6. Chromosomes -Number, structural organization -Nucleosome.

7. Cell cycle, cell division - Somatic cell division or mitosis – Stages and phases
 - Reproductive cell division or meosis – Stages and phases and significance.

8. Morphology of flowering plants - Roots - Characters, types and modifications of roots, basic external and internal structural organization of root in monocots and dicots.

9. Morphology of flowering plants - Stems - Characters, functions and modification of stems - Basic external and internal structural organization of stem in monocots and dicots.

10. Morphology of flowering plants - Leaf - Parts, functions, types and modifications of leaves - Leaf venation and phyllotaxy.

11. Morphology of flowering plants - Inflorescence - types of inflorescences, types of racemose inflorescence, types of cymose inflorescence - Special types of inflorescences.

12. Morphology of flowering plants - Flower - Structure and parts of flower, types of flowers based on sex distribution, structural symmetry, position of gynoecium, aestivation - Description of types of calyx, corolla, stamens and ovary; Seed - Structure and organization of seed in monocots and dicots - Seed germination - Necessary conditions for germination.

13. Plant systematics – Brassicaceae - Distribution, important plants, economic importance, vegetative and floral characters, pollination, fruit and seed characters.

14. Plant systematics - Fabaceae - Distribution, important plants, economic importance, vegetative and floral characters, pollination, fruit and seed characters.

15. Plant systematics - Poaceae - Distribution, important plants, economic importance, vegetative and floral characters, pollination, fruit and seed characters.

16. Role of animals in agriculture–Animals of draught and milch, fur, wool, etc. - Different animal products used as manure.

Practical

1. External morphology of monocot roots - Rice and maize.

2. External morphology of dicot roots - Brassica and any legume.

3. External morphology of monocot stem - Rice and maize.

4. External morphology of dicot stem - Brassica and any legume.

5. External morphology of monocot leaf - Rice and maize.

6. External morphology of dicot leaf – Brassica and any legume.

7. Structure and organization of plant cell.

8. Study of different types of tissue systems - Parenchyma, collenchyma and sclerenchyma.

9. Study of mitosis through onion root tip cells.

- 10. Study of meiosis through onion anther cells.
- 11. Internal anatomy of monocot stems and roots Rice and maize.
- 12. Internal anatomy of dicot stems and roots Brassica and any legume.
- 13. Internal anatomy of ovary of monocots and dicots Any millet and legume.
- 14. Description of Brassicaceae with live specimens.
- 15. Description of Fabaceae with live specimens.
- 16. Description of Poaceae with live specimens.

AGRICULTURE HERITAGE

1(1+0)

Course outlines

Theory

Introduction of Indian agricultural heritage, status of farmers in society, advice by sages to kings on their duties towards farmers, soil management in ancient, medieval & pre-modern India and its relevance in modern day sustainable agriculture, heritage of crop & water management, plant growth and development & plant protection through vrikshayurveda and traditional knowledge. Heritage of medicinal plants and their relevance today, seed health in ancient & medieval history and its relevance to present day agriculture, description of Indian civilization and agriculture by travelers from China, Europe and United States, our journey in agriculture, green revolution and its impact and concerns, vision for the future.

Lectures outlines

Theory

1. Introduction to Indian agricultural heritage – Definition of heritage, agriculture heritage - Need to study agriculture heritage

 Genesis of agriculture and its chronological arrangement - Homes of evolution of agriculture and "old and new" world - Early indigenous domestications.

3. Status of farmers in society and specific role of women in ensuring food security- Farming systems in ancient periods.

4. Status of agriculture and advice by sages to kings on their duties towards farmers- Importance of farmers - Ancient agricultural practices and scientific basis.

5. Soil management in ancient, medieval, pre- modern India - Historical background - Soil management and its relevance in pre-modern India and modern day sustainable agriculture - Use of amendments - Land management, Piercing, tillage, puddling and pre-plant submergence, mulching, fallowing.

6. Soil concept - Ancient systems of soil classification - Ancient systems of soil management - Medieval and pre modern soil management.

7. Heritage of crop and water management – Ancient and pre-historic period; Medieval period.

8. Plant growth and development- Heritage of plant protection through vrikshayurveda and traditional Knowledge

9. Plant protection in ancient India - Plant disorders – Cause, symptoms, treatment materials.

10. Traditional knowledge in crop production and water management

11. Heritage of medicinal plants and their relevance today

12. Seed health in ancient and medieval history and its relevance to presentday agriculture-seed health in Hellenistic age – seed health in India – Materials recommended for seed treatments.

13. Description of Indian civilization and agriculture by travellers from China, Europe and USA.

14. Pre-historic cropping patterns.

15. Our journey in agriculture-Green revolution and its impact and concerns.

16. Vision for the future – Challenges ahead.

RURAL SOCIOLOGY AND EDUCATIONAL PSYCHOLOGY

2 (2+0)

Objective

This course will enable students to acquire knowledge on basics concepts related to rural sociology and educational psychology. Students will also learn the practical applications of important sociological and psychological concepts. **Theory**

UNIT I

Introduction to Sociology, Social groups, Culture and Social Values

Sociology and Rural Sociology – definitions; Society – rural and urban, characteristics, differences and relationships, important characteristics of Indian rural society; Social groups – definition, classification, role of social groups in extension; Culture – concept, cultural traits, characteristics, functions, Ethnocentrism, Acculturation, Cultural lag, Cultural diffusion, Marginal man, Ethos. Social Values – definition, values and norms, characteristics of values, functions;

UNIT II

Social Structure, Social Stratification and Migration

Structure of Rural Society – patterns of rural settlement, social institutions, social organizations, ecological entities (Region, Community, Neighbourhood, Family); Social Stratification – concept, functions, types, differences between class and caste system; Migration – concept, factors influencing migration.

UNIT III

Social Control, Social Customs

Social Control – definition; Customs – conventions, folkways, mores, rituals, taboos; Social Interaction Process – definition, basic social processes; Social Change – concept, factors influencing social change, indicators of social change; Social development:

UNIT IV

Introduction to Educational Psychology, Intelligence, Teaching-Learning Process;

Education – Psychology – Educational Psychology – Social Psychology – definitions, importance in extension; Basic principles of Human behaviour – Sensation, Attention, Cognitive, affective, psychomotor domain Perception – meaning, characteristics; Intelligence – concept, types, measurement, factors affecting intelligence; Personality – concept, types, measurement, factors influencing personality; Teaching–Learning Process – Teaching – definition, meaning, principles of teaching, steps in extension teaching; Learning – definition,

meaning, principles, types of learning, learning situation.

UNIT V

Motivation, Attitude

Motivation – concept, Maslow's hierarchy of needs, intrinsic and extrinsic motivation, techniques of motivation, importance in extension; Attitude – concept, factors influencing the development of attitudes.

Theory Schedule

- 1. Sociology and Rural Sociology Definitions, nature of rural sociology,
- 2. Importance of rural sociology in extension education.
- 3 Society rural and urban, characteristics, differences and relationship, important characteristics of Indian rural society;
- 4.. Social Groups definitions, classification, role of social groups in extension.
- 5. Culture concept, cultural traits, characteristics, functions,
- 6.. Ethnocentrism, Acculturation, Cultural lag, Cultural diffusion, Marginal man, Ethos.
- 7. Structure of Rural Society patterns of rural settlement,
- 8. Social institutions, Social organizations and ecological entities Region, Community, Neighbourhood, and Family.
- 9. Social Stratification concept, functions, types, differences between class and caste system;
- 10. Social Values definition, values and norms, characteristics of values, functions.
- 11. Migration concept, factors influencing migration.
- 12. Social Control definition;
- 13. Customs conventions, folkways, mores, rituals, taboos;
- 14. Social Interaction Process definition, basic social processes.
- 15. Social Change concept, theories, factors and indicators of social change.
- 16. Social development
- 17. Mid semester Examination.
- 18. Education Psychology Educational Psychology –definitions, importance
- 19. in extension.Social Psychology Definitions, importance in extension.
- 20. Basic principles of Human behaviour –
- 21. Cognitive, affective, psychomotor domain
- 22. Perception meaning, characteristics.
- 23. Sensation, Attention
- 24. Intelligence concept, types,
- 25. Intelligence measurement, factors affecting intelligence;
- 26 Personality concept, types,
- 27. Personality measurement- factors influencing personality Teaching-
- 28. Learning Process Teaching definition, meaning, Principles of
- 29. teaching, steps in extension teaching.
- 30. Learning definition, meaning, principles,

- 31. Types of learning, learning situation.
- 32 Motivation concept, Maslow's hierarchy of needs (including selfless-service), intrinsic and extrinsic motivation,
- 33. Techniques of motivation, importance of motivation in extension.
- 34. Attitude concept, factors influencing the development of attitudes.

HUMAN VALUES AND ETHICS

1 (1+0)

Course outlines

Theory

Universal human aspirations: Happiness and prosperity; Human values and ethics: Concept, definition, significance and sources; Fundamental values: Right conduct, peace, truth, love and non-violence; Principles and Philosophy. Self Exploration. Self Awareness. Self Satisfaction. Decision Making. Motivation. Sensitivity. Success. Selfless Service. Case Study of Ethical Lives. Positive Spirit. Body, Mind and Soul. Attachment and Detachment. Spirituality Quotient. Examination.

Ethics: professional, environmental, ICT; Sensitization towards others particularly senior citizens, developmentally challenged and gender.

Spirituality, positive attitude and scientific temper; Team work and volunteering; Rights and responsibilities; Road safety; Human relations and family harmony; Modern challenges and value conflict: Sensitization against drug abuse and other social evils; Developing personal code of conduct (SWOT Analysis); Management of anger and stress.

Lecture outlines

Theory

1. Universal human aspirations, happiness and prosperity

2. Human values and ethics - Concept, definition, significance and sources -

Fundamental values - Right conduct, peace, truth, love and non-violence.

3. Principles and philosophy – Self exploration, self awareness, self satisfaction,

decision making, motivation, sensitivity, success, selfless service.

4. Case study of ethical lives.

5. Positive spirit, body, mind and soul - Attachment and detachment.

6. Spirituality and spirituality quotient.

7. Examinations.

8. Ethics - Professional, environmental, ICT - Sensitization towards others particularly senior citizens, developmentally challenged and gender.

9. Positive attitude and scientific temper.

10. Team work and volunteering.

11. Rights and responsibilities.

12. Road safety.

13. Human relations and family harmony, modern challenges and value conflict.

14. Sensitization against drug abuse and other social evils.

15. Developing personal code of conduct (SWOT/SWOC/SNAC Analysis).

16. Management of anger and stress.

*18 NCC/NSS 101 NSS/NCC/PHYSICAL EDUCATION & YOGA PRACTICES 2 (0+2)

Course outlines

Introduction and basic components of NSS, NSS programmes and activities, Understanding youth, Community mobilization, Social harmony and national integration, Volunteerism and shramdan, Citizenship, constitution and human rights, Family and society, Importance and role of youth leadership, Life competencies, Youth development programmes, Health, hygiene and sanitation, Youth health, lifestyle, HIV AIDS and first aid, Youth and yoga, Vocational skill development, Issues related environment, Disaster management, Entrepreneurship development, Formulation of production oriented project, Documentation and data reporting, Resource mobilization, Additional life skills, Activities directed by the Central and State Government

Lecture outlines

1 Introduction and basic components of NSS – Orientation - History, objectives, principles, symbol, badge; regular programmes under NSS, organizational structure of NSS, code of conduct for NSS volunteers, points to be considered by NSS volunteers awareness about health 2 NSS programmes and activities - Concept of regular activities, special camping,

day camps, basis of adoption of village/slums, conducting survey, analysing guiding financial patterns of scheme, youth programme/ schemes of GOI, coordination with different agencies and maintenance of diary

3 Understanding youth - Definition, profile, profile, categories, issues and challenges of youth; and opportunities for youth who is agent of the social change 4 Community mobilization -Mapping of community stakeholders, designing the message as per problems and their culture; identifying methods of mobilization involving youth-adult partnership

5 Social harmony and national integration - Indian history and culture, role of youth in nation building, conflict resolution and peace-building

6 Volunteerism and shramdan - Indian tradition of volunteerism, its need, importance, motivation and constraints; shramdan as part of volunteerism

7 Citizenship, constitution and human rights - Basic features of constitution of India, fundamental rights and duties, human rights, consumer awareness and rights and rights to information

8 Family and society - Concept of family, community (PRIs and other community based organisations) and society

9 Importance and role of youth leadership - Meaning, types and traits of leadership, qualities of good leaders; importance and roles of youth leadership

10 Life competencies - Definition and importance of life competencies, problemsolving and decision-making, inter personal communication

11 Youth development programmes - Development of youth programmes and policy at the national level, state level and voluntary sector; youth-focused and youthled organstions

12 & Health, hygiene and sanitation - Definition needs and scope of health education;

13 role of food, nutrition, safe drinking water, water born diseases and sanitation (Swachh Bharat Abhiyan) for health; national health programmes and reproductive health

14 Youth health, lifestyle, HIV AIDS and first aid - Healthy lifestyles, HIV AIDS, drugs and substance abuse, home nursing and first aid

15 & Youth and yoga - History, philosophy, concept, myths and misconceptions about

16 yoga; yoga traditions and its impacts, yoga as a tool for healthy lifestyle, preventive and curative method

17 & Vocational skill development - To enhance the employment potential and to set

18 up small business enterprises skills of volunteers, a list of 12 to 15 vocational skills will be drawn up based on the local conditions and opportunities. Each volunteer will have the option to select two skill-areas out of this list

19 Issues related environment - Environmental conservation, enrichment and sustainability, climatic change, natural resource management (rain water harvesting, energy conservation, forestation, waste land development and soil conservations) and waste management

20 & Disaster management - Introduction and classification of disaster, rehabilitation

21 and management after disaster; role of NSS volunteers in disaster management.

22 Entrepreneurship development - Definition, meaning and quality of entrepreneur; steps in opening of an enterprise and role of financial and support service institution

23 Formulation of production oriented project - Planning, implementation, management and impact assessment of project

24 Documentation and data reporting - Collection and analysis of data, documentation and dissemination of project reports

25 & Youth and crime - Sociological and psychological factors influencing youth crime,

26 cyber crime, pear mentoring in preventing crime and awareness for juvenilejustice

27 & Civil/self defence - Civil defence services, aims and objectives of civil defence;

28 needs and training of self defence

29 & Resource mobilisation - Writing a project proposal of self fund units (SFUs) and its

30 establishment

31 & Additional life skills - Positive thinking, self confidence and esteem, setting life

32 goals and working to achieve them, management of stress including time management.

*18 GPB 102 FUNDAMENTALS OF GENETICS Course outlines

Theory

Pre-Mendelian concepts of heredity; Mendelian principles of heredity; Cell division – mitosis and meiosis; Probability and Chi-square; Dominance hypothesis; Gene Multiple factor relationships; interaction; Epistatic interactions with examples; Multiple alleles; Linkage and its estimation; over mechanisms; Chromosome mapping; Crossing Pleiotropism and Pseudoalleles; Sex determination and sex linkage; sex limited and sex influenced traits; Structural changes in chromosome; Mutation- classification, mutagenic agents and methods of inducing mutation and ClB technique. Oualitative & quantitative traits: Polygenes and continuous variations; Cytoplasmic inheritance; Gene concept: Gene structure, function and regulation (eg. Lac operon); Nature, structure & replication of genetic material; Protein synthesis- Transcription and translational mechanisms of genetic material.

Practical

Study of microscope; Study of cell structure; Experiments on monohybrid, dihybrid, trihybrid, test cross and back cross; Experiments on epistatic interactions including test cross and back cross; Practice on mitotic and meiotic cell division; Experiments on probability and Chi-square test; Determination of linkage and cross over analysis (through two point test cross and three point test cross data); Study of models on DNA and RNA structure.

Lecture outlines

Theory

1. Pre Mendelian concepts of heredity – Early history of heredity, inheritance of acquired traits, preformation theory, pangenesis and germplasm theory.

2. Chromosome - Structure of chromosome, types of chromosomes based on position of centromere.

3. Cell division – Cell cycle – Mitosis - Process of mitosis - Significance.

4. Meiosis - Process - Differences between mitosis and meiosis - Significance.

 Mendelian principles of heredity – Terminology, Mendel's experiments – Reasons for selection of pea as experimental material- characters studied - Reasons for mendel's success.

 Mendel's laws – Law of segregation – Law of independent assortment – Principle of dominance – Principle of unit characters – Exceptions to mendel's laws – Rediscovery of mendelian principles.

7. Probability and Chi-square – Concept of probability, predicting results of a monohybrid cross, predicting results of a dihybrid cross - Chi-square test.

8. Dominance relationships – Complete dominance, incomplete dominance, codominance, over dominance, pseudodomiance, lethal factors.

9. Gene interaction - Nonepistatic interaction – Interaction of factors; epistatic interactions – Complementary epistasis, dominant epistasis.

10. Recessive epistasis, duplicate dominant gene action, dominant suppression or inhibitory gene action, duplicate genes with cumulative effect.

11. Multiple alleles – Characteristics of multiple alleles - Blood groups in humans, coat colour in rabbits, self incompatibility alleles in plants - pleiotropism, penetrance and expressivity.

12. Linkage – Definition – Classification of linkage – Characteristic features of linkage – Linkage groups.

13. Detection of linkage – Estimation of linkage - Importance of test cross in linkage studies - significance in plant breeding.

14. Crossing over mechanisms - Mechanism of crossing over – Types of crossing over – Factors affecting crossing over.

15. Significance of crossing over in plant breeding - Cytological proof of crossing over in *Drosophila*.

16. Chromosome mapping - 2-point and 3-point test cross – Cytological maps and genetical maps – Coincidence and interference.

17. Sex determination – Various mechanisms of sex determination – Chromosomal sex determination, genic balance mechanism of sex determination in *Drosophila melanogaster*, male haploidy, single gene effects etc.

18. Sex linkage – White eye colour in *Drosophila*, colour blindness and haemophilia in humans - sex influenced traits – Horns in sheep, baldness in humans, sex limited - Milk production in cattle, beard in man – Pseudohermaphrodites – Gynandromorphs.

19. Qualitative and Quantitative traits, Polygenes and continuous variations – Definition - Inheritance and their differences, multiple factor hypothesis.

20. Cytoplasmic inheritance – Definition – Chloroplast inheritance (leaf variegation in *Mirabilis jalapa)* - mitochondrial inheritance (cytoplasmic male sterility in maize) - Characteristic features of cytoplasmic inheritance - Differences between chromosomal and extrachromosomal inheritance.

21. Nature and structure of genetic material - DNA and its structure -Watson and Crick's model - Function – Experiments to prove DNA as genetic material.

22. Replication of DNA - Modes of DNA replication - Semi-conservative DNA replication - Experimental proof.

23. -Types of RNA - Messenger RNA, ribosomal RNA and transfer RNA - structure of tRNA, dfferences between DNA and RNA.

24. Protein synthesis – Central dogma, tanscription and translational mechanism of genetic material - Genetic code – Properties of genetic code – Wobble hypothesis.

25. Steps in protein synthesis - Transcription and translation.

26. Gene regulation - Lac operon concept – Gene concept – Cistron – Recon – Muton.
27. Mutation - Classification - Gene mutations - Introduction - Definition - Types of mutations - Spontaneous and induced mutations - Point mutations - Characters of mutations - Xenia and metaxenia – Chimeras Types and their significance in plant breeding.

28. Methods of inducing mutations, Physical and chemical mutagens -Detection of sex linked lethals in *Drosophila* (ClB method given by Muller). 29. Molecular basis of mutations - Transitions, transversions and frame shift mutations - Importance of mutations in plant breeding.

30. Structural changes in chromosome - Breakage - fusion - bridge cycle –
Deletions (deficiency) - Duplications and their significance in plant breeding.
31. Inversions - pericentric inversions and paracentric inversions - inversions as cross over suppressors.

32. Translocations - simple and reciprocal - their role in plant breeding.

Practical

- 1. Study of microscope.
- 2. Study of cell structure.
- 3. Practice on mitotic cell division.
- 4. Practice on meiotic cell division.
- 5. Practice on meiotic cell division.
- 6. Probability and Chi-square test.
- 7. Monohybrid and its modifications.
- 8. Dihybrid.
- 9. Trihybrid.
- 10. Test cross and back cross.
- 11. Epistatic interactions including test cross and back cross.
- 12. Epistatic interactions including test cross and back cross.

13. Epistatic interactions including test cross and back cross.

14. Determination of linkage and cross over analysis (through two point test cross data).

15. Determination of linkage and cross over analysis (through three point test cross data).

16. Study of models on DNA and RNA structure.

*18 AGM 101 AGRICULTURAL MICROBIOLOGY 2(1+1) Course outlines

Theory

Introduction- Scope of microbiology & brief history of microbiology. Microbial world- Prokaryotic and eukaryotic microbes and their differences, Bacteria-Detailed cell structure of bacteria, Microbial Nutrition-Autotrophychemoautotrophy, photo autotrophy, heterotrophy.Growth-Phases in bacterial diauxic Growth. growth, synchronous and Bacterial genetics-Genetic recombinationtransformation, conjugation and transduction, plasmids, transposon. Role of microbes in soil fertility and crop production: Carbon cycle. Phosphorus and Sulphur cycles. **Biological** Nitrogen, nitrogen fixationsymbiotic, associative and asymbiotic. Azolla, blue green algae, Actinorrhizal symbiosis- Frankia. Phosphorus solubilizing microrganisms and mycorrhiza. Rhizosphere and phyllosphere. PGPRmicroorganisms. Microbes in human welfare, Types of Fermentation and Fermentation technology, Biofertilizers and silage production technology, Biopesticides-Mode of action, types of biopesticides, Biofuel production and biodegradation-Gobar gas and composting technology.

Practical

Introduction to microbiology laboratory and its equipments, Microscope- Parts, principles of microscopy, resolving power and numerical aperture, Micrometry-Measurement of size of microorganisms, Methods of sterilization, Bacterial Staining procedures-Simple staining, Gram's staining and Endospore staining, Nutritional media and their preparations, Enumeration of microbial population in soil- bacteria, fungi and actinomycetes. Methods of isolation, purificationand maintenance of microbial cultures. Isolation of *Rhizobium* from legume root nodule. Isolation Azotobacter. Isolation of of Phosphate solubilisingbacteria/Phosphate solubilizing fungi. PSB/PSF. Isolation of Azospirillum from roots. Staining and microscopic examination of biofertilizer organisms. Isolation of VAM from soil by wet sieving and decantation Technique. Determination of VAM root colonization by staining the infected roots.

Lecture outlines

Theory

 Introduction- Definition- The hidden world of microbiology- How microbes evolved on earth- General classification of microbes-Microorganisms and principles of microbiology- Scope of microbiology. Brief History of microbiology
 Spontaneous generation theory- Contributions of Antony Van Leeuwenhoek-Francesco Redi- Lazzaro Spallanzani- Franz Schulze- Schroder and Von Dusch- Louis Pasteur- John Tyndall. 2. Role of microbes in fermentation-Contributions of Cagnaird Latour-Theodor Schwann, F.Kutzing- Louis Pasteur - Germ theory of disease - Contribution of Hippocrates-Louis Pasteur- Robert Koch - Pure Culture Methods- Joseph Lister-Robert Koch- Beijerinck-Winogradsky- Francois Appert- Schroder and Von Dush- John Tyndall.

3. Protection against infection-Contributions of Edward Jenner- F. Loeffler-Behirng- Kitasasto- Louis Pasteur - Applied aspects of Microbiology- Agricultural microbiology-Industrial microbiology-Food Microbiology - Medical microbiology – Water Microbiology - Geochemical Microbiology- Pollution microbiology – Air microbiology – Exo-Microbiology - Microbial biotechnology.

4. Morphological types of Bacteria , Bacteria cell Structure- External and internal cell structures- Differences between Prokaryotes and Eukaryotes.

5. Microbial Nutrition- Autotrophy - Chemoautotrophy- Photoautotrophy

6. Heterotrophy – Metabolic pathways-Glycolysis-HMP-ED-TCA cycle.

7. Growth of Microorganisms - Cell Division - Growth cycle of bacteria [Lag phase, Log phase, Stationary and Death phase]- Generation time- Growth rate-Growth yield- Synchronous - Diauxic growth.

8. Bacterial genetics- Genetic recombination- Transformation- Conjugation-Transduction- Plasmids- Transposon.

9. Role of microbes in fertility of soils and plant growth - Rhizosphere- Rhizoplane-Phyllosphere- Phylloplane - Microflora- Carbon cycle- Carbon dioxide fixation.

10. Nitrogen cycle - Mineralisation- Immobilisation- Nitrification Denitrification- Nitrogen Fixation - Phosphorus cycle, phosphorus solubilisation
 - Oxidation - Reduction - Sulphur cycle-Oxidation and reduction.

11. Biological nitrogen fixation - Symbiotic- Associative- Asymbiotic- Nitrogen fixation In *Azolla - Blue green algae -* Actinorhizal symbiosis - *Frankia*, Phosphate solubilizing microorganisms - *Bacillus - Pseudomonas- Mycorrhiza* for Phosphorous uptake.

12. PGPR Organisms - *Bacillus – Pseudomonas – Azotobacter – Azospirillum – Rhizobium* -Microbes in human welfare.

13. Types of fermentations - Batch - Batch fed- Continuous - Solid State Fermentations, Common microbial fermentations-Alcohol- Lactic acid- Butyric acid- Formic acid - Butanediol- Propionic Acid- Mixed Acid - Fermentation technology- Alcoholic beverages production.

14. Biofertilizers (Bacterial-Cyanobacterial-Fungal) production technology-Silage Production Technology.

15. Biopesticides- Viruses (*Nucleo polyhedrosis virus - Granular viruses*) – Bacteria (*Bacillus thuringiensis, Bacillus papilliae*) - fungi (*Beauveria - Verticillium*) – Protozoa (*Malameba locustae-Mattesia Spp*)-Mode of action.

16. Biofuel Production- Biodegradation - Biogas, Biomanures and Composting Technologies.

Practical

1. Introduction to microbiology laboratory and its equipments.

2. Microscope- Parts, principles of microscopy, resolving power and numerical aperture.

3. Micrometry-Measurement of size of microorganisms.

4. Methods of sterilization.

5. Bacterial staining procedures-Simple staining - Gram's staining and Endospore staining.

6. Nutritional media and their preparations.

7 & 8. Enumeration of microbial population in soil- Bacteria, fungi and actinomycetes.

9 Methods of isolation, purification and maintenance of microbial cultures.

10 Isolation of Rhizobium from legume root nodule.

11 Isolation of Azotobacter.

12 Isolation of phosphate solubilising bacteria/Phosphate solubilizing fungi PSB/ PSF.

13 Isolation of Azospirillum from roots.

14 Staining and microscopic examination of biofertilizer organisms.

15 Isolation of VAM from soil by wet sieving and decantation technique.

16 Determination of VAM root colonization by staining the infected roots.

*18 SWE 101 SOIL AND WATER CONSERVATION ENGINEERING 2(1+1) Course outlines

Theory

Introduction to soil and water conservation - Causes of soil erosion – Definition and agents of soil erosion - Water erosion - Forms of water erosion - Gully classification and control measures - Soil loss estimation by Universal Soil Loss Equation - Soil loss measurement techniques - Principles of erosion control -Introduction to contouring - Strip cropping - Contour bund - Graded bund and bench terracing - Grassed water ways and their design - Water harvesting and its techniques - Wind erosion - Mechanics of wind erosion - Types of soil movement - Principles of wind erosion control and its control measures. Introduction to irrigation - Irrigation project classification - Methods of microirrigation - Importance of irrigation water measurements – Volumetric area velocity - Discharge methods - Weirs – Orifice – Flumes - Types of wells - Water lifting devices - Classification of pumps – capacity – Power - Dischargecalculations -Open channel hydraulics - Discharge calculations - Underground pipeline systems – Functional components of micro irrigation systems and its design like drip -Sprinkler etc. – Water harvesting - Lining of ponds – Tanks - Canals.

Practical

General status of soil conservation in India - Calculation of erosion index – Estimation of soil loss - Measurement of soil loss - Preparation of contour maps - Design of grassed water ways -Design of contour bunds - Design of graded bunds - Design of bench terracing system - Problem on wind erosion - Discharge measurements - Irrigation pumps - Different pumps and structural differences -Design of farm ponds - Lining of ponds - Irrigation tank - Water management.

Lecture outlines

Theory

1. Introduction to soil and water conservation and causes of soil erosion.

Definition and agents of soil erosion, water erosion - Forms of water erosion
 Gully classification and control measures.

3. Soil loss estimation by universal soil loss equation - Soil loss measurement techniques.

4. Principles of erosion control - Introduction to contouring, strip cropping.

- 5. Contour bund Graded bund and bench terracing.
- 6. Grassed water ways and their design.
- 7. Wind erosion Mechanics of wind erosion, types of soil movement -

Principles of wind erosion control and its control measures.

8. Introduction to irrigation - Classification of irrigation projects.

9. Importance of irrigation water measurements - Volumetric, area velocity, discharge methods - Weirs, orifice, flumes.

10. Open channel hydraulics - Discharge calculations.

11&12. Types of wells - Water lifting devices - Classification of pumps, their capacity, power requirement and discharge calculations.

13. Functional components and working principle of underground pipeline systems.

14&15. Functional components of micro irrigation systems and its design like drip, sprinkler irrigation systems etc.

16. Water harvesting techniques - Lining of ponds, tanks and canal systems. **Practical**

1. Practicing survey - Principles and educating to use pacing technique for measurement.

2&3. Area calculations through chain survey - GPS demo for tracking and area measurement.

4. Estimation of soil loss and calculation of erosion index.

5. Leveling concepts and practical utility in agriculture.

6. Preparation of contour maps.

7. Concept of vegetative water ways and design of grassed water ways.

8. Construction of contour and graded bunds.

9. Wind erosion and estimation process.

10&11. Water discharge measurements lab exercises for computing discharge.

12&13. Different irrigation pumps and their constructional differences.

14. Farm pond construction and its design aspects.

15. Farm pond and canal lining and its procedures.

16. Visit to nearby farm pond.

*18 CRP 101 FUNDAMENTALS OF CROP PHYSIOLOGY 2(1+1)

Course outlines Theory

Introduction to crop physiology and its importance in Agriculture; Plant cell: an Overview; seed physiology: seed structures, seed development seed viability and vigour, Physiological maturity, seed germination. Physiological aspects of growth and development: Growth analysis. Diffusion and osmosis; Absorption of water, transpiration and Stomatal complex; Mineral nutrition of Plants: Functions and deficiency symptoms of nutrients, nutrient uptake mechanisms; assimilation of mineral nutrients: nitrate, ammonium, Biological nitrogen fixation. Photosynthesis: Light and Dark reactions, C3, C4 and CAM plants; Respiration: energy balance, significance, OPPP pathway. Lipids: Biosynthesis and functions of lipids, significance in plant metabolism; Physiology of flowering: Photoperiodism, importance classification of plants based on photoperiodism, biological clock. Phytochrome, vernalization importance. Plant growth regulators: Biosynthesis, Mode of action, Physiological roles and commercial uses in agriculture.

Senescence and Abscission: definition, types, changes that occur during senescence, abscission versus senescence. Post harvest physiology: dormancy, fruit ripening, physiology of cut flowers.

Practical

Solutions- Preparation, Seed vigor and viability tests, optimum conditions for seed germination, leaf area measurement, Growth analysis, Measurement of water status in plants, Measurement of water potential, Measurement of Stomatal frequency and index photosynthetic pigments- Absorption spectrum , Leaf anatomy of C3 and C4 plants, Measurement of photosynthesis – Hill's reaction, Measurement of photosynthesis by IRGA, Effect of plant growth regulators on plant growth. Diagnosis of nutrient deficiency symptoms in crops, Yield analysis

Lecture outlines

Theory

1. Introduction to Crop Physiology and its importance in Agriculture.

2 & 3. Plant cell - The endomembrane system - Plasma membrane, endoplasmic reticulum, nuclear envelope, golgi apparatus, vacuole and endosomes - Structure and functional characteristics - Plastids, mitochondria, oil bodies, peroxisomes and glyoxysomes - Structure and functions.

4 & 5. Metabolic changes during seed development - Seed viability and seed vigor - Tests of viability and vigor - Physiological maturity, harvestable maturity

- Indices of physiological maturity in crops - Seed germination - Metabolic changes during seed germination.

6. Growth and Development - Definition - Growth analysis - Growth parameters - Definitions and mathematical formulae

7, 8 & 9. Absorption of water - Diffusion and osmosis - water potential and its components - Importance of water potential – Active and passive uptake of water – Stomatal complex – Transpiration – Water use efficiency – Water use efficiency of C3, C4 and CAM plants – Water requirement / Transpiration ratio – Factors affecting WUE.

10 to 13. Mineral nutrition of plants – Essential mineral elements – Criteria of essentiality of mineral elements – Mengel's classification of mineral nutrients – Nutrient uptake mechanisms - Functional roles of N, P, K, S Ca and Mg – Functional roles of Fe, Mn, Cu, Zn, B, Mo, Cl, Na, Co and Si –Deficiency symptoms of macro and micro nutrients.

14 & 15. Assimilation of mineral nutrients – Nitrate assimilation – Ammonium assimilation in plants – Biological nitrogen fixation – Free-living and symbiotic bacteria – Nodule formation – Nitrogenase enzyme complex.

16 to 19. Photosynthesis – Reactions of photosynthesis – Energy synthesis – Principle of light absorption by plants – Light reactions - Cyclic and non cyclic photophosphorylation – CO2 fixation – C3 and C4 pathways – Significance of C4 pathway – CAM pathway and its significance – Photorespiration and its significance – Photosynthetic efficiency of C3, C4 and CAM plants – Factors affecting photosynthesis (light, CO2, temp and water stress) - Relationship of photosynthesis and crop productivity.

20. Respiration – Energy balance – Significance of respiration – Oxidative Pentose Phosphate Pathway (OPPP) and its significance – Growth respiration and maintenance respiration – Alternate respiration – Salt respiration – Wound respiration.

21. Lipid metabolism – Biosynthesis of fatty acids in plastids – Functions of lipids - Significance of lipids in plant metabolism.

22 & 23. Physiology of flowering – Photoperiosism and flowering – Importance of photoperiodism – Classification of plants based on photoperiodic responses – Perception of photoperiodic stimulus – Biological clock – Phytochrome – Flowering hormones – Vernalization and flowering – importance of vernalization in agriculture.

24 to 29. Plant growth regulators – Auxins – Occurrence, transport, biosynthesis, mode of action and physiological roles – Commercial uses.– Gibberellins – occurrence, transport, biosynthesis, mode of action and physiological roles – Commercial uses – Cytokinins – Occurrence, transport, biosynthesis, mode of action and physiological roles – commercial uses – ABA – Occurrence, transport, biosynthesis, mode of action and physiological roles – Commercial uses – Ethylene – Ocurrence, transport, biosynthesis, mode ofaction and physiological roles – Commercial uses.

30. Senescence and abscission – Definition – Classification of senescence – Physiological and biochemical changes that occur during senescence -

Prevention of leaf and flower senescence – Abscission and its relationship with senescence.

31 & 32. Post harvest physiology – Dormancy – Types of dormancy – Advantages and disadvantages of dormancy - Causes of dormancy – Remedial measures for breaking seed dormancy - Fruit ripening - Climacteric and non climacteric fruits – Metabolic changes during fruit ripening - Hormonal regulation of fruit ripening – Ripening induction and ripening inhibition – Useof hormones in increasing vase life of flowers.

*18 AEC 101 FUNDAMENTALS OF ECONOMICS

2(2+0)

Course outlines

Theory

Economics: Economic activity and economy-Economics- Meaning, scope and subject matter, definitions, Approaches to economic analysis; micro and macro economics, positive and normative analysis. Nature of economic theoryrationality assumption, economic laws as generalization of human behavior. Basic concepts: scarcity, choice and decision making Goods and services, wants, demand, utility, cost and price, wealth, capital, income, investment, welfare, efficiency ,equilibrium, and firm. Demand: meaning, law of demand, demand schedule and demand curve, determinants, utility theory; law of diminishing marginal utility, Equi-marginal utility principle. Indifference curve analysis, Consumer's equilibrium and derivation of demand curve, concept of consumer surplus. Elasticity of demand: concept and measurement of price elasticity. cross elasticity. Production: Production process, income elasticity and creation of utility, factors of production, input - output relationship. Laws of returns. Cost: Production costs, Supply: meaning, law of supply, supply schedule, supply curve, determinants of supply, elasticity of supply and its measurement

Market structure: meaning and types of market, basic features of perfectly competitive and imperfect markets. Price determination under perfect competition; equilibrium price. Market dynamics- changes in demand and supply and prices. Distribution theory: meaning, factor market and pricing of factors of production. Concepts of rent, wage interest and profit.

Public Finance/Public policy: meaning importance, Public revenue and public expenditure and their importance. Sources of public revenue, Taxes: meaning, direct and indirect taxes, agricultural taxation, VAT and GST. National income: Meaning and importance, circular flow in the economy, concepts of national income accounting and approaches to measurement, difficulties in measurement. Trends in contribution of different sectors' to GDP .Indian economy in the globalised economy.

Population: Economic importance, Malthusian population theory, technological transition and economic growth, natural and socio-economic determinants, demographic transition in India, population growth, Money, Banking and Credit: Evolution, meaning and functions of money, classification of money, flows of money in the economy, money supply, general price index, inflation and deflation. Banking: Role in modern economy, borrowing and lending,functions of commercial and central bank, credit ; meaning , role of credit in modern economy ,credit policy.

Economic systems: Concepts of economy and its functions, important features of capitalistic, socialistic and mixed economies, elements of economic planning.

Lecture outlines Theory

1. Introduction to Economics– Economic activity and concept of economy and its functions, basic economic problems, three main economic actors- households, firms, governments as basic decision making units.

2. Economics - Meaning, definitions, its importance as a subject to science students.

3. Scope of study of economics as a science -Subject matter of economics – Traditional approach – Consumption, production, exchange, distribution and public finance/ public policy - Modern Approach – Microeconomics and macroeconomics.

4. Methods of economic investigation – Deduction and induction approaches, positive and normative analysis - Nature of economic theory - Rationality assumption, economic laws as generalization of human behavior.

5. Basic concepts: goods and services - Characteristics and classification, scarcity, choice, decision making, wants, substitutes and complements - Utility – Cardinal and ordinal approaches, forms of utility, marginal utility.

6. Cost and price, value and wealth and their characteristics, capital, income, investment, welfare, efficiency, equilibrium and firm.

7. Demand - Meaning, law of demand, demand schedule and demand curve characteristics, determinants, types of demand - Income demand, price demand, cross demand - Product demand, firm demand, market demand.

8. Market dynamics due to changes/ shifts in demand and prices - Contraction and extension, increase and decrease in demand.

9. Law of diminishing marginal utility – Statement, assumptions of law, explanation, limitations of the law - Importance and applications.

10. Law of equi-marginal utility – Meaning, assumptions, explanation of the law - Practical importance and applications, limitations.

11. Consumer's surplus – Meaning, assumptions, explanation with examples, difficulties in measuring, consumer's surplus - Importance and applications -Engels law of family expenditure.

12. Indifference curve analysis - Indifference curves - Meaning, basic assumptions, properties and their importance in economics.

13. Budget line and its properties - Consumer's equilibrium - Graphical and algebraic expressions and its importance.

14. Elasticity of demand – Meaning, elastic and inelastic demand, measurement of elasticity of demand - Types of elasticity of demand - Price elasticity, income elasticity and cross elasticity of demand.

15. Kinds of elasticity of demand - Perfectly elastic, perfectly inelastic, relatively elastic, relatively inelastic, unitary elastic demand - Factors affecting elasticity of demand, practical importance of elasticity of demand.

16. Production - Meaning of production process, creation of utility, factors of production and input - output relationship and production function – Meaning.

17. Laws of returns - Increasing, decreasing and constant laws of returns - Meaning and explanation with examples.

18. Cost - Seven production costs - Meaning and formulas, cost and output relationships - Short run and long run cost curves.

19. Supply – Meaning, definition, law of supply, supply schedule, supply curve and properties, determinants of supply - Market dynamics due to changes/ shifts in supply and prices - Increase and decrease in supply, contraction and extension of supply.

20. Elasticity of supply and its measurement - Kinds of elasticity of supply – Perfectly elastic, perfectly inelastic, relatively elastic, relatively inelastic and unitary elastic - Factors affecting elasticity of supply.

21. Markets and market structure – Meaning, classification of markets based on market structure - Competition and its meaning, basic features of perfectly competitive and imperfect competitive markets.

22&23. Characteristics of monopolistic competition, monopoly, duoploy, oligopoly, monopsony, duopsony and oligopsony with examples.

24. Price determination under perfect competition – Equilibrium analysis – Numerical and graphical explanation.

25. Distribution theory - Meaning, factor market - Concepts of rent - Meaning, types of rent - Ricardian theory of rent.

26. Wages - Meaning, nominal and real wages, working population in India – Labour participation rate, employment rate, unemployment rate - Interest-Meaning of interest and interest rate - Profit and income - Meaning, difference between income and profit.

27. Pricing of factors of production - Modern theory of distribution.

28. Public finance/ Public policy – Meaning, role and importance of public finance/Public policy - Functions of the government – Differences between public finance and private finance - Public revenue - Meaning, major and minor sources of public revenue.

29. Tax – Meaning - Classification – Direct and indirect taxes, methods of taxation - Proportional, progressive, regressive and digressive taxation, agricultural taxation - VAT and GST.

30. Canons of taxation – Adam Smith's canons of taxation – Equality, economy, certainty and convenience – Other canons of taxation.

31. Public expenditure – Meaning, need for public expenditure - Principles of public expenditure – Budget – Meaning - Balanced budget and deficit budget - Fiscal policy - Meaning and its policy instruments.

32. National income accounting system – Meaning and importance, circular flow in the economy.

33. Concepts of national income accounting - Gross domestic product, gross national product, net national product, net domestic product- National income at factor cost, personal income, disposable income, per capita income.

34. Approaches to measurement of national income – Product method, income method, expenditure method and value added method, difficulties in measurement.

35. Trends in contribution of different sectors' to GDP - Indian economy in the globalised world economy.

36. Importance of population in the economy - Malthusian theory, escaping from the Malthusian stagnation - Innovations, technological transition and economic growth.

37. Money - Meaning, evolution of money, functions of money, the money market - Types of demand and supply of money in the economy.

38. Credit - Meaning of credit, borrowing and lending, investments and their role in the modern economy - Credit controls and credit policy.

39. Role of banking in the modern economy, functions of central bank and commercial banks, monetary policy and its instruments.

40. Inflation – Meaning, definition, deflation - Meaning, causes of inflation – Demand pull and cost push inflation.

41. Types of inflation - Comprehensive and sporadic inflation – Suppressed and repressed inflation – Creeping, walking, running and galloping inflation – Mark up inflation.

42. General price index, wholesale price index, consumer price index - Rate of inflation – Measurement.

43. Other causes of inflation – Remedial measures – Monetary and fiscalmeasures.

44. Economic system - Meaning, importance of study of economy in systems approach - Types of economic systems.

45. Capitalism- Meaning and its characteristic features, socialism and its characteristic features - Mixed economies and their characteristic features.
46. Economic planning - Meaning, importance of planning in management of resources and institutions in the economy, elements of economic planning.
47 & 48. Brief history of planning system in India - Annual plans, five yearplans meaning and objectives, role of planning commission of India and NITI Ayog.

*18 PAT 101 FUNDAMENTALS OF PLANT PATHOLOGY 3 (2+1)

Course outlines

Theory

Importance of plant diseases, scope and objectives of Plant Pathology. Important plant pathogenic organisms, different groups: fungi, bacteria, fastidious vesicular bacteria, phytoplasmas, spiroplasmas, viruses, viroids, algae, protozoa, phanerogamic parasites and nematodes with examples of diseases caused by them. Diseases and symptoms due to abiotic causes.

Fungi: General characters, definition of fungus, somatic structures, types of fungal thalli, fungal tissues, modifications of thallus, reproduction (asexual and sexual).

Nomenclature, Binomial system of nomenclature, rules of nomenclature, classification of fungi. Key to divisions, sub-divisions, orders and classes.

Bacteria and mollicutes: general morphological characters. Basic methods of classification and reproduction.

Viruses: nature, architecture, multiplication and transmission. Study of phanerogamic plant parasites.

Nematodes: General morphology and reproduction, classification, symptoms and nature of damage caused by plant nematodes (Heterodera, Meloidogyne, Anguina etc.)

Practical

Microscopy, General study of different structures of fungi. Study of symptoms of various plant diseases. Study of representative fungal genera. Staining and identification of plant pathogenic bacteria. Transmission of plant viruses. Study of phanerogamic plant parasites. Study of morphological features and identification of plant parasitic nematodes. Extraction of nematodes from soil.

Lecture outlines

Theory

1. Introduction to Plant Pathology - Definition of Plant Pathology, Plant Pathogen, Plant Disease, Symptom, Disorder. Importance of plant diseases- Brief mention of Important epidemics of international importance – Irish Famine (1845), Bengal Famine (1942), Coffee rust (1868), Wheat Rust (1940), Southern Corn Leaf blight in USA. Epidemics of local significance - Peanut Stem Necrosis Disease (Anantapur dt), Mung bean yellow mosaic virus (AP) *etc*.Brief mention of economic importance of micro organisms. Scope and objectives of Plant Pathology.

2. Important plant pathogenic organisms with one or two examples of important plant diseases caused by them- fungi (rice blast, wheat rust), Chromista (*Pythium* damping off, late blight of potato protozoa (coffee phloem necrosis, club root of crucifers) bacteria (rice bacterial leaf blight (BLB), cotton black arm), fastidious vascular bacteria (sugarcane ratoon stunt, citrus greening), Phytoplasma (sugarcane grassy shoot, sesamum phyllody), *Spiroplasma* (corn stunt), viruses (TMV, MYMV), viroids (potato spindle tuber viroid, coconut cadang cadang).

3. Important plant pathogenic organisms with one or two examples of important plant diseases caused by them (contd)- algae (red rust), phanerogamic plant parasites (*Cuscuta, Striga, Orabanche, Loranthus*), nematodes (root knot and cyst nematode). Diseases and symptoms due to abiotic causes (khaira, cotton purple leaf, tomato blossom end rot, black heart of potato).

4. General characteristics of fungi, fungus definition. Somatic structures - types of fungal thalli - plasmodium, unicellular and filamentous. Types of fungi based on reproductive structures - eucarpic, holocarpic. Types of fungi based on their physical presence on or in the host - ectophytic and endophytic (intercellular, intracellular and vascular). Septation in fungi – Primary, adventitious, perforated and dolipore septa. Fungal tissues - plectenchyma (prosenchyma and pseudoparenchyma).

5. Modifications of mycelium (rhizomorphs, sclerotium, stroma, haustorium, rhizoids and appressorium).Ultra structure of fungal cell. Fungal nutrition groups of fungi based on mode of nutrition - saprophytes (obligate saprophytes and facultative parasite), parasites (obligate parasites and facultative saprophytes) and symbionts (mycorrhizae and lichens).

6. Reproduction in fungi - asexual reproduction (mitospores)- fragmentation (arthrospores, oidia, chlamydospores), fission, budding (blastospores), and sporulation –Sporangium, sporangiole, merosporangium.Spores- Plano and Aplanospores. Planospores – flagellum structure, types of flagella-tinsel, whiplash, Monoflagellate, Biflagellate, Anisokont and Heterokont zoospores. Conidiophore and Conidiospores (conidia). Asexual fruiting bodies with examples.

7. Sexual reproduction – Phases in sexual reproduction, (meiospores).Methods of plasmogamy-planogametic copulation, gametangial contact, gametangial copulation, spermatization and somatogamy.Various life cycle patterns displayed by fungi – haplobiontic haploid, haplobiontic haploid (modified), haplobiontic diploid and diplobiontic life cycles with examples. Parasexual cycle. Sexual spores in fungi.

8. Taxonomy - Nomenclature, Binomial system of nomenclature, rules of nomenclature, Classification of fungi as per Kirk *et al* (2008)- Key to phylum, subphyla, classes, orders and families.

9. Major characteristic features of Kingdom Fungi, Chromista and Protozoa. Characteristics of Phyla Chytridiomycota, Zygomycota, Ascomycota, Basidiomycota and Mitosporic fungi (Anamorphic fungi) in Kingdom Fungi.

10. Kingdom Fungi – Phylum Chytridiomycota, Class Chytridiomycetes – important characteristics of Order Chytridiales – Family Synchytriaceae – disease caused by *Synchytrium endobioticum* (potato wart). 11. Phylum Zygomycota – Subphylum Mucoromycotina – Order Mucorales – Family Mucoraceae, Genus *Rhizopus*, Example of disease caused by *Rhizopus arrhizus* Head rot of sunflower). Family Choanephoraceae, Genus *Choanephora*. Example of disease caused by *Choanephora cucurbitarum* (Choenophora blight of chillies).
12 Phylum Ascomycota - important characteristics of the phylum. Different types of ascocarps. Stile structures in ascocarps. Ascospore development in *Pyronema omphaloides*. Morphology of asci. Types of asci based on structure of ascus wall , asci arrangement -fascicle, hymenium.

13. Phylum Ascomycota, subphylum Taphrinomycotina (=Archiascomycetes) –
Class Taphrinomycetes – Order Taphrinales, (i) Family Taphrinaceae – diseases
caused by *Taphrina deformans* (peach leaf curl)and*T. maculans*(turmeric blotch).
(ii) Family Protomycetaceae – Disease caused by *Protomyces macrospores*(stem gall of coriander).

14. Phylum Ascomycota Subphylum Pezizomycotina – (i) Class Eurotiomycetes – Subclass Eurotiomycetidae Order Eurotiales – Genera *Eurotium, Emericella* (*Aspergillus flavus* – aflatoxins), *Talaromyces* (*Penicillium italicum* – citrus blue mold). (ii) Class Leotiomycetes Order Erysiphales Family Erysiphaceae - *Erysiphe*, *Leveillula, Phyllactinia, Uncinula, Sphaerotheca, Podosphaera* and *Microsphaera* (key for genera of Erysiphaceae based on position of fungus on/in the host, conidial stages, number of asci per cleistothecium and cleistothecial appendages) – Important diseases caused by each of the genera. Order Helotiales Family Sclerotiniaceae Genus *Sclerotinia (Sclerotinia sclerotiorum* – white mold of vegetables).

Subphylum 15. Phylum Ascomycota, Pezizomycotina -(iii) Class Sordariomycetes, Subclass Sardariomycetidae Order Diaporthales Family Cryphonectriaceae, Genus Cryphonectria (chestnut blight). **Subclass** Hypocreomycetidae Order Hypocreales - Family - Clavicepitaceae, Genus – Claviceps (ergot of sorghum and bajra).Family –Hypocreaceae – Genus – Hypocrea (Anamorph – Trichoderma, biocontrol agent). (iv) Class Dothidiomycetes Subclass - Dothidiomycetidae Order – Capnodiales – Family – Mycosphaerellaceae – Genus Mycosphaerella (M. arachidicola (Groundnut early leaf spot), M. personata (Groundnut late leaf spot), *M. pinodes* (Ascochyta blight of chickpea). Order Myriangiales – Family – Elsinoaceae – Genus – Elsinoe (E. ampelina – Grape anthracnose). Subclass – Pleosporomycetidae – Order – PleosporalesFamily Venturiaceae – Genus – Venturia (V. inaequalis – Apple scab). Family– Pleosporaceae - Genus- Cochliobolus (C. miyabeanus - brown spot of rice).

16. Phylum Basidiomycota – important characteristics – Primary, Secondary and Tertiary mycelium, dolipore septum, clamp connections. Development of basidium and basidiospores,parts of basidium, dispersal of basidiospores, structure of *Agaricus bisporus* basidiocarp.

17. Phylum Basidiomycota-Subphylum 1. Pucciniomycotina -Class Pucciniomycetes Order Pucciniales -Family –Pucciniaceae- Genera Puccinia (three rusts of wheat, groundnut rust) Uromyces (rust of green gram and black gram). Family - Melampsoraceae -Genus Melampsora (M. ricini – castor rust). family),*Hemileia*(*H. vastatrix* – coffee rust).Class *Incertae sedis* (no Microbotryomycetes (Pucciniomycetous smuts)- Order -Microbotryales -Family Microbotryaceae - Genus -Sphacelotheca (Sorghum grain smut, loose smut and head smut of

sorghum).

18. Macrocyclic, microcyclic, demicyclic rusts; Autoecious and Heteroecious rusts with examples. Life cycle of *Puccinia graminis tritici*.

19. Phylum Basidiomycota – Subphylum 2. Ustilagomycotina Class Ustilaginomycetes Order Ustilaginales - *Ustilago* (loose smut of wheat, sugarcane whip smut)and*Tolyposporium*(bajra smut). Order Urocystidales- Family -Urocystidaceae-Genus *Urocystis* (Onion smut).*Class*Exobasidiomycetes Order Tilletiales -Family -Tilletiaceae -Genera *Tilletia* (wheat bunts), *Neovossia* (Karnal bunt of wheat). Order Exobasidiales –Family- Exobasidiaceae –Genus *Exobasidium* (Tea blisterblight).

20. Differences between rust and smut fungi. Differences between smuts and bunts Phylum Basidiomycota – Subphylum 3. Agaricomycotina Class
 Agaricomycetes - Incertae sedis (no sub class) Order Polyporales- Family
 Ganodermataceae –Genus Ganoderma (coconut root rot and wilt).

21. Anamorphic Fungi (Mitosporic fungi = Fungi Imperfecti) Characteristics. Saccardoan spore group system. (1)Hyphomycetous anamorphic fungi: Identification features of Genera *Alternaria* (sunflower and sesamum leaf blight), *Botrytis* (castor grey mold), *Helminthosporium* (maize turcicum leaf blight), *Bipolaris* (rie brown spot), *Cercospora* (groundnut early leaf spot), *Phaeoisariopsis* (groundnut late leaf spot), *Fusarium*(cotton wilt), *Pyricularia* (*rice blast*), *Verticillium* (cotton wilt), Mycelia Sterilia – *Rhizoctonia*(rice sheath blight, dry root rot),

Sclerotium (stem rot of groundnut).

22. Acervular Imperfect Fungi – *Colletotrichum* (sugarcane red rot), *Pestalotiopsis* (coconut grey leaf spot), *Pestalotia* (guava leaf spot), *Gloeosporium* (grape anthracnose).Pycnidial Imperfect Fungi – *Ascochyta* (chickpea blight), *Phoma* (blackleg of crucifers), *Phomopsis* (brinjal fruit rot), *Phyllosticta* (ginger leaf spot), *Macrophomina* (dry root rot) *Diplodia* (rose dieback), *Botryodiplodia* (cirus stem end rot), *Septoria* (leaf spot of tomato).

23. Kingdom Chromista: Characteristics of Phylum Oomycota. Important characteristics of Class Oomycetes, Subclass- Peronosporomycetidae. Order Pythiales -Family -Pythiaceae –Genus-*Pythium* (damping off of nursery crops). Order Albuginales -Family -Albuginaceae -Genus -*Albugo* (white rust).

24. Order Peronosporales- Family -Peronosporaceae - Genus -Phytophthora (late blight of potato). Downy mildew fungi Sclerospora (green ear of bajra), Peronospora (blue mold of tobacco), Peronosclerospora (sorghum downy

mildew), *Pseudoperonospora* (cucurbit downy mildew), *Plasmopara* (grape downy mildew)and *Bremia* (lettuce downy mildew) *S*porangiophore branching and sporangial characteristics of downy mildew genera.

25. Characteristics of Class Plasmodiophorea in Kingdom Protozoa. Important characteristics of Order Plasmodiophorida, Family Plasmodiophoraceae - differences in the characteristics of *Plasmodiophora* (club root ofcabbage) and *Spongospora* (potato powdery scab).

26. Prokaryotes – Characteristics of phytopathogenic bacteria, Classification (2nd Edition of Bergey's Manual of Systematic Bacteriology, 2004). Identificationof plant pathogenic bacteria based on morphological features. Domain Bacteria

– Phyla Proteobacteria, Firmicutes and Actinobacteria Phylum Proteobacteria – Class Alphaproteobacteria- Order- Rhizobiales- Family -Rhizobiaceae -Genus -*Agrobacterium* (crown gall of stone fruits). Also *Candidatus* Liberobacter (citrus greening).

27. Class Betaproteobacteria -Order -Burkholdariales -Family – Burkholdariaceae Genus *Ralstonia* (bacterial wilt of solanaceous crops). Gammaproteobacteria - Order -Xanthomonadales -Family -Xanthomonadaceae -Genera –*Xanthomonas* (BLB, BLS, citrus canker), *Xylella* (Pierce's disease of grapes).

Order Pseudomonadales -Family -Pseudomonadaceae -Genus - *Pseudomonas* (wild fire of tobacco). Order *Enterobacteriales*-Family- *Enterobacteriaceae*-Genera-*Erwinia* (Apple fire blight), *Pectobacterium* (Soft rot of vegetables).

28. Phylum Firmicutes. -Class Bacilli -Order -Bacillus -Family -Bacillaceae -Genus - Bacillus (Class Mollicutes Order Entomoplasmatales -Family -Spiroplasmataceae -Genus Spiroplasma (Corn stunt). Order -Acholeplasmatales-Family - Acholeplasmataceae -Genus -Candidatus Phytoplasma (Sesamum phyllody, Brinjal little leaf). Phylum Actinobacteria - Class -Actinobacteria -Order -Actinomycetales -Family -Microbacteriaceae - Genus -Clavibacter (Wheat yellow ear rot/tundu, sugarcane ratoon stunt).Family Streptomycetaceae Genus Streptomyces (Potato scab).

29. Viruses and viroids - important characteristics of plant viruses and viroids - multiplication - classification of viruses based on nucleic acid (single stranded (ss) RNA, double stranded (ds) RNA, ssDNA and dsDNA). Taxonomy based on ICTV (2005). Important plant viral diseases - Tobacco Mosaic Virus (TMV) and Rice Tungro Virus (RTV).

30. Methods of transmission of plant viruses with examples of vector transmitted virus diseases. Examples of important viroid diseases - potato spindle tuber viroid and coconut cadang cadang. Study of phanerogamic plant parasites with suitable examples – *Cuscuta, Orabanche, Striga, Loranthus.*

31. **Nematodes-**Economic importance in agriculture - General characters of plant parasitic nematodes – classification.

32. **Nematodes-** symptoms and nature of damage caused by plant nematodes (*Heterodera*, *Meloidogyne*, *Anguina*, *Ditylenchus*, *Tylenchorhynchus*, *Aphelenchoides* etc.).

Practical

1. Microscopy - study of the parts of microscope.

2. Study of vegetative structures of fungi and their modifications.

3. Study of reproductive (sexual and asexual) structures of fungi.

4. Study of Zygomycetous fungus – Rhizopus, Choanephora.

5. Study of downy mildew fungi – *Sclerospora, Peronosclerospora,* Pseudoperonospora, Peronospora, Plasmopara and Bremia. Study of Pythium, Phytophthora and Albugo.

6. Study of powdery mildew fungi – Oidium, Oidiopsis, Ovulariopsis.

7. Study of ascocarps of *Erysiphe, Phyllactinia, Uncinula, Podosphaera* and *Microsphaera.*.

8. Study of rust fungi – *Puccinia* (different stages), *Uromyces, Hemileia*and *Melampsora*.

9. Study of smut fungi – *Sphacelotheca, Ustilago* and *Tolyposporium.* Study of *Ganoderma* and *Agaricus.*

10. Study of acervulous imperfect fungi – *Colletotrichum* and *Pestalotiopsis.* Study of pycnidial imperfect fungi – *Septoria.*

11. Study of imperfect fungi – Aspergillus, Penicillium and Pyricularia, Helminthosporium, Alternaria.

12. Study of imperfect fungi – *Cercospora* and *Phaeoisariopsis, Fusarium*, Rhizoctonia and Sclerotium.

13. Isolation of phytopathogenic bacteria (locally available diseased plant material) and study of colony characteristics.

14. Demonstration of mechanical transmission of plant viruses.

15. Extraction of plant parasitic nematodes from soil.

16. Study of morphological features and identification of plant parasitic nematodes.

*18 AEN 101 FUNDAMENTALS OF ENTOMOLOGY

3(2+1)

Course outlines

Theory

History of Entomology in India.Factors for insect's abundance. Major points related to dominance of Insecta in Animal kingdom. Classification of phylum Arthropoda upto classes.Relationship of class Insecta with other classes of Arthropoda. Morphology: Structure and functions of insect cuticle and moulting. Body segmentation.Structure of Head, thorax and abdomen. Structure and modifications of insect antennae, mouth parts, legs, wing venation, modifications and wing coupling apparatus. Structure of male and female genital and diapause in insects.Types organs.Metamorphosis of larvae and pupae. Structure and functions of digestive, circulatory, excretory, respiratory, nervous, secretory (Endocrine) and reproductive systems in insects. Types of reproduction in insects.

Major sensory organs like simple and compound eyes and chemoreceptors. Systematics: Taxonomy-importance, history and development and binomial nomenclature. Definitions of Biotype, Sub-species, Species, Genus, Family and Order. Classification of class Insecta upto orders, basic groups of present day insects with special emphasis to orders and families of agricultural importance like Orthoptera: Acrididae, Tettigonidae, Gryllidae, Gryllotalpidae; Dictyoptera: Mantidae, Blattidae; Odonata; Isoptera: Termitidae; Thysanoptera: Thripidae; Cimicidae, Hemiptera: Pentatomidae, Coreidae, Pyrrhocoridae, Lygaeidae, Cicadellidae, Delphacidae, Aphididae, Coccidae, Lophophidae, Miridae. Aleurodidae, Pseudococcidae; Neuroptera: Chrysopidae; Lepidoptera: Pieridae, Papiloinidae, Noctuidae, Sphingidae, Pyralidae, Gelechiidae, Arctiidae, Lymantridae. Saturniidae, Bombycidae; Coleoptera: Coccinellidae. Chrysomelidae, Cerambycidae, Curculionidae, Bruchidae. Apionidae, Scarabaeidae; Hymenoptera: Tenthridinidae, Apidae, Trichogrammatidae, Ichneumonidae, Braconidae, Chalcididae; Diptera: Cecidomyiidae, Tachinidae, Agromyzidae, Culicidae, Muscidae and Tephritidae.

Practical

Methods of collection and preservation of insects including immature stages; External features of Grasshopper/Blister beetle; Types of insect antennae, mouthparts and legs; Wing venation, types of wings and wing coupling apparatus. Types of insect larvae and pupae; Dissection of digestive system in insects (Grasshopper); Dissection of male and female reproductive systems in insects (Grasshopper); Study of characters of orders Orthoptera, Dictyoptera, Odonata, Isoptera, Thysanoptera, Hemiptera, Lepidoptera, Neuroptera, Coleoptera, Hymenoptera, Diptera and their families of agricultural importance.

Lecture outlines Theory

1 History of Entomology in India - Contributions of eminent entomologists – Locations and year of establishment of entomological institutions - Arthropoda – Mention of insects in scripts –Contributions of Aristotle, J.C. Fabricius, J.G. Koenig, Carolius Linnaeus, Cramer, Dury, Dr. Kerr, Rev Hope Rothney, Ronald Ross, L De Niceville, H.M Lefroy, T.B.Fletcher, E.P. Stebbing, T.V. Ramakrishna Ayyar, B.V. David, Y.Ramachandra Rao, M S Mani, S Pradhan, H.S. Pruthi, M.R.G.K. Nair and S. Pradhan; ML Roonwal, T.Kumara Swami, M R G K Nair,K.K. Nayar and N. Ananthakrishnan - Locations and year of establishment of Division of Entomology, IARI, Zoological Survey of India (ZSI), Directorate of Plant Protection, Quarantine and Storage (DPPQS), Indian Institute of Natural Resins and Gums (IINRG), National Bureau of Agricultural Insect Resources (NBAIR), National Institute of Plant Health Management (NIPHM), National Centre for Integrated Pest Management (NCIPM) and Forest Research Institute (FRI).

2 Contributory factors for abundance of insects – Major structural characters, developmental characters and protective characters (Morphological, physiological, behavioural and construction of protected niches) of Insecta in Animal Kingdom.

3 Classification of Phylum Arthropoda up to Classes – Different Classes of Arthropoda and comparison of characters of Class Insecta with Arachnida, Crustacea, Symphyla, Chilopoda, Diplopoda and Onychophora;

4 Structure and functions of body wall and moulting – Different layers, chemical composition, functions of body wall and cuticular appendages – Cuticular processes and cuticular invaginations – Chaetotaxy – Moulting – Apolysis, ecdysis and sclerotization.

5 Body segmentation of the insects – Head (Syncephalon) – Procephalon and gnathocephalon, types of head, sclerites and sutures of insect head - Thorax – Segments and appendages (wings and legs).

6 Abdomen – Segments, pre and post genital appendages (Furcula, cornicles, tracheal gills and pseudo ovipositor in Diptera - Propodeum, petiole and gaster in Hymenoptera) - Male and female genital organs - Epimorphic and anamorphic development in insects.

7 Antenna – Structure of typical antenna and its modifications in different insects with examples.

8 Mouthparts – Biting and chewing, sucking (Piercing and sucking, Rasping and sucking, Chewing and lapping, Sponging and Siphoning/ Simple sucking), mask and degenerate types with examples.

9 Legs – Structure of a typical insect leg and modifications of insect legs with examples, 10 Wings – Venation, margins and angles – Types of wings and wing coupling organs with examples.

11 Types of Metamorphosis and diapause – Metamorphosis- Ametamorphosis-Incomplete Metamorphosis or Direct or Simple Metamorphosis- Intermediate metamorphosis - Complete Metamorphosis or Complex or Indirect Metamorphosis-Hypermetamorphosis with examples - Diapause- Obligate and facultative diapauses – Stage of occurrence of diapause with examples.

12 Types of larva and pupa – Differences between nymph and larva - Larva-Protopod- Oligopod (Campodeiform and Scarabaeiform)- Polypod and Apodus with examples - Pupa- Obtect- Exarate- Coarctate- Chrysalis with examples.

13 Digestive system – Alimentary canal – Structure of foregut, midgut and hindgut
 – histology, functions, filter chamber and peritrophic membrane – Process of digestion- Extra intestinal digestion.

14 Circulatory system – Open and closed types – Organs of circulatory system – Dorsal blood vessel (diaphragms, sinuses and accessory pulsatile organs) – Process of circulation - Types of haemocytes –Properties and functions of haemolymph.

15 Excretory system – Structure, functions and modifications of malpighian tubules ¬ – Structure and functions of other organs of excretion.

16 Respiratory system – Tracheal system – Structure of spiracle and trachea – Classification based on functional spiracles and other means of respiration.

17 Nervous system – Neuron and its types (based on structure and function) – Synapse, ganglia, central nervous system, sympathetic nervous system and peripheral nervous system.

18 Reproductive system – Structure of male and female reproductive systems – Structure and types of ovarioles and structure of follicle – Types - Special modes of reproduction in insects.

19 Secretory (endocrine) system – Structure and functions of neurosecretory organs (neuro secretory cells of brain, corpora cardiaca, corpora allata, prothoracic glands and ring gland).

20 Sense organs – Compound eyes – Structure of ommatidium – Ocelli – Dorsal ocelli and lateral ocelli - Types of images and auditory organs (auditory hairs, tympanum, Jhonston's organ and pilifer organ) – Chemoreceptors.

21 Taxonomy – Importance - History – Binomial nomenclature - Holotype, allotype and paratype – Suffixes of tribes, subfamily, family and superfamily – Law of priority – Synonyms and homonyms - Definitions of biotype -Subspecies - Species – Genus - Family and Order. Characters of Class Insecta -Economic classification of insects- Classification upto Orders – Subclasses -Apterygota and Pterygota– Names of Orders of Apterygota and Pterygota with examples - Orthopteroid, Hemipteroid and Panarpoid group of orders.

22 Orthoptera – General characters - Gryllidae, Acrididae, Tettigonidae and Gryllotalpidae – Characters with examples.

23 Dictyoptera – General characters – Blattidae and Mantidae– Characters with examples - Odonata - General characters with examples.

24 Isoptera – General characters –Termitidae –Characters with examples - Order – Thysanoptera – General characters –Thripidae –Characters with examples

25 Hemiptera – General characters - Sub order Heteroptera – Characters -Cimicidae - Miridae, Pentatomidae, Lygaeidae, Coreidae, Pyrrhocoridae -Characters with examples.

26 Hemiptera - Suborder Homoptera – Characters – Delphacidae, Cicadellidae, Aleurodidae, Aphididae, Coccidae, Pseudococcidae, Lopophidae- Characters with examples -Neuroptera – General characters - Chrysopidae- characters with examples.

27 Lepidoptera-General characters - Differences between moths and butterflies

- Noctuidae, Lymantriidae and Sphingidae and Pieridae- Characters with examples.

28 Lepidoptera- General characters - Pyralidae, Crambidae, Gelechiidae, Lycaenidae, Arctiidae, Papilionidae, Saturniidae and Bombycidae - Characters with examples.

29 Coleoptera - General characters – Scarabaeidae, Coccinellidae, Chrysomelidae, - Characters with examples.

30 Coleoptera - General characters – Cerambycidae, Bruchidae, Apionidae and Curculionidae - Characters with examples.

31 Hymenoptera - General characters – Tenthredinidae, Ichneumonidae, Braconidae, Chalcididae, Trichogrammatidae, and Apidae- Characters with examples.

32 Diptera -General characters - Culicidae, Cecidomyiidae, Muscidae, Tachinidae, Agromyzidae and Tephritidae - Characters with examples.

Practical

Methods of collection and preservation of insects including immature stages.
 External features of Grasshopper / Blister beetle.

3 Study of types of mouthparts – Biting and chewing, piercing and sucking, rasping and sucking, chewing and lapping, sponging and siphoning.

4 Study of different types of insect antennae and legs.

5 Study of wing venation, types of wings and wing coupling mechanisms.

6 Study of different types of insect larva and pupa.

7 Dissection of digestive system in insects (Grasshopper).

8 Dissection of female and male reproductive systems in insects (Grasshopper).

9 Study of characters of Orders - Orthoptera, Dictyoptera and their families and Odonata.

10 Study of characters of Orders - Isoptera and Thysanoptera and their families. 11 Study of characters of Orders -Hemiptera and its sub order Heteroptera and their families.

12 Study of characters of Sub Order - Homoptera and its families.

13 Study of characters of Order- Neuroptera and Lepidoptera and their families.

14 Study of characters of Order- Coleoptera and its families.

15 Study of characters of Order- Hymenoptera and its families.

16 Study of characters of Order - Diptera and its families.

*18 AEX 103 FUNDAMENTALS OF AGRICULTURAL EXTENSION EDUCATION 3(2+1)

Course outlines

Theory

Education: Meaning, definition & Types - Formal, Non - Formal and Informal Education; Extension Education - meaning, definition, Concepts, Characteristics scope and process; objectives and principles of Extension Education; Extension Programme planning- Meaning, Process, Principles and Steps in Programme Development. Extension systems in India: extension efforts in pre-independence era

Extension systems in India: extension efforts in pre-independence era (Sriniketan, Marthandam, Sevagram, Firka Development Scheme, Gurgaon Experiment, etc.) and post-independence era (Etawah Pilot Project, Nilokheri Experiment, etc.); various extension/ agriculture development programmes launched by ICAR/ Govt. of India (IADP, IAAP, HYVP, T & V System, KVK, IVLP, ORP, ND, NATP, ATMA, SREP,ATIC, NAIP, NFSM, RKVY etc.). New trends

in agriculture extension: privatization extension, cyber extension/ eextension, market-led extension, farmer-led extension, expert systems, etc.

Community Development - meaning, definition, concept & principles, Philology of C.D. Rural Development: meaning, Definitions, concept, Characteristics, Objectives, Importance and Problems in Rural Development: various rural development programmes launched by Govt. of India - National Extension Service (NES). Panchayat Raj Systems / Democratic Decentralization and Panchayat Raj – Need, Three Tiers of Panchayat Raj System - Powers, Functions and Organization Set Up; Mandal System in Andhra Pradesh. Social Justice & Poverty Alleviation Programmes - ITDA, IWDP, NREP, IRDP, JRY, SGRY, SGSY, MGNREGP Women Development Programmes - ICDS, DWCRA, RMK, MSY,IKP, Participatory Rural Appraisal (PRA), Rural Leadership: Meaning, Definition and concept, types of leaders in rural context, Roles ofLeaders, different Methods in Selection of a Leader, Training of Leaders - Lay and Professional Leaders, Advantages and Limitations in using Local Leadersin Agricultural Extension; extension administration: meaning, definition and concept, principles and functions. Monitoring and evaluation - Meaning, definition, concept, Objectives, Types and Importance, and monitoring and evaluation of extension programmes; transfer of technology: concept and models, capacity building of extension personnel and Farmers- Training Meaning , definition,

Types of Training - Pre Service Training, In - Service, Orientation, Induction Training, Refresher Training and Training for Professional Qualification; Training of Farmers, Farmwomen and Rural Youth - Farmers' Training Centre (FTC): Objectives – Trainings Organized; District Agricultural Advisory and Transfer of Technology Centre (DAATTC) - Objectives.extension teaching methods: meaning, classification, individual, group and mass contact methods, media mix strategies; and communication: meaning and definition; Functions

of Communication, models - Aristotle, Shannon Weaver, Berlo, Schramm, J. P. Leagans, Rogers and Shoemaker, Litterer, Westley Macleansand barriers to communication. Agriculture journalism - Meaning – Scope Importance Characteristics of News Factors determining the News Value - Types of News Sources of News; Diffusion and Adoption of innovation: Meaning, and Definition, Concepts and process and Stages & Models of Adoption Process -Five (5) and Seven (7) Stage Models; Attributes of Innovation - Relative Trialability – Compatibility, Complexity, Advantage, Observability and Predictability, Innovation - Decision Process - Meaning - Stages (Knowledge, Persuasion, Decision, Implementation and Confirmation); Concepts: Dissonance – Rejection: Active Rejection and Passive Rejection; Discontinuance - Replacement and Disenchantment Discontinuance - Over Adoption - Rate of Adoption and Innovativeness; Adopter Categories and their Characteristics; Factors influencing Adoption Process Social, Personal and Situational.

Practical

To study and familiarize university extension system. Group discussion Simulated Exercise; Handling and use of audio visual equipments such as public address equipment (PAE) system, Still camera, digital camera and; Audio-visual Aids - meaning, importance and classification. Selection, planning, preparation, evaluation, presentation and use of Audio -visual aids. - Posters & Charts, Liquid Crystal Display (LCD) projector, Power Point Slides, ICT Tools Interactive white board and Digital / Electronic podium, Text messages, Voice Mail, Interactive Video recording (IVR) and New Applications (Apps) for Transfer oo Technology in Agriculture, Planning and preparation of extension literature – leaflet, folder, pamphlet, booklet with different DTP softwares. A visit to village to understand the problems being encountered by the villagers / farmers by administering the PRA techniques and understanding their applications in Village Development Planning; Visit to KrishiVigyan Kendra (KVK), Farmers' Training Centre, (FTC), District Agricultural Advisory and Transfer of Technology Centre (DAATTC): Visit to study organization and functioning of DRDA, DWMA, ATMA, JDA Office and other development departments at district level; visit to NGO and learning from their experience in rural development; Writing for Print media – News Stories and Success Stories; Visit to community radio and television studio for understanding the process of programme production. Writing for electronic media. Developing script for radio and television.

Lecture Outlines

Theory

1. a) Education - Meaning, definition and Types – Formal, non-formal and informal education.

b) Extension Education – Meaning, definition, concepts - Characteristics, scope and process.

2. Objectives and principles of extension education.

3. Extension programme planning – Meaning, process, principles.

4. Extension programme planning – Steps in programme development.

5. Extension systems in India.

6. Extension efforts in pre-independence era – Sriniketan, Marthandam,

Sevagram, Firka Development Scheme, Gurgaon Experiment, etc.

7. Extension efforts in post-independence era - Etawah pilot project, Nilokheri experiment etc.

8. Extension/Agriculture development programme launched by ICAR/Govt. of India – IADP, IAAP and HYVP.

9. Extension / Agriculture development programme launched by ICAR / Govt. of India – SFDA, MFAL and T & V System.

10. a) Extension / Agriculture development programme launched by ICAR / Govt. of India, KVK, ORP and ND.

b) IVLP.

11. a) Extension / Agriculture development programmes launched by ICAR / Govt. of India – NATP, ATMA, SREP, ATIC.

b) NAIP.

12. New trends in agriculture extension – Privatization extension and cyber extension / e-extension.

13. New trends in agriculture extension – Market led extension, farmer-led extension, expert systems, etc.

14. Community development – Meaning, definition, concept and principles - Philology of C.D.

15. Rural development - Meaning, definitions, concept, characteristics, objectives, importance and problems in rural development.

16. Rural development launched by Govt. of India – National Extension Service (NES), Panchayat Raj Systems/ Democratic Decentralization and Panchayat Raj – Need.

17. Rural development launched by Govt. of India – Three tiers of Panchayat Raj system – Powers, functions and organization set up -Mandal system in Andhra Pradesh.

18. Social justice and poverty alleviation programmes – ITDA, IWDP and NERP. 19. Social justice and poverty alleviation programmes – IRDP, JRY, SGRY, SGSY and MGNREGP.

20. Women development programmes – ICDS, DWCRA, RMK, MSY, ANTWA and IKP.

21. Participatory Rural Appraisal (PRA)

22. Rural leadership - Meaning, definition and concept, types of leaders in rural context, roles of leaders and different methods in selection of a leader.

23. Training of leaders – Lay and professional leaders, advantages and limitations in using local leaders in Agricultural Extension.

24. Extension administration - Meaning, definition and concept, principles and functions - Monitoring and evaluation – Meaning, definition and concept,

objectives - Types and importance and monitoring and evaluation of extension programmes.

25. Transfer of technology - Concept and models and capacity building of extension personnel farmers – Training – Meaning, definition, types of training

 Pre-Service training - In-service, orientation, induction training, refresher training and training for professional qualification.

26. Training of farmers, farm women and rural youth – Farmers' TrainingCentre (FTC) - Objectives – Training organized - District Agricultural Advisory and Transfer of Technology Centre (DAATTC) – Objectives.

27. Extension teaching methods - Meaning, classification, individual, group and mass contact methods, media mix strategies and communication -Meaning and definition

28. Functions of communication, models – Aristotle, Shannon, Weaver, Berlo, Schramm, J.P. Leagans, Rogers and Shoemaker, Litterer, Westley – Macleans and barriers to communication.

29. Agriculture journalism – Meaning – Scope – Importance - Characteristics of News – Factors determining the News value – Types of News and sources of News.

30. Diffusion and adoption of innovation - Meaning, definition, concepts and process and stages and Models of adoption process – Five (5) and Seven (7) stage models - Attributes of innovation – Relative advantage, compatibility, complexity, trialability – obsrevability and predictability.

31. Innovation – Decision process – Meaning – Stages (Knowledge, persuasion, decision, implementation and confirmation) - Decision process – Meaning – Stages (Knowledge, persuasion, decision, implementation and confirmation) – Concepts - Dissonance – Rejection – Active rejection and passive rejection – Discontinuance – Replacement and disenchantment discontinuance – Over adoption – Rate of adoption and innovativeness.

32. Adopter categories and their characteristics - Factors influencing adoption process – Social, personal and situational.

Practical

 Audio-visual aids – Meaning, importance and classification - Selection, planning, preparation, evaluation, presentation and use of audio-visual aids – Charts.

2. Selection, planning, preparation, evaluation, presentation and use of audiovisual aids – Charts, posters, flip charts, flash cards, plannel graphs.

3. Selection, planning, preparation, evaluation, presentation and use of audio- visual aids – Power point slides.

4. Planning and preparation of extension literature – Leaflet, folder, pamphlet, booklet, news stories and success stories.

5. Handling and use of audio visual equipments such as public address equipment (PAE) system and still camera and digital camera and Liquid Crystal Display (LCD) Projector.

6. Group discussion – Simulated exercise.

7. Visit to a village to study on going rural development and agricultural developmental programmes.

8. To study and familiarize university extension system.

9. Visit to KVK.

10. Visit to Farmers' Training Centre (FTC).

11. Visit to District Agricultural Advisory and Transfer of Technology Centre (DAATTC).

12. Visit to study organization and functioning of DRDA, DWMA, ATMA, JDA

Office and other development departments at district level.

13. Visit to a village to exercise PRA techniques.

14. Visit to community radio and television studio for understanding the

process of programme production, Script writing.

15. Developing script for radio.

16. Developing script for television.

*18 AEX 201COMMUNICATION SKILLS AND PERSONALITY DEVELOPMENT 2 (1+1)

Course outlines

Theory

Communication Skills: Structural and functional grammar; meaning and process of communication, verbal and nonverbal communication; listening and note taking, writing skills, oral presentation skills; Voice modulation basics and their usage for meaningful impact on people; field diary and lab record; indexing, footnote and bibliographic procedures. Reading and comprehension of general and technical articles, precise writing, summarizing, abstracting; individual and group presentations, Extempore, impromptu and Prepared presentations, public speaking; Group discussion. Organizing seminars and conferences. Human Behaviour – Domains and components of Behaviour; Personality and Personality Development – Meaning, Scope, Importance, Factors influencing Personality; Trait and Type Approaches; Personality Theories; Importance of Wants, Desires, Needs, Drives, Motives, Aspirations, Interests, Objectives and Goals in Personality development. Transactional Analysis - Importance, Methods and Strategies. Negotiation Skills, Stress Management and Conflict Management - Meaning, Concept, steps and Techniques. Emotional Intelligence

Meaning, Concept and Importance. Creativity – Meaning, Concept,
 Components and Characteristics of creative people. Team Work –Meaning,
 Concept, Characteristic Features of Effective Teams, Types of Teams, Factors
 affecting and role of Team Work.

Practical

Communication Skills: meaning and process of communication, Simulated Exercises on verbal and nonverbal communication and Science of body language; Practicing conscious body postures and movements; Simulated Exercises on listening and note taking, writing skills, oral presentation skills; field diary and lab record; indexing, footnote and bibliographic procedures. Reading and comprehension of general and technical articles, precise writing, summarizing, abstracting; individual and group presentations. Extempore, impromptu impromptu presentation, public speaking; Simulated Exercises: on Video recorded mock group discussions and interviews, Organizing seminars and conferences. Video recorded practical to evaluate change in confidence level; Team work and Time management.

Lecture outlines

Theory

1. Communication - Meaning and process of communication, verbal and non verbal communication.

2. Communication skills - Structural and functional grammar.

3. Listening and note taking, writing skills, oral presentation skills.

4. Voice modulation basics and their usage for meaningful impact on people.

5. Field diary and lab record; indexing, footnote and bibliographic procedures.

6. Reading and comprehension of general and technical articles and precise writing - summarizing, abstracting; individual group presentations.

7. Extempore, impromptu and prepared presentations, public speaking; group discussion - Organizing seminars and conferences.

8. Human behaviour - Domains and components of behaviour.

9. Personality and personality development - Meaning, scope, importance, factors influencing personality - Traits and type, approaches.

10. Personality theories.

11. Importance of wants, desires, needs, drives, motives, aspirations, interests, objectives and goals in personality development.

12. Transactional analysis, - Importance, methods and strategies.

13. Negotiation skills, stress management and conflict management - Meaning, concept, steps and techniques.

14. Emotional intelligence - Meaning, concept and importance.

15. Creativity - Meaning, concept, components and characteristics of creative people.

16. Team work - Meaning, concept, characteristic features of effective teams, types of teams, factors affecting and role of team work

Practical

1. Communication - Meaning and process of communication.

2. Overview of non verbal communication skills, signs of body language.

3. Non verbal communication skills - Practicing conscious body postures and movements.

4. Overview of verbal communication skills.

5. Practicing listening and note taking and writing skills.

6. Practicing oral presentation skills.

7. Practicing writing of field diary and lab record - Indexing, footnote and bibliographic procedures.

8. Practicing reading and comprehension of general and technical articles.

9. Practicing precise writing, summarizing, abstracting.

10. Exercise on individual and group presentations.

11. Practicing of extempore, impromptu, impromptu presentation, public speaking.

12. Evaluative exercises on video recorded mock group discussions and interviews.

13. Practical exposure on organizing seminars and conferences.

14. Evaluative exercise on recorded video programme to build the confidence levels of students.

15. Practical exercise on importance of team work.

16. Practical exercise on importance of time management.

*18 AGR 104INTRODUCTORY AGROMETEOROLOGY AND CLIMATECHANGE2(1+1)

Course outlines Theory

Earth atmosphere, composition, extent and structure; Atmospheric weather variables; Atmospheric pressure, its variation with height; Wind, types of wind, daily and seasonal variation of wind speed, cyclone, anticyclone, land breeze and sea breeze; Nature and properties of solar radiation, solar constant, depletion of solar radiation, short wave, long wave and thermal radiation, net radiation, albedo; Atmospheric temperature, temperature inversion, lapse rate, daily and seasonal variations of temperature, vertical profile of temperature, energy balance of earth; Atmospheric humidity, concept of saturation, vapor pressure, process of condensation, formation of dew, fog, mist, frost, cloud; Precipitation, process of precipitation, types of precipitation such as rain, snow, sleet, and hail, cloud formation and classification; Artificial rainmaking; Monsoon, mechanism and importance in Indian agriculture; Weather hazards, drought, floods, frost, tropical cyclones and extreme weather conditions such as heat-wave and coldwave; Agriculture and weather relations, modifications of crop microclimate, climatic normals for crop and livestock production; Weatherforecasting, types of weather forecast and their uses; Climate change, climatic variability, global warming, causes of climate change and its impact on regional and national Agriculture.

Practical

Visit of Agrometeorological observatory, site selection of observatory, exposure of instruments and weather data recording; Measurement of total, shortwave and long wave radiation, and its estimation using Planck's intensity law; Measurement of albedo and sunshine duration, computation of Radiation Intensity using BSS: Measurement of maximum and minimum air temperatures. its tabulation, trend and variation analysis, measurement of soil temperature and computation of soil heat flux; Determination of vapor pressure and relative humidity. determination of dew point temperature; Measurement of atmospheric pressure and analysis of atmospheric conditions; Measurement of wind speed and wind direction, preparation of windrose; Measurement, tabulation and analysis of rain; Measurement of open pan evaporation and evapotranspiration, computation of PET and AET

Lecture outlines

Theory

 Introduction: The three spheres of the earth; Terminology and definitions: Meteorology, Climatology, Agrometeorology, Agroclimatology climate and weather
 Scope and importance of agrometeorology.

2. Agro climatic regions of India and Agroclimatic zones of Andhra Pradesh.

3. Atmosphere -Composition of the atmosphere-Weather elements- Extent and structure of the atmosphere.

4. Solar Radiation: Nature and properties of solar radiation - Conduction – Convection - Radiation - Solar Spectrum - Distribution of solar radiation within the crop canopies- Physiological response of different bands of incident radiation - Definitions of solar constant, net radiation, albedo - Solar radiationand crops

5. Temperature: Temperature and heat, definitions- Temperature inversion-Adiabatic lapse rate - Daily and seasonal variations of temperature – Vertical profile of temperature- Energy balance of earth

6. Low air temperature and plant injury and high air temperature and plant injury-Soil temperature- Factors affecting soil temperature- Temperature and crops.

7. Humidity: Concept of saturation- Vapour pressure- Types of humidity-Humidity and crops- Atmospheric Pressure: Definitions of pressure, atmospheric pressure, standard atmospheric pressure

8. Wind:Types of wind; Planetary winds (trade winds, westerlies, polar easterlies, cyclones and anti cyclones) periodic winds and local winds (sea andland breezes, mountain and valley winds) Daily and seasonal variation of winds- Effect of wind on crops

9. Precipitation: Process of precipitation, types of rainfall(orographic, convectional and cyclonic)- Definition of cloud – WMO classification of clouds.

10. Forms of precipitation (solid, liquid and mixed) and condensation (dew, fog, mist, frost, cloud) - Artificial rain making- Monsoon:Indian monsoons, SW monsoon & NE monsoon.

11. Importance of monsoon in Indian agriculture- date of onset, significant features of Indian monsoon; length of growing season.

12. Weather hazards: Drought-Floods-Cyclones-Heat and cold-waves and their management.

13. Weather Forecasting: Importance-Types of weather forecast and their uses-Synoptic charts - Remote sensing-Applications of remote sensing in agriculture - Agrometeorological Advisory services in India.

14. Climate change- variability-Global processes and effects- Green house effect- Temperature changes on the earth- Precipitation changes on the earth-Changes in extreme events- Sea level raising- Tracking climate change- Impacts of climate change on agriculture- Climate neutral

15. Summary of evidence for climate change- Basic models for evaluating climate change Impacts -Specific weather related effects due to climate change.

16. Micro climate- micro climate scales – Modifications of crop microclimate – Examples of manipulation of climate- Climatic normals for crop and livestock production

Practical

1. Visit to Agrometeorological Observatory, site selection and layout plan for observatory.

2. Exposure to agrometeorological instruments and weather data recording.

3. Measurement of total, shortwave and longwave radiation and its estimation by using Planck's intensity law.

4. Measurement of albedo and sunshine duration.

5. Computation of radiation Intensity using bright sun shine hours.

6. Measurement of maximum and minimum air temperatures and interpretation of decennial temperature data.

7. Tabulation of maximum and minimum air temperatures, trend and variation analysis for climate change of the region.

8. Measurement of soil temperature and computation of soil heat flux.

9. Determination of atmospheric pressure and vapour pressure.

10. Determination of relative humidity.

11. Determination of dew point temperature- Measurement of atmospheric

pressure and analysis of atmospheric conditions.

12. Measurement of wind speed and wind direction, preparation of windroses-Measurement, tabulation and analysis of rainfall data.

13. Measurement of open pan evaporation and evapotranspiration. Computation of PET and AET-Preparation of synoptic chart and report

14. Computation of climate change and variability

15. Crop planning for climate change

16. GDD, HTU and PTU calculations and their interpretation using their efficiencies

References

*18 AGR 201 Crop production technology - I (Kharif crops) (1+1)

Theory:

Unit - I: Cereals

Rice, Maize, - Origin, geographic distribution, economic importance, soil and climatic requirements, varieties, cultural practices (from land preparation to harvest) and yield.

Unit - II: Millets

Sorghum, Pearl millet, Small millets - Finger millet, Foxtail millet, little millet, Kodo millet, Barnyard millet and Proso millet - Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices and yield.

Unit - III: Pulses

Redgram, Blackgram, Greengram, , Cowpea, - Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices and yield.

Unit - IV: Oilseeds (Kharif)

Groundnut, sesame, Soybean- Origin, and geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices, yield.

Unit - V: Fibre and forage

Cotton, jute, fodder sorghum, cumbu napier- Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices, yield.

Cereals	Rice, maize
Millets	Sorghum, pearl millet, finger millet and minor millets
Pulses	Pigeonpea, green gram, black gram, cowpea,
Oilseeds	Groundnut, sesame, soybean
Fibre & Forage	Cotton, jute, fodder sorghum, Cumbu napier

Theory Lecture Schedule:

- 1. Importance and area, production and productivity of major cereals and millets of India and Tamil Nadu.
- 2. Importance and area, production and productivity of pulses and oilseeds crops of India and Tamil Nadu.

- 3. Rice Origin geographic distribution economic importance varieties soil and climatic requirement.
- 4. Rice cultural practices yield economic benefits.
- 5. Special type of Rice cultivation SRI and Hybrid rice cultivation.
- 6. Maize Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices and yield.
- Sorghum and Pearl millet Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices and yield.
- 8. Finger millet and Minor millets Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices and yield.

9. Mid semester Examination.

- 10. Pigeonpea Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices and yield.
- 11. Greengram, Blackgram and Cowpea Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices and yield - Agronomy of rice fallow pulses.
- 12. Groundnut Origin, geographical distribution, economic importance, soil and climatic requirements - varieties, cultural practices yield and economics.
- 13. Sesame and Soybean Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield.
- 14. Cotton Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield.
- 15. Jute- Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield.
- 16. Fodder sorghum- Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield.
- 17. Cumbu napier- Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield.

Practical Schedule:

- 1. Identification of cereals, millets, pulses and oilseed crops in the crop cafeteria.
- 2. Practicing various nursery types and main field preparation for rice crop.

- 3. Nursery and main field preparation for important millets, pulses and oilseeds.
- 4. Acquiring skill in different seed treatment techniques in important kharif crops.
- 5. Estimation of plant population per unit area for important kharif crops.
- 6. Acquiring skill in field preparation, sowing and manuring of crops under pure and intercropping situations for cereals and millets.
- 7. Acquiring skill in field preparation, sowing and manuring of crops under pure and intercropping situations for pulses and oilseeds.
- 8. Acquiring skill in using seed drill for sowing operations.
- 9. Acquiring skill in foliar nutrition for important field crops.
- 10. Observations on growth parameters of cereals and millets.
- 11. Observations on growth parameters of pulses and oilseeds.
- 12. Study of yield parameters and estimation of yield in cereals and millets.
- 13. Study of yield parameters and estimation of yield in pulses and oilseeds.

14. Working out cost and returns of important cereals, millets, pulses and oilseeds crops.

15. Visit to farmers field / research stations to study the cultivation techniques of cereal, millets, pulses, cotton and oilseeds.

16. Visit to nearby Agricultural Research Station / Farmer's field.

17. Practical Examination.

*18 GPB 201 FUNDAMENTALS OF PLANT BREEDING 3(2+1)

Course outlines

Theory

Historical development, concept, nature and role of plant breeding, major achievements and future Genetics in relation to plant prospects; breeding;Heritability and genetic advance; modes of reproduction and apomixes; self - incompatibility and male sterility- genetic consequences, cultivar options; Domestication, Acclimatization, introduction, Centre of origin/diversity; Genetic basis and breeding methods in selfpollinated crops- mass and pure line selection, hybridization techniques and handling of segregating population; Multiline concept; Concepts of population genetics and Hardy- Weinberg Law; Genetic basis and methods of breeding cross pollinated crops, modes of selection; Heterosis and inbreeding depression, development of inbred lines and hybrids, composite and synthetic varieties; Breeding methods in asexually propagated crops, clonal selection and hybridization; Wide hybridization and pre-breeding; Polyploidy in relation to plant breeding; mutation breeding-methods and uses; Breeding for important biotic and abiotic stresses; Biotechnological tools-DNA markers and marker assisted selection. Participatory plant breeding.

Practical

Plant Breeder's kit; Study of germplasm of various crops; Study of floralstructure of self-pollinated and cross pollinated crops; Emasculation and hybridization techniques in self & cross pollinated crops; Consequences of inbreeding on genetic structure of resulting populations; Study of male sterility system; Handing of segregation populations; Methods of calculating mean, range, variance, standard deviation. Block Design; Estimation of heterosis, inbreeding depression and heritability; Layout of field experiments; Work out the mode of pollination in a given crop and extent of natural out crossing; Prediction of performance of double cross hybrids.

Lecture outlines

Theory

1 Historical developments, concept, nature and role of plant breeding, major achievements and future prospects - Definition, aim, objectives, history and developments of plant breeding, scientific contributions of eminent scientists -Landmarks in plant breeding - Scope of plant breeding.

2 Modes of reproduction and apomixis - Asexual reproduction (vegetative reproduction and apomixis) and sexual reproduction - Their classification and significance in plant breeding.

3 Modes of pollination - Classification of crop species on the basis of mode of pollination – self pollination – mechanisms promoting self pollination – Genetic consequences of self pollination – Cross pollination – Mechanisms promoting cross pollination – Genetic consequences of cross pollination – Often cross pollinated crops.

4 Self– incompatibility - Classification – Heteromorphic, homomorphic, gametophytic and sporophytic systems of incompatibility – Advantages and disadvantages – Utilization in crop improvement.

5 Male sterility- Genetic consequences, cultivar options - Different types – Genetic, cytoplasmic and cytoplasmic genetic male sterility – Inheritance and maintenance– utilization of male sterile lines in hybrid seed production – Their advantages and disadvantages.

6 Domestication, acclimatization and introduction - Plant introduction -Primary introduction and secondary introduction - Plant introduction agencies in India – National Bureau of Plant Genetic Resources (NBPGR) and its activities - Procedure of plant introduction – Merits and demerits of plantintroduction.

7 Centre of origin/diversity - Centres of diversity - Centres of origin - Classification
- law of homologous series - Types of centres of diversity - Germplasm collections
- Genetic erosion - Main reasons of genetic erosion - Extinction - Gene sanctuaries

- Introgression – Gene banks – Types of gene banks.

8 Breeding methods in self pollinated crops - Modes of selection - Selection - Natural and artificial selection – Basic principles of selection – Basic characteristics and requirements of selection – Selection intensity – Selection differential, heritability (narrow and broad sense) – Genetic advance as per cent of mean.

9 Mass selection – Procedure for evolving a variety by mass selection – Modification of mass selection – Merits, demerits and achievements.

10 Pure line selection - Johannsen's pure line theory and its concepts and significance – Origin of variation in pure lines – Characters of pure lines – Progeny test, genetic basis of pure line selection – General procedure for evolving a variety by pure line selection – Merits, demerits and achievements – Comparison between mass and pure line selection.

11 Hybridization techniques - Hybridization – Aims and objectives – Types of hybridization – Pre-requisites for hybridization – Procedure / steps involved in hybridization.

12 Handling of segregating population - Pedigree method – Procedure – Merits, demerits and achievements.

Bulk method – Procedure – Merits, demerits and achievements –
 Comparison between pedigree and bulk methods - Single seed descent method
 Merits and demerits.

14 Backcross method of breeding–Its requirements and applications – Procedure for transfer of single dominant gene - Procedure for transfer of single recessive gene – Merits, demerits and achievements - comparison between pedigree and backcross method.

15 Multiline concept - Definition – Characteristics of a good multiline – Development of multiline varieties – Achievements.

16 Concepts of population genetics and Hardy - Weinberg Law - Hardy Weinberg Law – Factors affecting equilibrium frequencies in random mating populations -Selection without progeny testing – Selection with progeny testing

- Merits and demerits of progeny selection – Line breeding– achievements.

17 Recurrent selection – Different types – Detailed procedure of simple recurrent selection and other recurrent selection methods – Conclusion on the efficiency of different selection schemes.

18 Heterosis - Heterosis and hybrid vigour – Luxuriance – Heterobeltiosis – Brief history– heterosis in cross pollinated and self pollinated species – Manifestations of heterosis-

19 Genetic basis of heterosis – Dominance, over dominance and epistasis hypotheses – Objections and their explanations – Comparison betweendominance and overdominance hypotheses – Physiological basis of heterosis – Commercial utilization.

20 Inbreeding depression - Brief history – Effects of inbreeding – Eegrees of inbreeding depression – Procedure for development of inbred lines and their evaluation.

21 Development of inbred lines and hybrids - Exploitation of heterosis – History of hybrid varieties – Important steps in production of single and double cross hybrids – Brief idea of hybrids in maize, pearl millet, sunflower and rice.

22 Composite and synthetic varieties - Production procedures – Merits, demerits and achievements – Factors determining the performance of synthetic varieties – Comparison between synthetics and composites.

23 Breeding methods in asexually propagated crops, clonal selection and hybridization - Characteristics of asexually propagated crops – Characteristics of clones –Clonal selection – Procedure – Advantages and disadvantages – Problems in breeding asexually propagated crops – Genetic variation within a clone – Clonal degeneration – Achievements – Comparison among clones, purelines and inbreds -Breeding of annual asexually propagated species through hybridization – Interspecific hybridization.

24 Wide hybridization and pre breeding - History – Objectives – Barriers for the production of distant hybrids– Techniques for production of distant hybrids – applications of wide hybridization in crop improvement – Sterility in distant hybrids – Limitations and achievements -use of gene pools to develop intermediate breeding material.

25 Polyploidy in relation to plant breeding - Polyploidy – Autopolyploids – Origin and production – Morphological and cytological features– Applications in crop improvement – Limitations– Allopolyploidy – Morphological and cytological features– Applications in crop improvement – Limitations. 26 Mutation breeding - Methods and uses - Mutation breeding – Procedure of mutation breeding – Applications – Advantages, limitations and achievements.
27 Breeding for important biotic and abiotic stresses - Disease resistance –

Mechanisms of disease resistance in plants (disease escape, tolerance, resistance, immunity and hypersensitivity) – Genetic basis of disease resistance

 Gene for gene hypothesis – sources of disease resistance – Breeding methods for disease resistance – Achievements.

28 Insect resistance – Mechanism of insect resistance in plants (non preference, antibiosis, tolerance and avoidance) – Nature of insect resistance – Genetics of insect resistance – Horizontal and vertical resistance– Sources of insect resistance – breeding methods for insect resistance – Problems in breeding for insect resistance – Achievements.

29 Drought resistance – Mechanisms of drought resistance (drought escape, avoidance, tolerance, and resistance) – Features associated with drought resistance – Sources of drought resistance – Breeding methods for drought resistance – Limitations – achievements - Resistance to water logging – Effectsof water logging – Mechanism of tolerance – Ideotype for flooded areas.

30 Salt tolerance – Response of plants to salinity – Symptoms – Mechanisms of salt tolerance – Breeding methods for salt tolerance – Problems – Achievements. Cold tolerance – Chilling resistance – Effects of chilling stress on plants – Mechanism of chilling tolerance – Sources of chilling tolerance – Selection criteria.

31 Biotechnological tools - DNA markers and marker assisted selection - Definition and classification of DNA markers and applications.

32 Participatory plant breeding - Definition – Goals – Methodology – Advantages and limitations.

Practical

1 Plant Breeder's kit.

2 Study of germplasm of various crops.

3 Emasculation and hybridization techniques in self pollinated crops – rice, groundnut.

4 Emasculation and hybridization techniques in self pollinated crops – greengram, sesame.

5 Emasculation and hybridization techniques in cross pollinated crops – maize, castor.

6 Emasculation and hybridization techniques in often cross pollinated crops – cotton, redgram.

7 Consequences of inbreeding on genetic structure of resulting populations.

8 Study of male sterility systems.

9 Handling of segregation populations.

10 Methods of calculating mean, range, variance, standard deviation.

11 Designs used in plant breeding experiments.

12 Layout of field experiment.

13 Analysis of Randomized Block Design.

14 Estimation of heterosis, inbreeding depression and heritability.

15 Prediction of performance of double cross hybrids.

16 Work out the mode of pollination in a given crop and extent of natural out crossing.

*18 AEC 201 AGRICULTURAL FINANCE AND CO-OPERATION 2(1+1)

Course outlines Theory

Agricultural Finance- meaning, scope and significance, capital and credit needs and their role in Indian agriculture. credit: meaning, definition, need, classification. Credit analysis: 3 R's, and 5C's and 7 Ps of credit analysis. Sources of agricultural finance: institutional and non-institutional sources, social control and nationalization of commercial banks, RRBs, Lead bank scheme,. Crop loan scheme,Scale of finance and unit cost. Cost of credit, KCC. Financial inclusion,Micro financing, and schemes for financing weaker sections. Crop insurance, AICI,PMFBY.

Introduction to higher financing institutions– RBI, NABARD, World bank group institutions. Recent developments in agricultural credit.Agril.Projects – projectmeaning, importance, Project cycle and phases., Basic guidelines for preparation of project reports.

Agricultural Cooperation – Meaning, objectives, principles of cooperation, brief history of cooperative development in India, , significance of cooperatives in Indian agriculture. Agricultural Cooperative institutions in India- credit, marketing, consumer and multi-purpose cooperatives, farmers' service cooperative societies, processing cooperatives, , cooperative warehousing; Role of ICA, NCUI, NCDC.

Practical

Determination of most profitable level of capital use. Optimum allocation of limited amount of capital among different enterprises. Analysis of progress and performance of cooperatives using published data. Analysis of progress and performance of commercial banks and RRBs using published data.Visit to a commercial bank, cooperative bank and cooperative society to acquire firsthand knowledge of their management, schemes and procedures of lending and sanction of loans .Estimation of credit requirement of farm business – A case study. Preparation and analysis of balance sheet – A case study.Preparation and analysis of balance sheet – A case study.Preparation and analysis of balance sheet – A case study.Preparation and analysis of balance sheet of a loan proposal – A case study. Techno-economic parameters for preparation of projects. Preparation of Bankable projects for various agricultural products and value added products. Seminar on selected topics.

Lecture outlines

Theory

 Agricultural Finance - Meaning, definition, nature and scope - Significance – Micro and macro finance - Capital and credit problems, need and their importance in Agriculture.

2. Credit - Meaning and definition - Classification of credit based on different criteria with examples.

3. Credit analysis - Economic feasibility tests - 3 R's of credit analysis - Returns to investment - Repayment capacity - Meaning, causes of poor repayment capacity of farmers, suggestions to improve repayment capacity - Risk bearing ability - Meaning, sources of risk, means to strengthen RBA.

4. Five Cs of credit – Character – Capacity – Capital - Condition and Commonsense - Seven Ps of credit - Principle of Productive purpose - Principle of personality - Principle of productivity - Principle of phased disbursement -Principle of proper utilization - Principle of payment and Principle of protection.

5. Social control and nationalisation - Meaning, objectives and their importance
Privatisation of commercial banks - Need and importance for institutional sources and structure of agricultural lending from different sources.

6. Lead bank scheme - Origin, objectives, functions - District credit plan – Regional Rural Banks (RRBs) - Origin, objectives, functions — RRBs in Andhra Pradesh.

7. Crop loan system - Objectives, importance, features of crop loan system - Scale of finance - Meaning and estimation and role of district level consultative committee - Term loans – Objectives and meaning of unit costs, fixation of unit costs and NABARD guidelines.

 8. Financial inclusion - Meaning and importance - Micro finance - Meaning, importance, agencies providing microcredit banks, NBFCs, NGOs, and Govt. agencies - SHGs and their role in microfinance and bank linkages - Micro finance lending and control act in Andhra Pradesh - Objectives and important features.
 9. Schemes for financing weaker sections - Differential interest rate (DIR) -Integrated rural development programme (IRDP) - Swarnajayanti gram swarozgar yojana (SGSY) - Self help groups (SHGs) etc., Srinidhi, MUDRA.

10. Higher financing agencies - Reserve Bank of India (RBI) - Objectives and functions and role in agricultural development and finance. National Bank for Agricultural and Rural Development (NABARD) - Origin, functions, activities and role in agricultural development.

11. World Bank (WB) - Objectives and functions -World Bank group institutions – role and functions of International Bank for Reconstruction and Development (IBRD) - International Development Agency (IDA) - International Finance Corporation (IFC), MIGA, ISID.

12. Crop insurance - Meaning and its advantages and limitations in application
Agricultural insurance company of India - Objectives and functions - Indemnity - Meaning, premiums and claims - Prime Minister's Fasal Bhima
Yojana (PMFBY) - Salient features - Weather based crop insurance - Salient features and its importance.

13. Agricultural project - Meaning, characteristics of agril. projects, project cycle and explanation of different phases of project cycle - Basic guidelines for preparation of project reports.

14. Co-operation - Meaning, Scope, importance and definition - Principles – Objectives of co-operation, significance of cooperatives in Indian agriculture.

15. Brief history of cooperative movement development in India - Recent developments in Indian cooperative movement - Short comings of Indian cooperative movement and remedies.

16. Agricultural Cooperative institutions in India - co-operative credit structure in India and Andhra Pradesh – Objectives and functions of state level (APCOB), district level (DCCB) and Village level (PACS) cooperative societies - Functions of marketing, consumer societies, multi-purpose cooperatives, farmers' service cooperative societies, dairy cooperatives - Andhra Pradesh mutually aided Cooperative Societies Act (1995) - Role of International Cooperative Alliance (ICA), National cooperative Union of India (NCUI), National Cooperative Development Council (NCDC).

Practical

1. Estimation of credit requirement of farm business – A case study.

2. Estimation of scale of finance - Unit costs and KCC.

3. Determination of most profitable level of capital use.

4. Analysis of progress and performance of priority sector lending by commercial banks, Cooperatives, RRBs and non-institutional sources using published data. Working out different repayment plans with examples.

5. Lump sum repayment /straight-end repayment - Variable or quasi variable repayment.

6. Amortized decreasing repayment plan and amortized even repayment plan.

7. Estimation of indemnity for crop insurance claims.

8. Visit and study of a commercial bank to acquire firsthand knowledge of their management, schemes and procedures of lending and sanction of loans.

9. Visit and study of a cooperative bank - PACS/ DCCB to acquire firsthand knowledge of their management, schemes and procedures of lending and sanction of loans.

10. Visit and study of a cooperative society - dairy/ consumers to acquire firsthand knowledge of their management, schemes and activities.

11. Preparation and analysis of balance sheet – A case study.

12. Preparation and analysis of income statement – A case study.

13. Appraisal of a loan proposal – A case study.

*18 COM 201 AGRO INFORMATICS

2(1+1)

Course outlines Theory

Introduction to Computers, Anatomy of Computers, Memory Concepts, Units of Memory, Operating System, definition and types. Applications of MS-Office for creating, Editing and Formatting a document, Data presentation, tabulationand creation, statistical analysis, mathematical expressions, graph Database, concepts and types, creating database, uses of DBMS in Agriculture, Internet and World Wide Web (WWW), Concepts, components and creation of web,HTML, XML coding. e-Agriculture, concepts, design and development. Application of innovative ways to use information and communication technologies (IT) in Agriculture. ICT for Data Collection, formation of development programmes, monitoring and evaluation of Programmes. Computer Models in Agriculture: statistical, weather analysis and crop simulation models, concepts, structure, inputs-outputs files, limitation, advantages and application of models for understanding plant processes, sensitivity, verification, calibration and validation. IT application for computation of water and nutrient requirement of crops, Computer-controlled devices (automated systems) for Agri-input management, Smartphone mobile apps in Agriculture for farm advises, market price, postharvest management etc; Geospatial technology, concepts, techniques, components and uses for generating valuable agri-information. Decision support systems, taxonomy, components, framework, classification and applications in Agriculture, DSS, Agriculture Information/Expert System, Soil Preparation of Systems etc for supporting Farm decisions. Information contingent crop-planning and crop calendars using IT tools.

Practical

Study of Computer Components, accessories, Introduction of different operating systems such as windows, Unix, Linux, Creating, Files & Folders, File Management. Use of MS-WORD and MS Powerpoint for creating, editing and presenting a scientific Document, Handling of Tabular data, animation, video tools, art tool, graphics, template & designs. MS-EXCEL - Creating a spreadsheet, use of statistical tools, writing expressions, creating graphs, analysis of scientific data, handling macros. MS-ACCESS: Creating Database, preparing queries and reports, demonstration of Agri-information system. Introduction to World Wide Web (WWW) and its components, creation of scientific website, presentation and management agricultural information through web. Preparation of Inputs file for CSM and study of model outputs, computation of water and nutrient requirements of crop using CSM and IT tools. Use of smart phones and other devices in agro-advisory and dissemination of market information. Introduction of Geospatial Technology,

demonstration of generating information important for Agriculture. Hands on practice on preparation of Decision Support System.

Lecture outline

Theory

1. Introduction to computers- Advantages- Disadvantages- Applications – Anatomy of Computers- Input / output devices -Memory Concepts - Units of Memory - RAM – ROM – PROM – EPROM - EAPROM - Cache Memory.

2. Operating system - Definition and types - WINDOWS OS – Features – Desktop – Icons etc.

3. Applications of MS-Office - MS- Word - Creating - Editing and formatting a document.

4. MS Word - Features of good word processor - Mail merge – Drop cap- Auto text- Track changes – Equation editor etc.

5. MS- Excel - Data presentation, Tabulation – Merging of cells and graph creation - Mathematical expressions.

6. MS- Excel - Data analysis tool pack – Pivot table and graph etc.,

7. MS Access – Database - concepts and types - creating database - Uses of DBMS in agriculture.

8. MS Access - Objects of data base – Types of fields etc.,

9. Internet and World Wide Web (WWW) – Concepts - Components and creation of web.

10. HTML - XML coding.

11. e-Agriculture - Concepts - Design and development - Application of innovative ways to use information and communication technologies (IT) in Agriculture.

12. ICT for Data Collection - Formation of development programmes – Monitoring and evaluation of Programmes - Computer Models in Agriculture statistical weather analysis and crop simulation models – Concepts – Structure

 Inputsoutputs files – Limitation - Advantages and application of models for understanding plant processes – Sensitivity –Verification - Calibration and validation.

13. IT application for computation of water and nutrient requirement of crops -Computer controlled devices (automated systems) for Agri-input management -Smartphone mobile apps in Agriculture for farm advises - Market price -Postharvest management etc,.

14. Geospatial technology – Concepts – Techniques - Components and uses for generating valuable agri-information.

15. Decision support systems – Taxonomy – Components – Framework – Classification and applications in Agriculture - DSS - Agriculture Information/Expert System - Soil Information Systems etc for supporting Farm decisions.

16. Preparation of contingent crop-Planning and crop calendars using IT tools.

Practical

 Booting of computer and its shut down - Practicing Windows operating system - Use of mouse -Title bar – Minimum, maximum and close buttons - Scroll bars - Menus and tool bars.

2. Windows explorer- Creating folder - Copy and paste functions - Controlpanel-Notepad -Wordpad etc.

3. MS word - Creating a document, saving and editing

4. Use of options from tool bars – Format - Insert and tools (Spelling and Grammar) - Alignment of paragraphs and text.

5. Creating a table - Merging of cells - columns and row width - Formats etc.

6. MS- Excel - Creating a spreadsheet - Alignment of rows - columns and cells using format tool bar.

7. Entering formula expression through formula tool bar and use of in-built functions Sum – Average – Stdev – Maximum and minimum.

8. Data analysis using inbuilt tool packs test of significance.

9. Data analysis using inbuilt tool packs correlations and regressions.

10. Creating graphs and saving with and without data.

11. MS- Power Point - Creating slides, layouts, action buttons, multimedia features.

12. MS- Access - Creating a data base, structuring with different types of fields.

13. Use of query facility for accessing the information.

14. Transforming the data of word - Excel and Access to other formats.

15&16. Internet concepts - Creating Email - Search Engines - Website designing.

*18 FMP 201 FARM MACHINERY AND POWER 2(1+1)

THEORY

Unit I: Farm Power & IC engines

Status of Farm Power in India, Sources of Farm Power, I.C. engines, working principles of IC engines, comparison of two stroke and four stroke cycle engines , Study of different components of IC engine, I.C. engine terminology and solved problems, Familiarization with different systems of I.C. engines: Air cleaning, cooling, lubrication, fuel supply.

Unit-II : Tractor & functional components

Hydraulic control system of a tractor, Familiarization with Power transmission system clutch, gear box, differential and final drive of a tractor ,Tractor types, Cost analysis of tractor power and attached implement,

Unit -III: Tillage implements

Familiarization with Primary and Secondary Tillage implement, Implement for hill agriculture.

Unit-IV: Sowing & Intercultural implements

Familiarization with sowing and planting equipment, calibration of a seed drill and solved examples, implement for intercultural operations.

Unit-V: Plant Protection and Harvesting equipments

Familiarization with Plant Protection equipment, Familiarization with harvesting and threshing equipment.

PRACTICALS

Study of different components of I.C. engine - To study air cleaning and cooling system of engine - Familiarization with clutch – Transmission Differential and final drive of a tractor - Familiarization with lubrication and fuel supply system of engine - Familiarization with brake – Steering - Hydrauliccontrol system of engine - Learning of tractor driving - Familiarization with operation of power tiller - Implements for hill agriculture - Familiarization with different types of primary and secondary tillage implements - Mould board plough - Disc plough and disc harrow -Familiarization with seed-cum- fertilizer drills their seed calibration - Planters mechanism and and transplanter metering Familiarization with different types of sprayers and dusters – Familiarization with different inter-cultivation equipment - Familiarization with harvesting and threshing machinery.

LECTURE SCHEDULE:

1. Farm power in India - sources of farm power and their use in agriculture

2. Working principles of IC Engines-Two stroke and Four stroke engines - applications – comparison-Engine terminology.

- 3. Components of IC engine and systems of IC engine air cleaning, cooling, lubricating and fuel supply systems.
- 4. Tractors- types transmission system- clutch, gearbox, differential and final drive hydraulic system.
- 5. Cost analysis of tractor with attached implement.
- Tillage, objectives, types ploughing methods. Primary tillage- mould board plough, disc plough, chisel plough and subsoil plough - components and functions, types, advantages and disadvantages
- Secondary tillage equipment cultivators, harrows, levelers, land forming equipment – rotovators – puddlers - manure tramplers and cage wheels, Implements for Hill agriculture.
- 8. Sowing methods seed drills and planters- seed cum fertilizer drills components and functions-Calibration.
- 9. Mid semester examination
- 10. Paddy transplanters, types, working principle, field and nursery requirements
- 11. Implements for intercultural operations cultivators, sweep, junior hoe, manual weeders and power operated weeders for wet land and garden land
- 12. Sprayers and their functions, classification, manually operated sprayers, terminology, Nozzle types.
- 13. Power operated sprayers Tractor operated boom sprayer, Knapsack mist blower cum duster Tall tree sprayer-dusters, types and uses.
- 14. Tools for horticultural crops propagation tools, planters and harvesting tools and machinery
- **15.** Threshing of crop, thresher and its principles of operation threshing losses.
- 16. Harvesting equipment reapers mowers and combine harvesters types, construction and operation-Balers.
- 17. Harvesting machinery for groundnut, tuber crops, Cotton and sugarcane

PRACTICAL SCHEDULE:

- 1. Study of working of two and four stroke IC engines and their systems with solved problems.
- 2. Study of Tractor clutch, gearbox, differential and final drive. Study of brake steering, and hydraulic control.
- 3. Learning driving of tractor and power tiller
- 4. Study of tractors and power tillers their operation and maintenance
- 5. Study of mould board plough, methods of ploughing- with solved problems.
- Disc plough and subsoiler and their components- Hitching and adjustment of plough - field operation of different tractor drawn primary tillage machinery.
- 7. Study of cultivator, disc harrows, Rotavator, bund former, ridger, leveller and puddling implements and their operation.

- 8. Study of seed drills, planters and seed-cum-fertilizer drills and their components and metering mechanisms calibration- simple problems on calibration.
- 9. Study and operation of machinery for rice cultivation puddling implements- rotary puddlers and cage wheels, tray seeder for rice nursery, transplanters- types operation and maintenance- Drum seeder, conoweeder, power weeder and finger type weeder.
- 10. Study of different inter-cultivation equipment for uplands manual, animal drawn, power operated - tractor and power tiller operated - field operation
- 11. Study of plant protection equipment manually operated sprayers and dusters, knapsack mist blower cum duster, tractor operated sprayers- their operation, adjustment, calibration and safety requirements
- 12. Study of tools for Hill agriculture and horticultural crops propagation tools, vegetable transplanter, harvesting tools -lawn mower, hole diggers, tree climber, shredders for crop residue.
- 13. Threshing machinery for paddy and identification of its componentsdifferent threshing drums - calculation of efficiency and losses.
- 14. Study of paddy reaper and paddy combine- their systems, method of operation and adjustment.
- 15. Study of harvesters for root crops turmeric and tapioca and groundnut diggers
- 16. Problems on cost of operation of tractor operated machinery.
- 17. Final practical examination

*18 HOR 201 Production technology of vegetables and spices 2(1+1)

Theory

Vegetables

Unit I: Scope, Importance and classification of vegetables

Importance of vegetable growing –area and production of vegetables in India and Tamil Nadu- National economy- nutritive value of vegetables and human nutrition.

Unit II: Production technology of tropical vegetable crops

Origin - climate and soil – varieties and hybrids – seeds and sowing – transplanting – water and nutrient management – fertigation – weed management – use of micronutrients and plant growth regulators - physiological disorders - maturity indices – harvest – pest and diseases – seed production

Crops: Tomato, chilli, brinjal, bhendi, gourds (ash gourd, pumpkin, bitter gourd, ridge gourd, bottle gourd, snake gourd and watermelon) onion, cassava, amaranthus and moringa.

Unit III: Production technology of temperate vegetable crops

Origin -climate and soil – varieties and hybrids – seeds and sowing – transplanting - water and nutrient management – fertigation – weed management – use of micronutrient and plant growth regulators-physiological disorders- maturity indices – harvest – pest and diseases – seed production

(**Crops:** Cabbage, cauliflower, potato, carrot, radish, beetroot, peas and french beans, Protected cultivation of vegetables (tomato, capsicum and cucumber).

SPICES

Unit IV: Crop production techniques of major spices

Spices- scope and importance - classification of spices - origin, area and production - role of commodity boards- export potential of spices.

Climate and soil - varieties - propagation - nursery management and planting – cropping systems-training practices - nutrient, water and weed management - shade regulation - maturity indices - harvest and yield - pests and diseases - processing - value addition.

Black pepper, Cardamom, Turmeric, Ginger and Garlic

Unit V: Crop production techniques in seed spices, tree spices and other spices

Climate and soil- varieties - propagation, nursery management and planting- training , pruning canopy management- weed and water management-

shade regulation- nutrient management including drip and fertigation – harvest and yield – pests and diseases – processing – value addition.

Coriander, Fenugreek, Cumin, Fennel, Clove, Nutmeg, Cinnamon, Curry leaf, Tamarind and Herbal spices

Practical

Vegetables

Layout of kitchen garden – seed sowing – nursery management – graftingin vegetables water and nutrient management – fertigation – weed management – practices in use of plant growth regulators - Special horticultural practices in vegetable production - study of maturity indices - Identification of physiological disorders - protected cultivation - visit to vegetable nursery unit/ protected cultivation unit.

Spices

Identification of spices - description of varieties - Propagation methods rapid multiplication techniques, seed collection and extraction - raising of nurseries - seed sowing - seed treatment - fertilizer application - harvesting – pests and diseases - processing - cost economics - visit to spice gardens

Black pepper, Cardamom, Turmeric, Ginger, Coriander, Fenugreek, Curry leaf, Clove, Nutmeg and Cinnamon

Theory lecture schedule

- 1. Importance of vegetable growing –area and production of vegetables in India and Tamil Nadu- National economy- nutritive value of vegetables and human nutrition.
- Climate and soil varieties and hybrids seeds and sowing transplanting

 water and nutrient management fertigation weed management use of
 micronutrients and plant growth regulator physiological disorders maturity
 indices harvest and yield pest and diseases seed production of tomato, chilli
 and brinjal
- Climate and soil varieties and hybrids seeds and sowing transplanting

 water and nutrient management fertigation weed management use of
 micronutrients and plant growth regulator physiological disorders maturity
 indices harvest and yield pest and diseases seed production of bhendi and
 onion.
- 4. Climate and soil varieties and hybrids seeds and sowing transplanting

 water and nutrient management fertigation weed management use of
 micronutrients and plant growth regulator physiological disorders maturity indices harvest and yield– pest and diseases seed production of
 gourds (ash gourd, pumpkin, bitter gourd, ridge gourd, bottle gourd, snake
 gourd and watermelon)

- 5. Climate and soil varieties and hybrids seeds and sowing transplanting
 water and nutrient management fertigation weed management use of micronutrients and plant growth regulator-physiological disorders maturity indices harvest and yield pest and diseases seed production of cassava and potato
- Climate and soil varieties and hybrids seeds and sowing transplanting

 water and nutrient management fertigation weed management use of
 micronutrients and plant growth regulator -physiological disorders -maturity
 indices harvest and yield pest and diseases seed production of moringa and
 amaranthus.
- 7. Climate and soil varieties and hybrids seeds and sowing transplanting

 water and nutrient management fertigation weed management use of
 micronutrients and plant growth regulator physiological disorders maturity
 indices harvest and yield pest and diseases seed production of cabbage and
 cauliflower.
- Climate and soil varieties and hybrids seeds and sowing transplanting

 water and nutrient management fertigation weed management use of
 micronutrients and plant growth regulator physiological disorders maturity indices harvest and yield pest and diseases seed production of
 carrot, beetroot and radish.

9. Mid -semester examination

- 10. Climate and soil varieties and hybrids seeds and sowing transplanting - water and nutrient management – fertigation – weed management – use of micronutrients and plant growth regulator – physiological disorders - maturity indices – harvest and yield – pest and diseases – seed production of french beans and peas.
- 11. Protected cultivation of vegetables (tomato, capsicum and cucumber)
- 12. Spices- scope and importance classification of spices origin, area and production role of commodity boards- export potential of spices. Black pepper climate and soil- varieties propagation rapid multiplication techniques nursery management and planting- nutrient, water and weed management special horticultural practices role of growth regulators shade regulation- maturity indices harvest and yield pests and diseases post harvest practices-processing and value addition.
- 13. Cardamom climate and soil varieties propagation nutrient, water and weed management-shade regulation- mulching maturity indices harvest and yield pests and diseases –post harvest practices- processing and value addition.
- 14. **Turmeric , Ginger and Garlic** Climate and soil- varieties propagation, nursery management and planting- nutrient, water and weed management-

inter cropping- physiological disorders -maturity indices - harvest and yield - pests and diseases –post harvest practices- processing and value addition.

- 15. Seed spices climate and soil- varieties seed treatment/ sowing nutrient, water and weed management- intercropping - maturity indices - harvest and yield - pests and diseases –post harvest practices- processing and value addition.(Coriander, Fenugreek, Cumin and Fennel)
- 16. **Tree spices -** climate and soil varieties propagation, nursery management and planting - nutrient, water and weed management- training and pruning practices- cropping system- special horticultural practices maturity indices - harvest and yield - pests and diseases -post harvest practices- processing and value addition.(**Clove, Nutmeg and Cinnamon**)
- 17. **Tamarind, Curry leaf and herbal spices -** climate and soil- varieties propagation, nursery management and planting- nutrient, water and weed management- canopy management - maturity indices - harvest and yield - pests and diseases – post harvest practices- processing and value addition.

Practical schedule

- 1. Layout of kitchen garden.
- 2. Seed treatment and sowing practices in direct sown vegetables
- 3. Nursery management of transplanted ,bulb and tuber vegetable crops
- 4. Grafting in vegetable crops
- 5. Water and nutrient management fertigation in vegetable crops
- 6. Practices in use of plant growth regulators in vegetable crops
- 7. Special horticultural practices in vegetable production
- 8. Identification of physiological disorders in vegetable crops
- 9. Study of maturity standards and harvesting of vegetables
- 10. Practices in protected cultivation of vegetable crops
- 11. Visit to vegetable nurseries/protected vegetable cultivation unit
- 12. Black pepper and cardamom- identification and description of varieties seed propagation and vegetative propagation – fertilizers application - preparation of plant bio regulators and application – pests and diseases- harvest and post harvest practices.
- 13. Turmeric and ginger- identification and description of varieties- propagation, fertilizers application - preparation of plant bio regulators and application – pests and diseases- harvest and post harvest practices.

- 14. Coriander and Fenugreek identification and description of varieties seed treatment, sowing fertilizer application - pests and diseases- harvest and post harvest practices.
- 15. Clove, Nutmeg and Cinnamon identification and description of varieties
 seed collection and extraction propagation fertilizer application training and pruning pests and diseases- harvest and post harvest practices.
- 16. Tamarind and curry leaf identification and description of varieties seed collection and extraction propagation fertilizer application canopy management pests and diseases- harvest and post harvest practices.
- 17.Visit to spice gardens or commodity boards and working out cost economics of spice crops.

*18 ENS 201 Environmental Studies and Disaster Management 3(2+1)

Theory

Unit 1:

Multidisciplinary nature of environmental studies Definition, scope and importance

Unit 2:

Natural Resources: Renewable and non-renewable resources Natural resources and associated problems. a) Forest resources: Use and over- exploitation, deforestation, case studies. Timber extraction, mining, dams and their effects on forest and tribal people. b) Water resources: Use and over- utilization of surface and ground water, floods, drought, conflicts over water, dams-benefits and problems. c) Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies. d) Food resources: World food problems, changes caused by agriculture and overgrazing, effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies. e) Energy resources: Growing energy needs, renewable and non-renewable energy sources, use of alternate energy sources. Case studies. f) Land resources: Land as a resource, land degradation, man induced landslides, soil erosion and desertification. • Role of an individual in conservation of natural resources. • Equitable use of resources for sustainable lifestyles.

Unit 3:

Ecosystems • Concept of an ecosystem. • Structure and function of an ecosystem. • Producers, consumers and decomposers. • Energy flow in the ecosystem. • Ecological succession. • Food chains, food webs and ecological pyramids. • Introduction, types, characteristic features, structure and function of the following ecosystem. a. Forest ecosystem. b. Grassland ecosystem. c. Desert ecosystem d. Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries)

Unit 4:

Biodiversity and its conservation:- Introduction, definition, genetic, species & ecosystem diversity and biogeographical classification of India. Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values. Biodiversity at global, National and local levels, India as a mega- diversity nation. Hot-sports of biodiversity. Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts. Endangered and endemic species of India. Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.

Unit 5:

Environmental Pollution: Definition, cause, effects and control measures of : a. Air pollution. b. Water pollution. c. Soil pollution. d. Marine pollution. e. Noise pollution. f. Thermal pollution. g. Nuclear hazards. Solid Waste Management: causes, effects and control measures of urban and industrial wastes. Role of an individual in prevention of pollution. Pollution case studies.

Unit 6:

Social Issues and the Environment: From Unsustainable to Sustainable development. Urban problems related to energy. Water conservation, rain water harvesting, watershed management. Environmental ethics: Issues and possible solutions, climate change, global warming, acid rain, ozone layer depletion, nuclear accidents and holocaust. Wasteland reclamation. Consumerism and waste products. Environment Protection Act. Air (Prevention and Control of Pollution) Act. Water (Prevention and control of Pollution) Act. Wildlife Protection Act. Forest Conservation Act. Issues involved in enforcement of environmental legislation. Public awareness.

Unit 7:

Human Population and the Environment: population growth, variation among nations, population explosion, Family Welfare Programme. Environment and human health: Human Rights, Value Education, HIV/AIDS. Women and Child Welfare. Role of Information Technology in Environment and human health. Case Studies.

DISASTER MANAGEMENT

Unit 8:

Natural Disasters- Meaning and nature of natural disasters, their types and effects. Floods, drought, cyclone, earthquakes, landslides, avalanches, volcanic eruptions, Heat and cold waves, Climatic change: global warming, Sea level rise, ozone depletion.

Unit 9:

Man Made Disasters- Nuclear disasters, chemical disasters, biological disasters, building fire, coal fire, forest fire, oil fire, air pollution, water pollution, deforestation, industrial waste water pollution, road accidents, rail accidents, air accidents, sea accidents.

Unit 10 : Disaster Management- Effect to migrate natural disaster at national and global levels. International strategy for disaster reduction. Concept of disaster management, national disaster management framework; financial

arrangements; role of NGOs, community - based organizations and media. Central, state, district and local administration; Armed forces in disaster response; Disaster response; Police and other organizations.

Practical

Field work: Visit to a local area to document environmental assets river/forest/grassland/hill/mountain, visit to a local polluted site Urban /Rural/Industrial/ Agricultural, study of common plants, insects, birds and study of simple ecosystems-pond, river, hill slopes, etc.

Lecture Schedule

- Multidisciplinary nature of environmental studies Definition, scope and importance - Natural Resources: Renewable and non-renewable resources -Natural resources and associated problems
- 2. Forest resources: Use and over-exploitation, deforestation, case studies -Timber extraction, mining, dams and their effects on forest and tribal people
- 3. Water resources: Use and over-utilization of surface and ground water Floods, drought, conflicts over water, dams benefits and problems

4. Mineral resources: Use and exploitation, environmental effects of extracting and using mineral resources, case studies - Food resources: World food problems, changes caused by agriculture and overgrazing

- 5. Effects of modern agriculture, fertilizer-pesticide problems, water logging, salinity, case studies Energy resources: Growing energy needs, renewable and non-renewable energy sources use of alternate energy sources. Case studies.
- 6. Land resources: Land as a resource, land degradation, man induced landslides - Soil erosion and desertification - Role of an individual in conservation of natural resources - Equitable use of resources for sustainable lifestyles
- 7. Ecosystems Concept of an ecosystem Structure and function of an ecosystem Producers, consumers and decomposers Energy flow in the ecosystem Ecological succession Food chains, food webs and ecological pyramids
- 8. Introduction, types, characteristic features, structure and function of Forest ecosystem, Grassland ecosystem and Desert ecosystem
- 9. Introduction, types, characteristic features, structure and function of Aquatic ecosystems : ponds, streams, lakes Rivers, oceans, estuaries
- Biodiversity and its conservation Introduction, definition, genetic, species
 & ecosystem diversity and biogeographical classification of India-

Value of biodiversity: consumptive use, productive use, social, ethical, aesthetic and option values

- Biodiversity at global, National and local levels India as a mega- diversity nation - Hotspots of biodiversity - Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts
- 12. Endangered and endemic species of India Conservation of biodiversity: In-situ and Ex-situ conservation of biodiversity.
- 13. Environmental Pollution Definition, cause, effects and control measures of Air pollution and Noise pollution
- 14. Definition, cause, effects and control measures of Water pollution and Soil pollution
- 15. Definition, cause, effects and control measures of Marine pollution, Thermal pollution and Nuclear hazards
- 16. Solid Waste Management: Causes, effects and control measures of urban and industrial wastes

17. Mid Semester Examination

- 18. Role of an individual in prevention of pollution Pollution case studies -Social Issues and the Environment - From Unsustainable to Sustainable development - Urban problems related to energy
- 19. Water conservation, rain water harvesting, watershed management -Environmental ethics: Issues and possible solutions, climate change, global warming
- 20. Acid rain, ozone layer depletion, Nuclear accidents and holocaust Wasteland reclamation-Consumerism and waste products
- 21. Environment Protection Act Air (Prevention and Control of Pollution) Act
 Water (Prevention and control of Pollution) Act Wildlife Protection Act
 Forest Conservation Act
- 22. Issues involved in enforcement of environmental legislation Public awareness - Human Population and the Environment: Population growth, variation among nations, population explosion, Family Welfare Programme
- 23. Environment and human health: Human Rights, Value Education, HIV/AIDS - Women and Child Welfare - Role of Information Technology in Environment and human health - Case Studies
- 24. **Disaster Management -** Natural Disasters Meaning and nature of natural disasters, their types and effects Floods, drought
- 25. Cyclone, earthquakes, Landslides, avalanches
- 26. Volcanic eruptions, Heat and cold waves, Climatic change: global warming, Sea level rise, ozone depletion

- 27. Man Made Disasters Nuclear disasters, chemical disasters, biological disasters, Building fire, coal fire, forest fire, oil fire
- 28. Air pollution, water pollution, deforestation, industrial waste water pollution
- 29. Road accidents, rail accidents, Air accidents, sea accidents
- 30. Disaster Management Effect to migrate natural disaster at national and global levels
- 31. International strategy for disaster reduction. Concept of disaster management, national disaster management framework; financial arrangements
- 32. Role of NGOs, community based organizations and media in disaster management
- 33. Central, state, district and local administration in disaster management
- 34. Armed forces in disaster response Disaster response; Police and other organizations.

Practical schedule

- 1. Visit to a local area to document environmental assets river/forest/grassland/hill/mountain
- 2. Energy: Biogas production from organic wastes
- 3. Visit to wind mill / hydro power / solar power generation units
- 4. Biodiversity assessment in farming system
- 5. Floral and faunal diversity assessment in polluted and un polluted system
- 6. Visit to local polluted site-Urban/Rural/Industrial/Agricultural to study of common plants, insects and birds
- 7. Environmental sampling and preservation
- 8. Water quality analysis: pH, EC and TDS
- 9. Estimation of Acidity, Alkalinity
- 10. Estimation of water hardness
- 11. Estimation of DO and BOD in water samples
- 12. Estimation of COD in water samples
- 13. Enumeration of *E. coli* in water sample
- 14. Assessment of Suspended Particulate Matter (SPM)
- 15. Study of simple ecosystem pond/river/hills
- 16. Visit to areas affected by natural disaster

Practical Examination

*18 MAT 201 STATISTICAL METHODS

2(1+1)

SCOPE OF THE COURSE

Students will acquire knowledge in basis techniques that are applicable to agricultural sciences. Further the course will provide them good introduction to various statistical analysis used in biological sciences.

OBJECTIVE

To understand and apply fundamental concept of statistical applications in biology and to acquire about theoretical concept of descriptive statistics, testing of hypothesis, correlation, regression and basic design of experiments.

THEORY

Unit I: Descriptive Statistics

Introduction – Measures of central tendency: arithmetic mean, geometric mean, harmonic mean, median and mode –Merits and demerits. Measures of dispersion: Range, Quartile deviation, Mean deviation, standard deviation, and coefficient of variation - Skewness and kurtosis – Merits and demerits.

Unit II: Sampling Theory and Probability Distributions

Sampling theory – population – sample – parameter and statistic – sampling distribution - sampling vs complete enumeration –Types of sampling - simple random sampling – selection using random numbers – Stratified - Systematic sampling.

Probability distributions – Discrete distributions: Bernoulli, Binomial and Poisson. Continuous distribution: Normal distribution – definitions and properties.

Unit III: Testing of hypothesis

Null and alternative hypothesis – types of errors - critical region and tests of significance. Large sample test – single mean and difference between two

means – single proportion and difference between two proportions.

Small sample tests – F-test - t-test for testing the significance of single mean – independent and paired t test – chi square test for testing the association of r x c contingency table.

Unit IV: Correlation and Regression

Correlation – Scatter diagram - Karl Pearson's correlation coefficient – Spearman's rank correlation - computation and properties.

Regression – simple linear regression – fitting of simple linear regression equation – properties of regression coefficient.

Unit V: Analysis of Variance and Experimental Designs

Analysis of Variance (ANOVA) – assumptions – one way and two way classifications. Basic principles of experimental designs – Completely Randomized Design (CRD) – Randomized Block Design (RBD) – Latin Square Design (LSD).

Theory Schedule

- Introduction Measures of central tendency: arithmetic mean, geometric mean, harmonic mean, median and mode –Merits and demerits. TBI 1-5, TBI 25 - 35
- Measures of dispersion: Range, Quartile deviation, Mean deviation, standard deviation, and coefficient of variation - Skewness and kurtosis. TBII 41 – 48
- Sampling theory population sample parameter and statistic sampling distribution - sampling vs complete enumeration –Types of sampling - simple random sampling – selection using random numbers Stratified - Systematic sampling. TBII 316 - 321
- 4. Probability distributions Discrete distributions: Bernoulli TBI 55 57
- 5. Binomial and Poisson distribution TBI 58 61
- 6. Continuous distribution: Normal distribution TBI 55 57
- Null and alternative hypothesis types of errors critical region and tests of significance. TBII.16-17
- 8. Large sample test single mean and difference between two means. Single proportion and difference between two proportions. TBII 20-24
- 9. Mid Semester Examination
- 10. Small sample tests–F-test t-test for testing the significance of single mean TBII 26- 28
- 11. Independent and paired t test TBII 29-38
- 12. Chi square test for testing the association of r x c contingency table. TBII 43-45
- 13. Correlation Scatter diagram Karl Pearson's correlation coefficient Spearman's

rank correlation - computation and properties. TBI 142 – 145
14. Regression – simple linear regression – fitting of simple linear regression equation – properties of regression coefficient. 157 - 165

- 15. Analysis of Variance (ANOVA) assumptions one way and two way classifications. Basic principles of experimental designs. TBI 227 231
- 16. Completely Randomized Design (CRD) Randomized Block Design (RBD). TBI 269 284

17. Latin Square Design (LSD). TBI 315 - 320

Practical schedule

- 1. Computation of arithmetic mean, geometric mean, harmonic mean, median and mode
- 2. Computation of range, standard deviation, variance, coefficient of variance
- 3. Selection of sample using simple random sampling method
- 4. Simple problems in Bernoulli distribution
- 5. Simple problems in Binomial distribution and Poisson distribution
- 6. Simple problems in Normal distribution
- 7. Large sample test test for single proportion and difference between two proportions
- 8. Large sample test test for single mean and difference between two means
- 9. Small samples test t-test for single mean t test for difference between two sample means (equal variances only)
- 10. Paired t-test
- 11. Chi square test
- 12. Computation of Karl Pearson's correlation coefficient
- **13.** Fitting of simple linear regression equation y on x correlation and

regression using MS Excel functions

- 14. Analysis of Completely Randomised Design (CRD) for equal replications only
- 15. Analysis of Randomised Block Design (RBD)
- 16. Analysis of Latin Square Design (LSD) analysis of CRD, RBD and LSD
- **17.** Final Practical Examination

**18 AMP 201 LIVESTOCK AND POULTRY MANAGEMENT 3(2+1)

Theory

Unit I: Introduction to Livestock Management

Significance of Livestock and Poultry in Indian Economy – Livestock and Poultry census – Different livestock development programs of Government of India and Tamil Nadu-Various systems of livestock production-extensive – semi intensive - intensive- mixed-Integrated and specialized farms.

Unit II: Dairy Cattle Management

Important White and Black cattle breeds-classification-indigenous and exotic – Breed characteristics – Breeding - Cross breeding- Upgrading - Economic traits of cattle –Culling - Estrus Cycle – Artificial Insemination – Introduction to Embryo transfer – Housing – Space requirement calf and adult stock – System and types of housing - Feeding and Management of Calf, Heifer, Pregnant, Milch animal and working animals – Nutrition – Ration – Balanced Ration - Characteristics of ration and classification of feed and fodder –Total Mixed Ration - composition of concentrate mixture for different stage - Milking methods - Clean milk production – Factors affecting milk composition – Common diseases of cattle – classification

- symptoms - preventing and control measures.

Unit III: Sheep and Goat Management

Breeds - Sheep and goat classification –– Economic traits - system of rearing - Housing Management – Floor space requirement - Care and Management of young and adult stock – Nutrition – Feed and fodders of Small ruminants – Flushing - Common diseases – prevention and control.

Unit IV: Management of Swine

Classification of breeds – Economic traits - Housing - Nutrition – creep feeding - Care and Management of Adult and Young Stock - Common diseaseprevention and control.

Unit V: Poultry Management

Classification of breeds - Commercial Strains of broilers and layers – Housing – brooding – deep litter and cage system – care and Management of broilers and layers - Nutrition of Chick, grower, Layer and broiler – Incubation and Hatching of Eggs - Common Diseases - Control and prevention.

Practical

Study of external parts of Livestock - Identification of livestock and poultry-Tattooing-ear tags-wing and leg bands-Common restraining methods-Disbudding (or) Dehorning-Different methods of castration- Dentition-Study of type design of animal and poultry houses-Selection of dairy cow and work bullock-Determination of specific gravity, fat percentage and total solids of milk-Demonstration of cream separation, - Identification of feeds and fodder-Economics Dairy, Goat and Swine farming - Study of external parts of Fowl -Preparation of Brooder House - Brooder management-Identification of layer and non layer- Debeaking, delousing and deworming of poultry-Vaccination schedule for broiler and layer-Dressing of broiler chicken - Economics of Broiler and Layer Farming - Visit to a modern Dairy and commercial layer and broiler farms - Demonstration of incubator and setter.

1		

Practical:

- 1. Study of external parts of livestock
- 2. Identification of livestock and poultry
- 3. Common restraining methods of livestock
- 4. Disbudding, Dehorning, Castration and Dentition of livestock
- 5. Study of type design of animal and poultry houses

- 6. Selection of dairy cow and work bullock
- 7. Determination of specific gravity, fat %, total solids, solids not fat
- 8. Demonstration of cream separation
- 9. Identification of feed &fodder
- **10.** Economics of dairy, goat and swine Farming
- 11. Study of external parts of fowl. Preparation of brooder house
- 12. Identification of layer and non-layer
- 13. Debeaking, delousing, deworming of poultry Vaccination schedule for broiler and layer
- 14. Demonstration of dressing of broiler. Economics of layer and broiler farming
- 15. Visit to a modern dairy and commercial layer and broiler farms
- 16. Demonstration of incubator and setter
- **17.** Practical examination

*18 AGR 204 CROP PRODCUTION TECHNOLOGY - II (RABI CROPS) 2(1+1)

Theory:

Unit - I: Sugar Crops

Sugarcane and Sugarbeet - Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices, yield.

Unit - II: Fibre Crops

Cotton, Jute and Mesta - Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices, yield.

Unit - III: Forage Crops

Sorghum, Maize, Pearlmillet, Guinea grass, Cumbu - Napier, Water grass, Buffalo grass, Elephant grass, Kolukkattai grass, Lucerne, Berseem, Desmanthus, Stylosanthus and Cowpea - Economic importance, soil and climatic requirement, varieties, cultural practices and yield.

Unit - IV: Green Manure Crops

Daincha, Sunhemp *S.rostrata,* Glyricidia, Kolingi - Origin, geographic distribution, economic importance, soil and climatic requirement, Varieties, cultural practices, yield.

Unit V: Narcotics

Tobacco, Origin, geographic distribution, economic importance, soil and climatic requirement, varieties, cultural practices.

Practical:

Identification of sugar, fibre, forage and narcotics - nursery preparation and management for sugarcane and tobacco - main field preparation; Seed treatment techniques - Sowing and manuring - Seeding equipment's - Estimation of population - After cultivation practices - Study of growth and yield parameters and yield estimation, harvesting of above crops; Fodder preservationtechniques -Silage and hay making, Cost and returns - Visit to institutes and industries -Farmers' fields.

Theory - Lecture Schedule:

- Sugar crops Sugarcane Origin, geographical distribution, economic importance, soil and climatic requirements - varieties, cultural practices and yield.
- 2. Sugarcane Crop logging, maturity and ripening sugar and gur manufacture Value addition and byproduct utilization.
- 3. Sugarbeet Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices, yield andby product utilization.
- Fibre crops Cotton Origin, geographical distribution, economic importance, soil and climatic requirements, cultural practices, yield and quality parameters.
- 5. Rainfed Cotton, Rice fallow Cotton and transgenic cotton.
- 6. Jute Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield.
- 7. Mesta Origin, geographical distribution, economic importance, soiland climatic requirements, varieties, cultural practices and yield.

8. Mid-semester Examination.

- 9. Sunhemp Origin, geographical distribution, economic importance, soil and climatic requirements, varieties, cultural practices and yield.
- 10. Forage crops Cumbu Napier Hybrid grass and Guniea grass: Economic importance, soil and climatic requirement, varieties, cultural practices and yield.
- 11. Forage crops Sorghum, Maize, Oats and Cowpea: Economic importance, soil and climatic requirement, varieties, cultural practices and yield.
- 12. Forage crops Cenchrus, Lucerne, Hedge lucerne: Economic importance, soil and climatic requirement, varieties, cultural practices and yield.
- 13. Berseem and Desmodium Economic importance, soil and climatic requirement, varieties, cultural practices and yield.

- 14. Silage and hay making green manure and green leaf manure crops.
- 15. Sesbania sp., Kolingi and Glyricidia economic importance, soil and climatic requirement, varieties, cultural practices and yield.
- 16. Narcotics Tobacco Origin, geographical distribution, economic
 importance, soil and climatic requirements, varieties, cultural practices
 yield, curing methods.
- 17. Sugarcane and Cotton based cropping systems in India and Tamil Nadu.

Practical Schedule:

- 1. Identification of sugar crops, fibre, forage, green manure and narcotics in the crop cafeteria.
 - 2. Nursery preparation and management for Sugarcane and Tobacco.
- 3. Acquiring skill in field preparation, sowing and manuring of crops under pure and intercropping situations.
- 4. Acquiring skill in different seed treatment techniques and foliar nutrition of crops.
- 5. Estimation of plant population per unit area for crops.
- 6. Acquiring skill in after cultivation practices in sugarcane detrashing, Cotton –

Earthing up, Tobacco - topping.

- 7. Study on growth parameters of sugar, fibre, forage crops, Greenmanures and narcotics.
- 8. Study on yield parameters and estimation of yield in sugar / fibre.
- 9. Study on yield parameters and estimation of yield in forage and narcotics.
- 10. Cost and returns of important sugar, fibre forage and narcotics.
- 11. Visit to Sugarcane Breeding Institute/ Research Station to study

cultivation of sugarcane and its by products.

- 12. Visit to nearby sugar mill, for observing juice extraction, quality assessment, sugar manufacture and by products.
- 13. Visit to Cotton Research Station, nearby ginning factory and Tobacco curing centre.
- 14. Visit to Dairy Unit / farmers field to acquire skill in hay, silo and silage making.Visit to farmers field to study sugarcane and cotton based cropping systems.
- 15. On / Off Farm visit to study forage crops and green manures.
- 16. Practical examination

*18 ERG 211 RENEWABLE ENERGY AND GREEN TECHNOLOGY 2(1+1)

Course outlines

Theory

Classification of energy sources - Contribution of non-conventional energy sources in agricultural sector - Familiarization with biomass utilization for biofuel production and its application - Familiarization with types of biogas plants and gasifiers – Biogas - Bio-alcohol - Biodiesel and bio oil production and their utilization as bioenergy resource - Introduction of solar energy - Collection and its application - Familiarization with solar energy gadgets - Solar cooker - Solar water heater - Application of solar energy – Solar drying - Solar pond - Solar distillation - Solar photovoltaic system and its application - Introduction of wind energy and their application.

Practical

Familiarization with renewable energy gadgets - To study biogas plants - To study the production process of biodiesel - To study briquetting machine - To study the production process of bio-fuels - Familiarization with different solar energy gadgets – To study solar photovoltaic system - Solar light - Solar pumping - Solar fencing - To study solar cooker - To study solar drying system - To study solar distillation and solar pond.

Lecture outlines

Theory

1. Introduction - Renewable energy sources, classification, advantages and disadvantages.

2. Biomass - Importance of biomass, classification of energy production – Principles of combustion, pyrolysis and gasification.

 Biogas - Principles of biogas production, advantages, disadvantages, utilization.

4. Biogas plants - Classification, types of biogas plants, constructional details of biogas plants.

5. Types of gasifiers - Producer gas and its utilization.

6. Briquettes, briquetting machinery – Types and uses of briquettes -Shredders.

7. Solar energy – Application of solar energy, methods of heat transfer, conduction, convection and radiation.

8. Solar appliances - Flat plate collectors, focusing type collectors, solar air heater.

9. Solar space heating and cooling - Solar energy gadgets, solar cookers, solar water heating systems.

10. Solar grain dryers, solar refrigeration system, solar ponds.

11. Solar photovoltaic system - Solar lantern, solar street lights, solar fencing, solar water pumping system.

12. Wind energy - Advantages, disadvantages, wind mills and types.

13. Constructional details of wind mills, applications of wind mills.

14. Biofuels – Characteristics of various biofuels, different parameters and calorific values.

15. Bio diesel production – Applications, extraction from jatropha.

16. Ethanol from agricultural produce (sugarcane and corn).

Practical

1. Availability and uses of non - conventional energy in agricultural sector.

2. Bio-fuel production from biomass and its application.

3. Practical approach to biogas production and biogas plants capacity and design calculations.

4. Running gasifies and production details of producer gas.

5. Production details of briquettes from briquetting machine.

6&7. Experimenting with solar gadgets like solar-cooler and solar water heater for their performance.

8. Performance of solar photovoltaic system and observing various factors influencing efficiency of the photo-voltaic system.

9. Evaluation of solar pump for agriculture.

10. Study of solar drying system.

11. Study of solar distillation and solar pond.

12. Steps adopted for erecting solar fence.

13&14. Visit to solar wind farm.

15&16. Visit to solar photovoltaic farm.

*18 SAC 201PROBLEMATIC SOILS AND THEIR MANAGEMENT 2(1+1)

Course outlines

Theory

Soil quality and health, Distribution of Waste land and problem soils in India. Their categorization based on properties. Reclamation and management of Saline and Sodic soils, Acid soils, Acid Sulphate soils, Eroded and Compacted soils, Flooded soils, Polluted soils.Irrigation water – quality and standards, utilization of saline water in agriculture.

Remote sensing and GIS in diagnosis and management of problem soils. Bio remediation through multipurpose tree species of soils, land capability and classification, land suitability classification. Problematic soils under different Agroeco systems.

Practical

Field identification of problem soils. Determination of soil pH, EC, gypsum requirement of alkali soils, lime requirement of acid soils, calcium carbonate content in soils. Water quality assessment (pH, EC, alkalinity, chlorides, SAR, RSC).

Lecture outlines

Theory

1. Problem soils –Definition – Different types of problematic soils – Extent and distribution of problematic and wastelands soils in different agro-eco systems and in Andhra Pradesh.

2. Salt affected soils – Origin and formation - Distribution of salt affected soils
 in India and Andhra Pradesh - sCharacteristic features of saline, sodic andsaline
 – sodic soils – Diagnostic criteria based on properties.

 Saline soils – Visual symptoms for identification of saline soils – Build up of salinity - Effect of salinity on plant growth and nutrient availability - Reclamation and management.

4. Sodic soils - Visual symptoms for identification of sodic soils - Effect ofsodicity on plant growth and nutrient availability - Reclamation and management.

5. Acid soils – Extent of area in India and Andhra Pradesh – Formation – Characteristics of acid soils – Sources of soil acidity – nutrient limitations and toxicity – Reclamation of acid soils - Different liming materials used for reclamation – Benefits of liming – Harmful effects of over liming.

6. Acid sulphate soils – Origin – Types – Characterization - Constraints and management.

7. Land degradation - Eroded, compacted, flooded and water logged soils – Biologically sick soils – Effects on plant growth – Management. 8. Polluted soils – Definition – Sources of pollution – Bio solid wastes – Industrial effluents (distillery, paper mill, tannery, textiles industrial effluents)

Mechanism of interaction of wastes with soil.

9. Soil pollution - Potentially toxic elements - Excessive use of fertilizers, pesticides and weedicides – Heavy metal contamination – Management.

10. Bio-remediation of problem soils through Multi Purpose Tree Species.

11. Taxonomic classification of soils - Land Capability Classification.

12. Land suitability classification - Index – Criteria - Different approaches – Land suitability for different crops.

13. Remote Sensing and GIS techniques in diagnosis, mapping and management of degraded and problematic soils.

 Soil health and quality – Definition - Concepts – Soil resilience – Factors affecting soil quality (Physical, chemical and biological) – Assessment of soil quality -Management and improvement of soil quality.

15. Irrigation water – Quality and standard parameters - Classification basedon ICAR, CSSRI and USDA criteria.

16. Guidelines for judging quality of water - Utilzation of saline water in agriculture.

Practicals

1. Field identification of problematic soils and visit to degraded lands.

2. Determination of infiltration rates of light soils.

3. Determination of infiltration rates of heavy soils.

4. Determination of aggregate stability of sodic soils.

5. Determination of pH, ECe of acid, saline and sodic soils.

6. Determination of ESP of sodic soils.

7. Determination of GR of sodic soils.

8. Determination of LR of acid soils.

9. Determination of lime content (CaCO3) of cacarious soil.

10. Determination of pH and EC of saline, sodic and good quality irrigation water.

11. Determination of CO3, and HCO3 in irrigation water.

12. Determination of chlorides in irrigation water.

13. Determination of Ca and Mg content in irrigation water.

14. Determination of Na and K content in irrigation water.

15. Computation of quality class, RSC and SAR of irrigation water.

16. Evaluation and interpretation of analytical data of problematic soils and

suggesting ameliorating practices.

*18 HOR 202 PRODUCTION TECHNOLOGY OF FRUITS AND PLANTATION CROPS 2 (1+1)

Course outlines

Theory

Importance and scope of fruit and plantation crop industry in India; Production technologies for the cultivation of major fruits-Mango, Banana, Citrus, Grape, Guava & Litchi, Papaya, Apple, Pear, Peach , Minor fruits- Pineapple, Pomegranate, Jackfruit, Strawberry, Nut crops (Almond & Walnut), Plantation crops-Coconut, Areca nut, Cashew, Tea, Coffee & Rubber.

Practical

Seed propagation, Scarification and stratification of seeds, Propagation methods for fruit and plantation crops including Micro-propagation, Description and identification of fruit, Preparation of plant bio regulators and their uses, Pests, diseases and physiological disorders of above fruit and plantation crops, Visit to commercial orchard.

Lecture outlines

Theory

1. Importance and scope of fruit crops - High density planting - Canopy management - Use of rootstocks in fruit crops.

2. Production technologies of Mango - Botanical name - Family – Origin – Introduction - Varieties – Climate – Soil- Propagation - Planting - Manuring-Irrigation – Inter Cultivation – Harvesting – Yield – Pests - Stem borer - Nut weevil -Fruit fly - Leaf webber - Diseases - Powdery mildew - Anthracnose - Sooty mould - Mango malformation - Physiological disorders-Fruit drop- Alternate bearing- Spongy tissue.

3. Production technology of Banana - Botanical name- Family – Origin -Importance- Varieties – Climate – Soil - Propagation- Planting – Manuring -Irrigation – Inter Cultivation practices – Harvesting – Yield – Pests - Rhizomeweevil - Pseudo Stem weevil- diseases - Sigatoka leaf spot - Panama wilt - Rhizome rot -Bunchy top.

4. Production technology of Citrus - Botanical name – Family - Origin- Introduction
Varieties – Climate – Soil - Propagation - Planting - Manuring - Irrigation – Inter
Cultivation – Harvesting – Yield – Pests -Butter fly - Fruit sucking moth – Citrus
leaf miner - Diseases – Gummosis – Canker - Tristeza - Physiological disorders Fruit drop – Granulation.

5. Production technology of Grape- Botanical name- Family- Origin- Introduction
 Varieties – Climate – Soil - Propagation- Planting- Manuring- Irrigation – Inter
 Cultivation – Harvesting – Yield – Pests-Flea beetles – Mealy

bug - Stem girdler Diseases- Powdery mildew - Downy Mildew – Anthracnose – Physiological disorders- Pink berries.

6. Production technology of Guava and Litchi - Botanical name- Family- Origin-Introduction - Varieties – Climate – Soil- Propagation - Planting- Manuring-Irrigation – Inter Cultivation – Harvesting – Yield – Pests of Guava -Tea mosquito bug - Mealybug - Diseases of Guava – Wilt.

 7. Production technology of Papaya - Botanical name - Family- Origin-Introduction- Varieties – Climate – Soil – Propagation – Planting – Manuring -Irrigation – Inter Cultivation – Harvesting – Yield – Pests - Nematodes - diseases
 Powdery mildew - Foot rot – Mosaic.

8. Production technology of Apple, Pear, Peach - Botanical name – Family – Origin – Importance – Varieties – Climate – Soil – Propagation - Planting- Manuring-Irrigation – Inter Cultivation – Harvesting – Yield – Pests of Apple - Wooly aphid, Codling moth - Pests of Peach - Fruit Fly - Diseases of Apple- Scab – Powdery mildew- Physiological disorder in apple - Bitterpit - Diseases of Pear- Fruit spot - Diseases of Peach- Leaf curl.

9. Production technology of Minor fruits- Pineapple, Pomegranate - Botanical name-Family-Origin-Importance-Varieties – Climate – Soil- Propagation- Planting-Manuring-Irrigation – Inter cultivation – Harvesting – Yield - Pests of pineapple-Mealy bug -Pests of pomegranate- Butterfly -Fruit sucking moth - Diseases of pineapple - Leaf and fruit rot - Diseases of pomegranate - Anthracnose and bacterial leaf spot - Physiological disorders of pomegranate - Fruit cracking.

10. Production technology of Jackfruit, Strawberry, Nut crops (Almond & Walnut) - Botanical name- Family- Origin- Importance- Varieties – Climate – Soil-Propagation- Planting- Manuring- Irrigation – Inter cultivation – Harvesting – Yield – Pests of Jackfruit - Spittle bug - Fruit borer – Diseases of Jackfruit - Rhizopus rot - Die back.

11. Plantation crops- Scope and Importance - Coconut – Botanical name-Family-Origin- Importance- Varieties – Climate – Soil- Propagation- Planting- Manuring-Irrigation – Inter cultivation – Harvesting – Yield – Processing – Pests of Coconut – Black headed caterpillar - Rhinoceros beetle - Red palm weevil diseases of Coconut – Ganoderma - Tatipaka - Drey blight.

12. Production technology of Arecanut - Botanical name- Family- Origin-Importance- Varieties – Climate – Soil- Propagation- Planting- Manuring- Irrigation – Inter cultivation – harvesting – Yield – Processing - Pests of Arecanut - Mite – Spindle bug Diseases of Arecanut - Mahali (Fruit rot)- Foot rot.

13. Production technology of Cashew - Botanical name- Family- Origin-Importance- Varieties – Climate – Soil- Propagation- Planting- Manuring- Irrigation – Inter cultivation – Harvesting – Yield – Processing - Pests of Cashewnut - Stem borer - Tea mosquito bug - Diseases of Cashewnut - Die back or Pink disease – Anthracnose. **14.** Production technology of Tea - Botanical name- Family- Origin- Importance-Varieties – Climate – Soil- Propagation- Planting- Manuring- Irrigation – Inter cultivation – Harvesting – Yield - Processing- Pests of Tea - Tea mosquito bug- Red spider mite - Diseases of Tea - Algal leaf spot- Blister blight.

15. Production technology of Coffee - Botanical name- Family- Origin- Importance-Varieties – Climate – Soil- Propagation- Planting- Manuring- Irrigation – Inter cultivation – Harvesting – Yield - Processing- Pests of Coffee - White borer – Red borer and Green scales – Diseases of Coffee - Rust- Die back -Berry blotch.

16. Production technology of Rubber - Botanical name- Family- Origin-Importance- Varieties – Climate – Soil- Propagation- Planting- Manuring- Irrigation – Inter cultivation – Harvesting – Yield - Processing- Pests of Rubber - Scale insect -Mealy bug and mite - Diseases of Rubber - Birds eye spot - Pink disease.

Practical

1. Seed propagation-Scarification and stratification of seeds.

- 2. Propagation methods for fruit crops.
- 3. Propagation methods for plantation crops.
- 4. Micro-propagation.
- 5. Description and identification of fruit crops.
- 6. Preparation of plant bio regulators and their uses.
- 7. Pests and diseases of Mango, Banana, Citrus.
- 8. Pests and diseases of Grape, Papaya, guava.
- 9. Pests and diseases of Apple, Pear, Peach.
- 10. Pests and diseases of Pineapple, Pomegranate, Jackfruit.
- 11. Pests and diseases of Coconut, Arecanut.
- 12. Pests and diseases of Cashew, Rubber.
- 13. Pests and diseases of Coffee and Tea.
- 14. Physiological disorders of fruit crops Mango, Citrus, Grape.
- 15. Physiological disorders of the plantation crops.
- 16. Visit to commercial plantations/ fruit orchards.

*18 SST 201 Principles of Seed Technology 3(2+1)

Theory

Unit I - Seed: Importance and biology

Seed and seed technology: definition -importance -Characters of good quality seed -Seed development and maturation - Germination - phases of seed germination - Dormancy - types of seed dormancy - Different classes of seed generation system of seed multiplication in supply chain - Seed replacement rate and varietal replacement - Seed Multiplication Ratio -Seed renewal period. Varietal deterioration of crops - causes and maintenance.

Unit II - Seed Production

Principles of seed production- Foundation and certified seed production of varieties and hybrids - Cereals - rice, maize, sorghum and bajra - Pulses - greengram, blackgram and redgram - Oilseeds - groundnut, sesame, sunflower and castor - Cotton, Forage crops - Cenchrus sp and lucerne - Vegetables - tomato, brinjal, chillies, bhendi, onion and gourds - bittergourd, ashgourd, snakegourd, ribbedgourd, bottlegourd and pumpkin. Principles of GM crop and organic seed production.

Unit III - Post harvest handling of seeds

Post harvest handling of seeds - threshing methods - drying - methods of seed drying - Seed processing - seed cleaning and grading - Processing equipments -cleaner cum grader -Upgrading equipments - specific gravity separator, colour sorter, indented cylinder separator, spiral separator, magnetic separator, needle separator - working principles - Seed quality enhancement techniques - importance - seed fortification, seed priming, seed coating, seed pelleting.

Unit IV - Seed Quality Control and Seed Testing

Seed certification - phases of certification, procedure for seed certification, field inspection, field counts, field and seed standards. Post harvest inspection processing, bagging and tagging. Seed Act and Rules - Seed law enforcement. Duty and powers of seed inspector, offences and penalties. Seeds Control Order 1983 -Salient features of PPV&FRA 2001 - National Seed Policy 2002 - Seed Bill 2004. Seed testing for quality assessment - importance - Varietal identification through grow out test, molecular and biochemical test. Detection of genetically modified crops.

Unit V - Seed Storage and marketing

Seed storage – principles- factors affecting seed longevity during storage – Seed treatments and packaging materials - measures for pest and disease control during storage and godown sanitation. Seed marketing - structure and organization - sales promotional activities. factors affecting seed marketing and demand - International seed movement - role of international organizations, WTO and OECD in seed trade.

Practical

Study on seed structure of major cereals - rice, wheat, maize, sorghum and bajra - Pulses - greengram, blackgram, redgram, bengalgram and field pea -Oilseeds - groundnut, sesame, sunflower, castor, soybean and mustard - Cotton - Forage crops - Vegetable crops. Seed production techniques - identification of physical and genetic contaminants - supplementary pollination in hybrid rice detasselling techniques in hybrid maize - emasculation and dusting techniquein cotton - supplementary pollination in sunflower - pre-germinative technique and enhancing female flowers in cucurbits - assessment of physiological maturity indices - seed extraction methods in vegetables. Visit to seed production farms -Seed enhancement techniques - seed coating, seed priming and seed pelleting. Visit to seed processing plant. Seed certification - field inspection and counting procedure - Seed sampling and testing - seed moisture content, physical purity, seed germination, viability - Seed and seedling vigour test - Seed health test- Genetic purity test -grow out test and electrophoresis - Seed production planning economics - Visit to seed testing laboratory.

Theory lecture schedule:

- 1. Seed and seed technology definition -importance -Characters of good quality seed.
- 2. Seed development and maturation.
- 3. Germination phases of seed germination Dormancy types of seed dormancy.
- Different classes of seed generation system of seed multiplication in supply chain - Seed replacement rate and varietal replacement - Seed Multiplication Ratio -Seed renewal period.
- 5. Varietal deterioration of crops causes and maintenance.
- 6. Principles of seed production factors affecting seed production physical and genetic contaminants.
- 7. Seed production techniques in varieties and hybrids of rice.
- 8. Seed production techniques in varieties and hybrids of maize.
- 9. Seed production techniques in varieties and hybrids of sorghum and bajra.
- 10. Seed production techniques in greengram and blackgram varieties.
- 11. Seed production techniques in varieties and hybrids of redgram.
- 12. Seed production techniques in varieties and hybrids of sunflower and groundnut varieties.

- 13. Seed production techniques in varieties and hybrids of castor and sesame varieties.
- 14. Seed production techniques in varieties and hybrids of cotton.
- 15. Seed production techniques in Cenchrus species and lucerne.
- 16. Seed production techniques in varieties and hybrids of tomato, brinjal and chillies.
- 17. Seed production techniques in varieties and hybrids of bhendi and onion.
- 18. Mid semester examination.
- 19. Seed production techniques in varieties and hybrids of gourds bittergourd, ashgourd, snakegourd, ribbedgourd, bottlegourd and pumpkin.
- 20. Principles of GM crop and organic seed production.
- 21. Post harvest handling of seeds threshing methods drying methods of seed drying.
- 22. Seed processing principle importance seed processing sequence for different crops equipments.
- 23. Principles and mechanism of seed cleaning and grading processing equipments cleaner cum grader specific gravity separator.
- 24. Principles and mechanism of upgrading equipments colour sorter indented cylinder separator - spiral separator - magnetic separator - needle separator
- 25. Seed quality enhancement techniques importance seed fortification seed priming seed coating seed pelleting.
- 26. Seed certification phases of certification, procedure for seed certification, field inspection, field counts, field and seed standards post harvest inspection processing bagging and tagging.
- 27. Seed Act and Rules Seed law enforcement Duties and powers of seed inspector offences and penalties Seeds Control Order 1983.
- Salient features of PPV&FRA, 2001 National Seed Policy, 2002 Seed Bill, 2004.
- 29. Seed testing for quality assessment importance methods.
- 30. Varietal Identification grow out test molecular and biochemical test Detection of genetically modified crops.
- 31. Seed storage principles factors affecting seed longevity during storage.
- 32. Seed treatment and packaging materials measures for pest and disease control during storage and godown sanitation.
- 33. Seed marketing structure and organization sales promotional activities factors affecting seed marketing and demand.

34. International seed movement - role of international organizations - WTO and OECD in seed trade.

Practical schedule:

- 1. Study on external and internal seed structure and identification of major cereals pulses oilseeds cotton forage crops and vegetable crops.
- 2. Practicing supplementary pollination techniques in hybrid rice and detasselling techniques in hybrid maize.
- 3. Practicing emasculation and dusting technique in cotton and supplementary pollination in sunflower.
- 4. Practicing pre-germinative technique and female flowers production enhancement techniques in cucurbits.
- 5. Assessment of physiological maturity indices in various crops and seed extraction methods in vegetables.
- 6. Visit to seed production farms.
- 7. Seed enhancement techniques Seed coating seed priming and seed pelleting.
- Seed certification field inspection and counting procedure identification of physical and genetic contaminants in seed production plots and roguing.
- 9. Seed testing seed sampling mixing dividing equipments.
- 10. Estimation of seed moisture content and physical purity.
- 11. Seed germination testing tetrazolium test for viability evaluation.
- 12. Genetic purity test grow out test electrophoresis.
- 13. Seed health testing methods.
- 14. Seed and seedling vigour test brick gravel test, paper piercing test cool and cold test accelerated ageing test.
- 15. Seed production planning economics.
- 16. Visit to seed processing plant and seed testing laboratory.
- **17.** Final practical examination.

*18 AGR 203 FARMING SYSTEMS AND SUSTAINABLE AGRICULTURE 1(1+0)

Course Outlines Theory

Farming system-scope, importance, and concept; Types and systems of farming system and factors affecting types of farming; Farming system components and their maintenance; Cropping system and pattern, multiple cropping system, efficient cropping system and their evaluation; Allied enterprises and their importance, tools for determining production and efficiencies in cropping and farming system; Sustainable agriculture, problems and its impact on agriculture, indicators of sustainability, adaptation and mitigation, conservation agriculture strategies in agriculture, HEIA, LEIA and LEISA andits techniques for sustainability; Integrated farming system, historical background. objectives and characteristics, components of IFS and its advantages, site specific development of IFS model for different agro-climatic zones; Resource use efficiency and optimization techniques, resource cycling and flow of energy in different farming system, farming system and environment; Visit of IFS model in different agro-climatic zones of nearby statesUniversity/ institutes and farmers field.

Lecture outlines

Theory

 Farming System – introduction – scope of farming system – importance – concept – principles of farming system.

2. Types of farming systems – advantages and limitations - suitability – factors affecting the farming system

3. Farming systems – system and systems approach - determinants of farming system – cropping systems(navadhanya concept) and related terminology

4. Allied enterprises – significance of integrating crop and livestock enterprises
– components and maintenance- dairying and sheep and goat rearing – breeds
– housing– feed and fodder requirements – biogas plant

5. Allied enterprises – poultry farming – breeds – housing –feed and fodder requirements – apiculture – species and management

6. Allied enterprises – sericulture – moriculture and silkworm rearing – agroforestry systems suitable for dryland farming

7. Tools for determining production and efficiencies in different farming and cropping systems.

8. Adverse effects of modern agriculture - sustainable agriculture –definition – concept

– goals – elements.

9. Problems related to soil, water and environment - adaptation and mitigation strategies - indicators of sustainability.

10. Conservation agriculture – concept – need - management of natural resources - land, water and vegetation.

11. Techniques for sustainability - Low External Input Agriculture (LEIA)and Low External Inputs for Sustainable Agriculture (LEISA) and HEIA (High External Input Agriculture).

12. Integrated farming system-historical background, objectives and characteristicsadvantages,

13. Site specific development of IFS models for different agro climatic zones of India and A.P.

14. Resource use efficiency – optimization of resource use by different methods in an IFS(Annapurna model)

15. Resource cycling - flow of energy in different farming systems.

16. Visit of IFS model in different agro-climatic zones of nearby states University/ institutes and farmers field

***18 AEC 202 AGRICULTURAL MARKETING, TRADE AND PRICES

18 AEC 202 3 (2+1)

Course outlines

Theory

Agricultural Marketing: concepts and definitions of market, marketing, agricultural marketing, market structure, classification and characteristics of agricultural markets; demand, supply and producer's surplus of agricommodities: nature and determinants of demand and supply of farm products, producer's surplus – meaning and its types, marketable and marketed surplus, factors affecting marketable surplus of agricommodities Marketing process and functions: Marketing process-concentration, dispersion and equalization; exchange functions – buying and selling; physical functions storage, transportation and processing; facilitating functions – packaging, branding, grading, quality control and labeling, AGMARK; Market functionaries and marketing channels: Types and importance of agencies involved in agricultural marketing and their meaning. Marketing channel-definition and meaning, marketing channels for different farm products and farm inputs. Marketing mix and Market segmentation. Product life cycle (PLC) and competitive strategies: Meaning and stages in PLC, characteristics of PLC, strategies in different stages of PLC, pricing and promotion strategies: pricing considerations and approaches - cost based and competition based pricing; market promotion – advertising, personal selling, sales promotion and publicity their meaning and merits & demerits; Market Integration, efficiency, costs and price spread: Meaning, definition and types of market integration; marketing efficiency; marketing costs, margins and price spread; factors affecting cost of marketing; Reasons for higher marketing costs of farm commodities; ways of reducing marketing costs.

Role of Govt. agencies in agricultural marketing: Public sector institutions- CWC, SWC, FCI, & DMI – their objectives and functions; cooperative marketing in India-NAFED, MARKFED.

Agricultural prices and policy: Meaning and functions of price; administered prices; need for agricultural price policy; Risk in marketing: Types of risk in marketing; speculation & hedging; An overview of futures trading in agricultural commodities and role of commodity exchanges. Role of regulatorybodies in futures markets- SEBI, etc

Trade: Concept of International Trade and its importance in globalised world economies, theories of absolute and comparative advantage. Present status and prospects of Indian agri-commodities trade in international trade. WTO: its genesis, objectives, functions and principles of multilateral trade, WTO agreements-Agreement on Agriculture (AoA) and its implications on Indian agriculture; TRIPS and Intellectual property rights and their implications to Indian agriculture.

Practical

Plotting and study of demand and supply curves and calculation of elasticities; Study of relationship between market arrivals and prices of some selected commodities; Computation of marketable and marketed surplus of important commodities; Study of price behaviour over time for some selected commodities; Construction of index numbers; Visit to a local market to study various marketing functions performed by different agencies, identification of marketing channels for selected commodity, collection of data regarding marketing costs, margins and price spread and presentation of report in the class; Visit to market institutions –, SWC, CWC, FCI, cooperative marketing society —DCMS, etc. to study their objectives, role, organization and functioning; Application of principles of comparative advantage of international trade. Seminar on selected topics

Lecture outlines

Theory

 Agricultural Marketing - Concepts and definitions of market, marketing, agricultural marketing - Components of market, dynamics of market structure.
 Classification and characteristics of each type of agricultural markets.

3. Demand and supply of agri-commodities, factors affecting the demand and supply of farm products, producers surplus - Meaning and types and producer's surplus of agri-commodities in India.

4. Meaning of marketable surplus and marketed surplus, importance and their measurement. marketable surplus and marketed surplus of agri-commodities in india, factors affecting them.

5. Marketing process and functions - Marketing process - Concentration, dispersion and equalization - Thompsons classification.

6. Exchange functions – Buying and selling, methods - Physical functions – Storage, transportation and processing.

7. Facilitating functions – Packing and packaging, branding, grading, standardization, FAQs for major crop produce, quality control and labeling -AGMARK, HACCP, FSSAI, CODEX - Need for codex certification and relevance.

8. Market functionaries - Types and importance of agencies involved in agricultural marketing and their role - Producers, middlemen (merchant middlemen, agent middlemen, speculative middlemen, processors, facilitative middlemen).

9. Meaning and definition of marketing channels and supply chain management and their importance.

10. Marketing mix - Meaning, 4Ps of marketing - Product, price, place and promotion - Their importance and characteristics in agriculture.

11. Meaning and stages in PLC (Product Life Cycle) - Characteristics of PLC – Strategies in different stages of PLC. 12. Pricing and promotion strategies - Pricing considerations and approaches – Cost based and competition based pricing.

13. Market promotion – Advertising, personal selling, sales promotion and publicity – Their meaning and merits and demerits.

14. Market segmentation-Meaning and its importance, types of market segmentation and benefits.

15. Market Integration - Meaning, definition - Marketing efficiency - Meaning, definition, measurement of marketing efficiency - Types of market integration and marketing efficiency.

16&17. Marketing costs, margins and price spread - Meaning and measurement, factors affecting cost of marketing - Reasons for higher marketing costs of farm commodities - Ways of reducing marketing costs.

18. Regulated markets-Definition - Important features of regulated markets -Functions, progress and defects.

19. Model regulated market act, objectives and features - APMC Act in Andhra Pradesh - Objectives and features and functions

20. Govt. interventions in agricultural marketing, their need, importance, and role - Important market acts - Public sector institutions - CWC, SWC, FCI, & DMI – Objectives and functions.

21. Cooperative marketing - Meaning and its need and importance, cooperative marketing agencies in India - NAFED, MARKFED – Objectives and functions and activities.

22. Risk in marketing - Types of risk in marketing - Measures to minimize risks, speculation and hedging - Meaning, differences between speculation & hedging, advantages, disadvantages and process of speculation and hedging.

23. An overview of futures trading in agricultural commodities - Forward/future markets

- Meaning, advantages and disadvantages of forward markets.

24. Commodity exchanges – Role and importance - Commodity exchanges in India - MCX,NCDX,NCMX,ACX, Safal - Role of regulatory bodies in futures markets

- SEBI, etc, Contract farming - Meaning, procedures and advantages - Contract farming act in Andhra Pradesh.

25. Meaning and functions of price - Characteristics of agricultural product prices - Agricultural price stabilization - Need for agricultural price policy - Role of Commission for Agricultural Costs and Prices (CACP) - Meaning of administered prices - Minimum support price, procurement price and issue price, levy price.

26. Concept of International Trade and its importance in globalised world economies - Free trade and protectionism - Meaning, pros and cons of free trade and protectionism.

27. Theory of absolute and comparative advantage and their importance international trade.

28. Trends, present status and prospects of Indian agri-commodities trade in international trade.

29. WTO - Genesis, objectives, functions and principles of multilateral trade. 30 & 31. WTO agreements - Agreement on Agriculture (AoA) - Market access, Aggregate Measures of Support (AMS), export subsidies, sanitary and phyto santitary measures (SPS) and their implications and impact on Indian agriculture.

32. TRIPS and intellectual property rights and their implications to Indian agriculture - Meaning of patents, copy rights, trademarks, geographical indications, industrial designs, trade secrets, integrated circuits, and plant varieties protection.

Practical

1. Plotting and study of demand and supply curves for major agricultural commodities.

2. Calculation of elasticities for important agricultural commodities.

3. Study of relationship between market arrivals and prices of some selected commodities.

4. Computation of marketable and marketed surplus of important commodities.

5. Study of price behaviour over time for some selected commodities.

6 &7. Construction of index numbers- moving averages -General PI , WPI, CPI.

8 & 9. Visit to a local markets to study various marketing functions performed

by different agencies, identification of marketing channels for selected commodities, collection of data regarding marketing costs.

10 Estimation and calculation of marketing costs, margins and price spread and presentation of report in the class.

11 Visit to SWC/CWC to study their objectives, role, organization, functioning and performance.

12 Visit to FCI and study its objectives, role, organization and functioning and performance.

13 Visit to cooperative marketing society – DCMS/ MARKFED, etc. to study their objectives, role, organization and functioning.

14 - 16. Study of comparative advantage of different agricultural commodities of India in International trade.

*18AGR205 IRRIGATION WATER MANAGEMENT 2(1+1)

Course outlines

Theory

Irrigation : Definition and objectives; Water resources, Irrigation projects (major, medium & minor) in India and Andhra Pradesh; Soil - plant - water relationships; Methods of soil moisture estimation; Evapotranspiration and Crop water requirement; Duty of water; Conjunctive use of water; Scheduling of irrigation; Methods of irrigation - Surface, Subsurface, Sprinkler and Drip irrigation; Irrigation efficiency and Water use efficiency; Irrigation water quality criteria and its management; Waterlogging; Agricultural drainage.

Practical

Measurement of bulk density, study of soil moisture measuring devices, determination of field capacity and permanent wilting point, measurement of infiltration rate, irrigation water, scheduling of irrigation by IW/CPE ratio method, calculations on soil moisture, irrigation water needs, duty of water and irrigation efficiencies, layout of surface methods of irrigation, demonstration of drip and sprinkler irrigation, visit to micro irrigation systems in farmers fields ,water management practices in different crops.

Lecture outlines

Theory

1 Introduction – importance – definition and objectives - water resources of world.

2 Surface and ground water resources in India and Andhra Pradesh-important major irrigation projects in India and Andhra Pradesh.

3 Soil-water relations – physical properties of soil viz., depth, soil texture, soil structure, particle density, bulk density and porosity influencing water retention, movement and availability.

4 Water retention in soil – adhesion and cohesion – soil moisture tension – pF – soil moisture characteristic curves- Water movement in soils – infiltration – percolation – seepage – permeability – hydraulic conductivity – saturated andunsaturated water flow.

5 Kinds of water in soil – gravitational water – capillary water – hygroscopicwater
 – their importance in crop production - Soil moisture constants –

saturation – Field capacity (FC) – Permanent Wilting Point (PWP) – Available
Soil Moisture (ASM) – hygroscopic coefficient –theories of soil water availability.
6 Plant-water relationships – rooting characteristics – effective root zone depth
– moisture extraction pattern – moisture sensitive periods of crops – Soil Plant
Atmospheric Continuum (SPAC).

7 Evapotranspiration – evaporation – transpiration – factors influencing evapotraspiration – Reference crop evapotraspiration (ETo) – Crop coefficient – Crop Evapotranspiration (ETc) - daily, seasonal and peak period consumptive use. 8 Crop water requirement – irrigation requirement – net and gross irrigation requirement – irrigation interval – irrigation period – seasonal waterrequirement of important crops – duty of water – base period – relation between duty and base period – conjunctive use of water – advantages of conjunctive use.

9 Scheduling of irrigation – different criteria – soil moisture regime approach – feel and appearance method – soil moisture tension and depletion of available soil moisture method - climatological approach – Irrigation Water (IW) /Cumulative Pan Evaporation (CPE) ratio method.

10 Scheduling of irrigation – plant indices approach – visual symptoms – soil cumsand mini plot technique – growth rate – relative water content – plant water potential – canopy temperature – indicator plants and critical growth stages.

11 Methods of irrigation - surface methods – wild flooding check basin, ring basin, border strip, furrow and corrugations – advantages and disadvantages-Sub surface irrigation.

12 Micro irrigation systems - sprinkler irrigation – merits and demerits – system components and layout – suitable crops – rain guns.

13. Drip irrigation (surface and sub surface) – merits and demerits – system components and layout – suitable crops - fertigation and maintenance of micro irrigation systems.

14. Water Use Efficiency (WUE) – crop and field water use efficiency – factors influencing WUE – climatic, genetic and management (agronomic) factors – Irrigation efficiencies – water conveyance efficiency, water application efficiency, water storage efficiency, water distribution efficiency and project efficiency.

15. Quality of irrigation water – salinity hazard, sodium hazard, residual sodium carbonate and boron toxicity – criteria and threshold limits – management practices for using poor quality water.

16. Water logging – causes for waterlogging – drainage- surface and subsurface drainage systems – relative merits.

Practical

1. Determination of bulk density

2. Determination of soil moisture content by gravimetric and volumetric method

3. Installation and working with tensiometer and resistance blocks

4. Determination of infiltration rate

5. Determination of field capacity by field method

6. Measurement of soil moisture content by moisture probe

7. Measurement of irrigation water through flumes, weirs and V notches

8. Scheduling of irrigation by IW / CPE ratio method

9. Calculation of irrigation water requirements

10. Lay out of surface irrigation methods

11. Problems on duty of water and irrigation efficiencies

12. Demonstration of drip irrigation system (filter cleaning, flushing of laterals and fertigation)

13. Demonstration of operation of sprinkler irrigation system

14. Visit to micro irrigation systems in farmers fields.

15. Water management practices in rice, wheat and maize.

16. Water management practices in groundnut, sunflower and sugarcane.

*18 PAT 201 PRINCIPLES OF INTEGRATED PEST AND DISEASE MANAGEMENT 2 (1+1)

Course outlines

Theory

Categories of insect pests and diseases, IPM: Introduction, history, importance, concepts, principles and tools of IPM. Economic importance of insect pests, diseases and pest risk analysis. Methods of detection and diagnosis of insect pest and diseases.

Calculation and dynamics of economic injury level and importance of Economic threshold level. Methods of control: Host plant resistance, cultural, mechanical, physical, legislative, biological and chemical control. Ecological management of crop environment. Introduction to conventional pesticides for the insect pests and disease management. Survey, surveillance and forecasting of Insect pest and diseases.

Development and validation of IPM module. Implementation and impact of IPM (IPM module for Insect pest and disease. Safety issues in pesticide uses. Political, social and legal implication of IPM. Case histories of important IPM programmes.

Practical

Methods of diagnosis and detection of various insect pests, and plant diseases, Methods of insect pests and plant disease measurement, Assessment of crop vield losses, calculations based on economics of IPM, Identification of biocontrol agents, different predators and natural enemies. Mass multiplication of Trichoderma, Pseudomonas, Trichogramma, NPV etc. Identification and nature of damage of important insect pests and diseases and their management. Crop (agro-ecosystem) dynamics of a selected insect pest and diseases. Plan & assess preventive strategies (IPM module) and decision making. crop monitoring attacked by insect, pest and diseases. Awareness campaign at farmers fields.

Lecture outlines

Theory

Plant Pathology

 Integrated disease management – Introduction, concept, Total system approach, Subsystem of IPM, IPM strategies, Integration of practices, Benefits and limitations.

2. Disease triangle, Disease pyramid, Factors affecting disease epidemics, Disease incidence-disease severity, Area under disease progress curve, Descriptive disease scales in important crops with examples. Survey and surveillance of plant diseases: Objectives, methodology and reporting results. Use of Remote sensing technology in Plant Pathology.

3. Plant disease forecasting – meaning – advantages, methods in forecasting, information needed for forecasting, examples of disease forecasting models.

4. Classification of fungicides based on chemical group and antibiotics with examples.

5& 6. Methods of disease control: Host plant resistance – advantages– Flor's gene for gene hypothesis – types of resistance – vertical and horizontal resistance – mechanism of resistance. Cultural methods, mechanical methods and physical methods with examples. Biological control – Biocontrol organisms

mechanisms of biocontrol – examples- mass multiplication methods.

7. Integrated disease management in important crops : Rice , Groundnut, Cotton and Chillies

8. Integrated disease management in important crops – Mango, Banana, Citrus and Brinjal

Entomology

9 Economic importance of insect pests. Pest risk analysis - Calculation and

dynamics of economic injury level and importance of Economic threshold level. 10 Methods of detection and diagnosis of insect pests – types of insect damage on crop plants based on the types of mouth parts (biting and chewing, piercing

and sucking, lacerating and sucking, siphoning and degenerate types)

11 Ecological management of crop environment - Ecological principles – importance of ecosystem concept – ecological niche – Agro ecosystem components and services in management of crop environment.

12 Introduction to conventional and botanical pesticides for the insect pests and disease management.

13 Survey & surveillance and forecasting of Insect pests, Case histories of IPM programmes – success stories. Development and validation of IPM modules for major crops – problem identification – Research and development of IPMs – Modules for major Agricultural and horticultural crops and validation.

14 Implementation and impact of IPM (IPM module for Insect pest) - IPM modules for major field crops (paddy, sugarcane, cotton, pulses and ground nut) major vegetables (brinjal, tomato, okra, cabbage and cauliflower), mango and coconut – Impact studies of IPM modules and constraints inimplementation. 15 Political, social and legal implication of IPM - Safety issues in pesticide uses – legislative measures – Awareness about IPM, Farmers participation – Government support.

16 Safety issues in pesticide uses – Pesticide risk assessment, management and communication, use in agriculture. Environmental impact – health effects

– residues, resurgence and resistance – effect on non target organisms – Strengths and weaknesses of pesticides.

Practicals:

Plant Pathology

1. Identification of plant diseases based on symptoms and signs.

2. Laboratory methods used in the diagnosis of Plant diseases.

3. Methods of measurement of plant diseases, descriptive disease scales for important diseases. Plotting AUDP curves.

4. Methods to assess crop yield losses due to crop diseases with examples.

5. Identification of disease biocontrol agents – *Trichoderma, Pseudomonas, Bacillus* spp. – Laboratory isolation procedures.

6. Mass multiplication of biocontrol agents : Trichoderma and Pseudomonas.

7. Crop monitoring for assessment disease dynamics – Decision making.

8. IDM and non IDM methods – Cost benefit analysis – Case studies. **Entomology**

9 Methods of diagnosis and detection of various insect pests.

10 Identification, nature of damage and dynamics of important insect pests and their management in different major crop ecosystems (paddy, maize, cotton, sugarcane, groundnut, castor, mango, citrus, coconut, brinjal and tomato).

11 Agro Eco System Analysis in major field crops (paddy and cotton).

12 Ecological engineering for rice.

13 Methods of assessment of insect pests population, damage and crop yield losses and calculation of cost benefit ratios (paddy/cotton).

14 Identification of natural biocontrol agents in different crop ecosystems.

15 Planning and assessment of insect pest preventive strategies (IPM module) and decision making.

16 Awareness campaign at farmer's fields.

*18 SAC 301 MANURES, FERTILIZERS AND SOIL FERTILITY MANAGEMENT 3(2+1)

Unit-l-Essential Nutrients

Soil fertility and productivity. Essential nutrients **Aim:**

To impart knowledge on essential nutrients, soil fertility, nutrient transformations in soil, manures, fertilizers and soil fertility management through various approaches.

Syllabus-Theory

- functions, deficiency and toxicities. Concepts and methods of soil fertility evaluation.

Unit-ll- Nutrient Dynamics

Nutrients - sources, forms, mobility, transformations, fixation, losses and availability of nitrogen, phosphorus, potassium, calcium, magnesium, sulphur, iron, manganese, zinc, copper, boron, molybdenum, nickel, chloride in soils - Beneficial elements -Nutrient interactions

Unit-III-Classification of Fertilizers

Fertilizers - Definition and classification, sources, properties and reactions of primary, secondary and micro nutrient fertilizers in soil -Manufacture of urea, ammonium sulphate, SSP, DAP, MOP and SOP. Complex, mixed fertilizers, customized / Specialty fertilizers - Water soluble fertilizers, liquid fertilizers. Micro nutrient mixtures and chelated micronutrients - Preparation, characteristics and compatibility -Fertilizer Control Order (FCO). Manures- classification, nutrient contents. Composting techniques.

Unit-IV-Application Methods

Methods of fertilizer application - Seed coating, pelletization, seedling dipping - Nutriseed pack - Soil Application water soluble fertilizers, fertigation scheduling (Fertilizer- water interaction, fertilizer solubility, comparison of fertilizer application methods)

Unit-V-Nutrient Management

Nutrient management concepts - INM, STCR, IPNS, SSNM and RTNM. Nutrient use efficiencies of major and micronutrients and enhancement techniques (Soil, Cultural and Fertilizer strategies). Soil health -Quality indices and their management - Organic farming and Precision Farming - Long term effect of fertilization on soil

Practical Syllabus

Soil Nutrient Analysis - Available nutrient status (N, P, K, S and DTPA extractable micronutrients) in soils- Fertilizer Nutrient Analysis- Analysis of nutrient contents in urea, ammonium nitrate, SSP, RP, MOP and SOP- Manure Analysis-Determination of nutrient contents (N, P& K) in FYM/GM -Colloquium on Soil testing laboratories - Soil test based fertilizer prescription - Visit to fertilizer mixing unit.

Theory- Lecture shedule

- Soil fertility and productivity essential nutrients- criteria of essentiality -N, P and K nutrients -functions, deficiency and toxicity symptoms
- Secondary nutrients, micro nutrients and beneficial elements functions, deficiency and toxicity symptoms
- Concepts and approaches of soil fertility evaluation Liebig's Law, Mitscherlich's law and Bray's nutrient mobility concept. Approaches -Deficiency symptoms, tissue analysis, biological tests and chemical tests
- Techniques/ methods of soil fertility evaluation Inductive, deductive, 'A' value technique,

crop logging, critical level, DRIS and agronomic approach

- 5. Sources, forms, mobility, transformation, fixation, losses and availability of nitrogen in soil
- Sources, forms, mobility, transformation, fixation, losses and availability of phosphorus in soil
- 7. Sources, forms, mobility, transformation, fixation, losses and availability of potassium in soil

- 8. Sources, forms, mobility, transformation, fixation, losses and availability of calcium magnesium and sulphur in soil
- 9. Sources, forms, mobility, transformation, fixation, losses and availability of micro

nutrients in soil

- 10. Nutrient interactions in soil
- 11. Fertilizers Definition, classification of N,P and K fertilizers
- 12. N fertilizers- Urea, ammonium sulphate, ammonium nitrate, CAN, properties and their reactions in soil
- 13. Manufacture of urea and ammonium sulphate
- 14. P fertilizers- Rock phosphate, bone meal, basic slag, single super phosphate, diammonium phosphate, triple super phosphate, propertiesand their reactions in soil
- 15. Manufacturing of SSP and DAP
- 16. K fertilizers- MOP and SOP- properties and reactions in soil
- 17. Mid Semester Examination
- 18. Synthesis of MOP and SOP
- 19. Complex fertilizers- definition, manufacture of ammonium phosphate, nitro phosphate and N,P,K complexes
- 20. Mixed fertilizers-definition, preparation and compatibility
- 21. Preparation and characteristics and compatibility Specialty/ Customized fertilizers, Water soluble fertilizers, liquid fertilizers, Micro nutrient mixtures and chelated micronutrients
- 22. Fertilizer Control Order
- 23. Organic manures- Definition, classification and sources- Fortified organics
- 24. Composting techniques- Aerobic and anaerobic (Bangalore & Coimbatore method) enriched FYM and vermicompost. Composting of organic waste-Sugarcane trash and coir waste

- 25. Methods of fertilizer application for different soil types Fertigation -Definition - water soluble fertilizers
- 26. Types of fertigation Fertilizer schedule
- 27. Fertilizer application methods Seed coating, pelletization, seedling dipping - Nutriseed pack - Soil Application - Foliar spray
- 28. Nutrient management concepts INM, STCR, IPNS, SSNM and RTNM - Tools - DSSIFER and VDK
- 29. Nitrogen use efficiency Slow release N fertilizers Significance and enhancement techniques
- 30. Nutrient use efficiency of P, K and micronutrients and their enhancement techniques
- 31. Soil health Definition Soil Quality Indices Physical, chemical and Biological indicators-Soil enzymes
- 32. SOM maintenance Role of SOM in sustaining soil health
- 33. Precision farming and organic farming Concepts and applications
- 34. Long term effect of fertilization on soil

Practical schedule

- 1. Estimation of alkaline KMnO₄ N in soil
- 2. Estimation of Olsen P and Bray P in soil
- 3. Estimation of Neutral Normal NH₄OAc K in soil
- 4. Estimation of available sulphur in soil by turbidimetry
- 5. Estimation of DTPA extractable micronutrients in soil
- 6. Identification of fertilizers Fertilizer sampling techniques
- 7. Estimation of N in urea
- 8. Estimation of ammoniacal and nitrate N in ammonium nitrate
- 9. Estimation of water soluble P in SSP

- 10. Estimation of citric acid soluble P in rock phosphate Pemberton's method
- 11. Estimation of K in KCI and K₂SO₄
- 12. Estimation of N in FYM / Compost by Macro Kjeldahl method
- 13. Preparation of triple acid extract Estimation of P in FYM / Compost by Vanado molybdate yellow colour method
- 14. Estimation of K in FYM / Compost by Flame Photometry.
- 15. Colloquium on establishment of soil testing laboratories -Fertilizer calculations-Soil test based fertilizer prescription
- 16. Visit to STL and FTL, Visit to fertilizer manufacturing / mixing unit
- 17. Practical Examination.

*18 HOR 301 PRODUCTION TECHNOLOGY FOR ORNAMENTAL CROPS MEDICINAL AND AROMATIC PLANTS AND LANDSCAPING 2 (1+1)

Course outlines Theory

Importance and scope of ornamental crops, medicinal and aromatic plants and landscaping. Principles of landscaping, Landscape uses of trees, shrubs and climbers, Production technology of important cut flowers like rose, gerbera, carnation, lilium and orchids under protected conditions and gladiolus & tuberose, chrysanthemum under open conditions. Package of practices for loose flowers like marigold and jasmine under open conditions. Production technology of important medicinal plants like asparagus, aloe, costus, periwinkle, isabgol and Aromatic plants like mint, lemongrass, citronella, Palmarosa, Ocimum, Geranium, Vetiver. Processing and value addition in ornamental crops and MAPs produce.

Practical

Identification of Ornamental plants, Identification of Medicinal and Aromatic Plants. Nursery bed preparation and seed sowing, Training and pruning of Ornamental plants, Planning and layout of garden, Bed preparation and planting of MAP, Protected structures – care and maintenance, Intercultural operations in flowers and MAP, Harvesting and post harvest handling of cut and loose flowers, Processing of MAP, Visit to commercial flower/MAP unit.

Lecture outlines

Theory

1. Importance and scope of ornamental crops and landscaping - Landscape uses of trees, shrubs and climbers.

Principles of landscaping - Initial approach – Axis – Focal Point – Mass effect
 Unity – Space – Divisional Lines – Proportion and Scale – Texture – Time and Light
 Tone and Colour – Mobility – Rhythm – Balance – Contract – Harmony- Vista –
 Style.

3. Production technology of cut flowers under protected conditions -Rose – Introduction- origin and distribution- Classification- Species and varieties-Climate and soil requirements- Propagation – Rootstocks- Stock scion compatibility- Land preparation- planting- Manures and fertilizers- Cultural operations (pruningpinching and mulching) harvesting- Post harvest management- Yield and rose biproducts.

4. Gerbera - Introduction- Origin and distribution- Classification- Species and varieties- Climate and soil requirements- Propagation- Land preparation-Planting- Manures and fertilizers- Cu**ltar**al operations - Defoliation- Soil loosening- Shadinguse of growth regulators- Physiological disorders- Harvesting-Post harvest management and yield.

5. Carnation - Introduction- Origin and distribution- Classification- Species and varieties- Climate and soil requirements- Propagation- Land preparation-Planting- Manures and fertilizers- Cultural operations- (Pinching and disbudding) use of growth regulators- Physiological disorders- Harvesting- Post harvest management and yield.

6. Liliumand Orchids - Introduction- Origin and distribution- Classification-Species and varieties- Climate and soil requirements- Propagation- Land preparation- Planting- Manures and fertilizers- Cultural operations- Use of growth regulators- Physiological disorders- Harvesting- Post harvest management and yield.

7. Production technology of cut flowers under open conditions - Gladiolus and Tuberose- Introduction- Origin and distribution- Classification of varieties-Species and varieties- Climate and soil requirements- Propagation- Land preparation- Planting- Manures and fertilizers- Cultural operations- Use of growth regulators- Physiological disorders- Harvesting- Post harvest management and yield.

8. Chrysanthemum - Introduction- Origin and distribution- Classification-Species and varieties- Climate and soil requirements- Propagation- Land preparation- Planting, Manures and fertilizers- Cultural operations- Pinching and disbudding - Use of growth regulators- Harvesting- Post harvest management and yield.

9. Loose flowers - Marigold and Jasmine under open conditions - Introduction-Origin and distribution- Species and varieties- F1 hybrids- Cimate and soil requirements- Propagation- Land preparation- Planting- Manures and fertilizers- Cultural operations- Pinching and disbudding - Use of growth regulators- Harvesting- Post harvest management and yield.

10. Medicinal plants – Scope and Importance – Production technology of Asparagus, Aloe, Costus - Botanical name – Family - Origin - Economic part - Introduction – Climate – Soil - Varieties – Propagation – Planting - Manuring - Irrigation - Intercultural operations - Harvesting - Yield.

11. Periwinkle, Isabgol -Botanical name – Family - Origin - Economic part -Introduction – Climate – Soil - Varieties – Propagation – Planting - Manuring -Irrigation - Intercultural operations - Harvesting - Yield.

12. Aromatic plants – Importance – Essential oil industry in India – Properties of essential oils – Production technology of Mint and Ocimum - Botanical name – Family - Origin - Economic part - Introduction – Climate – Soil - Varieties – Propagation – Planting - Manuring - Irrigation - Intercultural operations -Harvesting - Yield.

13. Lemongrass, Citronella, Palmarosa - Botanical name – Family - Origin –
 Economic part - Introduction – Climate – Soil - Varieties – Propagation – Planting
 Manuring - Irrigation - Intercultural operations - Harvesting - Yield.

14. Geranium and Vettiver - Botanical name – Family - Origin - Economic part
Introduction – Climate – Soil - Varieties – Propagation – Planting - Manuring Irrigation - Intercultural operations - Harvesting - Yield.
15&16. Processing and value addition in ornamental crops and MAPs produce

Dry flower making - Extraction methods of essential oils.

Practical

- 1. Identification of ornamental plants.
- 2. Identification of Medicinal and Aromatic Plants.
- 3. Nursery bed preparation and flower seed sowing.
- 4. Training and pruning of roses.
- 5. Planning and layout of ornamental garden.
- 6. Bed preparation and planting of Medicinal and Aromatic Plants.
- 7. Protected structures Care and maintenance.
- 8. Intercultural operations in flowers crops.
- 9. Intercultural operations in Medicinal and Aromatic plants.
- 10. Harvesting and post harvest handling of cut and loose flowers.
- 11. Floral preservatives to prolong vase-life of cut flowers.
- 12. Drying / dehydration techniques for flower drying.
- 13. Processing of Medicinal and Aromatic Plants.
- 14. Extraction of essential oils.
- 15. Visit to commercial flower unit.
- 16. Visit to commercial MAP unit.

*18 AEN 301 PESTS OF FIELD CROPS, STORED GRAINS AND THEIR MANAGEMENT I 3(2+1)

Course outlines Theory

General account on nature and type of damage by different arthropod pests. Scientific name, order, family, host range, distribution, biology and bionomics, nature of damage, and management of major pests and scientific name, order, family, host range, distribution, nature of damage and control practices for other important arthropod pests of various field crops. and rodent pests of field crops and their management. Locust management.Factors affecting losses of stored grain and role of physical, biological, mechanical and chemical factors in deterioration of grain. Insect pests, mites, rodents, birds and microorganisms associated with stored grain and their management. Storage structures and methods of grain storage and fundamental principles of grain store management.

Practical

Identification of different types of damage. Identification and study of life cycle and seasonal history of various insect pests attacking different crops and their produce: (a) Field Crops;. Identification of mites, birds and rodent pests ofcrops. Identification of insect pests and Mites associated with stored grain. Determination of insect infestation by different methods. Assessment of losses due to insects. Calculations on the doses of insecticides. Pesticide application techniques. Fumigation of grain store / godown. Identification of rodents and rodent control operations in godowns. Identification of birds and bird control operations in godowns. Determination of moisture content of grain. Methods of grain sampling under storage condition. Visit to Indian Storage, Management and Research Institute, Hapur and Quality Laboratory, Department of Food., Delhi. Visit to nearest FCI/CWC godowns.

Lecture outlines

Theory

General account on nature and type of damage by different arthropod pests. Scientific name, order, family, host range, distribution, marks of identification, bionomics, nature of damage, and management of major, minor insect pests and other important arthropod pests of various field crops.

Introduction of Economic Entomology and Economic Classification of Insect Pests
 5 Rice-Yellow stem borer and other borers, gall midge, brown - planthopper,
 green leafhopper, hispa, leaf folder, ear head bug, grasshoppers, root weevil,

swarming caterpillar, climbing cutworm, case worm, whorl maggot, leaf mite and panicle mite-IPM practices.

6-8 Sorghum and other millets- Sorghum shoot fly, stem borer, pink borer, sorghum midge, ear head bug, red hairy caterpillar, deccan wingless grasshopper, aphids, maize shoot bug, flea beetle, blister beetles, ragi cutworm, ragi root aphid and army worm- IPM practices. Wheat- Ghujia weevil, ragi pink borer and termites- IPM practices.

9-11 Sugarcane- Early shoot borer, internode borer, top shoot borer, scales, leafhoppers, white grub, mealybugs, termites, whiteflies, woolly aphid and yellow mite- IPM Practices.

12-14 Cotton- Spotted bollworm, American bollworm, pink bollworm, tobacco caterpillar, leafhopper, whiteflies, aphid, mites, thrips, red cotton bug, dusky cotton bug, leaf roller, stem weevil, grasshoppers, and mealybug - IPM Practices. 15-16 Jute- Semilooper, stem weevil, stem girdler and Bihar hairy caterpillar. Mesta- Hairy caterpillars, stem weevil, mealybugs, leafhopper and aphid. Sunhemp- Hairy caterpillars, stem borer and flea beetle. IPM Practices.

17-18 Pulses- Gram caterpillar, plume moth, pod fly, stem fly, spotted podborer, cowpea aphid, cowbug, pod bug, leafhopper, stink bug, green pod boring caterpillar, blue butterflies, leaf webber/borer and redgram mite. Soyabean-Stem fly, stem girdler, ragi cutworm, leaf miner and whitefly- IPM Practices. Peapea leaf miner and pea stem fly

19 Castor-Semilooper, shoot and capsule borer, tobacco caterpillar, leafhopper, butterfly, whitefly, thrips, castor slug and mite- IPM Practices.

20 Groundnut - White grub, leaf miner, red hairy caterpillar, tobacco caterpillar, leafhopper, thrips, aphid, pod bug, bud borer, wire worms and jewel beetle- IPM Practices.

21 Sesamum-Leaf and pod borer, gall fly and sphinx caterpillar. Safflower-Aphids and leaf eating caterpillars- IPM Practices.

22 Mustard- Aphid, sawfly, diamondback moth and painted bug. Sunflower-Helicoverpa and Spodoptera, leafhopper, Bihar hairy caterpillar and thrips - IPM Practices.

23 Stored grains Pests- Factors affecting losses of stored grain and role of physical, biological, mechanical and chemical factors in deterioration of grain 24-25 Stored grain Insect pests - Rice weevil, lesser grain borer, khapra beetle, pulse beetle, groundnut bruchid, flour beetles, saw-toothed beetle, cigarette beetle, Angoumois grain moth and rice moth

26-27 Stored grains - Non insect Pests- Mites, rodents, birds and microorganisms associated with stored grain - Storage structures and methods of grain storage and fundamental principles of grain store management.

28 Locusts- Locusts and their management

29 Mites- Economically important phytophagous mites of field crops and their management

30 Nematodes-White tip nematode of rice, cyst and gall nematode of wheat, and their management.

31 Rodents- Rodents damaging field crops and stored grains - Keys for identification of rodents and their management.

32 Birds- Various birds infesting crops and their management.

*Important insects and their scientific names may only be chosen for examination purpose.

Practical

1 Typical symptoms of damage by various phytophagous insects.

2 Calculations on the doses of insecticides and their application techniques.

3 Identification of major insect pests of rice and their damage symptoms

4 Identification of major insect and mite pests of sorghum, maize and other millets, and their damage symptoms

5 Identification of insect pests of sugarcane and their damage symptoms

6 Identification of insect pests of cotton, sunhemp and mesta and their damage symptoms

7. Identification of insect pests of pulse crop and their damage symptoms.

Identification of insect pests of oil seed crops and their damage symptoms

8 Mite pests of crops and their damage symptoms

9 Nematode pests of crops and their damage symptoms

10 Rodent pests of crops and their nature of damage

11 Bird pests of crops and their damage symptoms

12 Identification of insect and non insect pests (mites, birds and rodents) of stored grain, their nature of damage and their management tactics..

13 Methods of grain sampling under storage condition. Determination of moisture content of grain

14 Methods of detection of infestation by stored grains insect pests in stored grain 15 Assessment of losses in stored grain due to insect pests.

16 Fumigation of grain store / godown. Visit to nearest FCI/CWC/SWC godowns.

*18 PAT 302 DISEASES OF FIELD AND HORTICULTURAL CROPS AND THEIR MANAGEMENT-I (FIELD CROPS) 3(2+1)

Course outlines Theory

Symptoms, etiology, disease cycle and management of major diseases of following crops: Rice: blast, brown spot, Sheath rot, stem rot, narrow brownleaf spot, sheath blight, false smut, bacterial leaf blight, Bacterial leaf streak, tungro and Khaira; Wheat: rusts, loose smut, karnal bunt, powdery mildew, alternaria blight, and ear cockle; Sorghum: anthracnose, rust, ergot, grain mold , leaf blight, smuts, Charcoal rot, downy mildew, and Striga; Maize: stalk rots, downy mildew, leaf spots, banded leaf and sheath blight and blights; Bajra :downy mildew, ergot, rust and smut; Finger millet: Blast and leaf spot, smut and mosaic; Cotton: anthracnose, vascular wilts, leaf spots, rust and black arm; Sugarcane: red rot, smut, wilt, rust, ring spot, mosaic, grassy shoot, ratoon stunting and Pokkah Boeng; Tobacco: Damping off, frog eye leaf spot, Brown spot, black shank, black root rot and mosaic, leaf curl and Orobanche; Groundnut: early and late leaf spots, Collor rot, pepper leaf spot, Sclerotium wilt, rust, PBND, PSND and Kalahasti malady.

Sesamum: Phyllody, Alternaria leaf spot, Powdery mildew, macrophomina stem rot and bacterial leaf spot; Castor: Phytophthora blight, grey mold, root rot, bacterial leaf spot, seedling blight, rust and wilt;Sunflower: Downy mildew, powdery mildew head rot, rust, mosaic, necrosis, Sclerotinia stem rot and Alternaria blight; Safflower : wilt, Alternaria leaf spot, mosaic and rust; Mustard: Alternaria blight, white rust, downy mildew, powdery mildew and Sclerotinia stem rot; Pigeonpea: Phytophthora blight, wilt and sterility mosaic, bacterial leaf spot; Gram: rust, dry root rot, wilt, grey mould and Ascochyta blight; black & green gram: Cercospora, Corynospora leaf spot, bacterial leaf spot, angular black spot, anthracnose, powdery mildew, rust, web blight

,yellow mosaic, leaf crinckle and cuscuta; Pea: downy mildew, powdery mildew and rust; Soybean: Rhizoctonia blight, bacterial spot, seed and seedling rot, rust and mosaic; Lentil: rust and wilt;

Practical

Identification and histopathological studies of selected diseases of field crops covered in theory. Field visit for the diagnosis of field problems. Collection and preservation of plant diseased specimens for Herbarium;

Note: Students should submit 50 pressed and well-mounted specimens.

Lecture outlines

Theory of etiology, symptoms, Study host-parasite relationship and specific management practices of the following diseases. 1. Rice diseases – blast, brown spot. 2. Rice diseases – Sheath rot, Stem rot, narrow brown leaf spot. 3. Rice diseases – sheath blight, False smut, Bacterial leaf blight. 4. Rice diseases – Bacterial leaf streak, Rice Tungro Disease, Khaira. 5. Wheat diseases – Black or stem rust, orange rust, yellow rust. 6. Wheat diseases - loose smut, Karnal bunt. 7. Wheat diseases – Powdery mildew, alternaria blight, Tundu disease. 8. Sorghum diseases – Anthracnose, rust, ergot, headmold, leaf blight. 9. Sorghum diseases - smuts, charcoal rot, downy mildew, Striga. 10. Maize diseases - Turcicum leaf blight, post flowering stalk rots, charcoal rot. 11. Maize diseases - Banded leaf and sheath blight, downy mildew. 12. Bajra diseases – Downy mildew/green ear, rust, ergot, smut. 13. Ragi/Fingermillet diseases- blast, smut, mosaic. 14. Cotton diseases– Bacterial blight, Fusarium wilt, Verticillium wilt, root rot. 15. Cotton diseases – grey mildew, anthracnose, Alternaria leaf spot, Cercospora leaf spot, Helminthosporium leaf spot, rust. 16. Sugarcane diseases – red rot, whip smut, wilt, ring spot. 17. Sugarcane diseases – Grassy shoot, mosaic, ratoon stunting, rust, Pokah Boeng. 18. Tobacco diseases –black shank, Damping off, Frog eye spot, brown spot, black root rot. 19. Tobacco diseases – Mosaic, leaf curl, Orobanche. 20. Groundnut diseases – Collar rot, Tikka leaf spots, rust, pepper leaf spot, stem rot. 21. Groundnut diseases – Bud necrosis, Peanut stem necrosis disease, Kalahasti malady. 22. Sesamum diseases – Phyllody, Alternaria leaf spot, powdery mildew, charcoal rot, bacterial leaf spot. 23. Castor diseases – wilt, root rot, grey mold, bacterial leaf spot, seedling blight, rust. 24. Sunflower diseases – leaf blight, rust, powdery mildew, head rot, collar rot, downy mildew, mosaic, sunflower necrosis virus. 25. Safflower diseases – Alternarialeaf blight, wilt, rust, mosaic. 26. Mustard diseases – White rust, downy mildew, powdery mildew, Alternaria leaf spot, Sclerotinia stem rot. 27. Red gram diseases – Phytophthora blight, wilt, sterility mosaic and, bacterial leaf spot and stem canker.

28. Bengal gram diseases – wilt, rust, Ascochyta blight, stem and root rot, grey mold.

29. Black gram and Green gram diseases – Powdery mildew, rust, Cercospora leaf spot, Corynespora leaf spot, Angular black spot, Dry root rot, web blight.

30. Blackgram and Greengram diseases – Bacterial leaf spot, Yellow Mosaic virus, Leaf crinkle, Cuscuta.

31. Soybean diseases – Rhizoctonia blight, seed and seedling rot, rust, Soybean mosaic, Bacterial pustule;Pea diseases - downy mildew, powdery mildew and rust.

32. Cowpea diseases – Cowpea mosaic virus disease.; Lentil diseases - rust and wilt.

PRACTICAL

Study of the symptoms, identification and histopathological studies of the following diseases.

- 1. Rice diseases
- 2. Wheat, Sorghum and Bajra diseases
- 3. Maize and Fingermillet diseases
- 4. Field visits for the diagnosis of crop diseases.
- 5. Sugarcane diseases
- 6. Tobacco diseases
- 6 Groundnut diseases
- 7 Field visits for the diagnosis of crop diseases.
- 8 Sunflower and Safflower diseases
- 9 Castor and sesamum diseases
- 10 Mustard diseases
- 11 Field visits for the diagnosis of crop diseases.
- 12 Cotton diseases
- 13 Redgram, greengram and blackgram diseases

14 Bengalgram, cowpea and soybean diseases

15&16 Field visits for the diagnosis of crop diseases

References:

1. Rangaswami, Gand K.Mahadevan. 2001. *Diseases of crop plants in India.* Prentice Hall of India Pvt.Ltd, New Delhi.

*18 GPB 301 CROP IMPROVEMENT - I (CEREALS, MILLETS, PULSES AND OILSEEDS) 2 (1+1)

Course outlines

Theory

Centers of origin, distribution of species, wild relatives in different cereals, pulses, oilseeds; Plant genetic resources, its utilization and conservation; Floral biology; study of genetics of qualitative and quantitative characters; Important concepts of breeding self pollinated, cross pollinated and vegetatively propagated crops; Major breeding objectives and procedures including conventional and modern innovative approaches for development of hybrids and varieties for yield, adaptability, stability, abiotic and biotic stress toleranceand quality (physical, chemical, nutritional); Ideotype concept and climate resilient crop varieties for future.

Practical

Emasculation and hybridization techniques in different crop species; cereals, millets, pulses and oilseeds. Maintenance breeding of different crops. Handlingof germplasm and segregating populations by different methods like pedigree,bulk and single seed decent methods; Study of quality characters, donor parents for different characters; Visit to seed production plots; Visit to AICRP plots of different field crops.

Lecture outlines

Theory

1 Introduction – General Breeding Objectives – Concepts of breeding self pollinated, cross pollinated and vegetatively propagated crops - Breeding populationsrelevance in crop improvement.

2 Cereals - Rice - Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids-Accomplishments.

3. Cereals - Wheat and Barley - Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids – Accomplishments.

4. Millets - Sorghum and Pearlmillet - Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids – Accomplishments.

5 Millets - **F**inger millet, Kodo millet and Proso millet - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids-Accomplishments.

6 Pulses - Chickpea - Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids-Accomplishments.

7 Pulses - Pigeonpea - Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids – Accomplishments.

8 Pulses - Urd bean and Mung bean - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids -Accomplishments.

9. Pulses - Soybean and Cowpea - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids - Accomplishments.

10 Pulses - Horsegram, Fieldpea and Lentil - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties-seed production technology of varieties and hybrids – Accomplishments.

11 Oilseeds - Groundnut- Origin – Distribution of species – Wild relatives and forms – breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids-Accomplishments.

12 Oilseeds - Castor and Sesame - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids -Accomplishments.

13 Oilseeds - Sunflower and Safflower - Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids – Accomplishments.

14 Oilseeds - Rapeseed and Mustard - Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids Accomplishments.

15 Oilseeds - Linseed and Niger - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids – Accomplishments.

16 Oilseeds - Coconut and Oilpalm - Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids – Accomplishments.

Practical

1. Hybridization techniques and precautions to be taken, Floral morphology, selfing, emasculation and crossing techniques in field crops

2. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in rice.

3 Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Wheat and Barley.

4. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Maize and Sorghum.

5. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Pearl millet and Finger millet.

6. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Kodo millet and Proso millet.

7. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Chickpea and Pigeonpea.

8. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Urdbeanand Mungbean.

9. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Soyabeanand Cowpea.

10. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Groundnut and Castor.

11. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in and Sesame and Linseed.

12. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Rapeseed and Mustard.

13. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Sunflower and Safflower.

14. Visit to Agricultural Research stations/AICRP projects of crops.

15 Sources of donors for different characters in various crops &Parentage of released varieties / hybrids of important crops.

16 Study of special quality characters in various crops.

***18 AEX 301 ENTREPRENEURSHIP DEVELOPMENT AND BUSINESS COMMUNICATION 2 (1+1)

Course outlines

Theory

Concept of Entrepreneur, Entrepreneurship, Distinction between an Entrepreneur and a Manager ; Management – Levels & Functions of Management - planning- Organizing -Directing – motivation – ordering – leading – supervision-Communication and control; Characteristics of Entrepreneurs; Opportunities for entrepreneurship and rural entrepreneurship. Types of Entrepreneurs, Functions of Entrepreneurship, Agri

Entrepreneurship - Concept, Need and Scope. Assessing overall business environment in Indian economy; Globalization and the emerging business entrepreneurial environment: Entrepreneurship Development Programmes (EDPs) - Objectives, Phases, Problems of EDPs, Entrepreneurial behavior and Role of Achievement Motivation, Factors Affecting Entrepreneurship Development; Generation, Incubation and Commercialization of Business Ideas. Environment scanning and opportunity identification, Rsearching Managing Competition - Ways to define possible Competitors; Globalization and the emerging business entrepreneurial environment; Role of ED in economic development of a country- Overview of Indian social, political systems and their implications for decision making by individual entrepreneurs SWOT Analysis Concept, Meaning and Advantages. Government Policies, Incentives, Programmes and Schemes for Entrepreneurship Development; Export and Import Policies relevant to Indian Agriculture Sector. Institutional Support Financial Institutions and other agencies in entrepreneurship development. Venture capital (VC), contract farming (CF) and joint ventures (JV), Publicprivate partnerships (PPP); Overview of agricultural Input industry – Seed, Fertilizer, Pesticides, Farm Machinery, Agricultural Food Processing Industry; Steps in establishment of MSME Enterprise - Planning of an enterprise, Project identification, Selection of the product / services, selection of form of ownership; registration, selection of site, capital sources, acquisition of manufacturing know how, packaging and distribution; Project Planning, Formulation and Project Report - Meaning - Importance - Components and Preparation; Supply Chain Management - Meaning, Advantages, Stages and Process and Total quality Management; Definition of business; Stakeholders in business; Stages of Indian business; Importance of agribusiness in Indian economy; Business Communication for Public Relation , Advertisement and crisis communication. Social responsibility of business. Morals and ethics in enterprise management Assessment of Entrepreneurship skills, Business Leadership Skills; Communication Skills for entrepreneurship development, Developing organizational skill, Managerial skills, Problem solving skill and Time management skills.

Practical

Field Visits to study any one Agri - based industries / business – Strengths, Weaknesses, Opportunities and Threats (SWOT) analysis, Constraints in setting up of agro based industries; Formulation of project feasibility reports; industrial and agribusiness houses; Characteristics of Successful Entrepreneurs, Characteristics of Successful Agripreneurs, any one of the Local Financial Institutions to study the MSME Policies, Visit to Entrepreneurial Development Institute to study the Process of Entrepreneurship Development, Local Public -Private Enterprises to study the Enterprise Establishment and Management Process as well as Assessing entrepreneurial potential problem solving ability, managerial skills and achievement motivation,

exercise in Creativity, time audit, preparation of business plan and proposal writing; Carrying out the SWOT Analysis of nearby Successful Enterprises. Visit to nearest Agri - Clinic and Agri - Business Centre's, if any.

Lecture outlines

Theory

 Concept of entrepreneur, entrepreneurship - Distinction between an entrepreneur and a manager - Management - Management functions – Planning - Organizing - Directing - Motivation - Ordering - Leading – Supervision - Communication and Control.

 Characteristics of entrepreneurs - Opportunities for entrepreneurship and rural entrepreneurship - Types of entrepreneurs and functions of entrepreneurship.

3. Agri – entrepreneurship - Concept, need and scope - Assessing overall business environment in Indian economy and globalization and the emerging business entrepreneurial environment.

 Entrepreneurship development programmes (EDPs) – Objectives, phases, problems of EDPs - Entrepreneurial behavior and role of achievement - Motivation, factors affecting entrepreneurship development.

 Generation, incubation and commercialization of business ideas – Environment scanning and opportunity identification - Researching/ Managing competition -Ways to define possible Competitors.

6. Globalization and the emerging business entrepreneurial environment - Roleof ED in economic development of a country - Overview of Indian social, political systems and their implications for decision making by individual entrepreneurs.

7. SWOT Analysis - Concept, meaning and advantages.

8. Government policies, incentives, programmes and schemes for entrepreneurship development - Export and import policies relevant to Indian Agriculture sector. 9. Institutional support - Financial Institutions and other agencies in entrepreneurship development

10. Venture capital (VC), contract farming (CF) and joint ventures (JV) - Publicprivate partnerships (PPP).

11. Overview of agricultural input industry – Seed, fertilizer, pesticides, farm machinery and agricultural food processing industry.

12. Steps in establishment of MSME Enterprise - Planning of an enterprise -Project identification - Selection of the product/ services - Selection of form of ownership - Registration, selection of site, capital sources, acquisition of manufacturing know how, packaging and distribution.

13. Project planning - Formulation and project report - Meaning - Importance - Components and preparation.

14. Supply chain management - Meaning, advantages, stages and process and total quality management.

15. Marketing management - Market types - Marketing assistance - Market strategies - Definition of business - Stakeholders in business - Stages of Indian business - Importance of agribusiness in Indian economy -Social responsibility of business - Morals and ethics in enterprise management.

16. Assessment of entrepreneurship skills - Business leadership skills -Communication skills for entrepreneurship development – Developing organizational skill - Developing managerial skills - Problem solving skill and time management skills.

Practical

1 Field visits to study any one Agri - based industries/ business – Strengths, Weaknesses, Opportunities and Threats (SWOT) analysis.

2 Field visits to study the constraints in setting up of agro based industries -Formulation of project feasibility reports and industrial and agri-business houses.

3 Field visits to study the formulation of project feasibility reports.

4 Field visits to study the industrial and agri-business houses.

5 Field visits to study the characteristics of successful entrepreneurs.

6 Field visits to study the any one of the Local Financial Institutions to study the MSME Policies.

7 Field visits to study the Entrepreneurial Development Institute to study the Process of Entrepreneurship Development.

8 Field visits to the local Public - Private Enterprises to study the Enterprise Establishment and Management Process.

9 Field visit to the local Public - Private Enterprises to study the Assessing entrepreneurial potential problem solving ability.

10 Field visits to the local Public - Private Enterprises to study the managerial skills and achievement motivation.

11 Practicing exercise in creativity and time audit.

12 Practicing exercise in preparation of business plan and proposal writing.

13 Visit to nearest Agri - Clinic and Agri - Business Centre's if any.

14 Power Point Presentation of Assignments - Session I

15 Power Point Presentation of Assignments - Session II

16 Power Point Presentation of Assignments - Session III

*18AGR 303 GEOINFORMATICS AND NANO TECHNOLOGY AND PRECISION FARMING 2(1+1)

Course outlines

Theory

Precision agriculture: concepts and techniques; their issues and concerns for Indian agriculture; Geo-informatics- definition, concepts, tool and techniques; their use in Precision Agriculture. Crop discrimination and Yield monitoring, soil mapping; fertilizer recommendation using geospatial technologies; Spatial data and their management in GIS; Geodesy and its basic principles; Remote sensing concepts and application in agriculture; Image processing and interpretation; Global positioning system (GPS), components and its functions; System Simulation- Concepts and principles, Introduction to crop Simulation Models and their uses for optimization of Agricultural Inputs; STCR approach for precision agriculture; Nanotechnology, definition, concepts and techniques, brief introduction about nanoscale effects, nano-particles, nano-pesticides, nano-fertilizers, nano-sensors, Use of nanotechnology in tillage, seed, water, fertilizer, plant protection for scaling-up farm productivity.

Practical

Introduction to GIS software, spatial data creation and editing.Introduction to image processing software.Visual and digital interpretation of remote sensing images. Generation of spectral profiles of different objects.Supervised and unsupervised classification and acreage estimation.Multispectral remote sensing for soil mapping.Creation of thematic layers of soil fertility based on GIS. Creation of productivity and management zones. Fertilizers recommendations based of VRT and STCR techniques. Crop stress (biotic/abiotic) monitoring using geospatial technology.Use of GPS for agricultural survey.Formulation, characterization and applications of nanoparticles in agriculture. Projects formulation and execution related to precision farming.

Lecture outlines

Theory

1. AGRO Precision agriculture: concepts and techniques-Issues and concerns for Indian agriculture

2. AGRO Principles and practices of precision agriculture.

3. AGRO Geo-informatics- definition, concepts, tools and techniques and their use in Precision Agriculture.

4. AGRO Crop discrimination and Yield monitoring techniques

5. AGRO Geodesy and its basic principles

6. AGRO Spatial data and their management in GIS

7. AGRO Global positioning system (GPS) –Components and its application in agriculture

8. AGRO Application of nanotechnology in agriculture - tillage, seed, water, fertilizers, plant protection for scaling-up farm productivity

9. SSAC Cartography, units of cartography, map scale, various symbols used in cartography, Soil mapping techniques

10. SSAC Remote sensing- concepts, Spectral reflectance of various earth features, atmospheric windows

11. SSAC Applications of remote sensing techniques in the field of agriculture and allied sciences including drones.

12. SSAC Spatial variability of soil fertility, its determination, fertilizer recommendation using geospatial technologies in precision farming

13. SSAC Image processing and interpretation - geo referencing - supervised and unsupervised classification of RS images. STCR approach for precision agriculture - principles and computations

14. SSAC Nanotechnology, definition, concepts and techniques – Nano scale – definition – Nano-particles , materials - occurrence – properties

15. SSAC Characterization of nano-materials - structural characterization -Nanosensors

16. SSAC Nano-fertilizers , nano-pesticides - importance and advantages synthesis – strategies

Practicals

1. SSAC GIS software, spatial data creation and editing.

2. SSAC Image processing software.

3. SSAC Visual and digital interpretation of remote sensing images.

4. SSAC Generation of spectral profiles of different objects.

5. AGRO Supervised and unsupervised classification and acreage estimation.

6. SSAC Multispectral remote sensing for soil mapping.

7. SSAC Creation of thematic layers of soil fertility based on GIS.

8. AGRO Creation of productivity and management zones.

9. AGRO Fertilizers recommendations based of VRT and STCR techniques.

10. AGRO Crop stress (biotic/abiotic) monitoring using geospatial technology. Use of drones for assessing crop damage.

11. AGRO Conduct of agricultural survey using GPS.

12. AGRO Use of GPS for watershed management

13. AGRO Use of GPS for crop yield estimation

14. SSAC Formulation, characterization of nanoparticles

15. SSAC Applications of nanoparticles in agriculture.

16. AGRO Projects formulation and execution related to precision farming.

*18 AGR 302 PRACTICAL CROP PRODUCTION - I (Kharif crops) 2(0+2)

Crop planning, raising field crops in multiple cropping systems: Field preparation, seed, treatment, nursery raising, sowing, nutrient, water and weed management and management of insect-pests diseases of crops, harvesting, threshing, drying winnowing, storage and marketing of produce. The emphasis will be given to seed production, mechanization, resource conservation and integrated nutrient, insect-pest and disease management technologies. Preparation of balance sheet including cost of cultivation, net returns per student as well as per team of 8-10 students.

- Each student will be allotted a minimum land area of 100/200 m² and he / she will do all field operations in the allotted land from field preparation to harvest and processing.
- Under exigencies like water scarcity to raise wetland rice of the cropproduction programme shall be with two irrigated dry crops, with an area ofnot less than five cents.
- Irrigated puddled lowland rice / any irrigated dry crop (maize / sorghum / pearl millet / finger millet / cotton / groundnut / sunflower / sesame).

OUTLINE

- Rice (Transplanted and direct seeded rice)
- Rice ecosystems Climate and weather Seasons and varieties of Tamil Nadu.
- Preparation of nursery Application of manures to nursery seed treatment - Forming nursery beds and sowing seeds - Weed management and plant protection to nursery.
- Preparation of main field Application of organic manures Green manuring - Bio-fertilizers - Pulling out seedlings and transplanting -Rajarajan 1000 (SRI) - Application of herbicides - Water management -Nutrient management - Plant protection measures - Mechanization in rice cultivation - Recording growth, yield attributes and yield.

• Harvesting, threshing, drying and cleaning the produce - Working out cost of cultivation and economics.

Practical Schedule for Transplanted rice:

- 18. Study of rice ecosystems, climate, weather, seasons and varieties of Tamil Nadu.
- 19. Selection of nursery area, preparation of nursery, application of manures and fertilizer to nursery.
- 20. Acquiring skill in seed treatment, seed soaking and incubation, nursery sowing and management.
- 21. Study and Practice of main field preparation and puddling operations.
- 22. Practicing of field preparatory operations sectioning of field bunds and plastering, leveling and basal application of fertilizers.
- 23. Practicing transplanting techniques in lowland rice.
- 24. Estimation of plant population and acquiring skill in gap filling and thinning.
- 25. Study of weeds and weed management in rice.
- 26. Study and practice of green manuring and bio-fertilizer application in rice.
- 27. Acquiring skill in nutrient management and practicing top dressing techniques.
- 28. Study of water management practices for lowland rice.
- 29. Observation of insect pests and diseases and their management.
- 30. Recording growth and other related characters of rice.
- 31. Estimation of yield and yield parameters in rice.
- 32. Harvesting, threshing and cleaning of the produce.

33. Working out cost of cultivation and economics.

34. Practical Examination.

*18 IPR 301 INTELLECTUAL PROPERTY RIGHTS

1(1+0)

Course outlines

Theory

Introduction and meaning of intellectual property; brief introduction to GATT, WTO, TRIPs and WIPO; Treaties for IPR protection: Madrid protocol, Berne Convention, Budapest treaty, etc.; Types of Intellectual Property and legislations covering IPR in India: Patents, Copyrights,Trademark, Industrial design, Geographical indications, Integrated circuits, Trade secrets; Patents Act 1970 and Patent system in India, patentability, process and product patent, filing of patent, patent specification, patent claims, Patent opposition and revocation, infringement, Compulsory licensing, Patent Cooperation Treaty, Patent search and patent database;Origin and history including a brief introduction to UPOV for protection of plant varieties; Protection of plant varieties under UPOV and PPV&FR Act of India; Plant breeders rights; Registration of plant varieties under PPV&FR Act 2001; breeders, researcher and farmers rights; Traditional knowledge-meaning and rights of TK holders;Convention on **Biological** Diversity; International treaty on plant genetic resources for food and agriculture (ITPGRFA). Indian Biological Diversity Act, 2002 and its salient features, access and benefit sharing.

Lecture outlines

Theory

1 Introduction and meaning of intellectual property.

2 Brief introduction to GATT, WTO, TRIPs and WIPO.

3 Treaties for IPR protection: Madrid protocol, Berne Convention, Budapest treaty, etc.

4-6 Types of Intellectual Property and legislations covering IPR in India: Patents and Copyrights, Trademark, Industrial design, Geographical indications, Integrated circuits, Trade secrets.

7 Patents Act 1970.

8 Patent system in India, patentability, process and product patent, filing of patent, patent specification, patent claims, Patent opposition and revocation, infringement, Compulsory licensing, Patent Cooperation Treaty, Patent search and patent database

9 Origin and history including a brief introduction to UPOV for protection of plant varieties.

10 Protection of plant varieties under UPOV and PPV&FR Act of India, Plant breeders rights.

11 Registration of plant varieties under PPV&FR Act, 2001.

12 Breeders, researcher and farmers rights.

13 Traditional knowledge-meaning and rights of TK holders. 14

Convention on Biological Diversity.

15 International treaty on plant genetic resources for food and agriculture (ITPGRFA).

16 Indian Biological Diversity Act, 2002 and its salient features, access and benefit sharing.

*18 AGR 301 RAIN FED AGRICULTURE AND WATERSHED MANAGEMENT 2(1 + 1)

Course outlines Theory

Rainfed agriculture: Introduction, types, History of rainfed agriculture & watershed in India; Problems and prospects of rainfed agriculture in India ; Soil and climatic conditions prevalent in rainfed areas; Drought: types, effect of water deficit on physio- morphological characteristics of the plants, Mechanism of crop adaptation under moisture deficit condition; Water harvesting: importance, its techniques, Efficient utilization of water through soil and crop management practices, Management of crops in rainfed areas, Contingent crop planning for aberrant weather conditions, Concept, objective, principles and components of watershed management, factors affecting watershed management.

Practical

Studies on climate classification, studies on rainfall pattern in rainfed areas of the country and pattern of onset and withdrawal of monsoons. Studies on cropping pattern of different dry land areas in the country and demarcation of dry land area on map of India.Interpretation of meteorological data and scheduling of supplemental irrigation on the basis of evapo-transpiration demand of crops.Critical analysis of rainfall and possible drought period in the country, effective rainfall and its calculation. Studies on cultural practices viz; mulching, plant density, depth of sowing, thinning and leaf removal for mitigating moisture stress. Characterization and delineation of model watershed.Field demonstration on soil & moisture conservation measures.Field demonstration on construction of water harvesting structures. Visit to rainfed research station/watershed.

Lecture outlines

Theory

Rainfed agriculture – introduction and definition – dimensions of the problem
 area and production from dry lands in India and Andhra Pradesh – History of rainfed agriculture and watersheds in India.

Problems and prospects of rainfed agriculture in India – climate – rainfall pattern – distribution – variabilities of rainfall – short rainy season – high intensity rainfall
 Problems and prospects of rainfed agriculture in India - soil characteristics – soil fertility status –soil moisture storage and retention capacity – heavy weed infestation-soil crust and their effect on crop growth and soils-its management.

4. Drought – definition – types of drought – effect of water deficits on physiomorphological characteristics of the plants- mechanism of crop adaptation under moisture deficit condition - management strategies for drought.

 Tillage for rainfed crops – off-season tillage – primary tillage –secondary tillage – year round tillage – sub soiling – setline cultivation – modern conceptsof tillageminimum tillage and zero tillage.

6. Soil erosion – definition – losses due to erosion – types of water and wind erosion
 – nature and extent of wind and water erosion – factors affecting erosion –
 universal soil loss equation

 Management of crops in rainfed areas - Agronomic measures of soil and water conservation – choice of crop – crop geometry – tillage – contourcultivation – strip cropping – cover cropping – mulching – cropping systems and weed control
 Mechanical measures of soil and water management.

8. Watershed – definition – concept— objectives and principles of water shed management components of watershed development programme – factors affecting watershed management.

9. Water harvesting – importance, its techniques- Water harvesting structures – arid region – runoff farming – water spreading – micro catchments – semi arid region – farm ponds, check dams – percolation tank – dug wells – life savingirrigation

10. *In-situ* moisture conservation measures – bund forming – bunding, ridge and furrow system – conservation furrows- inter plot water harvesting, mulching – Broad Bed and Furrow (BBF) and leveling.

11. Fertilizer use in rainfed areas – use of organic manures – introduction of legumes in crop rotation– organic recycling and bio-fertilizer use in rainfed agriculture – time and method of fertilizer application

12. Efficient crops and varieties – cropping systems in rainfed areas – intercropping – advantages – efficient inter cropping systems in different rainfed regions of Andhra Pradesh

13. Contingent crop planning for aberrant weather conditions in red and black soils.

14. Evapotranspiration – measures to reduce evapotranspiration – weeding, use of mulches, chemicals, windbreaks and shelterbelts

15. Land capability classification – alternate land use system

16. Efficient utilization of water through soil and crop management practices agronomic measures - mechanical measures for soil and water conservation –gully control – bench terraces – contour terracing – graded bund

Practical

1. Climate classification.

2. Rainfall analysis - Mean, standard deviation, variance and CV.

3. Onset and withdrawal of monsoons and determination of length of growing crop season.

4. Study on cropping pattern of different dryland areas.

5. Mapping of dryland areas in India.

6. Interpretation of meteorological data for rainfall variability.

7. Scheduling of supplemental irrigation based on crop ET demand.

8. Critical analysis of rainfall and calculation of wet spells,dry spells ,and length of growing season.

9. Calculation of effective rainfall.

10. Determination of moisture availability index.

11. Study of cultural practices for mitigating moisture stress(mulching, plant density, depth of sowing, thinning and leaf removal).

12. Visit to watershed.

13. Field demonstration on soil & moisture conservation measures.

14. Field demonstration of water harvesting structures.

15. Study of farm ponds as a source of supplemental irrigation.

16. Visit to rainfed research station.

References

3. Dhruva Narayana, V.V., Sastry, G.S. and Patnaiak, V.S. 1999. Watershed Management in India. ICAR, New Delhi.

4. Jeevananda Reddy,S.2002. Dryland Agriculture in India: An agroclimatological and agro-meteorological perspective. B S publications.

**18 PCA 301 PROTECTED CULTIVATION AND POST HARVEST TECHNOLOGY (SECONDARY AGRICULTURE) 2(1+1)

<mark>Course outlines</mark> Theory

Greenhouse technology – Introduction - Types of greenhouses - Plant response to greenhouse environment - Planning and design of greenhouses - Design criteria of green house for cooling and heating purposes - Green house equipments - Materials of construction for traditional and low cost green houses - Irrigation systems used in greenhouses - Typical applications - Passive solar greenhouse - Hot air greenhouse heating systems - Greenhouse drying - Cost estimation and economic analysis.

Important engineering properties such as physical - Thermal and aerodynamic properties of cereals - Pulses and oilseeds - Their application in PHT equipment design and operation - Drying and dehydration - Moisture measurement – EMC - Drying theory - Various drying methods - Commercial grain dryer (deep bed dryer, flat bed dryer, tray dryer, fluidized bed dryer, re-circulatory dryer and solar dryer) - Material handling equipment - Screw conveyer and bucket elevator - Their principle - Working and Selection - Primary processing of cereals, pulses and oilseed, like cleaning, grading, packaging etc.

Practical

Study of different type of greenhouses based on shape - Determine the rate of air exchange in an active summer winter cooling system - Determination of drying rate of agricultural products inside greenhouse - Study of greenhouse equipment - Visit to various post harvest laboratories - Determination of moisture content of various grains by oven drying & infrared moisture methods

 Determination of engineering properties (shape and size, bulk density and porosity of biomaterials) - Determination of moisture content of various grains by moisture meter - Exposure to primary processing equipment like dalmills, graders, cold storages etc. - Field visit to seed processing plant.

Lecture outlines

Theory

 Introduction to green houses - History, definition, greenhouse effect, advantages of green houses.

 Brief description of types of green houses - Greenhouses based on shape, utility, construction, covering materials and cost, shade nets.

 Plant response to greenhouse environments - Light, temperature, relative humidity, ventilation and carbon dioxide and environmental requirement of agriculture and horticulture crops inside green houses.

 Equipment required for controlling green house environment – Summer cooling and winter cooling, natural ventilation, forced ventilation and computers. 5. Planning of green house facility - Site selection and orientation, structural design and covering materials.

6. Materials for construction of green houses - Wood, galvanized iron, glass, polyethylene film, poly vinyl chloride film, Tefzel T2 film, fiberglass reinforced plastic rigid panel and acrylic and polycarbonate rigid panel.

7. Design criteria and constructional details of greenhouses - Construction of pipe framed greenhouses, material requirement, preparation of materials and procedure of erection.

8. Greenhouse heating and distribution systems - Greenhouse utilization - Offseason drying of agricultural produce - Economic analysis of greenhouse production - Capital requirement, economics of production and conditions influencing returns.

9. Irrigation system used in greenhouses - Rules of watering, hand watering, perimeter watering, overhead sprinklers, boom watering and drip irrigation.

10. Important engineering properties such as physical, thermal and aerodynamic properties of cereals, pulses and oil-seeds.

11. Designing post harvest equipment based on physical and thermal properties.

12. Winnowing - Manual and power operated winnowers, care and maintenance - Groundnut decorticators - Hand and power operated decorticators, principle of working, care and maintenance.

13. Moisture measurement - Equilibrium moisture content (EMC) – importance
 Drying theory - Drying and dehydration.

14. Commercial grain dryers - Deep bed, flat bed, tray, fluidised bed,

recirculated and solar dryers.

15. Material handling equipment - Bucket elevator and screw conveyer and their selection.

16. Primary processing of cereals, pulses and oilseeds - Cleaning, grading and packaging.

Practical

1. Study of different types of green houses based on shape, etc.

2. Computing the rate of air exchange in an active summer and winter cooling systems.

3. Feasibility study on drying of agricultural products inside a greenhouse and its calculation.

4. Visit to post harvest technology units and laboratories.

5. Determination of moisture content of various grains by oven drying and infrared methods.

6. Determination of size, space, porosity, bulk density, etc., of grains.

7. Determination of aerodynamic properties of grains.

8. Cleaning and grading of grains, pulses and oilseeds.

9. Drying and dehydration of vegetables (cauliflower).

10. Visit to rice mill.

11. Study of LSU dryer.

12. Study of Bucket elevator and screw conveyor.

13. Visit to dhal mill

14. Visit to oil seed processing plant.

15. Visit to cold storage

16. Practical final examination

*18 PAT 302 DISEASES OF FIELD AND HORTICULTURAL CROPS AND THEIR MANAGEMENT-II (HORTICULTURAL CROPS) 2 (1+1)

Course outlines

Theory

Symptoms, etiology, disease cycle and management of following diseases: Citrus: canker, gummosis, felt, tristeza and greening; Mango: anthracnose, malformation,bacterial blight, powdery mildew, sooty mould, red rust and Loranthus; Guava: wilt and anthracnose; Papaya: foot rot, anthracnose, leafcurl and mosaic and powdery mildew,Ber: Powdery mildew; Sapota: Flat limb,;Banana: Panama wilt, bacterial wilt, Erwinia rhizome rot, Sigatoka, bunchy top, banana mosaic and banana bract mosaic; Pomegranate: Anthracnose and bacterial blight; Grape vine: downy mildew, Powdery mildew, anthracnose, alternaria leaf spot and rust; Apple: scab, powdery mildew, fire blight and crown gall; Peach: leaf curl ; Strawberry: leaf spot Chillies: Damping off, anthracnose and fruit rot, wilt, powdery mildew, Choanephora blight cercospora leaf spot, bacterial leaf spot, mosaic complex and leaf curl; Brinjal: Phomopsis blight and fruit rot, bacterial wilt, Sclerotinia blight and little leaf; Okra:Cercospora leaf spot, powdery mildew and Yellow Vein Mosaic; Potato: early and late blight, black scurf, common scab,wart, black leg, brown rot, leaf roll, mosaics, potato spindle tuber; Tomato: damping off, wilt, early and late blight, buck eye rot and leaf curl, Septoria leaf spot, bacterial canker, root knot, Tomato spotted wilt and mosaic; Cruciferous vegetables: Club root, white rust, Downy mildew, powdery mildew, Alternaria leaf spot and black rot; Cucurbits: downy mildew, powdery mildew, Cercospora leaf spot, wilt and CMV; Betelvine: Root and stem rot, Sclerotial wilt, Fusarial wilt, Anthracnose; Onion and garlic: Smudge, smut, purple blotch, and Stemphylium blight; Beans: anthracnose, rust, yellow Bean common mosaic virus and bacterial blight; Colocasia: mosaic, Phytophthora blight; Coriander: stem gall; Coconut: Stem bleeding, Ganoderma wilt, bud rot, grey blight and tatipaka; Oilpalm:Bunchrot and spear rot ; Tea: blister blight; Coffee: rust; Turmeric: leaf spot, leaf blotch, rhizome rot; Ginger: rhizome rot/soft rot, leaf spot; Mulberry:powdery mildew; Rose: dieback, Marigold: powdery mildew and black leaf spot; **Botrytis** blight; Chrysanthemum: wilt, stunt, septoria blotch; Jasmine: rust; Crossandra : wilt

Practical

Identification and histopathological studies of selected diseases of horticultural crops covered in theory. Field visit for the diagnosis of field problems. Collection and preservation of plant diseased specimens for herbarium. Note: Students should submit 50 pressed and well-mounted specimens

Lecture outlines

Theory

Study of etiology, symptoms, host-parasite relationship and specific management practices of the following diseases.

1. Citrus diseases - Citrus canker, gummosis (*Phytophthora* and *Diplodia*), felt, tristeza and greening.

2. Mango diseases:anthracnose, malformation, bacterial leaf spot, powdery mildew, sooty mold, red rust and Loranthus.

3. Guava, Papaya, Ber and Sapota diseases –Guava: wilt and anthracnose.Papaya: foot rot, anthracnose, leaf curl and mosaic and powdery mildew.Ber: Powdery mildew. Sapota: Flat limb.

4. Banana and Pomegranate diseases –Banana: Panama wilt, bacterial wilt, Erwinia rhizome rot, Sigatoka,bunchy top, banana mosaic and banana bract mosaic. Pomegranate: Anthracnose and bacterial blight.

5. Grapevine diseases – downy mildew, Powdery mildew, anthracnose, Alternaria leaf spot and rust.

6. Apple and Peach diseases –Apple: scab, powdery mildew, fire blight and crown gall Peach: leaf curl.

7. Chillies diseases - Damping off, die-back and fruit rot, Fusarium wilt, powdery mildew, Choanephora blight,Cercospora leaf spot, bacterial leaf spot, mosaic complex and leaf curl.

8. Brinjal and Okra diseases –Brinjal- Phomopsis blight and fruit rot, bacterial wilt and little leaf. Okra-Cercospora leaf spot, powdery mildew and Yellow Vein Mosaic.

9. Potato diseases - early and late blight, black scurf, common scab, wart, black leg, brown rot, leaf roll, mosaics, potato spindle tuber.

10. Tomato diseases - damping off, Ralstonia wilt, early blight, buck eye rot and leaf curl, Septoria leaf spot, bacterial canker, root knot, Tomato spotted wilt and mosaic.

11. Crucifers and Cucurbits diseases –Cruciferous vegetables- Club root, white rust, Downy mildew, powdery mildew, Alternaria leaf spot and black rot. Cucurbits: downy mildew, powdery mildew, Cercospora leaf spot, Erwinia wilt and CMV.

12. Betelvine, onion and garlic diseases –Betelvine: Phytophthora root andstem rot, Sclerotial wilt, Fusarial wilt, Anthracnose. Onion and garlic: Smudge, smut, purple blotch, and Stemphylium blight.

13. Beans, Colocasia and Coriander diseases –Beans- anthracnose, rust, Bean common mosaic virus and bacterial blight. Colocasia: Phytophthora blight. Coriander- stem gall.

14. Coconut and oil palm diseases –Coconut- Stem bleeding, Ganoderma wilt, bud rot, grey blight and Tatipaka disease.Oil palm- Bunch rot and spear rot. Teablister blightCoffee- rust.

15. Turmeric, ginger and mulberry diseases –Turmeric- leaf spot, leaf blotch, rhizome rot Ginger: rhizome rot/soft rot, leaf spot. Mulberry- powdery mildew.

16. Rose- dieback, powdery mildew and black leaf spot. Marigold: Botrytis blight Chrysanthemum- wilt, stunt, Septoria blotch. Jasmine- rust. Crossandra - wilt

Practical

Studies of symptoms, Identification and histopathological studies of the following diseases

1. Citrus diseases.

2. Mango diseases.

3. Ber, guava and sapota diseases.

4. Field visits for the diagnosis of crop diseases.

5. Papaya, banana and pomegranate diseases.

6. Grape and Apple diseases.

7. Chilli, brijnal and Bhendi diseases.

8. Field visits for the diagnosis of crop diseases.

9. Potato and tomato diseases.

10. Crucifers and cucurbits diseases.

11. Betelvine, Onion, Beans, Colocasia and Coriander diseases.

12. Field visits for the diagnosis of crop diseases.

13. Coconut and oilpalm diseases.

14. Tea, Coffee, Turmeric and Ginger diseases.

15. Mulberry, Rose, Jasmine and Chrysanthemum diseases.

16. Field visits for the diagnosis of crop diseases.

Note: Students should submit 50 pressed and well-mounted specimens. References

**18 HOR 302 POST-HARVEST MANAGEMENT AND VALUE ADDITION OF FRUITS AND VEGETABLES 2 (1+1)

<mark>Course outlines</mark> Theory

Importance of fruits and vegetables, extent and possible causes of post harvest losses; Pre-harvest factors affecting postharvest quality, maturity, ripening and changes occurring during ripening; Respiration and factors affecting respiration rate; Role of ethylene; Post harvest disease and disorders; Heat, chilling and freezing injury; Harvesting and field handling; Storage (ZECC, cold storage, CA, MA, and hypobaric); Value addition concept; Principles and methods of preservation; Intermediate moisture food- Jam, jelly, marmalade, preserve, candy – Concepts and Standards; Fermented and nonfermented beverages. Tomato products- Concepts and Standards; Drying/ Dehydration of fruits and vegetables – Concept and methods, osmotic drying. Canning – Concepts and Standards, Packaging of products.

Practical

Applications of different types of packaging containers for shelf life extension, Effect of temperature on shelf life and quality of produce, Demonstration of chilling and freezing injury in vegetables and fruits, Extraction and preservation of pulps and juices, Preparation of jam, Preparation of Jelly, Preparation of RTS, Preparation of Nectar, Preparation of Squash, Osmotically dried products, Fruit bar and Candy and Tomato products, Canned products, Quality evaluation of products — physico-chemical and sensory, Visit to processing unit/ industry

Lecture outlines

Theory

 Scope and Importance of post harvest technology of fruits and vegetables- Extent and possible causes of post harvest losses- Causes of post harvest losses.

 Pre-harvest factors affecting postharvest quality, maturity, ripening and shelf life of fruits and vegetables – Environmental factors (Temperature, Light, Rainfall, Wind, Relative humidity) – Cultural factors – (Rootstock, Variety, Mineral nutrients, growth regulators, Irrigation, pruning, thinning, girdling) – Maturity – Pest and diseases.

 Changes occurring during ripening – Ripening definition- Climacteric and nonclimacteric fruits – Metabolic changes - Maturation of seeds – Colour – Texture - Changes in carbohydrates- Changes in aromatic volatiles - Changesin organic acids – Fruit abscission – Changes in respiration rate – Development of surface waxes – Changes in tissue permeability. 4. Causes for deterioration of harvested fruits and Vegetables -Respiration and factors affecting respiration rate – Transpiration and factors affecting transpiration - Ethylene –Mechanical damage – Pest and Diseases.

5. Post harvest diseases and disorders - Heat, chilling and freezing injury.

6. Harvesting and field handling – Methods of harvesting – Post harvest handling – Pre-cooling - Sorting and grading – Disinfestation – Post harvest treatments (Waxing, Wrapping, de-greening, ripening).

7. Storage – Methods of storage – Traditional storages (In-situ, pit storage, high altitude, clamp storage, wind breaks, cellars, barns, Night ventilation, Evaporative cool storage ZECC) - Improved storage methods (Refrigerated storage, modified atmospheric storage, controlled atmospheric storage, hypobaric storage).

8. Value addition – Concept – Scope and importance of fruit preservation in India –

Status of fruit preservation in India.

9. Principles and methods of preservation – Principles of preservation – Preservation methods – High temperature, low temperature, drying, filtration, chemicals, food additives, fermentation, carbonation, antibiotics, irradiation etc. 10. Intermediate moisture foods - Jam, jelly, marmalade – Problems in Jam makingimportant considerations and problems in Jelly making- Problems in marmalade making.

 Preserve, candy – Concepts and Standards – Flow chart for manufacturingof preserve and candy – Problems in preservation of preserve and candied fruits – Glazed fruits/vegetables.

12. Fruit beverages –Fermented (Juices, Ready to serve, Nectar, cordial, Squash, crush, Syrup, Fruit Juice concentrate, Fruit Juice, Powder, Carbonated beverages) and non-fermented beverages (Wine, Champagne, Port,Sherry, Tokay, Muscat, Perry, Nira, Feni, Cider) – Preparation and preservation of unfermented fruit beverages.

13. Tomato processing - Concepts and Standards – Tomato juice – Tomato puree and paste – Tomato sauce/ketchup- Tomato chutney/pickle –Tomato cocktail – Tomato soup – Canned tomatoes.

14. Drying/dehydration of fruits and vegetables – Factors affect the rate of drying – Advantages of dehydration over sun drying – Process of drying/dehydration of fruits and vegetables – Spoilage of dried fruits and vegetables - Freezing – Methods of freezing.

15. Canning of fruits and vegetables – Selection of fruits and vegetable - Causes of spoilage of canned foods – Testing for defects - Containers for packing of canned products – Tin containers, glass containers.

16. Packaging of products - Definition – Properties of good packaging material – Different packaging materials for fresh fruits and vegetables for export – Cushioning materials – Purpose – Characteristics of cushioning material.

Practical

 Applications of different types of packaging containers for shelf life extension.

2. Effect of temperature on shelf life and quality of produce.

3. Demonstration of chilling and freezing injury in vegetables and fruits.

4. Extraction and preservation of pulps and juices.

5. Preparation of jam.

6. Preparation of jelly.

7. Preparation of RTS.

8. Preparation of nectar.

9. Preparation of squash.

10. Preparation of osmotically dried products.

11. Preparation of fruit bar and candy.

12. Preparation of tomato sauce.

13. Preparation of tomato ketchup.

14. Preparation of canned products.

15. Quality evaluation of products - (physic-chemical and sensory).

16. Visit to processing unit/ industry.

*18 AEN 302 PESTS OF HORTICULTURAL CROPS AND THEIR MANAGEMENT & BENEFICIAL INSECTS 3(2+1)

Course outlines Theory

General account on nature and type of damage by different arthropod pests. Scientific name, order, family, host range, distribution, biology and bionomics, nature of damage, and management of major pests and scientific names, order, family, host range, distribution, nature of damage and control practices for other important arthropod pests of various vegetable crops, fruit crops, plantation crops, ornamental crops, narcotics, spices and condiments.

Types of silkworm, voltinism and biology of silkworm. Mulberry cultivation, mulberry varieties, methods of harvesting and preservation of leaves. Rearingof mulberry silkworm, rearing appliances, mounting and harvesting of cocoons. Pests and diseases of silkworm, management, and methods of disinfection.

Importance of beneficial insects, bee keeping, pollinating plants and their cycle, bee biology, commercial methods of rearing, equipment used and seasonal management. Bee pasturage, bee foraging and communication. Insect pests and diseases of honey bee. Species of lac insect, morphology, biology, hostplant and lac production – Processing of lac - seed lac, button lac, shellac and lac- products. Identification of major parasitoids and predators commonly used in biological control. Insect orders bearing predators and parasitoids used in pest control and their mass multiplication techniques. Important species of pollinators, weed killers and scavengers and their importance.

Practical

Identification of different types of damage. Identification and study of life cycle and seasonal history of various insect pests attacking horticultural crops - vegetable crops, fruit crops, plantation gardens, narcotics, spices &condiments. Visit to orchards and gardens.

Mulberry cultivation, mulberry varieties and methods of harvesting and preservation of leaves.Types of silkworm, voltinism and biology and rearing of silkworm and equipment. Honey bee species and castes of bees. Beekeeping appliances and seasonal management.Bee enemies and diseases.Bee pasturage, bee foraging and communication.

Species of lacinsect, host plant identification. Identification of other important pollinators, weed killers and scavengers. Visit to research and training institutions devoted to sericulture, beekeeping, lac culture and natural enemies.

Lecture outlines Theory General account on nature and type of damage by different arthropod pests. Scientific name, order, family, host range, distribution, marks of identification, bionomics, nature of damage, and management of major, minor insect pests and other important arthropod pests of various vegetable crops, fruit crops, plantation crops, ornamental crops, narcotics, spices and condiments.

1 Brinjal- Epilachna beetle, shoot and fruit borer, stem borer, mealy bug, aphid, leafhopper, lacewing bug, leaf webber and red spider mite- IPM practices.

2 Bhendi- Shoot and fruit borer, leafhopper and whitefly and spider mite -Tomato- Serpentine leaf miner, South American Leaf miner/ Tomato pink worm, fruit borer and whitefly - IPM practices.

3 Cucurbits- Fruit flies, pumpkin beetles, semilooper, serpentine leaf minerand pumpkin leaf eating caterpillar - Coccinia-Coccinia gall fly and aphids - IPM practices.

4 Crucifers- Diamond back moth, cabbage head borer, leaf webber, aphid, painted bug, tobacco caterpillar and cabbage butterfly - IPM practices.

5 Potato- Tuber moth - Sweet potato - Sweet potato weevil, hairy caterpillar, tortoise beetle - Moringa- Hairy caterpillar, budworm, leaf webber and pod fly -Chillies- Thrips, pod borers, aphid, mites, blossom midge - Amaranthus- Leaf eating caterpillar, stem weevil - IPM practices.

6-7 Mango- Leafhoppers, stem borer, nut weevil, fruit fly, shoot borer, fruit borer, mealybug, aphids, leaf webber, termites, thrips, red tree ant, leaf gall midges and red spider mite - IPM practices..

8 Citrus- Butterfly, fruit sucking moths, leaf miner, psylla, rust mite, bark eating caterpillar, black fly and leaf mite.

9 Grapevine- Flea beetle, thrips, mealybug, stem girdler, stem borer, leaf eating caterpillars and root grub - IPM practices.

10 Cashew- Tree borer, shoot and blossom webber, tea mosquito bug, thrips and leaf miner Pomegranate- Butterfly, thrips and fruit sucking moths - IPM practices.

11 Guava- Tea mosquito bug, mealybug, fruit flies and spiralling whitefly -Sapota- Leaf webber, parijatha hairy caterpillar, mealybugs - Ber- Fruit fly,fruit borer and fruit weevil.

12 Banana- Rhizome weevil, skipper, aphid and pseudostem weevil -Papayawhiteflies, mealybugs and thrips - Apple - Woolly aphid and Codling moth – Custard apple- Mealybug - IPM practices

13 Coconut- Black headed caterpillar, rhinoceros beetle, red palm weevil, slug, termites, scale and mite - Oil palm- Black headed caterpillar, rhinoceros beetle and red palm weevil - IPM practices.

14 Arecanut- Scales - Cocoa - Scales - Cardamom- Thrips - Pepper- Pollu beetle and shoot borer - Eucalyptus - Gall wasp - Neem - Tea mosquito bugand white grub - IPM practices.

15 Turmeric and ginger- Rhizome fly and Lace wing bug - Betelvine- Shoot bug and tobacco caterpillar - Onion- Thrips and *Spodoptera exigua* - Coriander-

Aphids and leaf eating caterpillar - Rose- Thrips, scales, leaf eating caterpillars and chafer beetles - Jasmine- Stink bug, bud worm and gall mite -Chrysanthemum- Aphid- IPM practices - Tobacco-Tobacco caterpillar, aphid, whitefly and stem borer - Coffee- White borer, red borer and green scale; Tea-Tea mosquito bug, thrips, red spider mite, pink mite, purple mite and scarlet mite- IPM practices.

16 Economically important mite, nematode (vegetables, citrus, banana and coconut), rodent (coconut) and bird pests of horticultural crops and their management. 17 Beneficial insects – Importance of silkworm, honeybee, lac insects, predators, parasitoids, pollinators, weed killers and scavengers.

18 Species of Silkworms - Characteristic features of Mulberry Silkworm, Tasar Silkworm, Eri Silkworm and Muga Silkworm and their hosts- Biology – Voltinism - Ahimsa silk.

19 Establishment of mulberry garden – Planting season and land preparation, preparation of planting material - Irrigation- spacing, varieties, planting inter cultivation, fertilization, irrigation, leaf harvest and leaf yield - Mulberry Planting under rainfed and irrigated conditions - Spacing and preparation of pits, planting, fertilization, inter-cultivation, maintenance, soil moisture conservation and leaf harvest - Pests and diseases of mulberry plants and their management – Rearing house, rearing equipment and appliances-rearing stand, chawki rearing trays, late age rearing trays, paraffin wax coated paper, bird feathers, bed cleaning nets, chop sticks, rubber foam, ant well, mountages, chopping knife, chopping board, feeding basins, disinfection and hygiene in rearing house.

20 Mulberry silkworm races - Grainage centres, brushing of silkworm larvae, young age and late age silkworm rearing - Effect of temperature, humidity, air current and photoperiod - Leaf quality and leaf maturity on larval growth and survival – Feeding of late instars, bed cleaning and bed spacing for IV and V instars 21 Mounting- mountages, mounting density, harvesting and assessment of cocoon yield and cocoon characters for marketing - Defective cocoons.

22 Silk worm diseases- Pebrine- Symptoms, mode of transmission, stages of contamination and intensity, detection and control - Viral diseases- Nucleo polyhedron Virus and Cytoplasmic Polyhedro Virus - Symptoms, prevention and control. Grasserie - Symptoms, source of contamination, prevention and control - Infectious Flacherie - Symptoms, prevention and control - Fungal Diseases-White muscardine- Source of infection, symptoms, prevention and control - Uzi fly – Biology, nature of damage and symptoms and management.

23 Beekeeping- Importance and multiple source of income - Species of Honeybees-Rock bee, Little bee, Indian honey bee, European bee and Dammar bee -Bee biology- Life cycle - Caste determination in honey bees- Structural adaptations of honeybees.

24 Commercial methods of rearing, – Different types of the hive- Equipment -Smoker, bee veil, gloves, honey extractor, queen gate, queen excluder sheet, drone extruder, drone trap, comb foundation sheet, dummy division board, swarm trap, bee brush, feeder, queen cage and queen cell protector - Colony management in different seasons, winter, summer and rainy seasons.

25 Bee pasturage – Different species of pollen and nectar yielding plants- Honey flow season and dearth period – Communication in bees – Round dance and wag tail dance- Management of bees for crop pollination – Queen beesubstance – Honey extraction, testing of honey, honey composition and value, bee wax, pollen, royal jelly, propolis, venom and its uses.

26 Enemies of bees and bee brood - Nature of damage and management of Greater wax moth, lesser wax moth, wax beetle, wasps, black ants, birds *etc.*, - Nature of damage and management of honey bee - *mites, Acarapis woodi, Varroa jacobsoni* and *Tropilaelaps clareae*.

27 Bee diseases – Nature of damage and management of American foul brood disease, European foul brood disease, Sac brood disease, Thai sac brood disease, Chalk brood, stone brood disease, Nosema and Amoeba disease - Colony collapse disorder in bees.

28 Lac insect- Different species, morphology, behaviour, host plants, inoculation methods, natural enemies of lac insect and their management - Lac production – Processing, different forms of lac- raw lac, seed lac, shellac and lac by - products. Recent applications of lac.

29 Identification of biological control agents - Insect predators and parasitoids, pathogens, entomopathogenic nematodes.

30 Insect orders bearing predators and parasitoids used in pest control and their key identification characters (Dictyoptera: Mantidae; Hemiptera: Reduviidae, Anthocoridae, Lygaeidae, Pentatomidae; Neuroptera: Chrysopidae, Myrmeleontidae, Hemerobiidae; Coleoptera: Carabidae, Cicindelidae, Coccinellidae; Diptera: Asilidae, Tachinidae, Syrphidae; Lepidoptera: Noctuidae, Lycaenidae, Epipyropidae, Pyralidae; Hymenoptera: Vespidae, Braconidae, Ichneumonidae, Chalcididae, Trichogrammatidae, Platygasteridae, Elasmidae, Eulophidae, Scelionidae and Strepsiptera).

31 Mass production/multiplication methods of predators (Cheilomenes and Chrysoperla) parasitoids (Goniozus nephantidis).

32 Important species of pollinators, weed killers, and scavengers and their significance.

Practical

1 Identification of insect pests of Solanaceous and Malvaceous vegetables and their damage symptoms

2 Identification of insect pests of Cruciferous and Cucurbitacious vegetables and their damage symptoms

3 Identification of insect pests of leafy vegetables, potato, sweet potato, moringa and chilli and their damage symptoms (Potato and Chillies are Solanaceous crops).

4 Identification of insect pests of mango, cashew, citrus & banana and their damage symptoms.

5 Identification of insect pests of grapevine, pomegranate, sapota, papaya, apple, custard apple, ber and guava and their damage symptoms.

6 Identification of insect pests of coconut, arecanut, cocoa, cardamom, pepper, date palm & oil palm, eucalyptus and neem and their damage symptoms.

7 Identification of insect pests of spices, narcotics (turmeric, betel vine, onion, tobacco & ginger) and ornamental plants (jasmine, rose, chrysanthemum) and their damage symptoms.

8 Identification of economically important mite, nematode (vegetables, citrus, banana and coconut), rodent (coconut) and bird pests of horticultural crops and their management.

9 Acquaintance with silkworm species and small scale rearing of mulberry silkworm.

10 Acquaintance with different appliances of silkworm rearing, model rearing house and methods of disinfection.

11 Acquaintance with handling of chawki and late age silkworm rearing - Feed change and spacing techniques.

12 Dissection of silkworm larval mouthparts and salivary glands.

13 Acquaintance with important species of honey bees, caste system, structural adaptations, beekeeping appliances and different beehives.

14 Seasonal management of honey bees and their enemies and diseases.

15 Visit to nearby silkworm rearing and bee keeping centres.

16 Identification of various lac products.

*18 GPB 302CROP IMPROVEMENT-II (FIBRES, SUGARS, STARCHES,
NARCOTICS, VEGETABLES, FRUITS AND FLOWERS)2 (1+1)

Course outlines

Theory

Centers of origin, distribution of species, wild relatives in different fibres, sugars, starches, narcotics, vegetables, fruits and flower crops. Plant genetic resources, its utilization and conservation; Floral biology; study of genetics of qualitative and quantitative characters; Important concepts of breeding self pollinated, cross pollinated and vegetatively propagated crops; Major breeding objectives and procedures including conventional and modern innovative approaches for development of hybrids and varieties for yield, adaptability, stability, abiotic and biotic stress tolerance and quality (physical, chemical, nutritional); Ideotype concept and climate resilient crop varieties for future.

Practical

Emasculation and hybridization techniques in fibres, sugars, starches, narcotics, vegetables, fruits and flower crops;maintenance breeding of different crops,Handling of germplasm and segregating populations by different methods like pedigree, bulk and single seed decent methods; Study of quality characters, study of donor parents for different characters; Visit to seed production plots; Visit to AICRP plots of different field crops.

Lecture outlines

Theory

1 Introduction – General breeding objectives – Concepts of breeding self pollinated, cross pollinated and vegetatively propagated crops - Breeding populationsrelevance in crop improvement.

2 Fibres - Cotton and Jute- Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids - Accomplishments.

3. Sugars and starches – Sugarcane - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids – Accomplishments.

4. Sugars and starches – Potato and sweet potato - Origin – Distribution of species – wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for developmentof hybrids / varieties - Seed production technology of varieties and hybrids -

Accomplishments.

5 Narcotics - Tobacco- Origin – Distribution of species – Wild relatives and forms – breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids – Accomplishments.

6 Vegetables - Tomato andBrinjal - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids – Accomplishments.

7 Vegetables - Chilli and Okra - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids – Accomplishments.

8 Vegetables-Cucumber , Cabbage and cauliflower - Origin – Distribution of species – wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids – Accomplishments.

9. Vegetables - Garlic and Onion - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids - Accomplishments.

10 Vegetables - Gourds and Melons- Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids -Accomplishments.

11 Fruit crops - Banana and Guava - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids -Accomplishments.

12 Fruit crops-Mango and Papaya - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures(conventional and moderninnovative approaches) for development of hybrids / varieties-seed production technology of varieties and hybrids- Accomplishments.

13 Fruit crops - Lime, Lemons and Apple - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids -

Accomplishments.

14 Fruit crops - Pomegranate andSapota - Origin – Distribution of species – Wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids – Accomplishments.

15 Flower crops - Rose and Jasmine - Origin – Distribution of species – Wild relatives and forms – Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties – Seed production technology of varieties and hybrids -Accomplishments.

16 Flower crops - Chrysanthemum and Marigold - Origin – Distribution of species – wild relatives and forms –Breeding objectives – Major breeding procedures (conventional and modern innovative approaches) for development of hybrids / varieties - Seed production technology of varieties and hybrids -Accomplishments.

Practical

1. Hybridization techniques and precautions to be taken - Floral morphology, selfing, emasculation and crossing techniques in field crops. 2. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Cotton and Jute. 3. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Sugarcane and Tobacco. 4. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Tomato and Brinjal. 5. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Chilli and Okra. 6. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in and Cucumber, Cabbage and Cauliflower. 7. Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Garlic and Onion. 8 Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Bitter gourd and Water melon. 9 Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Bananaand Mango. 10 Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Papaya and Guava. 11 Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Lime and Lemon. 12 Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Rose and Jasmine.

13 Floral biology, anthesis, pollination, selfing, emasculation and crossing techniques in Marigold and Chrysanthemum.

14 Visit to Agricultural Research stations/AICRP Centres of crops.

15 Sources of donors for different characters in various crops & Parentage of released varieties / hybrids of important crops.

16 Study of special quality characters in various crops.

*18 AGR 304 PRACTICAL CROP PRODUCTION - II (Rabi Crops) 0+2

Practical

Crop planning, raising field crops in multiple cropping systems: Field preparation, seed, treatment, nursery raising, sowing, nutrient, water and weed management and management of insect-pests diseases of crops, harvesting, threshing, drying winnowing, storage and marketing of produce. The emphasis will be given to seed production, mechanization, resource conservation and integrated nutrient, insect-pest and disease management technologies. Preparation of balance sheet including cost of cultivation, net returns per student as well as per team of 8-10 students.

Any irrigated dry crop (maize / sorghum / pearl millet / finger millet / cotton / groundnut / sunflower / sesame)

Practical Schedule for Irrigated dry crop (Eg. Maize):

- Ecosystem Climate and weather Seasons and varieties of Tamil Nadu
- Selection of field Main field preparation seed treatment Application of manures and fertilizers - Sowing - Weed management and practicing preemergence application of herbicides - Thinning and gap filling -Estimation of plant population - Top dressing - Weed management - Water management - Pest management - Observation on nutrient and weeds -Recording growth, yield attributes and yield
- Harvesting, threshing and cleaning the produce Cost of cultivation and economics

Practical Schedule:

- 1. Study of ecosystems, climate, weather, seasons and varieties of Tamil Nadu
- 2. Selection of field for maize cultivation
- 3. Acquiring skill in seed treatment practices
- 4. Study and Practice of main field preparation for maize
- 5. Practicing of application of manures and fertilizers for maize

6.	Practicing sowing of maize
7.	Acquiring skill in pre-emergence application of herbicides
8.	Estimation of plant population and acquiring skill in gap filling and thinning
9.	Observation on nutritional deficiency symptoms and corrective measures
10.	Study of weeds and weed management in maize
11.	Recording growth parameters and assessing dry matter production
12.	Study of water management practices for maize
13.	Observation of insect pests and diseases and their management
14.	Estimation of yield and yield parameters in maize
15.	Harvesting, threshing and cleaning of the produce
16.	Working out cost of cultivation and economics
17.	Practical Examination

*18 AGR 305 PRINCIPLES OF ORGANIC FARMING

Theory:

Unit - I: Components and Principles of Organic Cotton

Organic farming: Definition - Scope - principles and concepts - history of organic farming - global scenario - biodiversity: importance and measure to preserve biodiversity - pre requisites for Organic farming:- Soil organic carbon: status and improvement strategies.

Unit - II: Organic sources of Nutrients

Organic sources of nutrients - manures and other inputs - on farm and off farm sources - organic waste recycling - methods - Soil and crop management inter cropping, crop rotation, green manures, cover crops, mulching - bio fertilizers.

Unit - III: Non - Chemical weed and Pest disease management

Non-chemical weed management methods: preventive, physical, cultural, mechanical and biological measures - Bio-intensive pest and disease management.

Unit - IV: Indigenous Technical Knowledge (ITK)

Indigenous Technical Knowledge (ITK) in organic agriculture - scientific rationale - soil, nutrient, weed, water, management - prospects and problems in organic farming. **Unit -**

V: Certification of label

Organic certification - NPOP guidelines - Certification agencies in India crop production standards - Quality considerations - labeling and accreditation process - marketing and export opportunities.

Practical:

Experiencing organic farming practices - soil, seed, nutrient, weed, water, pest and diseases, post - harvest management - hands on experience on bio composting, vermicomposting, ITK based biological preparations, bio inoculants - quality aspects of inputs and products - grading, packaging - visit to organic farms, market outlets and organic certification (TNOCD).

Theory - Lecture Schedule:

1. Organic farming; definition - prospects - principles and concepts - History and genesis of organic farming in World and India: Present status in World, India and Tamil Nadu.

2. Introduction to bio - diversity; importance and measures to preserve bio - diversity.

3. Pre-requisites and basic steps for organic farming; conversation to organic farming - planning and processes in practices - IFS approach - Integration of animal components.

4. Organic carbon; status and improvement strategies - conservative tillage systems.

5. Sources of organic manures - plant, animal and microbial origin - on - farm resources; FYM, green manures, crop residues, poultry manure, sheep and goat manures, biogas slurry and vermicompost.

6. Off-farm resources; coir pith, press mud, oilcakes, flyash, bio compost, minerals, bone meal, bio fertilizers, traditional preparations.

7. Organic waste recycling methods and techniques - composting, vermicomposting, *in situ* composting - system approach.

8. Mid-Semester Examination.

9. Soil and crop management in organic farming; Inter cropping and companion planting, crop rotation , green manures and cover crops, mulching.

10. Weeds - Ecology - habitat management of weeds - Non - chemical weed management methods; preventive, physical, cultural, use of tools and implements and biological measures - good crop husbandry practices.

11. Integrated pest and diseases management - bio control agents, bio rational pesticides; minerals, botanicals, soaps, trap crops, bird perches, and traditional preparations - sanitation.

12. Organic certification - procedures - certification agencies in India - labeling and accreditation processes.

13. Crop production standards - NPOP guidelines - principles,

recommendations and

standards - Quality considerations - assessment methods - premium and export

opportunities.

14. Indigenous technical knowledge (ITK) in organic agriculture rationale and principles - general, indigenous practices for soil, nutrient, weed, water pest and disease management in farming - ITK's in farmers practice.

15. Benefits and problems in organic farming.

16. Organic farming; Promotional activities; role of government and NGO's - action plan - policy considerations.

17. Economic evaluation of organic production systems - cost - benefit analysis and comparison with conventional systems.

Practical:

1. Resource inventory of organic farm- Soil sampling and analysis for organic carbon and pesticide residues / contaminants.

2. Raising of green manures (Sunnhemp / Daincha / Fodder cowpea).

3. Incorporation of green manure - seed treatment and raising of field crop (Rice / Maize / Cowpea / Cotton / Gingelly).

- 4. Hands on practice on preparatory cultivation; soil and water conservation methods.
- 5. Hands on experience on recycling techniques; bio-composting and vermicomposting.
- 6. Quantification of nutrients from organic sources and application of manures and bio-fertilizers.
- 7. Exposure visit to an organic farm to learn ITK based preparations.

8. Organic crop production and weed management.

9. Exposure visit to bio-pesticide and pheromone manufacturing units.

10. Organic crop production and pest management.

11. Exposure visit to bio-control agent (*Pseudomonas, Trichoderma* etc.,) production units.

12. Organic crop production and diseases management.

13. Exposure on macro quality aspects of crop produces in laboratories.

14.Handsontrainingongrading,packagingandpost-harvest management.

15. Exposure visit to organic market out lets.

16. Exposure visit to organic certification agencies / Directorate of Organic Certification, Tamil Nadu.

17. Practical Examination

g

*18 AEC 301 FARM MANAGEMENT, PRODUCTION AND RESOURCE ECONOMICS 2 (1+1)

Course outlines

Theory

Meaning and concept of farm management, definitions, objectives and relationship with other sciences. Meaning and definition of farms, its types and characteristics, changing structure of land holdings in India and characteristics of small and marginal farm holdings. Farm managementproblems in India. Principles of farm management: concept of production function and its type, use of production function in decision-making on a farm, factor-product, factorfactor and product-product relationship, law of equi-marginal/or principles of opportunity cost and law of comparative advantage, timecomparision principle.

Meaning and concept of cost, types of costs and their interrelationship, cost function /cost-output relationship, importance of costs in managing farm business and Cost Principle.

Farm inventory, appraisal and valuation of farm resources and products, Meaning and importance of farm planning and budgeting, Partial budget, enterprise budget and complete budgeting, steps in farm planning and budgeting-linear programming, Concept of risk and uncertainty in agriculture production, nature and sources of risks and its management strategies-Crop/livestock/machinery insurance, weather based crop insurance, features, determinants of compensation.

Concepts of Natural resource economics, differences between NRE and agricultural economics, unique properties of natural resources. Positive and negative externalities in agriculture, Inefficiency and welfare loss, solutions, Important issues in economics and management of common property resources of land, water, pasture and forest resources etc.

Practical

Computation of depreciation cost of farm assets. Determination of most profitable level of inputs use in a farm production process. Application of equimarginal returns/ opportunity cost principle in allocation of farm resources. Determination of least cost combination of inputs. Selection of most profitable enterprise combination. Farm holding survey. Application of cost principles including CACP concepts in the estimation of cost of crop and livestock enterprises. Farm business analysis, Preparation of farm plan and budget, farm records and accounts and profit & loss accounts. Collection and analysisof data on various resources in India. Seminar on selected topics.

Lecture outlines

Theory

1. Meaning and concept of farm management, definitions, objectives and relationship with other sciences - Importance of study of farm management - Farm management problems in India.

2. Meaning and definitions of types and systems of farming and their characteristics - Changing structure of land holdings in India - Characteristics of small, marginal and tenant farm holdings.

3. Concept of production function and its types, use of production function in decision -Making on a farm - Seven principles of farm management.

4. Factor - Product relationship – Law of variable proportions – Definition, graphical and arithmetical explanation with the help of an example.

5. Determination of optimum input and optimum output and decision rules.

6. Factor-Factor relationship, resources and types - Substitutes and complements, variable and fixed resources - Iso-quants - Iso-cost lines - Meaning and characteristics - Principle of least cost combination/ Principle of factor substitution – Explanation and decision rules.

7. Product-Product relationship - Iso- product curves and Iso-revenue lines – Meaning and characteristics - Principle of optimum product combination - Law of equimarginal returns/ principles of opportunity cost, decision rules.

8. Types of enterprises and their characteristics - Principle of comparative advantage.

9. Meaning and concept of cost, cost function /cost-output relationship - Types of production costs and their interrelationship - Importance of costs in managing farm business - Minimum loss principle (Cost Principle) and decision rules – Time comparison principle – compounding and discounting.

10. Farm inventory - Meaning and importance of taking inventory on farm business - Different methods of appraisal and valuation of farm resources and products.

11. Farm planning and budgeting - Meaning and importance, partial budgeting, enterprise budgeting and complete budgeting, steps in farm planning and budgeting.

12. Linear programming-Meaning - Definition, LP mathematical model specification, importance in farm decision making, basic assumptions, limitations.

13. Concepts of risk and uncertainty in agriculture production, nature and sources of risks and uncertainty and management strategies.

14. Economy and environmental linkages - How economic activity affects life on a planet with limited resources and a fragile environment - Concepts of natural resource economics - Ecological equilibrium, direct use value and indirect use value, willingness to accept and willingness to pay, contingent valuation, opportunity cost, discounting, societal cost - benefit analysis, consumer surplus, carbon sequestration - Unique properties of natural resources. 15. Environmental costs of economic growth - Sustainable development -Positive and negative externalities in agriculture - Inefficiency and welfare loss, solutions.

16. Important issues in economics and management of common property resources of land, water, pasture and forest resources etc. - India's environmental policy.

Practical

1 & 2. Different methods Computation of depreciation cost of farm assets.

3. Determination of most profitable level of inputs use and output in farm

production process.

4. Determination of least cost combination of inputs

5. Application of equi-marginal returns/opportunity cost principle in allocation of farm resources.

6. Selection of most profitable enterprise combination.

7 & 8. Farm holding surveys.

9.& 10. Application of cost principles - CACP concepts in the estimation of cost of mono cropping and poly cropping and livestock enterprises.

11. Farm business analysis - Estimation of different farm income measures, technical and economic efficiency measures and breakeven analysis.

12. Preparation of partial budgets and enterprise budgets.

13. Visit to college farm and study different farm records and accounts and

prepare profit and loss account.

14 -16. Collection and analysis of data on various natural resources in India -Land - Changes in land use pattern, forests – Water - Changes in ground water and

surface water resources - Changes in labour resources - Agricultural workers -Pollution and green gas emissions - Biodiversity, etc.

*18 FSN 301 PRINCIPLES OF FOOD SCIENCE AND NUTRITION (2+0)

2

Course outlines

Theory

Concepts of Food Science (definitions, measurements, density, phase change, pH, osmosis, surface tension, colloidal systems etc.); Food composition and chemistry (water, carbohydrates, proteins, fats, vitamins, minerals, flavours, colours, miscellaneous bioactives, important reactions); Food microbiology (bacteria, yeast, moulds, spoilage of fresh & processed foods, Production of fermented foods); Principles and methods of food processing and preservation (use of heat, low temperature, chemicals, radiation, drying etc.); Food and nutrition, Malnutrition (over and under nutrition), nutritional disorders; Energy metabolism (carbohydrate, fat, proteins); Balanced/ modified diets, Menu planning, New trends in food science and nutrition.

Lecture outlines

1 Concepts of food science - Definitions of food, specific nutrients in foods and their functions - Physical characterstics of foods - Importance

2 Food physical characteristics - Density - Phase change, pH, osmosis, surface tension, colloidal systems.

3 Food composition - Food chemistry - Water, solutions, water balances in body, clinical signs of water depletion, excessive water intake, recommended requirements

4 Carbohydrates - Structure, properties of sugars, starches, cellulose and hemicelluloses, pectin, gums.

5 Proteins - Structure, amino-acids, properties.

6 Fats and oils - Structure, functional aspects.

7 Vitamins - Retinol, vitamin D, vitamin E, vitamin K, ascorbic acid, B-complex group

8 Minerals, pigments, colours, flavours

9 Natural emulsifiers.

10 Organic acids.

11 Oxidants and antioxidants.

12 Enzymes.

13 Food microbiology - Morphology and fine structure of bacteria - Cultivation of bacteria, nutritional requirements -Nutritional classification of bacteria.

14 Introduction to yeast, algae and protozoa and virus, general characteristics

15 Microbial spoilage of foods - Factors affecting kinds, numbers, growth and survival of microorganisms in foods.

16 Production of fermented foods - Production, purification and estimation of beer/ ethanol.

17 Preservation by heat treatment - Principle and equipment for blanching. 18 Preservation by heat treatment - Canning, pasteurization, sterilization. 19 Preservation by use of low temperature - Principle, methods, equipment

20 Preservation by chemicals - Antioxidants, mould inhibitors, antibodies, acidulants, etc.

21 Preservation by irradiation - Principle, methods, equipment.

22 Preservation by fermentation - Principles, methods, equipment

23 Preservation by drying, dehydration and concentration - Principle, methods, equipment.

24 Food and nutrition - History of diet around the world - European diet.

25 Malnutrition (over and under nutrition), body cell, digestion and absorption, energy and calories, obesity and weight control.

26 Nutritional disorders that can compromise health.

27 Energy metabolism - Carbohydrates, individual sugars, sugars and diabetes mellitus, glycemic response, dietary carbohydrates

28 Energy metabolism - Fat, synthesis, control, biosynthesis, cellular degradation, peroxidation.

29 Energy metabolism - Proteins, synthesis, catabolism, ammonia and urea. 30 Balanced/modified diets, diet selection.

31 Menu planning.

32 New trends in food science and nutrition.
