DEPARTMENT OF MECHANICAL ENGINEERING

ABOUT THE INSTITUTION

Ponnamalain Karayyann Institute of Science and Technology (PRIST), a Deemed University (Uix 3 of the UGC Act 1956), is one of the renowned series of Ponnamalain Karayyann Institutions, which are carving for more than 25 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

ABOUT THE DEPARTMENT

The department of Mechanical Engineering came into existence in 2009 with an objective to impart quality education to meet today's competitive environment.

Department has well experienced and dedicated faculty with strong commitment to provide a vibrant learning environment to the students in order to help them excel.

To keep pace with the current technological trends, the department has a well designed, constantly reviewed syllabus to incorporate all advancements in existing and emerging technologies which gives the students a holistic and pragmatic view of the present scenario of industry.

INFORMATION BROUCHER ADD ON COURSE- 3D PRINTING

COURSE HIGHLIGHTS

- Getting to know the 3D printer, how they work, loading materials, levelling the bed, nozzle shooting, extruder maintenance.
- 3D printing applications in the real world.
- Advanced 3D printing in Industry.
- Advanced parametric 3D modelling skills e.g How to model complex shapes with patterns and working to tolerances.
- How to slice models and use

- custom/advanced settings, e.g. build plate adhesion, infill, print speeds, support analysis and how to manage 3D printing budgets.
- Different types of 3D printing materials, including post processing methods.
- Sustainability and 3D printing.
- Review of learnbylayers full curriculum.

COURSE OBJECTIVES

This course focuses on the fundamentals of print reading and the measuring skills needed to verify print requirements. Visualization of 3D objects from orthographic views and the use of micrometers and dial calipers are stressed.

The concepts of Geometric Dimensioning and Tolerancing, and quality tools (such as Pareto diagrams and fishbone charts) are introduced. Writing assignments, as appropriate to the discipline, are part of the course.

PRE-REQUISITES

Understand and design basic mechanical concepts and reverse engineering.

ELIGIBILITY

B.Tech - Mechanical students shall be eligible for the admission to the course.

COURSE DURATION: 45 Hours

date : 19 Feb to 18 Feb

Timing : 10.00 a.m - 4.00 pm

3D PRINTING

OBJECTIVE:

The students should be made to:

- Understand the basic concepts and nuances of 3D Printing Technology

9

UNIT I INTRODUCTION

Introduction; Design considerations – Material, Size, Resolution, Process; Modelling and viewing - 3D; Scanning; Model preparation – Digital; Slicing; Software; File formats

9

UNIT II PRINCIPLE

Processes – Extrusion, Wire, Granular, Lamination, Photopolymerisation; Materials - Paper, Plastics, Metals, Ceramics, Glass, Wood, Fiber, Sand, Biological Tissues, Hydrogels, Graphene; Material Selection - Processes, applications, limitations;

9

UNIT III INKJET TECHNOLOGY

Printer - Working Principle, Positioning System, Printhead, Printbed, Frames, Motion control; Printhead Considerations – Continuous Inkjet, Thermal Inkjet, Piezoelectric Drop-On-Demand; Material Formulation for jetting; Liquid based fabrication – Continuousjet, Multijet; Powder based fabrication – Colorjet;

9

UNIT IV LASER TECHNOLOGY

Light Sources – Types, Characteristics; Optics – Deflection, Modulation; Material feeding and flow – Liquid, powder; Printing machines – Types, Working Principle, Build Platform, Printbed Movement, Support structures;

9

UNIT V INDUSTRIAL APPLICATIONS

Product Models, manufacturing – Printed electronics, Biopolymers, Packaging, Healthcare, Food, Medical, Biotechnology, Displays; Opensource; Future trends;

TOTAL: 45 PERIODS

OUTCOMES:

Upon completion of the course, the student should be able to:

- Learn 3D printing workflow
- Understand the basic types of 3D Printing, materials used and their applications
- Select appropriate method for designing and modeling applications

DEPARTMENT OF MECHANICAL ENGINEERING

ABOUT THE INSTITUTION

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) Deemed to be University (U/s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 25 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

ABOUT THE DEPARTMENT

The department of Mechanical Engineering came into existence in 2000 with an objective to impart quality education to meet today's competitive environment.

Department has well experienced and dedicated faculty with strong commitment to provide a vibrant learning environment to the students in order to help them excel.

To keep pace with the current technological trends, the department has a well designed, constantly reviewed syllabus to incorporate all advancements in existing and emerging technologies which gives the students a holistic and pragmatic view of the present scenario of industry.

**INFORMATION BROUCHER
ADD ON COURSE- COMPUTER
NUMERICAL CONTROL OF
MACHINE**

COURSE HIGHLIGHTS

- Creating 2D geometry in CAM software
- Creating CNC toolpaths using 2D geometry
- Creating CNC toolpaths using solid models created in CAD software
- Applying previously learned machining concepts to CAM programs for both turning and machining centers
- Producing required EIA/ISO code and transfer code to CNC machines
- Programming industrial robots
- Describing how robots and automation are used in industry

Computer Numerical Control Technology

The Computer Numerical Control Technology provides instruction in the theory, operation and programming of CNC machine tools.

Students in this program learn the basics regarding the machinery handbook, process, and maintenance. Advanced operations courses are taken later into the program.

Course Work

This degree includes the following courses as part of the program requirements, and specific major requirements along with general education courses and graduation requirements.

Core

- MF133 Machinery Handbook (3 cr.)
- MF134 Manufacturing Process (4 cr.)
- MF233 Numerical Control (4 cr.)
- MF235 Computer Numerical Control (5 cr.)
- MF263 Advanced CNC Operations (4 cr.)

Other Required Courses

- IT010 Exit Seminar (0 cr.)
- MA100 Intermediate Algebra (4 cr.) (or higher)
- ME133 Materials Science I (3 cr.)
- DD100 Technical Drafting with intro to CAD (4 cr.)
- DD103 Geometric Dimensioning/Tolerancing (2 cr.)
- DD202 Product Development and Design (4 cr.)
- IT215 General Industrial Safety (2 cr.)
- WD140 Introduction to Welding (4 cr.)

Skills and Competencies

Like other degrees, you will be exposed to a variety of academic coursework as a Computer Numerical Control Technology major. In the process, you will acquire new skills. Specifically, your communication, analytical, technical, and computer skills will be challenged and strengthened.

Coursework will include advanced Computer Aided Design (CAD), Material Science and Machine Tool courses. Students will have a basic knowledge of manual and computer controlled machining, fixturing and industrial safety. Additionally introductory courses into the Machinery Handbook and basic welding will also be covered.

Career Development

You should begin the resume-building process as soon as you can. The Academic and Career Advisement Center can assist you with career planning, while Career Services will help you fine tune your resume and look for jobs related to your field. In the meantime, the more hands-on experience you have, the better the chances are that you will find a job. Becoming involved in a professional related internship is a way to develop your professional skills and gain experience. Your academic course work is important as well, so be sure to maintain a high grade point average.

Additional Considerations

This degree teaches the skills necessary to pursue an entry-level career.

Relevant work experience will be beneficial when applying for positions.

Job Outlook

Employment is supposed to grow by 8 percent through the year 2018, about as fast as average. Growth will be due to the demand for an increase of the use of advanced equipment.

COURSE DURATION: 45 Hours

COMPUTER NUMERICAL CONTROL OF MACHINE

OBJECTIVE:

- To implement CNC manufacturing concepts in the factories.

UNIT I INTRODUCTION:

Introduction to Numerical Control - Computer Aided Manufacturing – Components of CNC system – Types of CNC systems – Open loop and closed loop control systems, Drives and Controls – Interpolators; CNC machine tools - Constructional features – Design considerations – Tooling for CNC.

UNIT II AUTOMATION

Introduction to Automation – Goals of Automation, levels of automation, Hard Vs Soft Automation, Computer Aided manufacturing (CAM). Numerical Control - Introduction, Role of NC / CNC in CAM, Applications of NC / CNC, Benefits of NC / CNC, Limitations of CNC.

UNIT III

Basic Components of CNC system - Part programming, Machine control unit, Machine tool - Historical developments and their role in control of machine tools, Classification of NC / CNC systems - Based on type of Control (PTP/CML), method of programming, type of architecture - Hardwired / Softwired / Open.

UNIT IV

Machine Control Unit - Data processing Unit - elements and their functions - Interpolators and Sequential Controllers. Interpolators - Types and Stages of Interpolation, Principles of interpolation - Techniques employed for Interpolation Scheme, Requirements of Interpolation algorithms, Interpolation schemes - Stairs approximation, Digital Differential Analyser, Direct function calculation; DDA - Hardware and Software; Software Interpolators

UNIT V

Part programming - Introduction; Part Program and its elements, Methods of Programming - Manual and Computer Assisted Part programming - Custom Macro (Parametric Programming), APT and its variations, Concepts of CAM - Tool path generation and control methods- CNC Introduction G Codes and M codes- Drilling cycle Absolute system Incremental system- CNC Maintenance & Use coolant CNC Advantages - CNC Disadvantages

OUTCOMES:

1. Tooling for CNC concept.
2. Hard Vs Soft Automation, Computer Aided manufacturing
3. No student is to operate equipment without first checking with the instructor.
4. Students must sweep and clean their work areas before leaving.
5. Able to learn concept G Codes and M codes.

INFORMATION BROUCHER ADD ON COURSE- NON-DESTRUCTIVE TESTING

COURSE HIGHLIGHTS

- To ensure product reliability
- To prevent accidents and save human lives
- To make a profit for the user (add value)
- To ensure customer satisfaction and to maintain the manufacturer's "good name"
- To aid in better product design
- To control manufacturing processes
- To lower manufacturing costs
- To maintain a uniform quality level

- *Product reliability and safety top his list, of course. But he also includes the use of NDT in process control and applying NDT to improve profit, which adds value.*
- *Review of learn by layers full curriculum.*

COURSE OBJECTIVES

The main objectives of this course is to introduce the concept of non-destructive testing among the students and make them understand various types of non-traditional practices available for manufacturing industry.

This course provides students a synopsis of non-destructive and destructive evaluation methods that are used in evaluation of welds. This includes understanding the basic principles of various NDT methods, fundamentals, discontinuities in different product forms, importance of NDT, applications, limitations of NDT methods and techniques and codes, standards and specifications related to non-destructive testing technology.

Students also will be introduced to relevant quality assurance and quality control requirements in accordance with ASQ, ASME, and ANSI standards.

PRE-REQUISITES

Understand the testing of basic mechanical properties and defects .

ELIGIBILITY

B.Tech – Mechanical students shall be eligible for the admission to the course.

COURSE DURATION: 45 Hours

date : 10 AUG 2020 to 19 AUG 2020

Timing : 10.00 a.m - 4.00 pm

NON-DESTRUCTIVE TESTING

OBJECTIVE:

Students also will be introduced to relevant quality assurance and quality control requirements in accordance with ASQ, ASME, and ANSI standards.

Core Classes -I	9
Introduction to Nondestructive Testing	
Visual and Inspection	
Codes and Standards for Nondestructive Testing	
Core Classes –II	9
Radiation Safety	
NDT Radiographic Testing I	
NDT Radiographic Testing II	
Core Classes – III	9
Introduction to Ultrasonic Testing	
Advanced Ultrasonic Testing	
Magnetic Particle and Liquid Penetrant	
Radiographic Testing III	
Core Classes – IV	9
Eddy Current Testing I	
Eddy Current Testing II	
Advanced NDT Methods	
Ultrasonic Testing III	
Core Classes – V	9
Defect identification	
Remedies and selection	
Material identification	
Purpose and application	
TOTAL: 45 PERIODS	

OUTCOMES:

Upon completion of the course, the student should be able to:

- *To aid in better product design*
- *To control manufacturing processes*
- *To lower manufacturing costs*
- *To maintain a uniform quality level*

DEPARTMENT OF MECHANICAL ENGINEERING

ABOUT THE INSTITUTION

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) Deemed to be University (U/s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 25 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

ABOUT THE DEPARTMENT

The department of Mechanical Engineering came into existence in 2000 with an objective to impart quality education to meet today's competitive environment.

Department has well experienced and dedicated faculty with strong commitment to provide a vibrant learning environment to the students in order to help them excel.

To keep pace with the current technological trends, the department has a well designed, constantly reviewed syllabus to incorporate all advancements in existing and emerging technologies which gives the students a holistic and pragmatic view of the present scenario of industry.

INFORMATION BROUCHER ADD ON COURSE- PIPING TECHNOLOGY

COURSE HIGHLIGHTS

- Piping system designers that may decide to use expansion joints
- Expansion joint designers that use the information provided by piping system designers.
- To determine the best design to meet the requirements.
- Designers that use modern software systems to evaluate different options
- Engineers / Managers: field, maintenance, process, operations, construction, surveyors.

About the Program

The objective of this course is to provide the candidates the Detail knowledge and skills in Piping Design discipline to facilitate faster learning curves while on the job.

This course will cover the fundamental principles and concepts used in Process Plant Layout and Piping Design Engineering. Upon completion of this course, students will have a clear understanding of the design and principles used in Piping Design System for Oil & Gas Energy Sector.

Learning-Based Outcomes

Get hands-on experience in applying design tools & techniques to real engineering problems and understand Design, Engineering, Construction, O & M, etc. This, become a Technology Driven Engineering Professional.

Trainer

Delivered by Senior Industry Professionals having extensive experience in Design & Engineering in diverse domains & industries. These practitioners are also Empanelled as subject matter experts with SmartBrains Engineers & Technologist Pvt. Ltd.

PRE-REQUISITES

Understand and design basic mechanical concepts and reverseengineering .

ELIGIBILITY

B.Tech – Mechanical students shall be eligible for the admission to thecourse.

COURSE DURATION: 45 Hours

PRIST

PIPING TECHNOLOGY

OBJECTIVE:

This class covers the following topics: piping design, the effects on overall configuration on preliminary piping design, initial layout, the total system, introduction to pipe stress analysis, detailed piping design, and how all of this influences pipe support and pipe hanger design.

Syllabus

Part 1: Introduction - Overview of Piping

1. This section serves as an introductory overview of piping system design.
 - a. Effects of operating conditions, including flow rate, design pressure and temperature on piping design
 - b. Impact of internal and external forces on the design.
 - c. Influences that the different modes of failure and the applicable codes have on the entire system.
 - d. Piping layout, an overview of the general support classifications.

Part 2: Preliminary Piping Design - Piping System Components

1. Concepts used in developing an initial piping layout.
2. Design principles including fluid properties, flow rate, and physical laws which influence the complete piping system layout.
3. Understand the effect of different piping system components, such as tanks, vessels, valves, and pumps, on the overall configuration.

Part 3: Preliminary Piping Design - The Total System

1. The total piping system.
2. The different types of equipment and components that define various types of piping systems.
3. Differences between series piping, parallel piping and branch piping as well as their specialized applications.
4. The piping system conditions such as static and dynamic head loss
5. Influences on the selection and distribution of piping components throughout the entire system.

Part 4: Basic Concepts of Stress Analysis - Flexibility Analysis

1. Historical perspective of how earlier analysis techniques were developed in the absence of today's computer technology.
2. Review how earlier techniques have evolved ultimately leading to today's finite element practices.
3. The basic concepts of stress analysis will be covered, including failure theories, stress intensification factors and the overall purpose of stress analysis.

Part 5: Basic Concepts of Stress Analysis - Design Bases

1. A review of the different phases of project evolution.
2. The design bases which form the foundation of all our analyses, including physical attributes,

PRIST

DESIGNED TO BE

OUTCOMES:

- A general overview of piping engineering
- An awareness of the processes and issues involved with designing, procurement and construction
- An awareness of the materials and equipment used
- An understanding of industry terms and acronyms
- An understanding the stress analysis.

INFORMATION BROUCHER ADD ON COURSE- QUALITY ASSURANCE, SIX SIGMA AND LEAN MANUFACTURING

COURSE HIGHLIGHTS

- Training content are based on latest Six Sigma
- Earn 16 Hours PDU (Training) Certificate
- Training & Exam Fee Course ware Mock Tests and more.
- Best Certified Instructors with decades of experience in subject matter.
- Complimentary 180 Days of High Quality E-Learning Access
- Premium Access to Six Sigma resources and Six Sigma Job Portal.

COURSE OBJECTIVES

- Skill to predict, prevent and control defects in a process.
- Understanding the elements of waste.
- Skills to achieve sustainable quality improvement through process improvement.
- Understanding of variation in processes.
- Skills to reduce variation in processes and achieve predicted outcomes.
- Ability to identify, measure and analyse process potential.
- Usage of inferential statistics.
- Usage of hypothesis testing.

PRE-REQUISITES

COURSE DURATION: 45 Hours

QUALITY ASSURANCE, SIX SIGMA AND LEAN MANUFACTURING

OBJECTIVES:

- To impart knowledge to enable the students to design and implement Statistical Process Control in any industry

UNIT I QUALITY FUNDAMENTALS

9

Importance of quality- evolution of quality- definitions of quality- dimensions of quality- quality control- quality assurance- areas of quality- quality planning- quality objectives and policies- quality costs- economics of quality- quality loss function- quality Vs productivity- Quality Vs reliability.

UNIT II SIX SIGMA METHODOLOGY- TOOLS & TECHNIQUES

9

Cost of Quality – Conformance and Non-Conformance cost – 7 Basic Quality Control Tools – Seven Management tools – FMEA

Need for Six Sigma – Six Sigma Team – DMAIC Methodology: Define, Measure, Analyse, Improve and Control – Lean Six Sigma

UNIT III EVOLUTION & OVERVIEW OF LEAN MANUFACTURING

9

Evolution of Mass production – Traditional vs. Mass production – Evolution of Toyota (Lean) Production System – Business Dynamics of Lean production – Principles of Lean production: Value, Value stream, Flow, Pull, Perfection.

UNIT IV LEAN MANUFACTURING – TOOLS & TECHNIQUES

9

Ms: Muda, Mura, Muri – 7 Wastes in Manufacturing – Lean Tools to eliminate Muda – 5S – Standardised work – TPM – SMED – Jidoka – Poka Yoke – JIT – Heijunka – Kanban – One piece production.

UNIT V VALUE STREAM MAPPING

9

Need for Value Stream mapping – Steps involved in Value stream mapping – Choose value stream – PQ and PR analysis – Current State map – Lean Metrics – Future State Map – Kaizen plans – Lean implementation – Cultural change – Lean in the Supply chain.

TOTAL: 45 PERIODS

OUTCOMES:

- Control the quality of processes using control charts for variables in manufacturing industries.
- The students should apply the various tools, techniques and methodology of lean manufacturing.
- six sigma concepts to the potential quality gaps in manufacturing / production industries.
- Able to learn concept of tool and technique.
- Lean the Supply chain concept.

ABOUT PRIST DEEMED TO BE UNIVERSITY

Ponnaiyah Ramajayam Institute of Science & Technology (PRIST), made a for into the academic domain, with the establishment of SriRam Institute of Computer Science and Technology in 1985. Over time, various institutions of higher learning such as an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, Commerce & Business Management, Architecture, Agriculture, Law, Pharmacy & Polytechnic College, added feathers to the PRIST crown. PRIST University received university status under section 3 of UGC Act 1956 &also got NAAC Accredited status. Today, PRIST commands a massive student base, spread across a whole array of campuses such as Trichy, Kumbakonam, Puducherry, Chennai, Madurai etc.

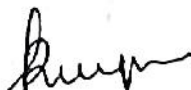

Ponnaiyah Ramajayam College applied for NAAC assessment and accreditation Council and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

The academic reach extends right from school education up to the level of the Ph.D Doctoral programmes in a rich array of disciplines such as Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Law, Agriculture &Architecture.

SCHOOL OF ENGINEERING & TECHNOLOGY

The Departments of Civil Engineering, Computer Science and Engineering, Electronics and Communication Engineering, Mechanical Engineering, and Electrical and Electronics Engineering were established in 2008 with an objective to impart quality education to meet today's competitive environment. All Departments has well experienced &dedicated faculty with strong commitment to provide vibrant learning environment to student in order to help them excel. To keep pace with the current technological trends, all departments have well designed, constantly reviewed syllabus to incorporate all advanced in existing& Emerging Technologies which gives the students a holistic and pragmatic view of the present scenario of Industry.

INTRODUCTION ABOUT THE DEPARTMENT

In PRIST UNIVERSITY the Department of Civil Engineering was established in 2008. Since then its excellence in each and every aspects has played an important role in the Institute. Our Department is offering B.Tech – Civil Engineering M.Tech – Structural Engineering & Doctorate in Civil Engineering. Civil Engineering Department has been actively involved in research and consultancy in all the fields of Civil Engineering. The Department has well equipped laboratories and research facilities. It is constantly modernizing the laboratory facilities with latest technology and research know-how.

The Department offers PG/UG degree courses and a number of add on courses. Group electives or major electives are offered to enable students choose from wide choice of fourteen courses. Also, we offer skill based electives, from the point of view of employment opportunities and free elective courses of inter disciplinary nature. The Advanced Learners are offered Extra Credit courses for earning extra credits.

INTRODUCTION ABOUT THE COURSE

Infrastructure is essential to a region's economic development. It allows for business operations, provides jobs, and promotes the exchange of goods and services. Reduces supply chain disruptions: Disruptions to the supply chain can have disastrous effects on a region's economy.

In an organization or for a country, a basic infrastructure includes communication and transportation, sewage, water, education system, health system, clean drinking water, and monetary system. These investments are concerned with the allocation of resources to tangible, capital-intensive, and enduring assets designed for public consumption.

Infrastructure refers to durable physical systems that support economic and social activities of a city or country. The physical infrastructure consists of economic and social infrastructure. A more general definition of infrastructure includes residential units, factories, offices, and commercial buildings.

Outline of the course:

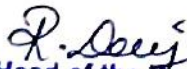

S.No	Topics	Minimum
1.	INTRODUCTION TO INFRASTRUCTURE.	5hrs
2.	ASSET MANAGEMENT PROCESS.	5hrs
3.	INVENTORY, INSPECTION AND CONDITION ASSESSMENT.	5hrs
4.	DETERIORATION MODELING.	5hrs
5.	OPTIMIZATION AND DECISION MAKING.	5hrs
6.	PERFORMANCE, USAGE, BUDGET AND COST FUNCTIONS.	5hrs
7.	INTERDEPENDENCE, RESILIENCY AND SECURITY.	5hrs
8.	CONTRACT AND WORKFLOW MANAGEMENT.	5hrs
9.	BENCHMARKING AND BEST PRACTICES.	5hrs

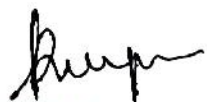

Duration of the Course: 45 hours.

Minimum Eligibility: UG&PG

Learning outcomes:

1. The role of school infrastructure in shaping students' success cannot be overstated. This provides students with both a visual and verbal example of what they will be expected to do. Create, manipulate and edit 2D drawings and figures.
2. Utilize the power and precision of AutoCAD as a drafting and design tool used in the mechanical design and manufacturing industries.
3. A learning model is a specific application or representation of a learning theory. As a result, it's more concrete and practical.

SUB: Add on Course - Reg

It is informed that Add on Course-Certificate Course-2020 for students will be started on 17-08-2020 the academic year 2020-2021 odd Semester. The detailed schedule will be given by the departments.

Head of the departments are requested to inform their students about the Add on Course-2020 on **BIM FUNDAMENTALS FOR ENGINEERS** and the course coordinator is Mr. S.RAVISHANKAR and motivates them to attend the course.

HOD's are requested to nominate one faculty member to co-ordinate the Add on Course.

ABOUT PRIST DEEMED TO BE UNIVERSITY

Ponnaiyah Ramajayam Institute of Science & Technology (PRIST), made a for into the academic domain, with the establishment of SriRam Institute of Computer Science and Technology in 1985. Over time, various institutions of higher learning such as an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, Commerce & Business Management, Architecture, Agriculture, Law, Pharmacy & Polytechnic College, added feathers to the PRIST crown. PRIST University received university status under section 3 of UGC Act 1956 & also got NAAC Accredited status. Today, PRIST commands a massive student base, spread across a whole array of campuses such as Trichy, Kumbakonam, Puducherry, Chennai, Madurai etc.

Ponnaiyah Ramajayam College applied for NAAC assessment and accreditation Council and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

The academic reach extends right from school education up to the level of the Ph.D Doctoral programmes in a rich array of disciplines such as Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Law, Agriculture & Architecture.

SCHOOL OF ENGINEERING & TECHNOLOGY

The Departments of Civil Engineering, Computer Science and Engineering, Electronics and Communication Engineering, Mechanical Engineering, and Electrical and Electronics Engineering were established in 2008 with an objective to impart quality education to meet today's competitive environment. All Departments has well experienced & dedicated faculty with strong commitment to provide vibrant learning environment to student in order to help them excel. To keep pace with the current technological trends, all departments have well designed, constantly reviewed syllabus to incorporate all advanced in existing & Emerging Technologies which gives the students a holistic and pragmatic view of the present scenario of Industry.

INTRODUCTION ABOUT THE DEPARTMENT

In PRIST UNIVERSITY the Department of Civil Engineering was established in 2008. Since then its excellence in each and every aspects has played an important role in the Institute. Our Department is offering B.Tech – Civil Engineering M.Tech – Structural Engineering & Doctorate in Civil Engineering. Civil Engineering Department has been actively involved in research and consultancy in all the fields of Civil Engineering. The Department has well equipped laboratories and research facilities. It is constantly modernizing the laboratory facilities with latest technology and research know-how.

The Department offers PG/UG degree courses and a number of add on courses. Group electives or major electives are offered to enable students choose from wide choice of fourteen courses. Also, we offer skill based electives, from the point of view of employment opportunities and free elective courses of inter disciplinary nature. The Advanced Learners are offered Extra Credit courses for earning extra credits.

INTRODUCTION ABOUT THE COURSE

BIM is the foundation of digital transformation in the architecture, engineering, and construction (AEC) industry. As the leader in BIM, Autodesk is the industry's partner to realize better ways of working and better outcomes for business and the built world. Try software. Some of the key fundamentals of BIM include the use of parametric modeling, model-based collaboration between project stakeholders, and data-rich models that can support analysis for energy efficiency, clash detection, scheduling, cost estimating, and more.

BIM integrates multi-disciplinary data to create detailed digital representations that are managed in an open cloud platform for real-time collaboration. BIM Engineers plan, design, and supervise Building Information Modelling (BIM), identify and resolve BIM technology implementation issues and problems, and assure quality deliverables of the related construction projects. In the context of BIM development, not only the 3D models of the object become more detailed, but also a series of other information is saved directly on the object. BIM, everything is represented as objects and elements, such as walls, doors, windows, and structural components.

BIM is utilized extensively in the construction industry as a collaborative digital tool for planning, designing, constructing, and managing building projects. These objects have both geometric and data attributes.

Outline of the course:

S.No	Topics	Minimum
1.	PREPARE FOR THE CLASS.	5hrs
2.	FUNDAMENTAL BIM KNOWLEDGE.	5hrs
3.	VIEW & RETRIEVE INFORMATION FROM BIM MODELS.	5hrs
4.	COLLABORATION WITH CAD DRAWINGS , PROJECT BUDGET CALCULATION WITH SCHEDULED 3D MODEL.	5hrs
5.	MULTIPLE 3D MODELS FOR DIFFERENT PROJECT TEAMS ON A DIGITAL PLATFORM.	5hrs
6.	ADDITIONAL INFORMATION OF TIME WITH SHARED 3D MODEL.	5hrs
7.	PROJECT BUDGET CALCULATION WITH SCHEDULED 3D MODEL.	5hrs
8.	MODELING A BIM MODEL.	5hrs
9.	CLOSURE.	5hrs
	Total Hours	45 hrs

Duration of the Course: 45 hours.

Minimum Eligibility: UG&PG

Learning outcomes:

1. The learning process is mainly organized around theoretical classes.
2. Related production of 2D drawings and representations in different detail levels.
3. Acquired know-how and abilities from these courses are directly transferred.
4. To design studios in various levels and construction project courses.

ABOUT PRIST DEEMED TO BE UNIVERSITY

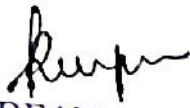

Ponnaiyah Ramajayam Institute of Science & Technology (PRIST), made a for into the academic domain, with the establishment of Sri Ram Institute of Computer Science and Technology in 1985. Over time, various institutions of higher learning such as an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, Commerce & Business Management, Architecture, Agriculture, Law, Pharmacy & Polytechnic College, added feathers to the PRIST crown. PRIST University received university status under section 3 of UGC Act 1956 & also got NAAC Accredited status. Today, PRIST commands a massive student base, spread across a whole array of campuses such as Trichy, Kumbakonam, Puducherry, Chennai, Madurai etc.

Ponnaiyah Ramajayam College applied for NAAC assessment and accreditation Council and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status. The academic reach extends right from school education up to the level of the Ph.D Doctoral programmes in a rich array of disciplines such as Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Law, Agriculture & Architecture.

SCHOOL OF ENGINEERING & TECHNOLOGY

The Departments of Civil Engineering, Computer Science and Engineering, Electronics and Communication Engineering, Mechanical Engineering, and Electrical and Electronics Engineering were established in 2008 with an objective to impart quality education to meet today's competitive environment. All Departments has well experienced & dedicated faculty with strong commitment to provide vibrant learning environment to student in order to help them excel. To keep pace with the current technological trends, all departments have well designed, constantly reviewed syllabus to incorporate all advanced in existing & Emerging Technologies which gives the students a holistic and pragmatic view of the present scenario of Industry.

INTRODUCTION ABOUT THE DEPARTMENT

In PRIST UNIVERSITY the Department of Civil Engineering was established in 2008. Since then its excellence in each and every aspects has played an important role in the Institute. Our Department is offering B.Tech – Civil Engineering M.Tech – Structural Engineering & Doctorate in Civil Engineering. Civil Engineering Department has been actively involved in research and consultancy in all the fields of Civil Engineering. The Department has well equipped laboratories and research facilities. It is constantly modernizing the laboratory facilities with latest technology and research know-how.

The Department offers PG/UG degree courses and a number of add on courses. Group electives or major electives are offered to enable students choose from wide choice of fourteen courses. Also, we offer skill based electives, from the point of view of employment opportunities and free elective courses of inter disciplinary nature. The Advanced Learners are offered Extra Credit courses for earning extra credits.

INTRODUCTION ABOUT THE COURSE

A total station is a surveying instrument that combines an electronic theodolite and an electronic distance meter (EDM) to provide accurate measurements of both horizontal and vertical angles as well as distances. It is commonly used in construction, engineering, and land surveying projects to collect data for creating detailed maps, plans, and 3D models. A Total Station consists of a telescope, a computer, and a reflector.

The telescope is used to aim at a target, and the EDM measures the distance to the target by sending out a laser beam and measuring the time it takes for the beam to be reflected back. This time is used to calculate the distance to the target.

The format of the course will be lectures, short in-class assignments for participation, final exam and lab sessions. Students will gain hands-on experience using ESRI Arc GIS Pro software, one of the most widely used commercial GIS packages. However, knowledge gained during the theoretical and practical sessions will easily be transferable to other platforms like QGIS or GRASS.

Outline of the course:

S.No	Topics	Minimum
1.	TOTAL STATION OPERATION	7 hrs
2.	CENTRING, LEVELLING AND FOCUSING.	7 hrs
3.	IMPORTING DATA FROM TOTAL STATION TO CADD SOFTWARE	7 hrs
4.	CONTOUR SURVEY , BUILDING MARKING , ANGLE & DISTANCE MEASUREMENT .	7 hrs
5.	CALCULATION OF AREA , MEASUREMENT OF VOLUME.	7 hrs
6.	INTRODUCTION TO GIS.	7 hrs
7.	SPATIAL DATA MODELS & NON-SPATIAL DATA MODELS.	7 hrs
8.	GIS DATA INPUT, AND GEO-CORRECTION.	6 hrs
9.	PREPARATION OF FLUVIO-GEOMORPHIC MAPS.	5 hrs

Duration of the Course: 60 hours.

Minimum Eligibility: UG&PG

Learning outcomes:

1. Setting up total station, Stationing and orienting to a direction and back sight point.
2. Resection/free stationing from known points.
3. Setting out lines and levels for buildings, kerbs, manholes or gullies.
4. Gaining the basic knowledge of mapping the earth and its features.
5. Be able to successfully organize, manage, and present results in the form of a GIS project.
6. Understand how GIS methodologies can be used to address spatial analysis from the theoretical perspective..

ABOUT PRIST DEEMED TO BE UNIVERSITY

Ponnaiyah Ramajayam Institute of Science & Technology (PRIST), made a for into the academic domain, with the establishment of Sri Ram Institute of Computer Science and Technology in 1985. Over time, various institutions of higher learning such as an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, Commerce & Business Management, Architecture, Agriculture, Law, Pharmacy & Polytechnic College, added feathers to the PRIST crown. PRIST University received university status under section 3 of UGC Act 1956 & also got NAAC Accredited status. Today, PRIST commands a massive student base, spread across a whole array of campuses such as Trichy, Kumbakonam, Puducherry, Chennai, Madurai etc.

Ponnaiyah Ramajayam College applied for NAAC assessment and accreditation Council and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

The academic reach extends right from school education up to the level of the Ph.D Doctoral programmes in a rich array of disciplines such as Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Law, Agriculture & Architecture.

SCHOOL OF ENGINEERING & TECHNOLOGY

The Departments of Civil Engineering, Computer Science and Engineering, Electronics and Communication Engineering, Mechanical Engineering, and Electrical and Electronics Engineering were established in 2008 with an objective to impart quality education to meet today's competitive environment. All Departments has well experienced & dedicated faculty with strong commitment to provide vibrant learning environment to student in order to help them excel. To keep pace with the current technological trends, all departments have well designed, constantly reviewed syllabus to incorporate all advanced in existing & Emerging Technologies which gives the students a holistic and pragmatic view of the present scenario of Industry.

INTRODUCTION ABOUT THE DEPARTMENT

In PRIST UNIVERSITY the Department of Civil Engineering was established in 2008. Since then its excellence in each and every aspects has played an important role in the Institute. Our Department is offering B.Tech – Civil Engineering M.Tech – Structural Engineering & Doctorate in Civil Engineering. Civil Engineering Department has been actively involved in research and consultancy in all the fields of Civil Engineering. The Department has well equipped laboratories and research facilities. It is constantly modernizing the laboratory facilities with latest technology and research know-how.

The Department offers PG/UG degree courses and a number of add on courses. Group electives or major electives are offered to enable students choose from wide choice of fourteen courses. Also, we offer skill based electives, from the point of view of employment opportunities and free elective courses of inter disciplinary nature. The Advanced Learners are offered Extra Credit courses for earning extra credits.

INTRODUCTION ABOUT THE COURSE

The Autodesk Revit software is a powerful Building Information Modeling (BIM) program that works the way architects think. The program streamlines the design process through the use of a central 3D model, where changes made in one view update across all views and on the printable sheets. This training guide is designed to teach you the Autodesk Revit functionality as you would work with it throughout the design process. You begin by learning about the user interface and basic drawing, editing, and viewing tools.

Then you learn design development tools including how to model walls, doors, windows, floors, ceilings, stairs and more. Finally, you learn the processes that take the model into the construction documentation phase. Since building projects themselves tend to be extremely complex, the Autodesk Revit software is also complex. The objective of the Autodesk Revit 2015 (R1): Architecture Fundamentals training guide is to enable students to create full 3D architectural project models and set them up in working drawings. This training guide focuses on basic tools that the majority of students need to work with the Autodesk Revit software. Topics Covered: Understand the purpose of Building Information Management (BIM) and how it is applied in the Autodesk Revit software. Navigating the Autodesk Revit workspace and interface. Working with the basic drawing and editing tools.

Outline of the course:

S.No	Topics	Minimum
1.	INTRODUCTION TO REVIT ARCHITECTURE&BIM	5 hrs
2.	STARTING THE PROJECT & BUILDING THE MODEL..	5 hrs
3.	DETAILING OF THE MODEL .	5 hrs
4.	ADDING FLOORING, CEILING, ROOFING & BALCONY.	5 hrs
5.	MATERIAL APPLICATION & NEW MATERIAL.	5 hrs
6.	MASSING & SITE: TOPO SURFACE, SITE COMPONENT.	5 hrs
7.	3D MODEL OF THE HOUSE WITH MASSING & SITE COMPONENTS.	5 hrs
8.	EXTRUSIONS & OPENING.	5 hrs
9.	FINISHING THE MODEL.	5 hrs

Duration of the Course: 45 hours.

Minimum Eligibility: UG&PG

Learning outcomes:

1. Students will learn to capture and analyze concepts, and maintain your vision through design, documentation, and construction.
2. Students will learn to do building element energy analysis; use the API to perform pipe/duct calculations; perform static analysis from the cloud; create/manage the structural analytical model; automatically update your model with analysis results; and improve BIM-based building performance workflows.
3. Student will learn to dock dialogs in a single window; more easily model, edit, and document designs; place air terminal devices on duct faces; restrict angles for pipe, duct, and cable tray; cap open ends of pipe or duct content quickly; rebar placement constraints customization; gain control over rebar placement; and get more rebar options when modeling.

ABOUT PRIST DEEMED TO BE UNIVERSITY

Ponnaiyah Ramajayam Institute of Science & Technology (PRIST), made a for into the academic domain, with the establishment of Sri Ram Institute of Computer Science and Technology in 1985. Over time, various institutions of higher learning such as an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, Commerce & Business Management, Architecture, Agriculture, Law, Pharmacy & Polytechnic College, added feathers to the PRIST crown. PRIST University received university status under section 3 of UGC Act 1956 & also got NAAC Accredited status. Today, PRIST commands a massive student base, spread across a whole array of campuses such as Trichy, Kumbakonam, Puducherry, Chennai, Madurai etc.

Ponnaiyah Ramajayam College applied for NAAC assessment and accreditation Council and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status. The academic reach extends right from school education up to the level of the Ph.D Doctoral programmes in a rich array of disciplines such as Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Law, Agriculture & Architecture.

SCHOOL OF ENGINEERING & TECHNOLOGY

The Departments of Civil Engineering, Computer Science and Engineering, Electronics and Communication Engineering, Mechanical Engineering, and Electrical and Electronics Engineering were established in 2008 with an objective to impart quality education to meet today's competitive environment. All Departments has well experienced & dedicated faculty with strong commitment to provide vibrant learning environment to student in order to help them excel. To keep pace with the current technological trends, all departments have well designed, constantly reviewed syllabus to incorporate all advanced in existing & Emerging Technologies which gives the students a holistic and pragmatic view of the present scenario of Industry.

INTRODUCTION ABOUT THE DEPARTMENT

In PRIST UNIVERSITY the Department of Civil Engineering was established in 2008. Since then its excellence in each and every aspects has played an important role in the Institute. Our Department is offering B.Tech – Civil Engineering M.Tech – Structural Engineering & Doctorate in Civil Engineering. Civil Engineering Department has been actively involved in research and consultancy in all the fields of Civil Engineering. The Department has well equipped laboratories and research facilities. It is constantly modernizing the laboratory facilities with latest technology and research know-how.

The Department offers PG/UG degree courses and a number of add on courses. Group electives or major electives are offered to enable students choose from wide choice of fourteen courses. Also, we offer skill based electives, from the point of view of employment opportunities and free elective courses of inter disciplinary nature. The Advanced Learners are offered Extra Credit courses for earning extra credits.

INTRODUCTION ABOUT THE COURSE

STAAD's full form is Structural Analysis and Design. STAAD Pro is one of the popular software that is used for analyzing & designing structures like – buildings, towers, bridges, industrial, transportation, and utility structures. Designs may include any building structures like tunnels, culverts, bridges, piles, and petrochemical plants; and building materials like timber, concrete, steel, cold-formed steel, and aluminum.

STAAD or STAAD.Pro was developed by Research Engineers International at Yorba Linda, CA in 1997. To get rid of the boring & time-consuming manual procedures architectural Engineers started using automated software STAAD.Pro. STAAD.Pro permits structural engineers to design & analyze any type of structure virtually. Structural consultants, structural engineering firms, departments in construction companies, government agencies, owner/operators, offshore platform designers, and many more are extensively using this software.

STAAD.Pro V8i provides a flexible modeling environment, fluent data collaboration, and advanced features. It best structural analysis & design software that supports Indian as well as all international codes. STAAD.Pro® is one of the most widely-used software for developing and analyzing the designs of various structures, such as petrochemical plants, tunnels, bridges, etc. STAAD.Pro v8i, the latest version, allows civil engineering individuals to analyze structural designs in terms of factors like force, load, displacements, etc. Multisoft Virtual Academy STAAD.Pro v8i online training builds expertise in using the software at a professional level in domains, including construction companies, government agencies, architecture firms, etc.

Outline of the course:

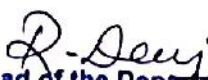

S.NO	TOPICS	MINIMUM
1.	INTRODUCTION TO STAAD PRO V8i.	5 hrs
2.	MODEL GENERATION AND EDITING.	5 hrs
3.	INTRODUCTION TO LOADING AND AUTOMATIC LOAD GENERATION.	5 hrs
4.	CONCRETE DESIGN.	5 hrs
5.	SEISMOLOGY.	5 hrs
6.	FEM / FEA.	5 hrs
7.	STEEL DESIGN.	5 hrs
8.	REPORT GENERATION.	5 hrs
9.	FOUNDATION DESIGN.	5 hrs

Duration of the Course: 45 hours.

Minimum Eligibility: UG&PG

Learning outcomes:

1. Students will be able to complete object-oriented instinctive 2D/3D graphic model.
2. Students will know to make isometric & perspective views and 3D.
3. This course will introduce one to STAAD Pro's state-of-the-art user interface, prevailing analysis and design engines with sophisticated finite element (FEM), visualization tools, and dynamic analysis capabilities.
4. Students will learn how to achieve user-specified design parameters to customize.
5. Students will know to perform code check, member selection, and optimized member selection consisting of analysis/design.

ABOUT PRIST DEEMED TO BE UNIVERSITY

Ponnaiyah Ramajayam Institute of Science & Technology (PRIST), made a for into the academic domain, with the establishment of SriRam Institute of Computer Science and Technology in 1985. Over time, various institutions of higher learning such as an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, Commerce & Business Management, Architecture, Agriculture, Law, Pharmacy & Polytechnic College, added feathers to the PRIST crown. PRIST University received university status under section 3 of UGC Act 1956 & also got NAAC Accredited status. Today, PRIST commands a massive student base, spread across a whole array of campuses such as Trichy, Kumbakonam, Puducherry, Chennai, Madurai etc.

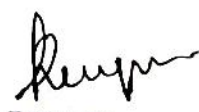

Ponnaiyah Ramajayam College applied for NAAC assessment and accreditation Council and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

The academic reach extends right from school education up to the level of the Ph.D Doctoral programmes in a rich array of disciplines such as Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Law, Agriculture & Architecture.

SCHOOL OF ENGINEERING & TECHNOLOGY

The Departments of Civil Engineering, Computer Science and Engineering, Electronics and Communication Engineering, Mechanical Engineering, and Electrical and Electronics Engineering were established in 2008 with an objective to impart quality education to meet today's competitive environment. All Departments has well experienced & dedicated faculty with strong commitment to provide vibrant learning environment to student in order to help them excel. To keep pace with the current technological trends, all departments have well designed, constantly reviewed syllabus to incorporate all advanced in existing & Emerging Technologies which gives the students a holistic and pragmatic view of the present scenario of Industry.

INTRODUCTION ABOUT THE DEPARTMENT

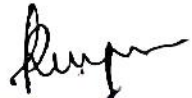

In PRIST UNIVERSITY the Department of Civil Engineering was established in 2008. Since then its excellence in each and every aspects has played an important role in the Institute. Our Department is offering B.Tech – Civil Engineering M.Tech – Structural Engineering & Doctorate in Civil Engineering. Civil Engineering Department has been actively involved in research and consultancy in all the fields of Civil Engineering. The Department has well equipped laboratories and research facilities. It is constantly modernizing the laboratory facilities with latest technology and research know-how.

The Department offers PG/UG degree courses and a number of add on courses. Group electives or major electives are offered to enable students choose from wide choice of fourteen courses. Also, we offer skill based electives, from the point of view of employment opportunities and free elective courses of inter disciplinary nature. The Advanced Learners are offered Extra Credit courses for earning extra credits.

INTRODUCTION ABOUT THE COURSE

Civil engineering is the professional engineering discipline that deals with the design, construction and maintenance of public and private infrastructure within the natural environment. Geotechnical engineering is a discipline within civil engineering that focuses on the behavior of natural geological materials in engineered systems. Geotechnical engineers recognize that soil and rock are the cheapest and most abundant building materials on Earth, and consequently play a major role in the construction and performance of every type of civil engineering structure.

1	Soil and rock mechanics	5hrs
2	Soil-structure interaction	5hrs
3	Constitutive modeling	5hrs
4	Computational geomechanics	5hrs
5	Foundation and earth structures engineering	5hrs
6	Ground improvement	5hrs
7	Slope stability and landslide stabilization	5hrs
8	Liquefaction of soils and earthquake engineering	5hrs
9	Laboratory characterization of geomaterials and soil reinforcement	5hrs

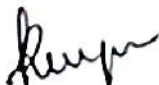

Duration of the Course: 45 hours

Minimum Eligibility: UG&PG

Learning outcomes:

1. Geotechnical design challenges in civil engineering. Technologies used to install or construct geotechnical systems.
2. Soil behaviour relevant to ultimate and serviceability limit states.
3. Numerical and constitutive modelling methods used in geotechnical design.

INTRODUCTION ABOUT THE COURSE

Plastics are being used in practically all areas of consumer products, including construction, transportation, packaging, automobile and agriculture. In recent world more concern is on the possible damaging impact of plastics on the environment. A Plastic Diploma engineer has to identify all possible sources of plastic waste generation and do recycling of it with or without energy recovery within government norms.

This competency requires the knowledge of various plastic recycling techniques. Hence the course has been designed to develop this competency and its associated cognitive, practical and affective domain learning outcomes.

4	To carry out separation of plastics using float-sink method.	5hrs
5	To study various separation methods of paper/plastic mixtures.	5hrs
6	To perform primary recycling of plastic using granulators.	5hrs
7	To study recycling by chemical modification of plastic waste.	5hrs
8	To study secondary recycling by co-extrusion and coinjection molding.	5hrs
9	To study quaternary recycling methods	5hrs

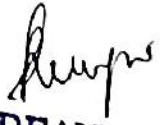

Duration of the Course: 45hours

Minimum Eligibility: UG&PG

Learning outcomes:

1. Apply strategies, tactics and Incident Command/Incident Management skills to emergency incidents
2. Application of management and leadership principles to Fire Department operations, inter-agency cooperation and implementation of policies and procedures

About the University

The Institute was founded in 1985 by Prof. P. Murugesan. It was initially known as the Institute of Computer Science and Technology. Murugesan founded the Institute to introduce computer education to the Thanjavur District. In 1988, the Institute received affiliation from Bharathidasan University to offer Postgraduate Diploma Programmes in Computer Applications.

Thereafter it expanded to include an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, and Polytechnic College.

In 2004, Ponnaiya Ramajayam College applied for NAAC assessment and accreditation and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

On 4 January 2008, the Institute was conferred deemed university status based on the recommendations of the UGC Expert Committee, the Ministry of HRD, and the Government of India. The Institute also received approval from the Distance Education Council (DEC) and its B.Ed. course is approved by The National Council for Teacher Education (NCTE).

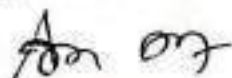

In 2015, the Institute once again applied for NAAC assessment and accreditation and was awarded a "B" grade. In a letter signed by an undersecretary in the Union Health Ministry, it was stated that the Institute, which was granted conditional approval to offer 150 MBBS seats last year, was debarred from admitting students for the academic years of 2017-18 and 2018-19.

Currently, the Institute offers degrees in Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Agriculture and Technology, as well as Ph.D. programmes in some of these fields.

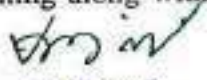

About the Department

The School of Agriculture under Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) was established at Vallam, Thanjavur in the year 2016.

The agriculture is intended to impart high quality education so as to produce not just agricultural graduates but agro technocrats with practical and conceptual skills. With precise and deliberate course modules, which provides education, research and training along with

The department has spacious laboratories such as Plant Pathology, Microbiology, Agricultural Entomology, Agricultural Botany and Genetics, Agronomy, Horticulture, Economics lab and Audio - Visual lab. All the laboratories are fully equipped with latest, modern and sophisticated equipment.

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at Undergraduate (UG) levels. The staffs are from various disciplines in Doctorate like Plant Pathology, Microbiology, Soil science, Plant Genetics and Veterinary. The staffs are from various disciplines in masters like Agricultural Entomology, Agronomy, Agricultural Extension, Horticulture and Economics. Many of the staff members are encouraged to pursue their higher studies and research works.

About the Course

Introduction and Overview

- The major principles that govern SSI can be stated as below
- Cultivation aspects
- Fertigation schedule for sugarcane in SSI
- Comparison between SSI methods of Sugarcane Cultivation

What Conventional and is Sustainable Sugarcane Initiative (SSI)?

- The Sustainable Sugarcane Initiative (SSI) is yet another practical approach to sugarcane production which is based on the principles of 'more with less' in agriculture like System of Rice Intensification (SRI). SSI improves the productivity of water, land and labor, all at the same time, while reducing the overall pressure on water resources.
- Sustainable Sugarcane Initiative is a method of sugarcane production which involves using less seeds, less water and optimum utilization of fertilizers and land to achieve more yields. Driven by farmers, SSI is an alternate to conventional seed, water and space intensive Sugarcane cultivation.

The major principles that govern SSI

- Raising nursery in portrays using single budded chips

HEAD

DEAN

- Transplanting young seedlings (25-35 days old)
- Maintaining wider spacing (5x2 feet) in the main field
- Providing sufficient moisture through efficient water management technological viz., drip fertigation (sub or sub surface)
- Encouraging organic method of nutrient and plant protection measures
- Practicing intercropping with effective utilization of land

Overall Benefits

- Improved water use efficiency
- Optimum use of fertilizers favour balanced availability of nutrient
- Better aeration and more penetration of sunlight favours higher sugar content
- Reduced cost of cultivation and increased returns through intercropping

Opportunities offered by SSI:

- Addresses the issue of late planting by raising seedlings and their transplantation later on which actually advances the entire process.
- Addresses the issue of narrow spacing as the technology is based on successful exploitation of sunlight and air by following wider spacing in the main field.
- Addresses the problem of improper method of irrigation, namely, flooding. Significant reduction in seed requirement, as only the bud is used as seed material

Learning outcomes of the course unit:

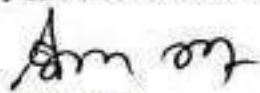

The students finally come up with the practical knowledge of growing sugarcane in SSI method which promote self employability by providing more yield.

Eligibility: Any graduates / ongoing degree students shall be eligible for the admission to the course.

Duration of the Program: 45 hrs. Value added Certificate Course.

Lecture Hours: 4.30 p.m. to 5.30 p.m. (Monday to Saturday)

Mode of Examination: Written Exam and seminar

About the University

The Institute was founded in 1985 by Prof. P. Murugesan. It was initially known as the Institute of Computer Science and Technology. Murugesan founded the Institute to introduce computer education to the Thanjavur District. In 1988, the Institute received affiliation from Bharathidasan University to offer Postgraduate Diploma Programmes in Computer Applications.

Thereafter it expanded to include an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, and Polytechnic College.

In 2004, Ponnaiya Ramajayam College applied for NAAC assessment and accreditation and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

On 4 January 2008, the Institute was conferred deemed university status based on the recommendations of the UGC Expert Committee, the Ministry of HRD, and the Government of India. The Institute also received approval from the Distance Education Council (DEC) and its B.Ed. course is approved by The National Council for Teacher Education (NCTE).

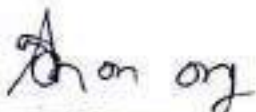

In 2015, the Institute once again applied for NAAC assessment and accreditation and was awarded a "B" grade. In a letter signed by an undersecretary in the Union Health Ministry, it was stated that the Institute, which was granted conditional approval to offer 150 MBBS seats last year, was debarred from admitting students for the academic years of 2017-18 and 2018-19.

Currently, the Institute offers degrees in Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Agriculture and Technology, as well as Ph.D. programmes in some of these fields.

About the Department

The School of Agriculture under Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) was established at Vallam, Thanjavur in the year 2016.

The agriculture is intended to impart high quality education so as to produce not just agricultural graduates but agro technocrats with practical and conceptual skills. With precise and

The department has spacious laboratories such as Plant Pathology, Microbiology, Agricultural Entomology, Agricultural Botany and Genetics, Agronomy, Horticulture, Economics lab and Audio – Visual lab. All the laboratories are fully equipped with latest, modern and sophisticated equipment.

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at Undergraduate (UG) levels. The staffs are from various disciplines in Doctorate like Plant Pathology, Microbiology, Soil science, Plant Genetics and Veterinary. The staffs are from various disciplines in masters like Agricultural Entomology, Agronomy, Agricultural Extension, Horticulture and Economics. Many of the staff members are encouraged to pursue their higher studies and research works.

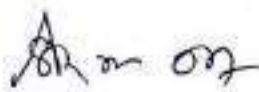

About the Course

What is agricultural technology?

Agricultural technology, also known as “agritech,” encompasses a broad range of disciplines and devices that improve agricultural output. That includes vehicles, robotics, computers, satellites, drones, mobile devices, and software. The use of big data analytics and artificial intelligence (AI) technology in agriculture is also an example of how the farming sector is embracing technological advancement. Changes in farming and field management during the past few decades have been revolutionary. The employment of modern, state-of-the-art technology in agriculture can be credited with much of the recent success in crop management and increased harvests.

Benefits of starting an agricultural technology

agriculture technology: The implementation of smart agricultural technology is advantageous for all players in the agri-food chain. With its use in optimizing and automating agricultural operations and field activities, growers and landowners can now save significant amounts of time and effort. These are just a few examples of how farming has benefited from advances in agriculture technology:

- Using less water, fertilizer, pesticides, and other inputs allows agricultural producers to cut costs and keep more of their profits;
- By preventing or drastically reducing the amount of chemical runoff into waterways, businesses lessen agriculture's impact on the environment and take steps toward greater sustainability;
- Increasing crop yields while decreasing labor inputs;
- Making it easier for farmers, agronomists, or other agricultural workers to communicate and coordinate activities using mobile devices, apps, or web-based resources;
- Lowering barriers to accessing agricultural insurance and financial services as well as market and technological data;
- Mitigation of the damage that could be caused by pests, natural calamities, and bad weather in agriculture with the help of affordable, always-on agricultural monitoring systems
- Increase in farm income through improved product quality and increased quality controls;
- Timely recognizing nutrient deficiency in plants and notifying agricultural producers of the type and amount of fertilizer and other amendments needed;
- Ability to foresee potential problems on the farm through the visualization of production patterns and trends gleaned from an analysis of current and historical agricultural data. By estimating their overall crop yield, agricultural producers can precisely budget for the next growing season and better prepare for emergencies.

Eligibility: Any graduates / ongoing degree students shall be eligible for the admission to the course.

Duration of the Program: 45 hrs. Value added Certificate Course.

About the University

The Institute was founded in 1985 by Prof. P. Murugesan. It was initially known as the Institute of Computer Science and Technology. Murugesan founded the Institute to introduce computer education to the Thanjavur District. In 1988, the Institute received affiliation from Bharathidasan University to offer Postgraduate Diploma Programmes in Computer Applications.

Thereafter it expanded to include an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, and Polytechnic College.

In 2004, Ponnaiya Ramajayam College applied for NAAC assessment and accreditation and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

On 4 January 2008, the Institute was conferred deemed university status based on the recommendations of the UGC Expert Committee, the Ministry of HRD, and the Government of India. The Institute also received approval from the Distance Education Council (DEC) and its B.Ed. course is approved by The National Council for Teacher Education (NCTE).

In 2015, the Institute once again applied for NAAC assessment and accreditation and was awarded a "B" grade. In a letter signed by an undersecretary in the Union Health Ministry, it was stated that the Institute, which was granted conditional approval to offer 150 MBBS seats last year, was debarred from admitting students for the academic years of 2017-18 and 2018-19.

Currently, the Institute offers degrees in Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Agriculture and Technology, as well as Ph.D. programmes in some of these fields.

About the Department

The School of Agriculture under Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) was established at Vallam, Thanjavur in the year 2016.

The department has spacious laboratories such as Plant Pathology, Microbiology, Agricultural Entomology, Agricultural Botany and Genetics, Agronomy, Horticulture,

Economics lab and Audio – Visual lab. All the laboratories are fully equipped with latest, modern and sophisticated equipment.

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at Undergraduate (UG) levels. The staffs are from various disciplines in Doctorate like Plant Pathology, Microbiology, Soil science, Plant Genetics and Veterinary. The staffs are from various disciplines in masters like Agricultural Entomology, Agronomy, Agricultural Extension, Horticulture and Economics. Many of the staff members are encouraged to pursue their higher studies and research works.

About the Course

Introduction and Overview

1. Understand the current developments in the field of Biotechnology
2. Equip the students to carry out plant tissue culture

What is Tissue Culture?

Tissue culture is a general term that refers to the process of growing cells, tissues, or organs from an animal or plant in an artificial environment that mimics their natural setting.

Objectives of Tissue Culture

- To maintain or grow plant cells, tissues, or organs under sterile conditions on a nutrient culture medium of known composition.
- It is widely used to produce clones of a plant in a method known as micro propagation

Eligibility: Any graduates / ongoing degree students shall be eligible for the admission to the course.

Duration of the Program: 45 hrs. Value added Certificate Course.

Lecture Hours: 4.30 p.m. to 5.30 p.m. (Monday to Saturday)

Mode of Examination: Written Exam and seminar

Award of Certificate: The candidate successfully qualifying the course shall be awarded a certificate to that effect in the appropriate form by School of Agriculture, ~~PRIST~~ Deemed to

University, Vallam, Thanjavur.

Course content

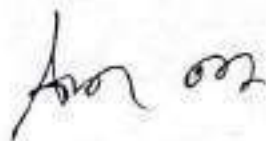

Unit 1- Introduction - History, Scope and Concepts of basic techniques in plant tissue culture. Laboratory requirements and organization. Sterilization - filter, heat, wet and chemical. Media preparation - inorganic nutrients, organic supplements, carbon source, vitamins, gelling agents, phytohormones and growth regulators; composition of commonly used culture media (MS and Gamborg's)

Unit 2 – Cell, tissue and organ culture - Isolation of single cells, selection and types of cells. Tissue explants and organs for culture - Cell suspension cultures - batch, continuous. Synchronization of suspension culture, cellular totipotency, Cytological, cytochemical and vascular differentiations

Unit 3 – Elite and ornamental Plants for propagation in vitro, Selection of superior biotypes of orchids, roses, jasmine, Hibiscus and crotons; Clonal propagation of elite germplasms, clonal propagation strategies for commercial exploitations.

Unit 4 - Micro propagation - Factors affecting morphogenesis and proliferation rate; technical problems in micro propagation. Organogenesis - formation of shoots and roots, production of virus free plants by meristem and shoot-tip culture

Unit 5 - Somatic embryogenesis - Process of somatic embryogenesis, structure, stages of embryo development factors affecting embryogenesis; production of artificial seeds; Cryopreservation.

About the University

The Institute was founded in 1985 by Prof. P. Murugesan. It was initially known as the Institute of Computer Science and Technology. Murugesan founded the Institute to introduce computer education to the Thanjavur District. In 1988, the Institute received affiliation from Bharathidasan University to offer Postgraduate Diploma Programmes in Computer Applications.

Thereafter it expanded to include an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, and Polytechnic College.

In 2004, Ponnaiya Ramajayam College applied for NAAC assessment and accreditation and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

On 4 January 2008, the Institute was conferred deemed university status based on the recommendations of the UGC Expert Committee, the Ministry of HRD, and the Government of India. The Institute also received approval from the Distance Education Council (DEC) and its B.Ed. course is approved by The National Council for Teacher Education (NCTE).

In 2015, the Institute once again applied for NAAC assessment and accreditation and was awarded a "B" grade. In a letter signed by an undersecretary in the Union Health Ministry, it was stated that the Institute, which was granted conditional approval to offer 150 MBBS seats last year, was debarred from admitting students for the academic years of 2017-18 and 2018-19.

Currently, the Institute offers degrees in Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Agriculture and Technology, as well as Ph.D. programmes in some of these fields.

About the Course

Introduction and Overview

- Azolla in order to improve the soil fertility and productivity.
- To study the basic principles and application methodologies of azolla.

What is Azolla Cultivation?

Azolla is an aquatic floating fern. The fern appears as a green mat over water. The Blue Green Algae cyanobacteria (*Anabaena azollae*) present as a symbiont with this fern in the lower cavities actually fixes atmospheric nitrogen

Objectives of Azolla

- Reduction in fodder requirement
- Increases the live weight of livestock
- Improves the egg quality and production
- Improves the quality of milk

Eligibility: Any graduates / ongoing degree students shall be eligible for the admission to the course.

Duration of the Program: 45 hrs. Value added Certificate Course.

Lecture Hours: 4.30 p.m. to 5.30 p.m. (Monday to Saturday)

Mode of Examination: Written Exam and seminar

About the University

The Institute was founded in 1985 by Prof. P. Murugesan. It was initially known as the Institute of Computer Science and Technology. Murugesan founded the Institute to introduce computer education to the Thanjavur District. In 1988, the Institute received affiliation from Bharathidasan University to offer Postgraduate Diploma Programmes in Computer Applications.

Thereafter it expanded to include an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, and Polytechnic College.

In 2004, Ponnaiya Ramajayam College applied for NAAC assessment and accreditation and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

On 4 January 2008, the Institute was conferred deemed university status based on the recommendations of the UGC Expert Committee, the Ministry of HRD, and the Government of India. The Institute also received approval from the Distance Education Council (DEC) and its B.Ed. course is approved by The National Council for Teacher Education (NCTE).

In 2015, the Institute once again applied for NAAC assessment and accreditation and was awarded a "B" grade. In a letter signed by an undersecretary in the Union Health Ministry, it was stated that the Institute, which was granted conditional approval to offer 150 MBBS seats last year, was debarred from admitting students for the academic years of 2017-18 and 2018-19.

Currently, the Institute offers degrees in Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Agriculture and Technology, as well as Ph.D. programmes in some of these fields.

About the Department

The School of Agriculture under Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) was established at Vallam, Thanjavur in the year 2016.

The department has spacious laboratories such as Plant Pathology, Microbiology, Agricultural Entomology, Agricultural Botany and Genetics, Agronomy, *win*

Economics lab and Audio – Visual lab. All the laboratories are fully equipped with latest, modern and sophisticated equipment.

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at Undergraduate (UG) levels. The staffs are from various disciplines in Doctorate like Plant Pathology, Microbiology, Soil science, Plant Genetics and Veterinary. The staffs are from various disciplines in masters like Agricultural Entomology, Agronomy, Agricultural Extension, Horticulture and Economics. Many of the staff members are encouraged to pursue their higher studies and research works.

About the Course

Aim and objective

Students will be able to compost in a limited space and describe the decomposing process.

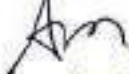

- Students will get the employment.
- They can generate employments.
- They will also turn towards organic farming,
- They will help to maintain the environment pollution free.

What is Vermicompost?

Vermicompost (vermi-compost) is the product of the decomposition process using various species of worms, usually red wigglers, white worms, and other earthworms, to create a mixture of decomposing vegetable or food waste, bedding materials, and vermicast. This process is called vermicomposting, with the rearing of worms for this purpose is called vermiculture.

Benefits of Vermicompost

- Improves soil aeration
- Enriches soil with micro-organisms (adding enzymes such as phosphatase and cellulase)
- Microbial activity in worm castings is 10 to 20 times higher than in the soil and organic matter that the worm ingests
- Attracts deep-burrowing earthworms already present in the soil

In 2004, Ponnaiya Ramajayam College applied for NAAC assessment and accreditation and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

On 4 January 2008, the Institute was conferred deemed university status based on the recommendations of the UGC Expert Committee, the Ministry of HRD, and the Government of India. The Institute also received approval from the Distance Education Council (DEC) and its B.Ed. course is approved by The National Council for Teacher Education (NCTE).

In 2015, the Institute once again applied for NAAC assessment and accreditation and was awarded a "B" grade. In a letter signed by an undersecretary in the Union Health Ministry, it was stated that the Institute, which was granted conditional approval to offer 150 MBBS seats last year, was debarred from admitting students for the academic years of 2017-18 and 2018-19.

Currently, the Institute offers degrees in Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Agriculture and Technology, as well as Ph.D. programmes in some of these fields.

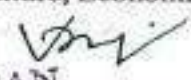

About the Department

The School of Agriculture under Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) was established at Vallam, Thanjavur in the year 2016.

The department has spacious laboratories such as Plant Pathology, Microbiology, Agricultural Entomology, Agricultural Botany and Genetics, Agronomy, Horticulture, Economics

lab and Audio – Visual lab. All the laboratories are fully equipped with latest, modern and sophisticated equipment.

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at Undergraduate (UG) levels. The staffs are from various disciplines in Doctorate like Plant Pathology, Microbiology, Soil science, Plant Genetics and Veterinary. The staffs are from various disciplines in masters like Agricultural Entomology, Agronomy, Agricultural Extension, Horticulture and Economics. Many of the staff members are encouraged to pursue their higher studies and research works.

About the Course

Introduction and Overview

- Green revolution technologies such as greater use of synthetic agro chemicals like fertilizers and pesticides, adoption of nutrient responsive, high-yielding varieties of crops, greater exploitation of irrigation potentials etc., has boosted the production out put in most of cases.
- It concentrates on building up the biological fertility of the soil so that the crops take the nutrients they need from steady turnover within the soil nutrients produced in this way and are released in harmony with the need of the plants.
- Organic farmers recycle all wastes and manures within a farm, but the export of the products from the farm results in a steady drain of nutrients

What is organic farming?

- Organic farming, agricultural system that uses ecologically based pest controls and biological fertilizers derived largely from animal and plant wastes and nitrogen-fixing cover crops. Modern organic farming was developed as a response to the environmental harm caused by the use of chemical pesticides and synthetic fertilizers in conventional agriculture. and it has numerous ecological benefits. Benefits of Organic Farming Organic manures produce optimal conditions in the soil for high yields and good quality crops. They supply all the nutrients required by the plant (NPK, secondary and micronutrients). They improve plant growth and physiological activities of plants. They

improve the soil physical properties such as granulation and tilth, giving good aeration, easy root penetration and improved water holding capacity.

- Organic farming helps to avoid chain reaction in the environment from chemical sprays and dusts. Organic farming helps to prevent environmental degradation and can be used to regenerate degraded areas.

Learning outcomes of the course unit

- This course aims to update the knowledge of Organic Farming
- This process involves the use of biological materials, avoiding synthetic substances to maintain soil fertility and ecological balance thereby minimizing pollution and wastage.
- Ability to define and explain the concept, importance as well as scope of farming system.
- To study the important farming and cropping systems and their contribution in organic farming. Gaining knowledge about organic farming and precision farming with their issues and concerns for Indian agriculture

COURSE CONTENT

Unit 1: Introduction (Definition of organic farming and an Overview of organic farming) Systems Concept/Theory (Components, interactions, structures, hierarchies)

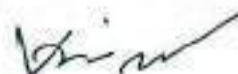

Unit II: Initiatives taken by the central and state governments, NGOs and other organizations for promotion of organic agriculture in India. Organic nutrient sources and their fortification organic manures- methods of composting

Unit III: Nutrient use in organic farming-scope and limitations. Nutrient management inorganic farming. Organic ecosystem and their concepts

Unit IV: Fundamentals of insect, disease and weed management under organic mode of production-cultural-biological methods-non chemical pest & disease management. Botanicals pyrethrum, neem seed kernel extract, neem seed powder, soluble neem formulations, neem oil

About the University

The Institute was founded in 1985 by Prof. P. Murugesan. It was initially known as the Institute of Computer Science and Technology. Murugesan founded the Institute to introduce computer education to the Thanjavur District. In 1988, the Institute received affiliation from Bharathidasan University to offer Postgraduate Diploma Programmes in Computer Applications.

Thereafter it expanded to include an Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, and Polytechnic College.

In 2004, Ponnaiya Ramajayam College applied for NAAC assessment and accreditation and was awarded an "A" grade, thus making it the first "A" grade awarded college in the Bharathidasan University area. The college then submitted its proposal to the Ministry of Human Resource Development, Government of India for deemed university status.

On 4 January 2008, the Institute was conferred deemed university status based on the recommendations of the UGC Expert Committee, the Ministry of HRD, and the Government of India. The Institute also received approval from the Distance Education Council (DEC) and its B.Ed. course is approved by The National Council for Teacher Education (NCTE).

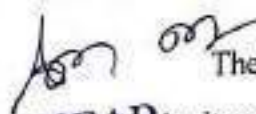

In 2015, the Institute once again applied for NAAC assessment and accreditation and was awarded a "B" grade. In a letter signed by an undersecretary in the Union Health Ministry, it was stated that the Institute, which was granted conditional approval to offer 150 MBBS seats last year, was debarred from admitting students for the academic years of 2017-18 and 2018-19.

Currently, the Institute offers degrees in Medicine, Engineering, Arts & Science, Education, Pharmacy, Management, Agriculture and Technology, as well as Ph.D. programmes in some of these fields.

About the Department

The School of Agriculture under Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) was established at Vallam, Thanjavur in the year 2016. 

The department has spacious laboratories such as Plant Pathology, Microbiology, Agricultural Entomology, Agricultural Botany and Genetics, Agronomy, Postgraduate School of Agriculture, Ponnaiyah Ramajayam Institute of Science & Technology (PRIST)

About the Course

Introduction and Overview

- Identify and understand different types of fishes and fin fish anatomy related to classification of commercially important crustaceans and mollusks up to sub class level and their salient features and distribution.
- Apply knowledge on shell fish anatomy and examine identification and morphology of cultivable organisms

What is Fish Farming?

Fish farming or Pisciculture involves commercial breeding of fish, most often for food, in fish tanks or artificial enclosures such as fish ponds.

Objectives of Fish Farming

- To reduce operating costs and maximize the farmer's income.
- To develop a more economic ration for fish from wastes to useful fish protein production.
- To solve the waste management problem.
- To control the pollution problem associated with livestock (in the form of fly and odour).

Eligibility: Any graduates / ongoing degree students shall be eligible for the admission to the

course

Duration of the Program: 45 hrs. Value added Certificate Course.

About PRIST

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST), a Deemed University [U/s 3 of the UGC Act 1956], is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 30 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

About School of Arts and Science

School of Arts and Sciences consists of Tamil, English, Mathematics, Physics, Chemistry, Biochemistry, Biotechnology, and Microbiology departments. It offers B. Sc., M.Sc. M.Phil. and Ph.D. programmes in all disciplines. It comprises of well qualified and research oriented faculty members whose are experts in the frontier areas in Sciences. Faculty members have received research projects from various funding agencies such as DST, CSIR, DRDO, and ICMR.

About Physics Department

The Physics Department offers credit based undergraduate programme, Bachelor of Science (B.Sc.) in Physics, postgraduate programme, Master of Science (M.Sc.) in Physics and Ph.D. programmes. The Department also offers credit based core and elective courses in basic Physics to undergraduate first year engineering (B.Tech) students.

List of topics covered in the programme

Unit 1

Fundamentals of NANO – Historical Perspective on Nanomaterial and Nanotechnology – Classification of Nanomaterials – Metal and Semiconductor Nanomaterials - 2D, 1D, 0D nanostructured materials - Quantum dots – Quantum wires – Quantum wells - Surface effects of nanomaterials.

Unit 2

Physical properties of Nanomaterials: Melting points, specific heat capacity, and lattice constant - Mechanical behavior: Elastic properties - strength - ductility - superplastic behavior - Optical properties; - Surface Plasmon Resonance – Quantum size effects - Electrical properties - Conductivity, Ferroelectrics and dielectrics - Magnetic properties – super para magnetism – Diluted magnetic semiconductor (DMS).

Unit 3

Physical vapour deposition - Chemical vapour deposition - sol-gel - Wet deposition techniques - electrochemical deposition method - Plasma arching - Electrospinning method - ball milling technique - pulsed laser deposition - Nanolithography: photolithography - Nanomanipulator.

Unit 4

Powder X-ray diffraction – X-ray photoelectron spectroscopy (XPS) - UV-visible spectroscopy – Photoluminescence - Scanning electron microscopy (SEM) - Transmission electron microscopy (TEM) - Scanning probe microscopy (SPM) - Scanning tunneling microscopy (STM) – Vibrating sample Magnetometer.

Unit 5

Sensors: Nanosensors based on optical and physical properties - Electrochemical sensors – Nano-biosensors, Nano Electronics: Nanobots - display screens - GMR read/write heads - Carbon Nanotube Emitters – Photocatalytic application: Air purification, water purification -Medicine: Imaging of cancer cells – biological tags - drug delivery - photodynamic therapy - Energy: fuel cells - rechargeable batteries - supercapacitors - photovoltaics.

Syllabus

Course Objectives:

The main objectives of this course are to:

- Physics of Nanoscience and Technology is concerned with the study, creation, manipulation and applications at nanometer scale.
- To provide the basic knowledge about nanoscience and technology.
- To learn the structures and properties of nanomaterials.
- To acquire the knowledge about synthesis methods and characterization techniques and its applications.

Unit 1

Fundamentals of NANO – Historical Perspective on Nanomaterial and Nanotechnology – Classification of Nanomaterials – Metal and Semiconductor Nanomaterials - 2D, 1D, 0D nanostructured materials – Quantum dots – Quantum wires – Quantum wells - Surface effects of nanomaterials.

Course Outcomes

At the end of the course, trainees/students will be able to:

1. Understand the basic of nanoscience and explore the different types of nanomaterials and should comprehend the surface effects of the nanomaterials.
2. Explore various physical, mechanical, optical, electrical and magnetic properties nanomaterials.
3. Understand the process and mechanism of synthesis and fabrication of nanomaterials.
4. Analyze the various characterization of Nano-products through diffraction, spectroscopic, microscopic and other techniques.
5. Apply the concepts of nanoscience and technology in the field of sensors, robotics, purification of air and water and in the energy devices.

PHYSICS FOR EVERYDAY LIFE	
Learning Objective: To know where all physics principles have been put to use in daily life and appreciate the concepts with a better understanding also to know about Indian scientists who have made significant contributions to Physics	
UNITS	COURSE DETAILS
UNIT-I	MECHANICAL OBJECTS: spring scales – bouncing balls –roller coasters – bicycles –rockets and space travel.
UNIT-II	OPTICAL INSTRUMENTS AND LASER: vision corrective lenses – polaroid glasses – UV protective glass – polaroid camera – colour photography – holography and laser.
UNIT-III	PHYSICS OF HOME APPLIANCES: bulb – fan – hair drier – television – air conditioners – microwave ovens – vacuum cleaners
UNIT-IV	SOLAR ENERGY: Solar constant – General applications of solar energy – Solar water heaters – Solar Photo – voltaic cells – General applications of solar cells.
UNIT-V	INDIAN PHYSICISTS AND THEIR CONTRIBUTIONS: C.V.Raman, Homi Jehangir Bhabha, Vikram Sarabhai, Subrahmanyam Chandrasekhar, Venkatraman Ramakrishnan, Dr. APJ Abdul Kalam and their contribution to science and technology.
TEXT BOOKS	1. The Physics in our Daily Lives, Umme Ammara, Gugucool Publishing, Hyderabad, 2019. 2. For the love of physics, Walter Lawin, Free Press, New York, 2011.

Course outcomes:

At the end of the course, students will be able to:

1. apply physical principles of linear motion of different mechanical objects.
2. Understand the basic physics behind working of optical instruments and laser
3. Know about physics of home appliances
4. Gather knowledge regarding solar energy
5. Know about Indian physicists and their contributions

Course Objectives:

The main objectives of this course are to:

1. To make student to understand the importance of solar energy and its effective utilization.
2. To bring exposure to various tools and equipment used for Solar Photovoltaic installation.
3. To get hands-on training on the installation and maintenance of Solar Photovoltaic Systems.
4. To bring knowledge on the possibility of Employability and Entrepreneurship avenues in the area of solar energy extraction and utilization.

Course Outcomes

At the end of the course, trainees/students will be able to:

- 1 Gain knowledge on renewable energy sources, solar PV systems, potential, and applications.
- 2 Analyze the solar geometry, system parameters, challenges, and opportunities.
- 3 Understand the system sizing, costing, installation, and operation with and without storage systems.
- 4 Development of solar PV systems for domestic, commercial, and industrial applications.
- 5 Performance analysis of a solar PV system for livelihood development.
- 6 Develop an understanding of the perspective on SDGs 7, 8, and 13.

About PRIST

Ponnaiyah Ramejayan Institute of Science and Technology (PRIST), a Deemed University (U/s.3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramejayan Institutions, which are serving for more than 30 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

About School of Arts and Science

School of Arts and Sciences consists of Tamil, English, Mathematics, Physics, Chemistry, Biochemistry, Biotechnology, and Microbiology departments. It offers B. Sc., M.Sc. M.Phil. and Ph.D. programmes in all disciplines. It comprises of well qualified and research oriented faculty members whose are experts in the frontier areas in Sciences. Faculty members have received research projects from various funding agencies such as DST, CSIR, DRDO, and ICMR.

About Physics Department

The Physics Department offers credit based undergraduate programme, Bachelor of Science (B.Sc.) in Physics, postgraduate programme, Master of Science (M.Sc.) in Physics and Ph.D. programmes. The Department also offers credit based core and elective courses in basic Physics to undergraduate first year engineering (B.Tech) students.

The Head, Department of Physics,
PRIST Deemed to be University,
Vallam, Thanjavur-613403.
Tamilnadu, India.

List of topics covered in the programme

Unit 1

TELESCOPES: Optical telescopes – magnifying power, brightness, resolving power and f/λ ratio – types of reflecting and refracting telescopes – detectors and image processing – radio telescopes – Hubble space telescope.

Unit 2

SOLAR SYSTEM: Bode's law of planetary distances – meteors, meteorites, comets, asteroids – Kuiper belt – Oort cloud – detection of gravitational waves – recent advances in astrophysics.

Unit 3

ECLIPSES: types of eclipses – solar eclipse – total and partial solar eclipse – lunar eclipse – total and partial lunar eclipse – transits.

THE SUN: physical and orbital data – solar atmosphere – photosphere – chromosphere – solar corona – prominences – sunspots – 11 year solar cycle – solar flares.

Unit 4

STELLAR EVOLUTION: H-R diagram – birth and death of low mass, intermediate mass and massive stars – Chandrasekar limit – white dwarfs – neutron stars – pulsars – black holes – supernovae.

GALAXIES: classification of galaxies – galaxy clusters – interactions of galaxies, dark matter and super clusters – evolving universe.

Unit 5

ACTIVITIES IN ASTROPHYSICS:

- (i) Basic construction of telescope
- (ii) Develop models to demonstrate eclipses/planetary motion
- (iii) Night sky observation
- (iv) Conduct case study pertaining to any topic in this paper
- (v) Visit to any one of the National Observatories

Any three activities to be done compulsorily.

Total : 45 hours

Syllabus

Learning Objective:

This course intends to introduce principles of astrophysics describing the science of formation and evolution of stars and interpretation of various heavenly phenomena and provides an understanding of the physical nature of celestial bodies along with the instrumentation and techniques used in astronomical research

UNITS	COURSE DETAILS
UNIT-I	TELESCOPES: Optical telescopes – magnifying power, brightness, resolving power and f/λ ratio – types of reflecting and refracting telescopes – detectors and image processing – radio telescopes – Hubble space telescope.

List of topics covered in the programme

UNIT – I: MICROPROCESSOR 8085

8085 Microprocessor – Bus Architecture – registers – Central processing unit – timing and control unit – Instruction and Data flow – System timings – Examples – Instruction set – Data transfer group – Logical group – Branch group – Stack and I/O control instructions – Addressing modes.

UNIT – II: ASSEMBLY LANGUAGE PROGRAMS (8085 ONLY)

Addition – Subtraction – Multiplication – Division – BCD arithmetic – Searching an array for a given number – Choosing the biggest and smallest numbers from a list – Ascending and Descending order – Square root of a number – Time Delay – Square wave generator.

UNIT – III: MICROPROCESSOR 8086

Organization of the 8086 Microprocessor – Memory organization – Register structure – Addressing modes in 8086 – Minimum mode and maximum mode – Exception handling in 4086 – Assembler and Multiprocessing – Assembler – Directives and operators – Data definition and storage allocation – Assigning names and expressions – Segment definition – Program definition – Alignment directives.

UNIT – IV: INTERFACING MEMORY AND I/O DEVICES

Interfacing memory and devices – I/O and memory mapped I/O – Types of interfacing devices – Data transfer schemes – Programmed and DMA data transfer schemes – Programmable Peripheral Interface (8255 A) – 8253 Timer Interface – DMA controller – Programmable Interrupt Controller (8259) – Programmable communication interface (8251).

UNIT – V: MICROCONTROLLER 8051

Introduction of Microprocessor and Micro controllers – Comparison of microprocessor and microcontrollers – 8051 architecture – Internal memory – Input output pins, ports external memory – Addressing modes.

Instruction set of 8051 – Data transfer instruction – Arithmetic instruction – Branch instruction – Bit manipulation instruction.

Course Objectives:

The main objectives of this course are to:

1. To learn basic principles of architecture and functioning of microprocessor and microcontroller and programming and interfacing aspects of them.
2. To provide fundamental operating concepts of microprocessors and microcontrollers.

UNIT - I: MICROPROCESSOR 8085

8085 Microprocessor – Bus Architecture – registers – Central processing unit – timing and control unit – Instruction and Data flow – System timings – Examples – Instruction set – Data transfer group – Logical group – Branch group – Stack and I/O control instructions – Addressing modes.

UNIT - II: ASSEMBLY LANGUAGE PROGRAMS (8085 ONLY)

Addition – Subtraction – Multiplication – Division – BCD arithmetic – Searching an array for a given number – Choosing the biggest and smallest numbers from a list – Ascending and Descending order – Square root of a number – Time Delay – Square wave generator.

UNIT - III: MICROPROCESSOR 8086

List of topics covered in the programme

Unit 1

RADIO TRANSMISSION AND RECEPTION: transmitter – modulation types of modulation – amplitude modulation – limitations of amplitude modulation – frequency modulation – comparison of FM and AM – demodulation- essentials in demodulation – receivers: AM radio receivers – types of AM radio receivers – stages of superheterodyne radio receiver, advantages – FM receiver – difference between FM and AM receivers.

Unit 2

FIBER OPTIC COMMUNICATION: introduction – basic principle of fiber optics – advantages – construction of optical fiber – classification based on the refractive index profile – classification based on the number of modes of propagation – losses in optical fibers – attenuation – advantages of fiberoptic communication

Unit 3

RADAR COMMUNICATION: introduction – basic radar system – radar range – antenna scanning – pulsed radar system – search radar – tracking radar – moving target indicator Doppler effect-MTI principle – CW Doppler radar

Unit 4

SATELLITE COMMUNICATION: introduction history of satellites – satellite communication system – satellite orbits – basic components of satellite communication system – commonly used frequency in satellite – communication – multiple access communication – satellite communication in India

Unit 5

MOBILE COMMUNICATION: introduction – concept of cell – basic cellular mobile radio system – cellphone – facsimile – important features of fax machine – application of facsimile – VSAT (very small aperture terminals) modem IPTV (internet protocol television) – Wi-Fi-4G (basic ideas)

About PRIST

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST), a Deemed University (U/s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 30 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

About School of Arts and Science

School of Arts and Sciences consists of Tamil, English, Mathematics, Physics, Chemistry, Biochemistry, Biotechnology, and Microbiology departments. It offers B. Sc., M.Sc. M.Phil. and Ph.D. programmes in all disciplines. It comprises of well qualified and research oriented faculty members whose are experts in the frontier areas in Sciences. Faculty members have received research projects from various funding agencies such as DST, CSIR, DRDO, and ICMR.

About Physics Department

The Physics Department offers credit based undergraduate programme, Bachelor of Science (B.Sc.) in Physics, postgraduate programme, Master of Science (M.Sc.) in Physics and Ph.D. programmes. The Department also offers credit based core and elective courses in basic Physics to undergraduate first year engineering (B.Tech) students.

List of topics covered in the programme

Unit I

Introduction – thermogravimetric analysis (TGA) – instrumentation – determination of weight loss and decomposition products – differential thermal analysis (DTA)– cooling curves – differential scanning calorimetry (DSC) – instrumentation – specific heat capacity measurements – determination of thermomechanical parameters.

Unit II

Optical Microscopy: optical microscopy techniques – Bright field optical microscopy – Dark field optical microscopy – Dispersion staining microscopy - phase contrast microscopy –differential interference contrast microscopy - fluorescence microscopy - oil confocal microscopy - - digital holographic microscopy - oil immersion objectives -quantitative metallography - image analyzer.

Unit III

SEM, EDAX, EPMA, TEM: working principle and Instrumentation – sample preparation –Data collection, processing and analysis- Scanning tunneling microscopy (STEM) - Atomic force microscopy (AFM) - Scanning new field optical microscopy.

Unit IV

Two probe and four probe methods- van der Pauw method – Hall probe and measurement scattering mechanism – C-V characteristics – Schottky barrier capacitance – impurity concentration – electrochemical C-V profiling – limitations. Photoluminescence – light – matter interaction – instrumentation – electroluminescence – instrumentation – Applications.

Unit V

Principles and instrumentation for UV-Vis-IR, FTIR spectroscopy, Raman spectroscopy, ESR, NMR, NQR, XPS, AES and SIMS- proton induced X-ray Emission spectroscopy (PIXE) –Rutherford Back Scattering (RBS) analysis-application - Powder diffraction - Powder diffractometer -interpretation of diffraction patterns - indexing - phase identification - residual stress analysis - Particle size, texture studies ~~DETA~~ fluorescence spectroscopy - uses.

Syllabus

COURSE OBJECTIVES:

- To make the students learn some important thermal analysis techniques namely TGA, DTA, DSC and TMA.
- To make the students understand the theory of image formation in an optical microscope and to introduce other specialized microscopic techniques.
- To make the students learn and understand the principle of working of electron microscopes and scanning probe microscopes.
- To make the students understand some important electrical and optical characterization techniques for semiconducting materials.
- To introduce the students, the basics of x-ray diffraction techniques and some important spectroscopic techniques.

Course Outcomes

At the end of the course, trainees/students will be able to:

1. Describe the TGA, DTA, DSC and TMA thermal analysis techniques and make interpretation of the results.
2. The concept of image formation in Optical microscope, developments in other specialized microscopes and their applications.
3. The working principle and operation of SEM, TEM, STM and AFM.
4. Understood Hall measurement, four –probe resistivity measurement, C-V, I-V, Electrochemical, Photoluminescence and electroluminescence experimental techniques with necessary theory.
5. The theory and experimental procedure for x- ray diffraction and some important spectroscopic techniques and their applications.

INTRODUCTION

It is an easy-to-use, yet powerful, open-source embedded system development platform that has gained huge amount of popularity in past few years. Specially among hobbyists. The standard hardware consists of an 8 bit Atmel AVR processor with on-board headers providing access to its IO pins.

ARDUINO PLATFORM

Arduino platform comprises a microcontroller. It can be connected to a PC through a USB cable. It is freely accessible and can be easily downloaded. It can also be modified by a programmer. Different versions of Arduino boards are available in the market depending on the user requirement.

ARDUINO DEVICE

Choose the right version for your operating system. Download the file and double-click on it to open it. On Windows or Linux, this creates a folder named Arduino [version]. Drag the folder to wherever you want it your desktop, your Program Files folder (on Windows), etc. On the MAC, double-clicking it will open a desktop page.

INTRODUCTION

INTERNET OF THINGS (IOT) is a system of interrelated computing devices, machines or objects with unique identifiers and the ability to communicate the data over a network or Internet without requiring human intervention. Internet of Things offers many applications today that help in making life easier. Making IoT product is the act of connecting any physical object to the internet or local network to collect and share data and performing some physical act according to available data.

OVERVIEW OF NODE MCU

OVERVIEW OF NODEMCUMCU is open source platform, it's hardware design is open for edit/modify/build. NodeMCU Dev Kit/board consist of ESP8266 wifi enabled chip The ESP8266 is a low-cost Wi-Fi chip developed by Espressif Systems with TCP/IP protocol. [12]More details can be found on ESP8266 Documentation.

NODUMCU DEVELOPMENT PLATFORM

The ESP8266 NodeMCU can be programmed using a variety of development platforms. A few such platforms are listed below. Espuino Espuino is an open-source JavaScript interpreter for microcontrollers. JavaScript SDK and firmware closely emulating Node.js. Espuino can be loaded into the esp8266 using any of the flashing techniques applicable to the esp8266 itself. A variety of tools are available to assist with this [15]

OBJECTIVES

COURSE OBJECTIVES

Real time / embedded systems are designed to provide a timely response to real world events. Events occurring in the real world can have deadlines before which the real time / embedded system must respond and the RTOS scheduling policy must ensure these deadlines are met.

1. Students have knowledge about the basic functions, structure, concepts and applications of embedded systems.
2. Develop familiarity with 8051 Microcontrollers and their applications in an embedded environment.
3. To learn the method of designing and program an Embedded Systems for real time applications.
4. To understand operating system concepts, types and choosing RTOS.
5. Students have knowledge about the development of embedded software using RTOS and implement small programs to solve well-defined problems on an embedded platform.
6. Develop familiarity with tools used to develop in an embedded environment.

achieved is perhaps still open to debate, but what is clear is that the device has gained a significant following in the hobbyist and DIY world.

There is a strong, active community and support from the Raspberry Pi foundation focused on their Raspian Linux distribution, which is a Debian derivative with support and optimisation for the Raspberry Pi hardware.

Module 4 – EMBEDDED SYSTEM DESIGN USING

An embedded real-time operating system is the software kernel of high performance smart phone. This paper presents an embedded real-time operating system named SPOS (smart phone operating system) whose purpose is to hold key technique of smart phone and enhance the Competence of production. Cluing in particularities of smart phone operating system, the paper interprets detailed the designing ideas of system architecture, multitasking kernel, wireless application interface and application framework of SPOS.

Module 5 – applications of embedded systems

Embedded systems are commonly found in consumer, industrial, automotive, home appliances, medical, telecommunication, commercial, aerospace and military applications. ...

Consumer electronics include MP3 players, television sets, mobile phones, video game consoles, digital cameras, GPS receivers, and printers.

Key concepts include:

Sophisticated Functionality. ...

Real-Time Operation. ...

Low Manufacturing Cost. ...

Processor and Memory. ...

Tight Design Constraint. ...

Based on Performance and Functional Requirements. ...

Based on the Performance of the Microcontroller.

ELIGIBILITY

Introduction to SciLab

ABOUT THE INSTITUTION

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST), a Deemed University (U s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 25 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

ABOUT THE DEPARTMENT

The department of Electronics and Communication Engineering came into existence in 2008 with an objective to impart quality education to meet today's competitive environment.

School of Engineering,
Ponnaiyah Ramajayam Institute of
Science and Technology (PRIST)
Deemed to be University
Vallam, Thanjavur - 613 403.

Department has well experienced and dedicated faculty with strong commitment to provide vibrant learning environment to the students in order to help them excel.

To keep pace with the current technological trends, the department has a well designed, constantly reviewed syllabus to incorporate all advancements in existing and emerging technologies which gives the students a holistic and pragmatic view of the present scenario of industry.

The Department has state-of-the-art laboratories, such as VLSI lab, Digital Image Processing Lab, Circuit Simulation Lab, Communication Lab, and higher end software like MATLAB, PSPICE, Xilinx, IAR, J-Sim & N-Sim.

The Department runs an undergraduate course in B. Tech - Electronics and Communication Engineering and three postgraduate programmes like M.Tech in Communication Systems, Applied Electronics and Embedded systems.

ABOUT THE COURSE

Scilab is an open source, cross-platform numerical computational package and a high-level, numerically oriented programming language. As the syntax of Scilab is similar to MATLAB(R), Scilab includes a source code translator for assisting the conversion of code from MATLAB(R) to Scilab. Scilab is available free of cost under an open source license and is one of several open source alternatives to MATLAB(R). Scilab has been widely exploited for different applications in signal processing, statistical analysis, image processing, fluid dynamics simulations, numerical optimization, and modeling, simulation of explicit and implicit dynamical systems and (if the corresponding toolbox is installed) symbolic manipulations.

COURSE OBJECTIVES

1. Numerical Analysis: Data visualization Algorithm development Application development.
2. Model Customization & Modelica blocks creation Model building & edition Simulation Standard Palettes & Blocks.
3. It can be used for signal processing, statistical analysis, image enhancement, fluid dynamics simulations, numerical optimization, and modeling simulation of explicit and implicit dynamical systems and (if the corresponding toolbox is installed) symbolic manipulations.

PRE-REQUISITES

Scilab is free and open source software for numerical computation.

powerful computing environment for engineering and scientific applications. Scilab is released as open source under the GPL License, and is available for download free of charge.

COURSE CONTENT

Module-1-A Learning fundamentals of Sci lab

Scilab is an interpreted language, which implies that there is no need to declare a variable before using it. Variables are created at the moment where they are first set. In the following example, we create and set the real variable x to 1 and perform a multiplication on this variable..

Module-2-SIGNAL PROCESSING WITH SCILAB

Signal processing involves converting or transforming data in a way that allows us to see things in it that are not possible via direct observation. Signal processing allows engineers and scientists to analyze, optimize, and correct signals, including scientific data, audio streams, images, and video. Further features:

Data windowing.
Power spectral density estimation.
Digital FIR and IIR filter design.
Analog filter design.

Signal transforms including fftw

Module-3-IMAGE PROCESSING USING SCILAB

SIP is a toolbox for processing images in Scilab. SIP is meant to be a free, complete, and useful image toolbox for Scilab. Its goals include tasks such as filtering, blurring, edge detection, thresholding, histogram manipulation, segmentation, mathematical morphology, and color image processing.

Module-4-PRACTICAL EXAMPLES ON IMAGE & SIGNAL PROCESSING WITH SCILAB

Use of Sip is a toolbox for processing images in Scilab. SIP is meant to be a free, complete, and useful image toolbox for Scilab. Its primary goals include tasks such as filtering, blurring, edge detection, manipulation, segmentation, and color image processing.

mathematical morphology, and color image processing. There are several ways of using Scilab and the following paragraphs present three methods: • using the console in the interactive mode, • using the exec function against a file, • using batch processing. We also present the management of the graphical windows with the docking system.

Module-5-INTERFACING MATLAB® AND SCILAB

Scilab is one of the two major open-source alternatives to MATLAB, the other one being GNU Octave. Scilab puts less emphasis on syntactic compatibility with MATLAB than Octave does, but it is similar enough that some authors suggest that it is easy to transfer skills between the two systems.

SOFTWARE TOOL USED:

Scilab, Xcos, Model Customization & Modelica blocks creation, Model building & edition, Simulation Standard Palettes & Blocks, Atoms.

ELIGIBILITY

ECE students shall be eligible for the admission to the course.

COURSE DURATION: 45 Hours

Wednesday: 4.00-5.30 P.M
Friday: 4.00-5.30 P.M

LEARNING OUTCOMES:

Scilab environment and programming language.
Use decision making control statements like if, if else and loops (for while) to develop programs.
Use data structure like vector, matrix, cell arrays available in Scilab to work with data.

ABOUT THE COURSE

In the highly competitive electronics industry, the knowledge and skills of students directly responsible for schematic capture and design documentation can have a direct impact on successful design implementation and time to market.

PCB (Printed Circuit Board) designing is an integral part of each Electronics products and should known to each electronics engineering students and who are working in electronics industry

PCB Design training course helps all the engineering students to design and develop an electronics prototype accurately. A high-quality PCB eliminates the risk of loose solder joints

This program is designed to make students and professionals capable of designing PCB up to Industrial grade. After the completion of Training, Students will be able to design and print their own PCB (Printed Circuit Board).

COURSE OBJECTIVES

OBJECTIVES

- Understanding of Electronics Project Design Flow
- Knowledge of Schematic Design techniques
- Knowledge of PCB Design techniques
- Personal Experience of working with PCB

COURSE CONTENT – PCB FUNDAMENTALS SCHEMATIC CAPTURE

Module 1 – Introduction to PCB Design

Program overview outlining class schedule and options for accessing class material and assignments. An overview of the fundamentals of PCB Design and review of passive components. Lecture 1 will focus on passive components and basic electrical engineering equations.

Module 2 – Component Library Concepts

Creation of library components, including schematic symbol and PCB footprint generation, component parameters, and simulation models.

Module 3 – Basic Schematic Concepts

Proper structure and layout of a good schematic.
Key concepts include:

- Page sequencing
- Symbol placement
- Net naming
- Power / ground symbols
- IPC standards

- Busses / wire harnesses

Module 5 – Schematic Documentation

Proper documentation of schematics and review application of IP.C-26xx standards

Key concepts include:

- Use of standard title blocks
- Standard page sequencing
- Readability
- Standard notes
- ECO and revision history
- Annotation methodology
- Design rules
- Parts lists

INTRODUCTION

Innovation and entrepreneurship are two different concepts having entirely different meanings. However, there is a strong relationship between innovation and entrepreneurship which sometimes causes confusion.

The main difference between innovation and entrepreneurship is that innovation involves introducing something new. This could be a new business model, product, idea, or service. On the other hand, entrepreneurship involves turning a great idea into a business opportunity.

IMPORTANCE OF ENTREPRENEURSHIP AND INNOVATION

Developing a novel method of producing a good or a solution demonstrates the significance of innovation in entrepreneurship. To meet the constantly shifting needs of its customers, a service sector might grow by offering a different kind of service. The use of byproducts and raw materials allows producers to create new goods.

OBJECTIVES OF PROGRAM

The objectives of entrepreneurship development programmes are to increase the knowledge and skill of existing entrepreneurs and encourage others to become one.

DURATION OF PROGRAM

45 Hours self-instruction course

PROGRAM OUTCOME

- will have generated some entrepreneurial ideas
- understood the difference between low and high potential ideas

- prepare an inventory of resources at hand
- identify market and customer segments

About the University

Pranava Education Institute of Science and Technology (PEIST) is a deemed university in Thanjavur. It is offering various undergraduate and postgraduate courses in Engineering, Science, Education, Management, Arts and Law, as well as research programmes.

Facilities Available

The University is blessed with state-of-art equipment facilities. Laboratories and infrastructure to help research has been provided. Most of a research have been started in maintaining the research program. Computer Library with internet facilities for research. Hostel facilities, Health centre, Sports complex, etc.

Department of Life Science

Life science course is very broad where one get to touch and know about all the recent areas of **Life-Sciences**.

The Microbiology **Biotechnology** Department is focusing on areas such as: use of genetic technology, cell biology, molecular biology. In the course one provide such basic hand on laboratory practices.

INTRODUCTION

► History of development of Industrial Microbiology. Industrial fermentation processes. Major classes of products and processes. Importance of Industrially important microbial strains. Design of a fermenter: types of fermenters and basic functions. Fermentation media. Fermentation strategies, measurement methods of providing energy, carbon, nitrogen, vitamins and mineral sources, role of buffers, precursors, inhibitors, antibiotics and antibiotics: types of fermentation.

► Microbial products of pharmaceutical value - (i) secondary, (ii) primary and tertiary products involved in the production of penicillin, Vitamin B12 and other various. Microbial products of industrial value - (i) secondary, (ii) primary and tertiary products involved in the production of ethanol, vinegar, acetic acid, protein, glutamic acid. Recovery and safe disposal of industrial wastes through anaerobic. The recovery and purification of large scale animal and plant cell cultivation and bioremediation. Fermentation processing - similar fermentations.

► Basic principles of bioprocess, media formulation, fermentation equipment and its use (type of fermenter (batch and continuous fermenter) and its application. Test: UNIT: BCT10501B20 and more self-study.

Objective of the Programme

- This course is planned to give adequate knowledge on fermentation technology to train the students for self-employment.
- It shall be optional for the students of either B.E. II or B.Sc. III of the full-time technical courses to join the one- year Diploma certificate course.

► Theory and Development

► Design of a fermenter

► Microbial products of pharmaceutical

► Secondary products

► Purification of fermenter products

► Microbial Growth and Propagation

► Product recovery

► Downstream processing

► Concepts of basic units of fermentation processes

► Applications of Microbes in food processing and production

Level of knowledge Expected

Working knowledge with excellent technological value

Duration of the program

90 hrs. add on certificate course

Course Program Outcome

Students enrolled for the Diploma course in Fermentation product will following the opportunities students will demonstrate knowledge of scientific principles related to agriculture

- Students will demonstrate knowledge of bioprocess Production including structure production practices and management principles.
- Students will demonstrate effective application of operation and downstream processing.
- Students will demonstrate harvesting and packaging of fermented product mass cultivation.

Eligibility criteria

Any graduate shall be eligible for the admission to the course. Entry is open to 15 Years or less (even first year) additional admission to the course is permissible at the schools.

Course Structure and Duration

Course is 12 month duration and will be of 90 hrs. integrated learning programme covering theoretical and practical aspects of fermentation technology.

Certification

The candidates successfully qualifying the course the course shall be awarded a certificate to that effect in the appropriate form by School of Arts and Science, Department of Biotechnology, PRIST University, Thanjavur, Vallam.

FERMENTATION TECHNOLOGY

Subject code: 18517FMT

Course outcome

Students enrolled for the certificate course in Fermentation Technology will follow the opportunities. Students will demonstrate knowledge of scientific principles related to agriculture.

- Appreciate the importance of embarking on self-employment and has developed the confidence and personal skills for the same

- Identify business opportunities in chosen sector/sub-sector and plan and market and sell products/services

UNIT I: Major types of organisms used in fermentation. Microbial growth kinetics, Batch culture, Continuous Culture, Fed – Batch – Types, applications, fermentation kinetics.

UNIT II: Isolation, preservation and improvement of industrially important microorganisms, media for industrial fermentations – media formulation, Development of inoculum for industrial fermentations.

UNIT III: Fermentor design and types-basic functions of a Fermentor for microbial and animal cell culture – alternative vessel design, common measurements and control systems. Sensors – solutions to common problems in fermentation, anaerobic fermentation.

UNIT IV: Control of fermentation – requirements for control, design of a fermentation control systems, sensors and controllers, control of incubation, # aeration and agitation.

UNIT V: Computers in fermentation, modeling, software sensors, control and supervision of fermentation processes.

ABOUT THE UNIVERSITY

PRIST Deemed to be University (Formerly Ramakrishna Mission of Science and Technology) made a firm step for Academic Expansion with the establishment of the Basic Institute of Computer Science and Technology in 1987. Over time various institutes of higher learning such as Arts and Science College, College of Engineering and Technology, College of Education, Research Institute, Postgraduate College are added facilities to the PRIST system. Under PRIST, currently 4 master studies have spread across a wide area of computer such as Post-graduate, Doctoral, Certificate, Diploma and Masters. The Academic research extends right from school education up to the level of the Ph.D. Doctoral programmes in a wide area of disciplines such as Medical, Engineering, Arts & Science education, Pharmacy, Management and Technology etc.

TEACHERS AVAILABLE

The University is housed in an independent multi-story building with state of art equipment oriented Laboratories and infrastructure to help integrate the entire. Ministry of science have been working to maintain the research programs. Computer Library with internet facilities for students. Hostel facilities. Health centre. Sports complex etc.

DEPARTMENT OF THE SCIENCE

The Science section is very broad class and get to teach and learn about all the major areas of life. Biology of science.

The Microbiology, Biotechnology Department is focusing on some major areas like genetic, Biochemistry and biotech industries. For the course you provide such a broad based on integrated programme.

ABOUT FACULTY OF THE SCIENCE BIOTECHNOLOGY

The Department of Life Science was established in the year 2016 with Biotechnology, Biochemistry and Microbiology Department focusing on research and education offering courses like Undergraduate Programme (UG) and PGDI programme offered in the department. There are 15 faculty members (Professor, Assistant and Associate Professors) and four faculty Post Doctoral Research associates. Key areas: Molecular Biology, Biotech and Health Care. The three areas of research of the department: Molecular Biotechnology, Microbiology, Molecular Engineering, Biotechnology, Biotechnology, Agricultural Biotechnology. The department has published papers research papers in leading journals, publications such as Nature, Science, etc.

COURSE OBJECTIVE

To learn the basic of technology of Biotech and aquaculture to understand the principles of all important purpose and applications. To learn the theories and aquaculture systems and a leading strong and leading technologies in terms how purpose and principles of application to areas of the Biotech and aquaculture design and construction programs taking into account the legislation and laws.

ELIGIBILITY CRITERIA

It shall be open for the students of either B.Sc. I or B.Sc. II of the full time or take courses to any the left months certificate courses.

COURSE CONTENT (Module 1)

World aquaculture

COURSE CONTENT (Module 2)

Marine fishes resources in India

COURSE CONTENT (Module 3)

Fish culture systems selection for culture

COURSE CONTENT (Module 4)

Fish preservation processing and marketing

COURSE CONTENT (Module 5)

Selection of land, land pollution, land reclamation

EXAMINATION

There shall be an annual university examination at the end of a academic year.

ELIGIBILITY CRITERIA FOR APPEARING IN THE FINAL EXAMINATION

Minimum Attendance - 75%

Minimum Internal Assessment marks - 40%

* If a student fails through the above criteria

** students must obtain at least 75% marks in theory and practical respectively at internal assessment to be eligible for the annual university examination.

* Internal assessment (Theory) shall be done as follows:

a) Mid-term and term examinations - 10 marks

b) Assignments/Projects/Case study/ Special

Practicals - 15 marks

c) Attendance - 10 marks

Total - 25 marks.

Criteria for a pass in the subject

Minimum marks in Theory - 40

Scheme of Examination

Duration of written examination - 1 hour

Minimum marks - 100

Course Program Outcome

1. To learn the basic of technology of Biotech and aquaculture to understand the principles of all important purpose and applications.
2. To learn the theories of development of aquaculture and its various conditions, Environment and design patterns of creating an system with the environmental changes of water-borne pollution.
3. To learn the Biotech and aquaculture systems used in leading strong and leading technologies in terms how purpose and principles of application to areas of the Biotech and aquaculture design and construction programs taking into account the legislation and laws.
4. Develop the Biotech and aquaculture systems management theories, methods, and strategies for environmental friendly, environment friendly, Biotech and aquaculture production, marketing and marketing programs.
5. Apply traditional research methods, scientific literature, advanced technologies and statistical methods of collection in practice and management the research and conduct the results of analysis by preparation of the final thesis and presentation.
6. Apply methods and techniques used in Biotech and aquaculture design and construction, their management methods and quality assurance principles.
7. Write the technology challenges faced in management of Biotech and aquaculture from regional activities to global level, sustainability and development.

Course Structure and Duration

Course is 6 months duration and will be of 47 hrs required learning programme covering theoretical and practical aspects of biotechnology/aquaculture.

Certification

The candidate successfully completing the course the certificate shall be awarded a certificate in that effect in the appropriate form by School of Arts and Science, Department of Biotechnology, PRIST University, Thanjavur, Tamil Nadu.

AQUACULTURE TECHNOLOGY

Subject code: 17517AQT

Course Outcomes:

By the completion of the course the graduate should able to

1. Describe the concept of blue revolution and different aqua culture systems
2. Explain the pond ecosystem
3. Describe the different types of fish ponds.
4. Explain the steps of pond preparation
5. Describe the pond management practices

Unit:1

Introduction, Plan and implement environmentally sustainable aquacultural practices, Pond preparation.

Unit:2

Plan and Implementation Aquaculture Biosecurity Plan, Feeding, Culture activity, Nutrient Cycles in Culture Ponds – Phosphorus, Carbon and Nitrogen, Importance of Plankton and Benthos in culture ponds, nutrient dynamics and algal blooms

Unit:3

Develop a stock nutrition program, Plan stock health management, Monitoring, Functional classification of ponds -rearing, production, stocking and quarantine ponds

Unit:4

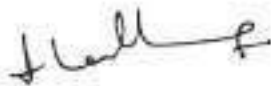

Manage an aquaculture research trial, Plan an design water supply and disposal systems, Plan and design stock culture or holding systems and structures.

Unit:5

Develop stock production plan, Design are circulating aquaculture system, Develop export markets for produce, Collect and manage data, Develop work place policy and procedures for sustainability.

MOLECULAR DOCKING

Subject code: 20517MD0

COURSE OBJECTIVE

- To learn various software and tools for computer-aided drug designing.
- To make students understand the essential features of the interdisciplinary field of science

UNIT I: Drug Discovery

Historic development of drug discovery, Modern drug discovery, Molecular modelling-drug targets discovery-target identification, Hits and lead identification, lead optimization, principles of drug ability, Role of Bioinformatics in drug design

UNIT II: Molecular Mechanics

Basic Chemistry Review & Drug Discovery - Bio-molecular Structure & their Molecular Interactions and Recognition – Introduction to Methods in 3-D Structure Determination and Molecular modeling - Molecular Conformation & Primary Sampling Methods for Computer Simulations

UNIT III: Drug – Receptor interaction

Molecular basis of drug action; Drug Receptor Interaction: Basic ligand concept, agonist, antagonist, partial agonist, inverse agonist, Drug receptor concepts. Enzyme Inhibition – enzyme Inhibitors - reversible, irreversible; enzyme Inhibitors as drugs.

UNIT IV: Drug design

Prediction of binding site and virtual screening, Drug design -Structure-based drug design, Ligand based drug design, De novo ligand design, Molecular docking-search algorithm, scoring functions, ADMET properties.

UNIT V: Molecular Docking

Methods and Tools in Computer-aided molecular design, Molecular Docking- searching Methods – Scoring function-Protein ligand interaction- Docking using AUTODOCK- Pitfalls in docking

COURSE OUTCOME

- Apply basic bioinformatics tools for various needs in biotechnology
- Identify the drug targets and understand the mode of action
- To know software and tools for computer-aided drug designing

COURSE OUTCOME

- The students learnt to maintain cultures of plant and animal cell with good viability.
- Gained knowledge about preparation, storage of cultures and developed their ideas to carry the research work.

UNIT-1: Biology of cultured cells techniques and safety protocols

Introduction of cell culture technology-philosophy and complexity in cell culture-to grow the cell outside the body-cell cycle concept-dividing cells. Biology of cell culture-layouts & designs of cell culture facility-Precautions during designing the lab layout.

UNIT-2: Culture vessels & media development

State of art facility in cell culture lab-specialized facility in cell culture lab-interaction of cell and polycarbonate surface. Poly D lysine deposition-surface chemical analysis- cell growth process-cell surface interface-cell culture substrate patterning.

UNIT-3: Primary culture, secondary culture, cloning & selection

Introduction to define system-mechanical dissociation of hippocampal tissue-rules for mechanical dissociation of tissue-drug molecule testing-adult hippocampal neuron dissociation

UNIT-4: Cell separation and culture mode

Cell separation, characterization, differentiation & transformation of cells. In vitro myelination cell culture mode. Contamination, cryo-preservation & cyto-toxicity.

UNIT-5: Organo-typic culture & specialized techniques

Fluorescent assisted cell sorting-condition for regenerated cells-introduction of skeletal muscle cell culture and cardiac muscle cell culture. Organo-typic culture & specialized techniques, Advance cell culture technique.

About the University

Ponnyiah Ramayyazh Institute of Science and Technology (PRIST) is a deemed University in Vallam, India. The institute offers undergraduate and postgraduate courses in Engineering, Science, Education, Management, Arts, and Law, as well as research programmes. Facilities Available

The University is housed in an independent, multi-store building with state of art equipment, excellent Laboratories and infrastructure to help complete this course. Majority of scientists have been acting as monitoring the research program. Computer Library with internet facilities for students, Hostel facilities, Health centre, Sports complex, etc.

Department of Biotechnology

contact: coordinator@prist.ac.in where you get to touch and know about all the major areas of life biological sciences.

The Biotechnology is focusing on some major areas like genetics, biochemistry, cell biology, molecular biology. So this course can provide much former hand on Biotechnical production.

COURSE OBJECTIVE

Each graduate will demonstrate knowledge of industrial process, valve maintenance and instrumentation, including calibration, configuration, troubleshooting, and use of valves with instrumentation.

Each graduate will demonstrate knowledge of basic fundamentals, terms, and units of DC and AC electrical theory. Graduate will have the ability to use test equipment, hand tools and techniques of soldering.

COURSE CONTENT (Module 1)

Introduction to environmental studies

COURSE CONTENT (Module 2)

Ecosystems, ecosystem, Structure And function of ecosystem.

COURSE CONTENT (Module 3)

Natural Resources: Renewable and Non-renewable Resources

COURSE CONTENT (Module 4)

Biodiversity and Conservation levels of biological diversity.

COURSE CONTENT (Module 5)

Environmental Pollution - Environmental pollution

EXAMINATION

There shall be an university examination at the end of academic year.

Eligibility criteria for appearing in the in the final examination.

Minimum Attendance - 80%

Minimum Internal Assessment marks - 40%

• It will be done through the whole year

• Candidate must obtain at least 35% marks in theory

Internal assessment to be eligible for the university examination.

Internal assessment (Theory) will be done as follows :

a) Mid-term and term examinations = 10 marks

b) Assignments/Projects/Class test/Clinical Presentations = 05 marks

c) Attendance = 05 marks

Total = 20 marks

Criteria for a pass in the subject

Minimum marks in theory - 45

Scheme of Examination:-

Duration of written examination - 3 hrs.

Maximum marks - 100

Level of knowledge Expected

Working knowledge with excellent technological value

Duration of the program

90 hrs add on Diploma course

Course Program Outcome

1. Discover knowledge genetic ecological interactive and value of environment, Understand the significance of various natural resources and its management. Demonstrate a comprehensive understanding of the world's biodiversity and the importance of its conservation.

2. Categorize different types of pollutions and their control measures. Discover effective methods of waste.

Eligibility criteria

Any graduate shall be eligible for the admission to the course. Intake Capacity 15 Seats on first cum first basis. (Additional admission to the course is prerogative of the school).
 Course Structure and Duration

Course is 6 months duration and will be of 90 hrs imparted training programme covering theoretical and practical aspects of biomedical instrumentation.

Certification

The candidates successfully qualifying the course shall be awarded a certificate to that effect in the appropriate form by School of Arts and Science, Department of Biotechnology, PRIST University, Thanjavur, Vallam.

ENVIRONMENTAL STUDIES

Subject code: 20517EVS

Course outcome

1. Discover knowledge in ecological perspective and value of environment,
2. Understand the significance of various natural resources and its management. Demonstrate comprehensive understanding of the world's biodiversity and the importance of its conservation.
3. Categorize different types of pollutions and their control measures. Discover effective methods of waste Management.
4. Analyze global environmental problems and come out with best possible solutions. Understand environmental laws and sustainable development.
5. Demonstrate an integrative approach to environmental issues with a focus on sustainability; Use critical thinking, problem-solving, and the methodological approaches of the social sciences, natural sciences, and humanities in environmental problem solving.
6. Communicate complex environmental information to both technical and non-technical audiences; Understand and evaluate the global scale of environmental problems; and Reflect critically on their roles, responsibilities, and identities as citizens, consumers and environmental actors in a complex, interconnected world.

UNIT-I

Introduction to environmental studies Multidisciplinary nature of environmental studies Scope and importance; Concept of sustainable development.

UNIT-II

Ecosystems: What is an ecosystem? Structure And function of ecosystem; Energy Flow in an ecosystem; Food chains, food webs and ecological succession. Case studies of the following ecosystems: a) Forest ecosystem b) Grassland ecosystem c) Desert ecosystem d) Aquatic ecosystems (ponds, streams, lakes, rivers, oceans, estuaries).

UNIT-III

Natural Resources: Renewable and Non-renewable Resources and resources and land use change; Land degradation, soil erosion and desertification. Deforestation: Causes and impacts due to mining, dam building on environment.

forests and biodiversity. Water: Use and overexploitation of surface and ground water. Energy resources: Renewable and non-renewable energy sources, Use of alternate energy sources.

UNIT-IV

Biodiversity and Conservation levels of biological diversity :genetic, species and ecosystem diversity; Biogeography zones of India; Biodiversity patterns and global biodiversity hotspots. Endangered and endemic species of India. Threats to biodiversity: habitat loss, poaching of wildlife, man-wildlife conflicts, biological invasions; Conservation of biodiversity. Ecosystem and biodiversity services: Ecological, economic, social, ethical, aesthetic and Informational value.

UNIT-V

Environmental Pollution - Environmental pollution: types, causes, effects and controls; Air, water, soil and noise pollution etc. Nuclear hazards and human health risks, Solid waste management Control Measures of urban and industrial waste, Pollution case studies.

UNIT-VI

Environmental Policies & Practices • Climate change, global warming, ozone layer depletion, acid rain and impacts on human communities and agriculture • Environment Laws : Environment Protection Act; Air (Prevention & Control of Pollution) Act; Water (Prevention and control of Pollution).

TOOLS IN BIOSTATISTICS

Subject Code: 19517TIB

COURSE OUTCOME

- ✓ Develop the ability to apply the methods while working on a research project work
- ✓ Describe the appropriate statistical methods required for a particular research design
- ✓ Choose the appropriate research design and develop appropriate research hypothesis for a research project

UNIT 1: Elementary concepts in Statistics; Concepts of statistical population and sample from a population; qualitative and quantitative data; nominal, ordinal, ratio, interval data; cross sectional and time series data; discrete and continuous data. Collection and scrutiny of data: Primary data; designing a questionnaire and a schedule

UNIT 2:

Using R Software's: Difference of mean & proportion, Chi-Square test for independence of attributes and Contingency table, t-test, Paired t-test, Test for correlation in sampling from normal population, F-test, testing of two variance of two univariate normal population.

UNIT 3:

Statistical techniques: Correlation: Pearson product moment correlation, Spearman rank correlation, Partial correlation, Simple linear regression, Two way ANOVA, Multivariate ANOVA, Analysis of Covariance, Repeated measures.

UNIT 4:

Introduction to Regression : **Multiple Regression:** Multiple linear regression and correlation
- Model building and selection - Interpreting regression coefficients and confidence intervals
- Quantifying and dealing with multicollinearity - Power Analysis for linear regression;

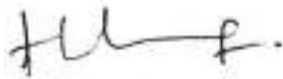

UNIT 5:

Decision Trees: Introduction to SPSS Decision Trees - Application of SPSS Decision Trees - Overview of decision tree based methods (CRT Decision Trees CRT Regression Trees Quest Analysis)

- To learn fundamental data analysis using in R
- To study various analytics on stream data.

Course Outcomes:

MODULE -1

History and overview of R ,Install and configuration of R programming environment ,Basic language elements and data structures ,R+Knitr+Markdown+GitHub ,Data input/output

MODULE -2

Data storage formats ,Subsetting objects ,Vectorization,Control structures

MODULE -3

Functions ,Scoping Rules ,Loop functions ,Graphics and visualization ,Grammar of data manipulation (dplyr and related tools),Debugging/profiling , Statistical simulation

MODULE -4

Installation,Launching Explorer,Loading Data,File Formats

MODULE -5

Preprocessing the Data,Classifiers,Clustering,Association,Feature Selection

Course Outcomes:

- Convert real world problems to hypothesis and perform statistical analysis.
- Perform data analysis using in R.
- Design efficient modeling of huge data and work in big data platforms.

Course: WEB APPLICATION DEVELOPMENT AND HOSTING
Subject Code: 20DPWP123

Aim:

- To learn the basics of web application and development of hosting.
-

Course objective:

- To know the fundamental concepts of web designing
- To learn fundamental web application using in hosting
- To study various analytics on stream data.

MODULE -1

Basics of Web Designing
Multimedia and its Applications
Web Technologies
Introduction to Web Design & Applications
Computer Graphics

MODULE -2

Mathematical Structure for Computer Science
HTML
CSS
JavaScript
Bootstrap

MODULE -3

Adobe Dreamweaver
Adobe Flash

Course: Software Testing using Selenium
Subject Code: 20DPDE125

Aim:

- To learn the basics of software testing using java environment.

Course objective:

- To know the fundamental concepts of software testing
- To learn fundamental testing the application using selenium
- To study various inspect Web/HTML Elements

Module I: Java Programming for Selenium

1. Java Environment Setup

Download & Install Java (JDK) software, set Java environment variable path, and Download & Install Eclipse IDE.

2. Java Keywords and Identifiers

Java keywords are also known as reserved words. Keywords are particular words that act as a key to a code.

Identifiers in Java are symbolic names used for identification. They can be a class name, variable name, method name, package name, constant name, and more.

3. Java Program Structure

Java Program Structure, Java Syntax, Java Keywords & Literals, Java main method, Create Java Variables, Methods, conditions, loops, and IO.

4. Java Data Types

Java Data Types, Categories of Data Types in Java, Java Primitive Data Types, Java Non-primitive Data Types, and Data Type Conversion in Java.

9. Java Variables

Java Variables, What is Variable, Types of Variables in Java, Declare Variables, Assign values to Variables, and Java Variable Naming Rules.

10. Java Operators

Operators in Java, what is the operator? operator precedence, arithmetic operators, unary operators, comparison operators, and logical operators.

11. Java Control Flow

- i. Decision Making/Conditional Statements
- ii. Loop Statements
- iii. Branching Statements

12. String Handling in Java

Java Strings, What is String?, Declare Strings in Java, String handling in Java, String Methods, String Concatenation, and String Comparison.

13. Java Data Structures

Java Arrays

Arrays in Java, What is Array in Java, Declare Arrays, Java Array built-in methods, advantages of Java Arrays, and Drawbacks of Java Arrays.

Java ArrayList

Java ArrayList, Java Data Structures, Java Arrays vs. ArrayList, Add elements to an ArrayList, Remove Java Array List Elements, and Java ArrayList Operations.

14. Java Input and Output

Java Input and Output, Java User Input, Java Output, Java Scanner Class, Java System Class, Java File Handling, and Java Database Connectivity.

15. Java Methods

Java User-defined methods

Java User-defined Methods, What is a Method?. Advantages of methods in Java. Declare & call methods, and Static & Non-static Methods in Java.

Java built-in methods

Java Built-in Methods, Java Java Standard Library Methods, Java String Methods, Java Number Methods, Java Character Methods, and Array Methods.

16. Java Exception Handling

Exception Handling in Java, What is Exception handling, Types of exceptions in Java, Java Program Run-time Errors, and Java try-catch block.

17. Java Object-Oriented Programming

Java Object-Oriented Programming, Class, Object, Method, Java Inheritance, Polymorphism in Java, Java Abstraction, and Java Encapsulation.

Module 2: Selenium Web Driver

1. Selenium Test Environment Setup
2. Inspect Web/HTML Elements
3. Locating Elements in Selenium (Using Element Locators)
4. Performing Actions on Elements (Using Selenium WebDriver Methods)
5. Selenium Page Object Model (Creating Object Repositories)
6. Writing Selenium Test Cases
Write Selenium Test Steps
Synchronization
Inserting Verification Points
Handling Run-time Errors Etc,

Module 3: TestNG Testing Framework for Selenium

Install TestNG plug-in for Eclipse IDE, Create Test Batches (TestNG Programs), Prioritize Test Cases, Grouping Test Cases, Executing Test Batches, Generating Test Reports etc,

Course Outcomes:

- Convert real world problems to testing the software in online.
- Perform the test cases using various inspect web and HTML elements.
- Design efficient application using selenium and generate the test report.

Course: DATA VISUALIZATION TOOLS

Subject Code: 19CCDV01

- ∞ Data visualization is the practice of translating information into a visual context, such as a map or graph, to make data easier for the human brain to understand and pull insights from.
- ∞ The main goal of data visualization is to make it easier to identify patterns, trends and outliers in large data sets.

OBJECTIVES:

- ❖ To develop skills to both design and critique visualizations.
- ❖ To introduce visual perception and core skills for visual analysis.
- ❖ To understand visualization for time-series analysis.
- ❖ To understand visualization for ranking analysis.
- ❖ To understand visualization for deviation analysis.
- ❖ To understand visualization for distribution analysis.
- ❖ To understand visualization for correlation analysis.
- ❖ To understand visualization for multivariate analysis.
- ❖ To understand issues and best practices in information dashboard design.

COURSE OUTCOMES:

- * Know the history of data visualization and its connection with computer Graphics.
- * Understand the visualization pipeline with its relationship to other data analysis Pipelines.
- * Know the definition(s) of the visualization and interpretations of the Notion.

MODULE -1 SKILLS FOR VISUAL ANALYSIS

YEAR : 2020-21

Unit-I

Machine learning: What and why? - Examples of Machine Learning Applications - Types Of Machine Learning Supervised Learning - Machine Learning Process- The Curse of Dimensionality, Overfitting - Training, Testing, and Validation Sets-The Confusion Matrix & Basic Statistics-BiasVariance Tradeoff.

Unit-II

Hebb's Rule - Neural Networks - The Perceptron - Linear Separability & Linear Regression. The Multi-layer Perceptron: Biases, Algorithm - Local minima and Stochastic gradient Descent Examples Of Using The MLP : Regression Problem & Classification Example - Deriving Back-Propagation.

Unit-III

Linear Discriminant Analysis (LDA) - PRINCIPAL COMPONENTS ANALYSIS (PCA), Factor Analysis - Independent Components Analysis -PROBABILISTIC MODEL - Gaussian Mixture Models : EM Algorithm - Nearest Neighbour Methods - Support Vector Machines.

Unit-IV

Evolutionary Learning - The Genetic Algorithms (GA)- Reinforcement Learning -Decision Trees - CLASSIFICATION AND REGRESSION TREES (CART) - Ensemble Learning :Boosting, Bagging, Random Forests - Unsupervised Learning : K-Means – Algorithm - Vector Quantisation.

Unit-V

Bayesian Networks - Markov Random Fields - Hidden Markov Models (HMMS) - Markov Chain Monte Carlo (MCMC) Methods - Deep Belief Networks (DBN)

ADD-ON COURSES

Certificate in [R / Weka Tool]

PRIST

**Deemed to be University, Vallam,
 Thanjavur -613 403**

COURSE OBJECTIVE

The objective of this course is to learn the basic concepts of Big Data including various methods for analysis of data

ELIGIBILITY CRITERIA

Any graduate shall be eligible for the admission to the course on first cum first basis (Additional admission to the course is prerogative of the school)

COURSE DURATION (45 Hrs)

Module 1

Essential of R programming

- Introduction To The R Language
- Programming Statistical Graphics
- Programming With R

Module 2

Data manipulation and mining techniques

- Data In R
- Reading And Writing Data
- R And Databases
- Dates
- Factors
- Subscribing
- Character Manipulation
- Data Aggregation

Module 3

Statistical applications using R programming

- Probability And Distributions
- Descriptive Statistics And Graphics
- One- And Two-Sample Tests
- Regression And Correlation
- Types of Digital Data
- Introduction to Big Data
- Big Data Analytics
- History of WEKA
- Analysing Data with WEKA

Module 4

- Introduction to Big data tools like Hadoop
- Map reduce and HDFS

Module 5

- Recommendation system
- Big Data Analysis through R

EXAMINATION

1. Every student has to give periodic tests consisting of Programming tasks and Objective Questions
2. At the end of the Course each student will give a presentation on a topic covered in the course

COURSE STRUCTURE AND DURATION

Course is 6 months duration and will be of 45 hrs imparted training programme covering theoretical and practical aspects of Adobe photoshop.

Eligibility criteria for appearing in the in the final examination

- Minimum Attendance - 80%
- Minimum Internal Assessment marks - 40%
- It will be done through the whole year.
- Candidate must obtain at least 35% marks in theory internal assessment to be eligible for the university examination.

Internal assessment will be done as follows:

- a) Mid-term and term examinations = 10 marks
 - b) Assignments/Projects/Class test/Clinical Presentations = 05 marks
 - c) Attendance = 05 marks
- Total = 20 marks

Criteria for a pass in the subject
Minimum marks in theory - 45

SCHEME OF EXAMINATION:-
Duration of written examination - 3 hrs
Maximum marks - 100

CERTIFICATION

The candidates successfully qualifying the course shall be awarded a certificate to that effect in the appropriate form by School of Arts and Science, Department of Computer Science, PRIST University, Thanjavur, Vallam.

COURSE OUTCOMES:

- Visually represent analysis's conclusions to technical and non-technical audiences
- Use the most common algorithms, to make sense of large amounts of data, which are applicable to most business and management problems.
- Learn WEKA and apply machine learning techniques using R.

About the University

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) is a deemed university in Vallam, India. The institute offers undergraduate and postgraduate courses in Engineering, Science, Education, Management, Arts, and Law, as well as research programmes.

Facilities Available

The Department of Computing has highly sophisticated computing facilities for training and R&D work in various areas of Computer Science & Information Technology applications. The facilities available include Parallel Programming, Software Engineering & Testing, Computer Graphics, Multimedia & 3D, AutoCAD, Image Processing, Networking, Various Operating Systems, GUI, Distributed Computing, DoTnet. The Department of Computing has signed Memoranda with IBM for Python, IoT, Machine Learning, Artificial intelligent and Big data Analytics training.

COURSE OBJECTIVE

Specialization track involving Web Application Architectures. This course will give you the basic background, terminology and fundamental concepts that you need to understand in order to build modern full stack web applications. A full stack web developer is familiar with each "layer" of the software technologies involved in a web application, including data modeling and database technologies, the web server environment and middleware components, network protocols, the user interface and basic visual design and user interaction concepts.

ELIGIBILITY CRITERIA

Any graduate shall be eligible for the admission to the course Intake Capacity 15 Seats on first cum first basis (Additional admission to the course is prerogative of the school)

COURSE DURATION (90 Hrs)

Module #1 - Web Applications in Context

This module sets the context for what we will study in this specialization by first providing a historical perspective on computing and web applications. Next we provide an overview of how the Internet works, and then we discuss how web applications have evolved over the past few decades. After that we'll discuss some of the elements of modern software practice, including the typical tools that software engineers now use and the agile development practices they follow. The notion of software design patterns will be introduced, and the n-tier architecture design pattern,

fundamental to modern web application design, is then presented. We will also discuss a few current topics related to web application development. Finally, we will show you how to set up the software development environment you will use throughout the remainder of the courses in this.

Module #2 - Web Applications Frameworks

In this module you will learn about web application frameworks. We will start by talking about the evolution of software and programming languages, and then talk about software application frameworks. The fundamental trade-off we will consider is programmer productivity versus program efficiency. Next you will learn about web application frameworks, as well as the model-view-controller design pattern that is the backbone for many of these frameworks. We will also consider how these frameworks support the agile programming principles associated with modern software practice. This will include a discussion of distributed version control systems and you will learn how to use the popular Git system. We will also demonstrate how to use Git with a Ruby on Rails application. We will use Git to submit all of the programming applications in this specialization.

Module #3 - Managing Data

A successful web application provides information to users that is (1) useful, and also (2) easy to access and understand. This information is often collected from users, as well as from other information sources, and must be stored in a manner that allows it to be manipulated by the web application. The typical approach is to store this data in a relational database. In this module you will

learn some basic concepts associated with modeling the data in a web application, including how to specify the relationships between various data entities. We will also investigate how to hook a web application up to a back-end data store, along with good design techniques that will make it easier to use the data in your web applications by maintaining consistency throughout the entire web stack.

Module #4 - Middleware

Middleware is an abstraction layer that hides details about hardware devices and other lower-level software services from an application. Middleware services implement common low-level functions, such as communication with the operating system, application servers, database servers, etc., so that application developers do not need to concern themselves with these details, and can instead focus on the application functionality they are trying to provide. In a web application, these services generally make use of the HTTP protocol, and in a web application framework, the MVC design pattern can be thought of as being implemented over the middleware.

Module #5 - The User Interface

In our final module we will discuss the User Interface. We will touch on CSS and JavaScript, and how these are used to add style to layout and design of HTML documents. We will also learn about Ajax and how it improves user requests.

About the University

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST) is a deemed university in Vallam, India. The institute offers undergraduate and postgraduate courses in Engineering, Science, Education, Management, Arts, and Law, as well as research programmes.

Facilities Available

The Department of Computing has highly sophisticated computing facilities for training and R&D work in various areas of Computer Science & Information Technology applications. The facilities available include Parallel Programming, Software Engineering & Testing, Computer Graphics, Multimedia & 3D, AutoCAD, Image Processing, Networking, Various Operating Systems, GUI, Distributed Computing, DoTnet. The Department of Computing has signed Memoranda with IBM for Python, IoT, Machine Learning, Artificial intelligent and Big data Analytics training.

COURSE OBJECTIVE

The objective of the course is To understand the basic theory underlying machine learning. To be able to formulate machine learning problems corresponding to different applications. To understand a range of machine learning algorithms along with their strengths and weaknesses. To be able to apply machine learning algorithms to solve problems of moderate complexity. To apply the algorithms to a real-world problem, optimize the models learned and report on the expected accuracy that can be achieved by applying the models.

ELIGIBILITY CRITERIA

Any graduate shall be eligible for the admission to the course Intake Capacity 15 Seats on first cum first basis (Additional admission to the course is prerogative of the school)

COURSE DURATION (90 Hrs)

- Computer Studies
- Typographic Design
- Generic Skills
- Graphics Principle and Method of Design
- Introduction to Multimedia
- Basic Information
- Colour Theory for Computer
- Sound Principles
- Visual Communication
- Digital Publishing
- Principles of Management
- Drawing as Basis for 2D and 3D Animation
- Design: Character
- Background & Concept
- Introduction to Computer Animation
- Modelling Using CAD
- Web Design

- Digital Portfolio Development & Presentation
- Multimedia Authoring
- Flash & Scripting for the Web
- Web Campaign Implementation
- Animation the Production Process
- Sound Recording
- Breakdown: Voice
- Music & Effects Film
- Composing/Shooting on Film
- Project-I + Case Study I
- Industrial Training
- Live Project
- Team Management
- Language Career planning and guidance

EXAMINATION

1. Every student has to give periodic tests consisting of Programming tasks and Objective Questions
2. At the end of the Course each student will give a presentation on a topic covered in the course

COURSE STRUCTURE AND DURATION

Course is 6 month duration and will be of 45 hrs imparted training programme covering theoretical and practical aspects of Adobe photoshop.

Eligibility criteria for appearing in the in the final examination

Minimum Attendance - 80%

Minimum Internal Assessment marks - 40%

- It will be done through the whole year.
- Candidate must obtain at least 35% marks in theory internal assessment to be eligible for the university examination.

Internal assessment will be done as follows:

- a) Mid-term and term examinations = 10 marks

- b) Assignments/Projects/Class test/Clinical Presentations = 05 marks
 - c) Attendance = 05 marks
- Total = 20 marks

Criteria for a pass in the subject

Minimum marks in theory - 45

SCHEME OF EXAMINATION:-

Duration of written examination - 3 hrs

Maximum marks - 100

CERTIFICATION

The candidates successfully qualifying the course the course shall be awarded a certificate to that effect in the appropriate form by School of Arts and Science, Department of Computer Science, PRIST University, Thanjavur, Vallam.

COURSE OUTCOMES:

After completing this course, the student will be able to Appreciate the importance of visualization in the data analytics solution Apply structured thinking to unstructured problems Understand a very broad collection of machine learning algorithms and problems Learn algorithmic topics of machine learning and mathematically deep enough to introduce the required theory Develop an appreciation for what is involved in learning from data.

COURSE OBJECTIVE

This course introduces the core principles and techniques required in the design and implementation of database systems. This course focus on relational database management systems, including database design theory: E-R modeling, data definition and manipulation languages, database security and administration. It also covers essential DBMS concepts such as: Transaction Processing, Concurrency Control and Recovery and various types of databases like distributed database, and intelligent database, Client/Server. Students undertake a semester project to design and build a simple database system and demonstrate competence with the fundamental tasks involved with modeling, designing, and implementing a DBMS. It also provides students with theoretical knowledge and practical skills in the use of databases and database management systems in information technology applications.

DEPARTMENT OF COMPUTER SCIENCE AND ENGINEERING

CIRCULAR

SUB: ADD ON COURSE-Reg.,

It is informed that the department of computer science and engineering is planning to organized a certified course on Mobile app development using Android Studio on 09.09.20 for the academic year 2020-2021 odd semester. The detailed schedule will be given by the departments. Head of the departments are requested to inform their students about the certified course on Mobile app development using Android Studio and motivate them to attend the course. HOD's are requested to nominate one faculty member to co-ordinate the same.

MOBILE APP DEVELOPMENT USING ANDROID STUDIO

UNIT – I Introduction to Android:

The Android Platform, Android SDK, Eclipse Installation, Android Installation, Building you First Android application, Understanding Anatomy of Android Application, Android Manifest file.

UNIT – II Android Application Design Essentials:

Anatomy of an Android applications, Android terminologies, Application Context, Activities, Services, Intents, Receiving and Broadcasting Intents, Android Manifest File and its common settings, Using Intent Filter, Permissions.

UNIT – III Android User Interface Design Essentials:

User Interface Screen elements, Designing User Interfaces with Layouts, Drawing and Working with Animation.

UNIT – IV Android testing

Testing Android applications, Publishing Android application, Using Android preferences, Managing Application resources in a hierarchy, working with different types of resources.

UNIT – V Using Common Android APIs:

Using Android Data and Storage APIs, Managing data using Sqlite, Sharing Data between Applications with Content Providers, Using Android Networking APIs, Using Android Web APIs, Using Android Telephony APIs, Deploying Android Application to the World.

Mobile app development using Android Studio involves a series of steps to design, build, and test Android applications. Android Studio is the official Integrated Development Environment (IDE) for Android development, providing a comprehensive set of tools for app development. Here's a guide to getting started with Android Studio for mobile app development:

1. Setting Up Android Studio

Download and Install:

- **Download:** Go to the [Android Studio website](#) and download the installer for your operating system (Windows, macOS, or Linux).
- **Install:** Follow the installation instructions. This process will include setting up the Android SDK, Android Emulator, and other necessary components.

Initial Configuration:

- **Open Android Studio:** Launch Android Studio and complete the setup wizard, which includes installing additional components and setting up the development environment.

2. Creating a New Project

Start a New Project:

- **File > New > New Project:** Choose a project template based on the type of app you want to build (e.g., Empty Activity, Basic Activity).
- **Configure Your Project:** Enter your application name, package name, save location, and minimum API level.

3. Exploring the Project Structure

Project Files and Directories:

- **app/src/main/java/:** Contains your Java/Kotlin source code files.
- **app/src/main/res/:** Contains resources like layouts, strings, and images.
- **app/src/main/AndroidManifest.xml:** Contains essential information about your app, such as permissions and activities.
- **build.gradle:** Contains build configuration and dependencies.

4. Designing the User Interface

XML Layout Files:

- **Open `res/layout/activity_main.xml`:** Use the Layout Editor to drag and drop UI components or write XML code to define the app's layout.
- **Design and Code Views:** Toggle between the Design and Code views to adjust your layout.

5. Writing the Code

Activity Class:

- **Open `MainActivity.java` or `MainActivity.kt`:** This is where you write the code for your app's main activity.
- **Event Handling:** Write code to handle user interactions, such as button clicks and input validation.

Connecting UI to Code:

- **Find UI Elements:** Use `findViewById()` (Java) or `findViewById()` with Kotlin synthetic properties to get references to your UI elements.
- **Set Up Listeners:** Attach event listeners to respond to user actions.

6. Adding Functionality

Libraries: Use Android

- **Dependencies:** Add libraries to your `build.gradle` file to integrate functionalities like networking (Retrofit), image loading (Glide), or database management (Room).

Accessing Data:

- **Local Storage:** Use SQLite or Room for local databases, or SharedPreferences for simple key-value pairs.
- **Remote Data:** Use Retrofit or Volley for network operations to fetch data from web services.

7. Testing Your App

Run on Emulator or Device:

- **Android Emulator:** Configure and start an emulator through Android Studio to test your app on a virtual device.

- **Physical Device:** Connect a physical Android device via USB and enable Developer Options and USB Debugging.

Writing Tests:

- **Unit Tests:** Write unit tests to verify the functionality of individual components.
- **UI Tests:** Use Espresso or UI Automator to test user interactions and app behavior.

8. Debugging

Logcat:

- **View Logs:** Use Logcat to view logs and debug messages from your app.
- **Breakpoints:** Set breakpoints in your code and use the debugger to step through and inspect code execution.

9. Building and Publishing

Build APK:

- **Build > Build Bundle(s) / APK(s) > Build APK(s):** Generate the APK file for distribution.
- **Sign Your APK:Generate Signed Bundle/APK:** Follow the wizard to sign your APK with a release key for distribution.

Publish to Google Play Store:

- **Create Developer Account:** Sign up for a Google Play Developer account.
- **Prepare Store Listing:** Provide app details, screenshots, and other information.
- **Upload APK:** Submit your APK for review and release.

10. Maintaining Your App

Updates:

- **Enhance Features:** Regularly update your app with new features and improvements.
- **Fix Bugs:** Address any issues reported by users or found during testing.

Analytics:

- **Integrate Analytics:** Use Google Analytics or Firebase Analytics to track user behavior and app performance.

features and considerations in mobile app development

1. User Interface (UI) Design

- **Responsive Design:** Adapts to various screen sizes and orientations.
- **Intuitive Navigation:** Easy-to-use navigation elements like menus, tabs, and buttons.
- **Interactive Elements:** Engaging components such as animations, transitions, and feedback (e.g., button presses).
- **Consistent Styling:** Use of consistent colors, fonts, and design patterns following platform guidelines (Material Design for Android, Human Interface Guidelines for iOS).

2. User Experience (UX)

- **Onboarding:** Introduction screens and tutorials to help users get started.
- **Accessibility:** Features like voice control, screen readers, and high-contrast modes to make the app usable for people with disabilities.
- **Performance Optimization:** Ensuring fast load times and smooth interactions.
- **Personalization:** Customizable settings and preferences to tailor the experience to individual users.

3. Functionality

- **Core Features:** Essential functionalities that the app is designed to deliver (e.g., messaging, navigation, social networking).
- **Push Notifications:** Alert users about important events or updates.
- **Offline Capability:** Allow users to access certain features or content without an active internet connection.
- **Multilingual Support:** Localization and internationalization to support multiple languages and regions.

4. Integration

- **API Integration:** Connect with third-party services and APIs (e.g., social media, payment gateways, cloud storage).
- **Social Media:** Integration with platforms like Facebook, Twitter, or Instagram for login, sharing, and engagement.
- **Maps and Geolocation:** Incorporate location-based services and map functionalities (e.g., Google Maps API, location tracking).

5. Data Management

- **Local Storage:** Use of databases (SQLite, Room) or file storage for offline data.
- **Cloud Storage:** Integration with cloud services for data synchronization and backup (e.g., Firebase, AWS).
- **Data Security:** Encryption and secure storage of sensitive information.

6. Security Features

- **Authentication:** Support for various authentication methods, including passwords, biometrics (fingerprint, facial recognition), and OAuth.
- **Authorization:** Ensuring that users have the appropriate permissions to access specific features or data.
- **Secure Communication:** Use of HTTPS and other security protocols to protect data in transit.

7. Testing and Quality Assurance

- **Automated Testing:** Unit tests, UI tests, and integration tests to ensure app stability and performance.
- **Manual Testing:** Hands-on testing to identify usability issues and bugs.
- **Performance Testing:** Assess app performance under different conditions (e.g., load testing, stress testing).

8. Deployment and Distribution

- **App Store Submission:** Process for submitting apps to Google Play Store, Apple App Store, or other app marketplaces.
- **Version Control:** Manage different versions of the app and handle updates and patches.
- **Analytics and Monitoring:** Tools for tracking app usage, user behavior, and performance metrics (e.g., Google Analytics, Firebase Analytics).

9. Monetization

- **In-App Purchases:** Offer additional features or content for a fee within the app.
- **Subscription Models:** Recurring payments for premium features or content.
- **Advertisements:** Integrate ads to generate revenue (e.g., banner ads, interstitials, rewarded ads).

10. User Feedback and Support

- **Feedback Mechanisms:** Provide ways for users to give feedback, report issues, or suggest features.
- **Customer Support:** Integration of support channels like chat, email, or FAQs.

11. Scalability and Maintenance

- **Code Architecture:** Use of scalable code architectures (e.g., MVVM, MVP) to manage growing complexity.
- **Regular Updates:** Periodic updates to add new features, fix bugs, and ensure compatibility with new OS versions.
- **Monitoring:** Continuously monitor app performance and user feedback to address issues and improve the app.

12. Compliance and Legal Considerations

- **Privacy Policies:** Clearly defined privacy policies and terms of service to inform users about data collection and usage.
- **Regulatory Compliance:** Adherence to legal requirements and guidelines, such as GDPR or CCPA.

UNIT II- VIRTUAL MACHINES

COMPUTE ENGINE (VM): TYPES & OPTIONS, VM INSTANCE LIFECYCLE & COMMON OPERATIONS, MACHINE TYPES & COMPUTE OPTIONS (VCPU AND MEMORY) IN COMPUTE ENGINE, IMAGES & SNAPSHOTS, DISK TYPES: LOCAL SSD, PERSISTENT & BALANCED

UNIT III: VIRTUAL NETWORKS

VIRTUAL PRIVATE CLOUD (VPC) & TYPES, SUBNETS, IP ADDRESSES (PUBLIC/PRIVATE), NIC, ROUTES & ROUTE TABLE, FIREWALLS, NETWORK TOPOLOGY OPTIONS

UNIT IV: CLOUD IAM

IAM BASIC: AUTHENTICATION, AUTHORIZATION & MFA, ROLES, MEMBERS, SERVICE ACCOUNT, POLICY, RESOURCE HIERARCHY, CLOUD IAM BEST PRACTICES

UNIT V: DATA STORAGE SERVICES

GOOGLE CLOUD STORAGE OVERVIEW & STRUCTURE, CLASSES, VERSIONING & LIFECYCLE POLICIES, CLOUD SQL FOR DATABASE (MYSQL, POSTGRESQL AND SQL SERVER), CLOUD SPANNER: FULLY MANAGED RELATIONAL DB

Google Cloud Platform (GCP) is a suite of cloud computing services provided by Google. It is a public cloud computing platform consisting of a variety of services like compute, storage, networking, application development, Big Data, and more, which run on the same cloud infrastructure that Google uses internally for its end-user products, such as Google Search, Photos, Gmail and YouTube, etc.

The services of GCP can be accessed by software developers, cloud administrators and IT professionals over the Internet or through a dedicated network connection.

Why Google Cloud Platform?

Google Cloud Platform is known as one of the leading cloud providers in the IT field. The services and features can be easily accessed and used by the software developers and users with little technical knowledge. Google has been on top amongst its competitors, offering the highly scalable and most reliable platform for building, testing and deploying the applications in the real-time environment.

Apart from this, GCP was announced as the leading cloud platform in the Gartner's IaaS Magic Quadrant in 2018. Gartner is one of the leading research and advisory company. Gartner organized a campaign where Google Cloud Platform was compared with other cloud providers, and GCP was selected as one of the top three providers in the market.

Benefits of Google Cloud Platform

Some of the main benefits of Google Cloud Platform are explained below:

Best Pricing: Google enables users to get Google Cloud hosting at the cheapest rates. The hosting plans are not only cheaper than other hosting platforms but also offer better features than others. GCP provides a pay-as-you-go option to the users where users can pay separately only for the services and resources they want to use.

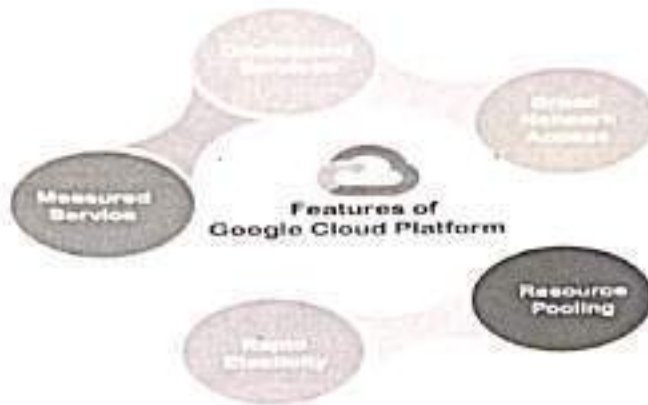

Work from Anywhere: Once the account is configured on GCP, it can be accessed from anywhere. That means that the user can use GCP across different devices from different places. It is possible because Google provides web-based applications that allow users to have complete access to GCP.

Private Network: Google has its own network that enables users to have more control over GCP functions. Due to this, users achieve smooth performance and increased efficiency over the network.

Scalable: Users are getting a more scalable platform over the private network. Because Google uses fiber-optic cables to extend its network range, it is likely to have more scalability. Google is always working to scale its network because there can be any amount of traffic at any time.

- **On-demand services:** Automated environment with web-based tools. Therefore, no human intervention is required to access the resources.

- o **Broad network access.** The resources and the information can be accessed from anywhere.
- o **Resource pooling.** On-demand availability of a shared pool of computing resources to the users.
- o **Rapid elasticity.** The availability of more resources whenever required.
- o **Measured service.** Easy-to-pay feature enables users to pay only for consumed services.

Artificial Intelligence, refers to the field of computer science dedicated to creating systems or machines that can perform tasks typically requiring human intelligence. These tasks include learning from experience, reasoning, problem-solving, understanding natural language, and perception. AI encompasses various approaches and techniques, from machine learning and neural networks to expert systems and robotics. The goal of AI is to develop systems that can autonomously adapt and improve their performance over time, often mimicking cognitive functions like recognizing patterns, making decisions, and interacting with humans.

1. **Threat Detection and Prevention:**
 - a. **Anomaly Detection:** AI algorithms can analyze network traffic and user behavior to detect unusual patterns or deviations that may indicate a cyber attack.
 - b. **Signature-Based Detection:** AI can improve the accuracy of detecting known threats by analyzing large datasets to identify malicious signatures more quickly and accurately.
2. **Incident Response:**
 - a. **Automated Response:** AI can automate responses to certain types of attacks, such as isolating affected systems or blocking malicious traffic, reducing the time to contain and mitigate threats.
 - b. **Forensic Analysis:** AI can assist in analyzing attack vectors and methods used during a breach, helping to understand how the attack occurred and preventing future incidents.
3. **Predictive Analytics:**
 - a. **Threat Intelligence:** AI can aggregate and analyze data from various sources to predict emerging threats and vulnerabilities, enabling proactive measures to enhance security.
 - b. **Vulnerability Management:** AI can assess software and system vulnerabilities, prioritize them based on potential impact, and recommend patching or remediation strategies.
4. **Phishing Detection:**
 - a. **Email Filtering:** AI-driven systems can analyze email content and metadata to identify and filter out phishing attempts, reducing the likelihood of successful social engineering attacks.
5. **Behavioral Analysis:**
 - a. **User Behavior Analytics (UBA):** AI can monitor and analyze user behavior to detect deviations from normal patterns, which may indicate compromised accounts or insider threats.

6. Enhanced Authentication:

- a. **Biometrics:** AI can improve biometric authentication systems, such as facial recognition or fingerprint scanning, to enhance security and reduce the risk of unauthorized access.

7. Security Automation:

- a. **SIEM Integration:** AI can enhance Security Information and Event Management (SIEM) systems by automating log analysis, correlating events, and generating actionable insights for security teams.

8. Continuous Monitoring:

- a. **Real-Time Analysis:** AI systems can continuously monitor network traffic and system activities in real-time, providing instant alerts and updates on potential threats.

Features of AI in this field:

1. Real-Time Threat Detection:

- o **Continuous Monitoring:** AI systems can analyze data in real-time, providing instant alerts about suspicious activities or anomalies.
- o **Behavioral Analytics:** AI can detect deviations from normal user behavior patterns, helping identify potential threats quickly.

2. Advanced Threat Intelligence:

- o **Predictive Analysis:** AI can analyze historical data and current trends to predict future threats and vulnerabilities.
- o **Threat Intelligence Aggregation:** AI gathers and processes information from various sources, providing a comprehensive view of emerging threats.

3. Automated Incident Response:

- o **Immediate Actions:** AI can automatically trigger predefined responses, such as isolating affected systems or blocking malicious traffic, to mitigate threats quickly.
- o **Adaptive Responses:** AI systems can learn from previous incidents to improve and adapt their response strategies over time.

4. Enhanced Phishing Detection:

- o **Content Analysis:** AI can analyze email content, URLs, and attachments to identify phishing attempts more effectively.

- **Contextual Understanding:** AI systems can understand the context and intent of communications to differentiate between legitimate and malicious messages.
5. **Behavioral Biometrics:**
- **User Authentication:** AI can enhance authentication methods by analyzing patterns such as typing rhythm, mouse movements, and device usage, adding an extra layer of security.
 - **Continuous Authentication:** AI can continuously verify user identities throughout a session, not just at login, reducing the risk of session hijacking.
6. **Anomaly Detection:**
- **Pattern Recognition:** AI can identify unusual patterns or deviations from baseline behavior in network traffic, system logs, or user activities.
 - **Zero-Day Threat Detection:** AI can recognize novel or unknown threats by detecting unusual behavior that doesn't match known attack patterns.
7. **Security Automation:**
- **Automated Monitoring:** AI can handle routine monitoring tasks, allowing security teams to focus on more complex issues.
 - **Streamlined Workflows:** AI can automate various cybersecurity workflows, such as threat analysis, incident management, and compliance reporting.
8. **Vulnerability Management:**
- **Risk Assessment:** AI can assess and prioritize vulnerabilities based on potential impact and exploitability, helping organizations focus on critical issues.
 - **Patch Management:** AI can assist in identifying and managing necessary patches and updates to address vulnerabilities efficiently.
9. **Forensic Analysis:**
- **Data Correlation:** AI can analyze and correlate data from different sources to reconstruct attack scenarios and understand attack vectors.
 - **Evidence Collection:** AI tools can automate the collection and analysis of digital evidence, supporting incident investigations and legal proceedings.

10. Adaptive Learning:

- **Machine Learning Models:** AI systems use machine learning to improve their detection and response capabilities based on new data and evolving threats.
- **Self-Improvement:** AI can continuously learn from new threats and adjust its algorithms and strategies to enhance security measures.

11. By integrating these features, AI significantly strengthens an organization's ability to prevent, detect, and respond to cybersecurity threats, ultimately improving overall security posture.

What are the Benefits of Artificial Intelligence in Cybersecurity

AI-driven cybersecurity solutions are revolutionizing the way organizations defend their sensitive data and digital assets. And it's not just the big companies benefiting from AI in cybersecurity. The technology is easily assessable to even small organizations, allowing for less expensive and more comprehensive security options in the face of today's threats.

1. Unparalleled Threat Detection

The sheer volume and complexity of cyber threats demand an advanced

approach to detection. Traditional signature-based methods struggle to keep up with the pace with which new threats emerge. Enter AI-driven threat detection, a game-changing solution.

AI's ability to process vast volumes of data and recognize patterns enables early detection of cyber threats. This includes zero-day attacks and advanced persistent threats (APTs). By analyzing enormous datasets and identifying patterns indicative of malicious activities, AI can detect threats that would otherwise go unnoticed. Unlike traditional methods, which rely on predefined rules, AI's adaptive learning allows it to evolve and continuously improve its threat detection capabilities.

2. Swift Incident Response

In the ever-accelerating digital landscape, every second counts when responding to cyber incidents. AI excels at automating repetitive tasks, such as incident validation and containment, freeing up human resources for more critical decision-making.

AI can instantly triage, validate, and contain threats, enabling security teams to act swiftly, minimizing potential damage, and limiting the spread of attacks.

By streamlining incident response processes, organizations can significantly reduce their mean time to respond (MTTR), a critical metric that directly impacts the scope of a cyber-attack.

3. Proactive Defense

Reactive cybersecurity strategies are no longer sufficient to combat modern-day threats. AI's predictive capabilities can identify potential vulnerabilities in an organization's cybersecurity infrastructure. Decision-makers can then implement pre-emptive measures, fortifying their defenses before cybercriminals strike.

Using AI, organizations can adopt a proactive defense approach. They can analyze historical data, identify weak points, and predict potential areas of exploitation. Armed with this intelligence, cybersecurity professionals can take necessary measures to address vulnerabilities before they are exploited by cybercriminals.

4. Enhanced User Behavior Analytics (UBA)

Human error remains one of the most significant challenges in cybersecurity. AI adds an additional layer of protection by continuously monitoring user behavior across an organization's network. By establishing baseline user activity, AI can quickly detect deviations indicative of suspicious or malicious actions, empowering security teams to take immediate action and prevent potential data breaches.

AI-powered UBA can identify anomalous user behavior, such as insider threats or unauthorized access attempts. This level of scrutiny ensures that sensitive data remains protected from internal and external risks.

What are the Challenges of Artificial Intelligence in Cybersecurity?

In the rush to capitalize on the AI hype, programmers and product developers may overlook some of the threat vectors. Since the likelihood of making unintentional errors is high, here are some pitfalls to steer clear of:

1. Adversarial AI

As AI becomes more prevalent in cybersecurity, cybercriminals are quick to adapt and deploy their own AI-driven tactics. Cybercriminals are increasingly leveraging AI to evade detection and launch more sophisticated attacks.

Adversarial AI involves crafting attacks specifically designed to bypass AI-based security systems. It poses a significant challenge to the effectiveness of AI-driven cybersecurity solutions, requiring constant vigilance and countermeasures to stay one step ahead of cybercriminals.

These attacks aim to exploit vulnerabilities in AI algorithms and confuse them into misclassifying malicious activities as benign. Such tricking of AI systems can lead to potential blind spots in cybersecurity defenses.

2. Bias and Fairness

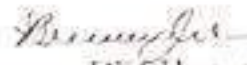

AI's ability to learn from historical data makes it a powerful tool, but it also makes it susceptible to biases present in that data. If unchecked, this could lead to unfair treatment of certain users or demographics, impacting the efficacy of cybersecurity measures. Biased data can also lead to discriminatory outcomes, affecting decision-making in cybersecurity.

For instance, biased AI algorithms may flag certain user behaviors as suspicious or risky based on factors like race or gender, leading to potential ethical and legal issues. To combat bias in AI, decision-makers must prioritize fairness, diversity, and transparency in their AI-driven cybersecurity implementations.

SUB: ADD ON COURSE-Reg.,

It is informed that the department of computer science and engineering is planning to organized a certified course on Data Science and Artificial Intelligent on 16.02.21 for the academic year 2020-2021 odd semester. The detailed schedule will be given by the departments. Head of the departments are requested to inform their students about the certified course on Data Science and Artificial Intelligent and motivate them to attend the course. HOD's are requested to nominate one faculty member to co-ordinate the same.

DATA SCIENCE USING ARTIFICIAL INTELLIGENT

UNIT I INTELLIGENT AGENTS

Introduction to AI – Agents and Environments – concept of rationality – nature of environments – structure of agents. Problem solving agents – search algorithms – uninformed search strategies.

UNIT II PROBLEM SOLVING

Heuristic search strategies – heuristic functions. Local search and optimization problems – local search in continuous space – search with non-deterministic actions – search in partially observable environments – online search agents and unknown environments

UNIT III GAME PLAYING AND CSP

Game theory – optimal decisions in games – alpha-beta search – monte-carlo tree search – stochastic games – partially observable games. Constraint satisfaction problems – constraint propagation – backtracking search for CSP – local search for CSP – structure of CSP.

UNIT IV LOGICAL REASONING

Knowledge-based agents – propositional logic – propositional theorem proving – propositional model checking – agents based on propositional logic. First-order logic – syntax and semantics – knowledge representation and engineering – inferences in first-order logic – forward chaining – backward chaining – resolution.

UNIT V PROBABILISTIC REASONING

Acting under uncertainty – Bayesian inference – naïve Bayes models. Probabilistic reasoning – Bayesian networks – exact inference in BN – approximate inference in BN – causal networks.

AI and Data Science are the key enablers for disruptive innovations of this century, these emerging technological revolutions have reshaped our work and life style. From the start of June 2021, CIT, Coimbatore establishes a new department "Artificial Intelligence and Data Science". The department will be driven by its commitment to excel in research, design and development of next generation cutting-edge technologies in the area of Artificial Intelligence and Data Analytics. Our mission is to cultivate Industry-Academia partnership, drive collaborative research with other domains and equip our talents to contribute on multi-disciplinary projects by translating the developed technology into real world impacts.

AI & DS Programme

The unique undergraduate program, B.Tech. Artificial Intelligence and Data Science (AI & DS), aims the students to acquire technical skills to perform data processing, analysis and visualization in multiple real-time applications. Program envisions to equip students with the ability to identify and assess societal, health, safety and cultural issues with an emphasize on identifying their consequent responsibilities as engineers of offering optimal and effective solutions for the same.

The designed curriculum is interdisciplinary at the core – straddling computer Science blended with Mathematical Foundations, Artificial Intelligence Techniques, Machine Learning Principles, Statistical Methods, Data Science Philosophies, and their applications across multiple domains. Curriculum also covers on sub-field such as Big Data Analytics, Deep Learning and Computer Vision and Pattern Recognition.

COURSE OUTCOMES

- 1. Explain intelligent agent frameworks
- 2. Apply problem solving techniques
- 3. Apply game playing and CNF techniques
- 4. Perform logical reasoning
- 5. Perform probabilistic reasoning under uncertainty

SUB: ADD ON COURSE-Reg.,

It is informed that the department of computer science and engineering is planning to organized a certified course on 3D Animation using Mat plot on 15.03.21 for the academic year 2020-2021 odd semester. The detailed schedule will be given by the departments. Head of the departments are requested to inform their students about the certified course on 3D Animation using Matplot and motivate them to attend the course. HOD's are requested to nominate one faculty member to co-ordinate the same.

3D ANIMATION USING MATPLOT

UNIT I INTRODUCTION TO SET MODELING FOR FILM, GAMING AND TELEVISION.

Set Modeling Overview and Objective: Modeling using Nurbs and Polygons in 3D software. Strategies of Modeling. Tips and Techniques of Modeling using Polygons. overview of Polygon selection and creation. Combining, separating and splitting.

UNIT II INTRODUCTION TO IN – ORGANIC, AUTOMOTIVE MODELING

In-organic Modeling such as Solar systems, mountain, stage show background, gaming background. Automotive like car, bus and van with reference pictures. To create a model as it is in the picture.

UNIT III BASIC TEXTURING

Advanced Materials Using Specialized Material Types. Unwrapping UVs and Using Pelt Mapping and Creating Baked Textures and Normal Maps. Working with Advanced Modeling and Light Tracing with Radiosity

UNIT IV TEXTURING THE MODEL USING UV MAPPING

Texturing and Shading. Intro to Hyper shade, UV mapping overview. Mapping UVs. Modeling and Texturing effects, UVs menu reference. UVs windows and editors reference.

UNIT V RENDERING THE TEXTURE WITH SHADING

Texturing and Shading by Unwrapping the Models. Gaming background Texturing. Digital texturing using Photoshop and Texturing via other 2D tools. Applying Mental Ray Shades to the model and Using Final Gather to Fine Tuning Mental Ray Shades.

3D animation is a process of creating moving images in a three-dimensional digital environment. It involves designing, modeling, and animating objects or characters in a 3D space to create the illusion of movement and depth. This type of animation is widely used in various fields, including film, television, video games, virtual reality, and simulations.

Key Components of 3D Animation:

1. **Modeling:** The creation of 3D objects or characters. This involves defining the shape, structure, and appearance of objects using vertices, edges, and polygons. Modeling can be done using software like Blender, Maya, or 3ds Max.
2. **Texturing:** Applying surface details to the 3D models. Textures are images or patterns that give the model its color, detail, and material properties, such as wood grain or fabric texture.
3. **Rigging:** Creating a skeleton or control system for a 3D model, which allows it to be animated. Rigging involves defining bones, joints, and control points that can be manipulated to move the model.
4. **Animation:** The process of creating movement for the 3D models. This involves setting keyframes (specific points in time where changes occur) and creating smooth transitions between them to produce realistic motion. Animation can include character movements, object interactions, and environmental changes.
5. **Lighting:** Setting up light sources in the 3D environment to simulate how light interacts with objects. Proper lighting is crucial for creating mood, highlighting details, and ensuring the scene looks realistic.
6. **Rendering:** The process of generating the final images or video from the 3D scene. Rendering converts the 3D data into 2D images or video frames, taking into account textures, lighting, shadows, and other effects. This process can be time-consuming and resource-intensive.
7. **Compositing:** Combining rendered images or video with other elements, such as special effects, background layers, or additional visual enhancements. Compositing helps integrate the 3D animation seamlessly into the final project.

Applications of 3D Animation:

1. **Film and Television:** Creating visual effects, animated characters, and entire virtual environments. Examples include animated movies like "Toy Story" or visual effects in movies like "The Avengers."
2. **Video Games:** Designing characters, environments, and animations for interactive gameplay. 3D animation is essential for creating lifelike characters and dynamic game worlds.

3. **Virtual Reality (VR) and Augmented Reality (AR):** Developing immersive experiences that blend virtual elements with the real world or create fully virtual environments for users to interact with.
4. **Simulations and Training:** Building realistic simulations for training purposes, such as flight simulators or medical training programs, to provide hands-on experience in a controlled virtual environment.
5. **Architecture and Product Design:** Visualizing architectural designs and product prototypes in 3D to better understand their appearance and functionality before physical production.
6. **Marketing and Advertising:** Creating compelling visual content for commercials, promotional videos, and advertisements to engage audiences and showcase products or services.

3D Animation using Matplot

Matplotlib, a popular plotting library in Python, does have some support for 3D plotting and animation, though it's not as feature-rich for 3D animation as some other libraries like Blender or Maya. You can create basic 3D animations using Matplotlib's `mpl_toolkits.mplot3d` module in combination with its animation capabilities.

Install Matplotlib

Make sure you have Matplotlib installed. You can install it using `pip` if you haven't already:

```
pip install matplotlib
```

Explanation:

1. Initialize Plot: `plt.figure()` and `fig.add_subplot(111, projection='3d')` create a 3D plot.
2. Create Data: `np.linspace` and `np.meshgrid` generate a grid of x and y values. Z is initially set to a sine function of the distance from the origin.
3. Plot Initial Data: `ax.plot_surface` creates a surface plot with the initial data.
4. Update Function: This function updates the Z values for each frame of the animation. It clears the previous plot and redraws the surface with updated data.
5. Animation: `animation.FuncAnimation` is used to animate the plot. It calls the update function for each frame.

ABOUT THE INSTITUTION:

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST), a Deemed University (U/s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 25 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

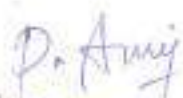

About the Department:

The department of Electrical and Electronics of PRIST DEEMED UNIVERSITY was established in 2008. Since then its excellence in each and every aspects has played an important role in the institute.

The EEE Department is dedicated to delivering competent electrical engineers to the arena of the real world. They are outfitted with core technical knowledge as well as professional skills necessary to face the challenges of the future. The committed faculty and staff are fully geared up towards this end.

The department has spacious laboratories such as Machine tool, Basics Circuits Lab, Measurement and Instrumentation Lab, Control System Lab, Power Electronics Lab and Power systems Simulation Lab. All the laboratories are fully equipped with latest, modern and sophisticated equipments.

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at both Undergraduate (UG) and Postgraduate (PG) levels. The staffs are from various disciplines in masters like Power electronics and drives, Power system, advanced communication system. Many of the staff members are encouraged to pursue their higher studies and research works.

ELECTRICAL LOAD ESTIMATION AND DESIGNING COURSE

Course objective

To develop knowledge on principles of design of static and rotating machines. Also students must able to understand the design fundamental concepts, design main dimensions & cooling systems of transformers and main dimensions of rotating machine.

- 1. Electrical Drawings and Documentations
- 2. Fundamentals of Electrical Design & Engineering
- 3. Developments of Single Line Diagrams and Control Schematics
- 4. Load Estimation of Plants
- 5. Application, Sizing and Protections of Electrical Equipments
- 6. Cables Selection, Sizing and Cable Routing
- 7. Ambient Lighting System Design & Illumination Design
- 8. Fundamentals of Plant Earthing Design and Protections
- 9. Hazardous Area Classification
- 10. Substation / Switchyard Design
- 11. System Studies (Load Flow, Short Circuit Analysis)

System planning

- 1. Site design considerations
- 2. Planning guide for the supply and distribution system
- 3. Power system modernization and evaluation studies/programs
- 4. T/F loss considerations
- 5. Voltage control in electric power systems
- 6. Transformer selection
- 7. Voltage ratings for low-voltage utilization equipment
- 8. Voltage drop considerations in locating the low-voltage/ high-voltage
- 9. Calculation of voltage drops

Cost estimating of industrial power systems

- 1. Preparing the cost estimate
- 2. Levels of estimates
- 3. Equipment and material costs
- 4. Labor costs
- 5. Overhead costs

ILLUMINATING DESIGN

- 1. Characteristics of illuminating systems
- 2. Light sources: daylight, incandescent, electric discharge, fluorescent, arc lamp and Lasers
- 3. Wires, wiring, switching & control circuits
- 4. Methods of illumination: illumination from point, line and surface sources. Photometry and spectrophotometry
- 5. Lighting - industrial, residential, office departmental stores, indoor stadium, theater and hospitals
- 6. Sign lighting - food, airline, aviation and transport lighting, lighting for displays and sign/lighting - neon signs, LED LCD displays their
- 7. Lighting for surveillance

Feeder Sizing and Selection of single Phase and Three Phase

- 1. Feeder Calculation
- 2. Feeder type and Construction materials
- 3. Feeder selection
- 4. Feeder Selection Based on the rated Rating of feeder
- 5. Feeder Ratings of cables
- 6. Feeder Current Ratings of cable
- 7. Feeder Selection and Coordination with Protective Devices

Domestic Electrification Design

- 1. The floor layout in residential building using Auto CAD
- 2. Allocation of house wiring
- 3. Cable and Selection of Conductor
- 4. Feeder selection of Switch Socket
- 5. Evaluation of load on circuit
- 6. Design of sub circuit (Lighting Circuit and Power Circuit)
- 7. Distribution of Power Circuit

COURSE OUTCOMES:

Gain comprehensive understanding of the different aspects of designing and engineering electrical power systems, covering single-line diagram preparation, codes and standards, voltage level selection, substation layouts, switching devices, instrument transformers, voltage drop calculation, power transformer selection and size calculation. Through a combination of lectures, interactive exercises, and case studies, you will develop the skills and knowledge necessary to work effectively in the power industry and contribute to the efficient and safe operation of electrical power systems.

Gain proficiency in using computerized software with ETAP, which are widely used in the power industry for designing and analyzing power systems.

Upon completion of this course, you will be able to apply your knowledge and skills to real-world design projects and be better prepared for a career in the power industry.

ABOUT THE INSTITUTION:

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST), a Deemed University (U/s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 25 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

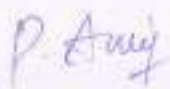

About the Department:

The department of Electrical and Electronics of PRIST DEEMED UNIVERSITY was established in 2008. Since then its excellence in each and every aspects has played an important role in the institute.

The EEE Department is dedicated to delivering competent electrical engineers to the arena of the real world. They are outfitted with core technical knowledge as well as professional skills necessary to face the challenges of the future. The committed faculty and staff are fully geared up towards this end.

The department has spacious laboratories such as Machines lab, Electric Circuits Lab, Measurement and Instrumentation Lab, Control System Lab, Power Electronics Lab and Power systems Simulation Lab. All the laboratories are fully equipped with latest, modern and sophisticated equipments.

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at both Undergraduate (UG) and Postgraduate (PG) levels. The staffs are from various disciplines in masters like Power electronics and drives, Power system, advanced communication system. Many of the staff members are encouraged to pursue their higher studies and research works.

Course objective

- In the area of equipment maintenance, connection or alteration, the capability to read and understand electric drawings is a complete must. This Electrical Drawings and Schematics course covers the creation of detailed electrical drawings, drawing sets and documentation.
- The Electrical Drawings and Schematics course will also provide its participant's familiarity with electrical equipment design drawing methods, practices, procedures, storing and retrieving data, and producing related documentation for introductory and closing drafts for confirmation. Any electrical drawing comprises of lines, symbols, scopes, and notations to precisely convey engineering design to the employees who install the electrical system.
- This course is designed to help students to understand the fundamentals of electrical drawings including logic diagrams, wiring layout and CAD. After completing this course, the trainees will possess a professional knowledge of different types of drawings and diagrams and understand their purpose and flow.

MODULE 1

ELECTRICAL DRAWINGS

- Drawings – relevance to engineering
- Standards & their necessity
- CAD & drawing standards
- Drawings in plant engineering
- Manufacturing organization
- Typical engineering drawing & its parts

MODULE 2

TWO DIMENSIONAL DRAWINGS

- Different types of drawing
- Electrical layout drawing & types
- Wiring diagram, Drawing scales, block
- Symbolology for various types of drawings

MODULE 3

LINE DIAGRAMS

- Power & control circuit diagrams
- Commonly used symbols
- Applications of schematic diagrams
- Single line diagram – advantages & example
- Terms associated with single line diagram

MODULE 4

CABLING, WIRING LAYOUT AND CABLE SCHEDULE

- Different types of cabling drawings
- Wiring diagrams
- Cable system drawings
- Different types of wiring drawings
- Difference between cabling & wiring drawings

ABOUT THE INSTITUTION:

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST), a Deemed University (U/s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 25 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

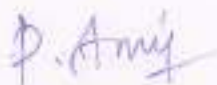

About the Department:

The department of Electrical and Electronics of PRIST DEEMED UNIVERSITY was established in 2008. Since then its excellence in each and every aspects has played an important role in the institute.

The EEE Department is dedicated to delivering competent electrical engineers to the arena of the real world. They are outfitted with core technical knowledge as well as professional skills necessary to face the challenges of the future. The committed faculty and staff are fully geared up towards this end.

The department has spacious laboratories such as Machines lab, Electric Circuits Lab, Measurement and Instrumentation Lab, Control System Lab, Power Electronics Lab and Power systems Simulation Lab. All the laboratories are fully equipped with latest, modern and sophisticated equipments.

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at both Undergraduate (UG) and Postgraduate (PG) levels. The staffs are from various disciplines in masters like Power electronics and drives, Power system, advanced communication system. Many of the staff members are encouraged to pursue their higher studies and research works.

MATLAB COURSE

LEARN FROM THE BEST

Course objective

- The course focuses on how to implement complex decision flows and finite-state machines using Stateflow and provides a general understanding of how to accelerate the design process for closed-loop control systems using MATLAB.
- Also it offers the good understanding of modelling and analyzing electrical systems.
- This course gives guidance on key features of widely used toolboxes in simulink, help transform concepts to a complete model, verify and evaluate the system behaviour in different user environments.
- It allows the attendees to explore the more advanced features of MATLAB in a unified manner and help learners 'future-proof' themselves and remain relevant for the rapidly evolving technology from industry perspective.

WHAT WILL I LEARN?

- MATLAB built-in functions
- 2D and 3D plots
- Simulink modelling
- Model Based Designing
- Masks and Subsystems,
- Lookup table editor and breakpoints
- Stateflow modelling
- Hierarchical state machines
- Parallel state machines
- Events in state machines
- Functions in state machines
- Truth tables and State transition tables
- Control systems stability analysis
- Controller implementation – P, PI, PID
- Frequency response estimation
- Sinscape modelling
- Selecting solver methods
- Connecting physical signals and simulink signals

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST), a Deemed University (U/s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 25 years in promoting quality education and research for our Indian community, since its inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

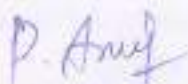

About the Department:

The department of Electrical and Electronics of PRIST DEEMED UNIVERSITY was established in 2008. Since then its excellence in each and every aspects has played an important role in the institute.

The EEE Department is dedicated to delivering competent electrical engineers to the arena of the real world. They are outfitted with core technical knowledge as well as professional skills necessary to face the challenges of the future. The committed faculty and staff are fully geared up towards this end.

The department has spacious laboratories such as Machines lab, Electric Circuits Lab, Measurement and Instrumentation Lab, Control System Lab, Power Electronics Lab and Power systems Simulation Lab. All the laboratories are fully equipped with latest, modern and sophisticated equipments.

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at both Undergraduate (UG) and Postgraduate (PG) levels. The staffs are from various disciplines in masters like Power electronics and drives, Power system, advanced communication system. Many of the staff members are encouraged to pursue their higher studies and research works.

185153FAR- FACTORY AUTOMATION AND ROBOTICS

UNIT 1 :

Programmer, Engineering and Scientific; converts scientific, engineering, and other technical problem formulations; Resolves symbolic formulations, prepares flow charts and block diagrams, and encodes resultant equations for processing by applying extensive knowledge of branch of science, engineering.

UNIT 2:

Metal Inert Gas/Metal Active Gas/Gas Metal Arc Welder (MIG/MAG/GMAW); perform manual (semi-automatic) MIG/ MAG (GMAW) welding for a range of standard welding job requirements and weld different materials (carbon steel, aluminium and stainless steel) in various positions. The welder can prepare various joints including corner, butt, fillet and tee. Set-up and prepare for operations interpreting the right information from the WPS.

UNIT 3:

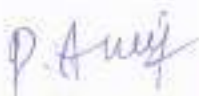

Pick and Place Operator: operates the automated pick-and-place machine for assembling components on the printed circuit board (PCB). maintains the automated pick-and-place machine for placing different types of components on the surface of PCBs for soldering.

UNIT 4:

Modeller: responsible for visualization of the final product; develop clay model from the design, transforming the sketch into digital data, three-dimensional shape and building mock-up. A modeller is working characteristics.

UNIT 5:

Application Maintenance Engineer; responsible for ensuring the availability of an application, or product for end users. Such roles provide on-going/ad-hoc support for software products or customized applications aimed towards correction of faults/bugs or improvement of performance

ABOUT THE INSTITUTION:

Ponnaiyah Ramajayam Institute of Science and Technology (PRIST), a Deemed University (U/s 3 of the UGC Act 1956), is one of the renowned units of Ponnaiyah Ramajayam Institutions, which are serving for more than 25 years in promoting quality education and research for our Indian community, since its Inception. The institution is now brimming with many social responsibilities, particularly in promoting quality education through research.

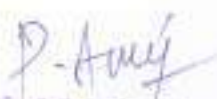

About the Department:

The department of Electrical and Electronics of PRIST DEEMED UNIVERSITY was established in 2008. Since then its excellence in each and every aspects has played an important role in the institute.

The EEE Department is dedicated to delivering competent electrical engineers to the arena of the real world. They are outfitted with core technical knowledge as well as professional skills necessary to face the challenges of the future. The committed faculty and staff are fully geared up towards this end.

The department has spacious laboratories such as Machines lab, Electric Circuits Lab, Measurement and Instrumentation Lab, Control System Lab, Power Electronics Lab and Power systems Simulation Lab. All the laboratories are fully equipped with latest, modern and sophisticated equipments.

The Department has young as well as experienced and dynamic personalities in its faculty, is involved in providing quality education at both Undergraduate (UG) and Postgraduate (PG) levels. The staffs are from various disciplines in masters like Power electronics and drives, Power system, advanced communication system. Many of the staff members are encouraged to pursue their higher studies and research works.

185153WIM- WINDING OF INDUCTION MOTOR

Course objectives:

Induction motors are electric motors that use alternating current (AC), propelled by a magnetic field that rotates. They are made up of a rotor, a stator and coils that convert electrical energy into mechanical energy using electromagnetic induction.

SYLLABUS

Unit 1: Stator winding

The stator winding is fed with a 3-phase supply and has a definite number of poles. The number of poles is determined by the desired speed of the motor. The stator winding can be connected in either a star or delta configuration.

Unit 2: Rotor winding

The rotor winding can be a polyphase secondary winding or a squirrel-cage secondary winding.

Unit 3:

Working principle The stator winding produces a rotating magnetic flux (RMF) when supplied with a 3-phase current. This RMF induces an emf in the rotor conductors, which causes the rotor to rotate in the same direction as the stator flux. The difference between the synchronous speed of the motor and its actual speed is known as the slip.

Unit 4: Starting methods

The three phases of the winding are connected in either a star or delta configuration depending on the starting method used. For example, squirrel cage motors are usually started with a star-delta stator.

Unit 5: Advantages

Induction motors have several advantages, including low cost, high efficiency, and simple construction.

EXAMINATION

There shall be an university examination at the end of academic year.

Eligibility criteria for appearing in the in the final examination

Minimum Attendance - 30%

Minimum Internal Assessment marks - 40%

* It will be done through the whole year.

* Candidate must obtain at least 35% marks in theory

internal assessment to be eligible for the university examination.

Internal assessment (Theory) will be done as follows :

a) Mid-term and term examinations - 10 marks

b) Assignments/Project/Class test/Clinical Practitioner - 05 marks

c) Attendance - 05 marks

Total - 20 marks

Criteria for a pass in the subject

Minimum marks in theory - 45

Scheme of Examination:-

Duration of written examination - 3 hrs

Maximum marks - 100

Level of Knowledge Expected

Working knowledge with excellent technological value

Duration of the program

90 hrs add-on diploma course

Course Program Outcome

* These methods are faster, and accurately provide valuable insights of experimental findings and mechanisms of action.

* In addition, appropriate implementation of these techniques could lead to a reduction in cost of drug designing and development.

* Currently in biomedicine, various these software are exhibiting imperative role in the different phases of drug discovery.

Eligibility criteria

Any graduate shall be eligible for the admission to the course. Intake Capacity: 15 Seats on first-come first-basis. (Additional admission to the course is prerogative of the school)

Course Structure and Duration

Course is One year duration and will be of 90 hrs imparted training programme covering theoretical and practical aspects of Drug Design.

Certification

The candidates successfully qualifying the course the course shall be awarded a certificate to that effect in the appropriate form by School of Arts and Science, Department of Chemistry, PRIST University, Thanjavur, Vallam.

DEPARTMENT OF CHEMISTRY

VALUE ADDED COURSE Academic year: 2020-2021

Diploma Course on UV-VISIBLE, IR SPECTROSCOPIC INSTRUMENTATION AND SEPARATION TECHNIQUES

Aim: Purification of aniline by distillation.

Separation of organic liquid mixture by fractional distillation.

Removal of solvent from a reaction mixture by reduced pressure distillation.

Objectives:

- To inculcate concepts of molecular structure target identification and validation.
- To understand techniques in Phenotypic screening and target deconvolution.
- To increase employability of the students.
- To educate about role of molecular structure of novel biologically active compounds.

Course Outcomes:

At the end of the course students will be able to:

Explain the fundamental components of UV-Visible spectrophotometer.

Familiarize the instrumentation of IR spectroscopy.

Examine the given material by UV-Visible spectroscopy.

Investigate the nature of the functional groups present in the sample by IR spectroscopy.

Separate the sample by distillation techniques.

UNIT-I: Instrumentation of UV-Visible Spectroscopy -

- UV-Visible Spectroscopy-principle, nomenclature of the components of IR instrument - fundamental components- Schematic diagram of fundamental components, photometer, spectrometer optical, spectrophotometer, colorimeter and spectrograph.
- UV-Visible Radiation source - essential characteristics, UV- light sources, visible light sources; Dispersing devices, filters and monochromators: prism, gratings; slits, test sample and optical materials, radiation detector and indicator- barrier layer cell, photo emissive cell, photomultiplier cell.

UNIT-II: Instrumentation of IR Spectroscopy

- IR Spectroscopy- principle, instrumentation-IR spectrometer-types-single beam and double beam spectrometer;
- Source of IR radiation, IR mono chromator, detector- selective detector-photo conductive cell; non-selective detectors- thermocouple, bolometer, pneumatic detector cell.
- Preparation of sample- liquid, solid; characteristic group frequencies.

UNIT-III: UV-Visible Spectroscopy- Practical

- Detection of λ_{max} of given organic compounds: aniline, toluene, benzaldehyde, Acetophenone, o-cresol, ethyl acetate.
- Determination of indicator constant of an indicator
- Determination of band gap of ZnO nanoparticle.

UNIT-IV: IR Spectroscopy-Practical-

- Identification of functional groups of organic compounds- urea, benzaldehyde, cinnamic acid, glucose and acetophenone.
- Determination of the purity of the commercial benzoic acid

UNIT-V: Separation Techniques – Practical

Course Program Outcome

• These methods are faster, and accurately provide valuable insights of experimental findings and mechanisms of action.

• In addition, appropriate implementation of these techniques could lead to a reduction in cost of drug designing and development.

• Currently in biomedicine sciences these software are exhibiting imperative role in the different phases of drug discovery

Eligibility criteria

Any graduate shall be eligible for the admission to the course Intake Capacity 15 Seats on first cum first basis (Additional admission to the course is prerogative of the school)

Course Structure and Duration

Course is One year duration and will be of 90 hrs imparted training programme covering theoretical and practical aspects of Drug Design.

Certification

The candidates successfully qualifying the course the course shall be awarded a certificate to that effect in the appropriate form by School of Arts and Science, Department of chemistry, PRIST University, Thanjavur, Vallam.

DEPARTMENT OF CHEMISTRY

VALUE ADDED COURSE
Academic year: 2021-2022

Diploma Course on Molecular Structure Drawing
Tool

Aim

:

- To introduce students to molecular structure and biological evaluation of novel biologically active compounds.

Objectives:

- To inculcate concepts of molecular structure target identification and validation.
- To understand techniques in Phenotypic screening and target deconvolution.
- To increase employability of the students.
- To educate about role of molecular structure of novel biologically active compounds

Course Outcomes:

At the end of this unit, you will be able to:

- Understand the software used in chemistry
- Perform the Manipulations of Selected Objects
- Apply the chemdraw software to draw the different systems
- Generate the IUPAC and physical properties of organic compounds

Predict resonance spectral data of chemical structures.

UNIT-I: Molecular Structure Drawing Tool

ChemDraw - Introduction, Installation, Drawing molecular structures - structure types, defining the framework of a structure, Drawing Bonds of Different Types, Changing Bond Types, Introducing Atom Labels,

UNIT-II: Manipulations with Selected Objects

Manipulations with Selected Objects- Select Objects, Move Objects, Copy Objects, Rotate and Mirror Objects, Stretch/Shrink/Scale Objects, Structure Perspectives, Join Objects.

UNIT-III: ChemDraw-Practical I

Drawing of molecules - acyclic, cyclic, heterocyclic and bicyclic systems

- Analysis of molecules - formula, exact mass and elemental analysis.
- Graphical representation of reaction scheme

UNIT-IV: ChemDraw-Practical II

- Chemical structures to IUPAC names
- IUPAC naming to chemical structures
- 2D structures into 3D structures
- Prediction of boiling point, melting point, critical temperature, critical pressure, critical volume and heat of formation.

UNIT-V: ChemDraw-Practical III

Prediction of ^1H NMR & ^{13}C NMR of following compounds:

Ethanol, Ethyl methyl ketone, Cycloheptanone, Pyridine and α -naphthol

About the University

Ponnalyah Ramajayam Institute of Science and Technology (PRIST) is a deemed university in Vallam, India. The institute offers undergraduate and postgraduate courses in Engineering, Science, Education, Management, Arts, and Law, as well as research programmes.

Facilities Available

The University is housed in an independent, multi-story building with state-of-the-art equipment, excellent laboratories and infrastructure to help complete this course. Majority of scientists have been using a monitoring the research program. Computer Library with internet facilities for students, Hostel facilities, Medical centre, Sports complex, etc.

Department of Chemistry

The Department has young as well as experienced and dynamic personalities as faculty, is involved in providing quality education at Undergraduate (UG) and Postgraduate (PG) levels. The staff are from various disciplines in domains like Physical chemistry, Organic chemistry, Inorganic chemistry, Analytical chemistry, Biochemistry, Polymer chemistry, Environmental chemistry, etc. Many of the staff members are encouraged to pursue their higher studies and research works.

COURSE OBJECTIVE

- The most fundamental goal in drug design is to predict whether a given molecule will bind to a target and if so how strongly.
- These methods are also used to predict the conformation of the small molecule and to model conformational changes in the target that may occur when the small molecule binds to it.

EXAMINATION

There shall be an university examination at the end of academic years.

Eligibility criteria for appearing in the in the final examination

Minimum Attendance - 80%

Minimum Internal Assessment marks - 40%

• It will be done through the whole year.

• Candidate must obtain at least 35% marks in the ory internal assessment to be eligible for the university examination.

Internal assessment (Theory) will be done as follows :

a) Mid-term and term examinations = 10 marks

b) Assignments/Projects Class test/Clinical Presentations = 05 marks

c) Attendance = 05 marks

Total = 20 marks

Criteria for a pass in the subject

Minimum marks in theory - 45

Scheme of Examination :-

Duration of written examination - 3 hrs

Maximum marks - 100

Level of Knowledge Expected

Working knowledge with excellent technological value

Duration of the program

90 hrs add on diploma course

Course Program Outcome

DEPARTMENT OF
CHEMISTRY

VALUE ADDED COURSE

Academic year: 2020 -2021

Diploma Course on Sustainable Development

Aim

To provide an idea on Green Technology with an approach towards the design, manufacturing and use of chemical products to reduce or eliminate the chemical hazards intentionally. Green Technology is a new and rapidly emerging branch of chemistry.

Course learning outcomes:

To understand the principles of green chemistry and engineering

To understand the field of Green Technology and its approach towards the new discovery and innovation.

To gain knowledge on Green industrial processes

To understand the concept of sustainable development and its importance

Ability to describe Cleaner Production measures applicable to different industries various applications.

UNIT -1

Principles of Green Technology and Green Engineering: To learn to modify the processes and products to make them green safe and economically acceptable to the society, Concepts of green chemistry and Process intensification

UNIT-2

Green Synthesis and Catalysis: Green oxidation and photochemical reactions, Microwave and Ultrasound assisted reactions, Synthesis of Green Reagents, Green solvents, Green nanotechnology and Ionic liquids.

UNIT-3

Green Industrial Processes: Pollution statistics from various industries like polymer, textile, pharmaceutical, dyes, pesticides and wastewater treatment. A greener approach towards all these industries.

UNIT-4

Meaning of Sustainable Development: Understand the Sustainable Development, three principal dimensions: the ecological, the economic and the social dimension, including intergenerational justice; use a systems perspective, to describe sustainability challenges and possibilities for major technical systems and for their transformation to meet sustainability requirements

UNIT-5

Concepts of Cleaner Technologies: Cleaner Production (CP), Definition, methodology, and Institutions, Environmental Management Hierarchy, Relation of CP and EMS. CP case studies Ammonical nitrogen recovery from wastewater, Fluoride removal from wastewater, Reuse of water from sewage treatment plant, Gas quenching process: replacement of oil with nitrogen and Reduction of hydrogen cyanide from process stack. Reuse of liquid industrial waste from several industries

Academic year: 2020-2021

Course: QUANTITATIVE APTITUDE AND REASONING

Subject Code: 19512QAR

Aim:

-To introduce students to Quantitative Aptitude and Reasoning for competitive examinations.

Objectives :

1. To learn the problems solving techniques for aptitude problems
2. To enable to students prepare themselves for various competitive examinations

Unit I

Numbers – HCF – LCM – Problems on numbers- Decimal Fractions and Simplification.

Unit II

Chain Rule – Time and Work – Pipes and Cisterns- Time and Distance –Problems on Trains – Boats and Streams

Unit III

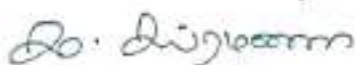

Surds and Indices – Percentage – Profit and Loss- Simple Interest – Compound Interest - Stocks and Shares.

Unit IV

Ratio and Proportion – Partnership – Allegation or Mixture- Clocks – Area – Volume and Surface Area.

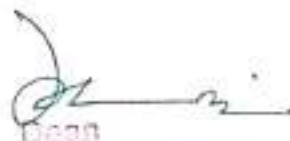

Unit V

Average – Problems on Age - Permutations and Combinations.

Aim:

To introduce Students to Introduction To Rings And Fields.

Objectives :

3. To learn the problems solving techniques for Rings And Fields problems
4. To enable to students prepare themselves for various competitive examinations

Unit I

Definition of rings, examples, polynomial rings, homomorphisms.

Unit II

Ideals, prime and maximal ideals, quotient rings- Noetherian rings, Hilbert basis theorem

Unit III

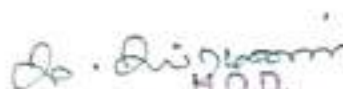

Integral domains, quotient fields- Unique factorization domains, principal ideal domains.

Unit IV

Definition of fields, examples, degree of field extensions.

Unit V

Adjoining roots, primitive element theorem- Finite fields.

Course Code	20512ML	TITLE OF THE COURSE	L	T	P	C
Value Added		MACHINE LEARNING	4	1	-	4
Pre-requisite		Knowledge in basic algebra	Syllabus Version		2020-21	

Course Objectives
The main objectives of this course are to:

- ❖ To Learn about Machine Intelligence and Machine Learning applications To implement and apply machine learning algorithms to real-world applications.
- ❖ To identify and apply the appropriate machine learning technique to classification, pattern recognition, optimization and decision problems.
- ❖ To understand how to perform evaluation of learning algorithms and model selection.
- ❖ To understand about the basic theory of problem solving paradigms and search strategies in artificial intelligence
- ❖ To make the students familiar with knowledge representation, planning, learning, natural language processing and robotics

Expected Course Outcomes
On completion of the course students will be expected to:

1	Have a good understanding of the fundamental issues and challenges of machine learning: data, model selection, model complexity, etc	K2
2	Have an understanding of the strengths and weaknesses of many popular machine learning approaches	K4
3	Appreciate the underlying mathematical relationships within and across Machine Learning algorithms and the paradigms of supervised and unsupervised learning	K3
4	Be able to design and implement various machine learning algorithms in a range of real-world applications	K3
5	Understand the computation intelligence	K6

K1 - Remember; K2 - Understand; K3 - Apply; K4 - Analyze; K5 - Evaluate; K6 - Create

Unit:1	Introduction to ML
Unit:2	Fundamentals of ML
Unit:3	Selected Algorithms
Unit:4	Neural Network Learning
Unit:5	Key Concepts from ML

DIPLOMA

Duration: 90 Hours

Course Code	Course Title	L	T	P	C
17VADMAP	MAPLE	4	0	0	1

Objectives	Learn the applications of mathematics in real life problems. Understand the suitable methods to adopt the problem using several mathematical concepts.
-------------------	---

Unit	Contents
I	Simple Programs using Mathematical constant, Programs using complex functions.
II	Numerical solutions of nonlinear equations and systems, Solving system of linear equations using Jacobi method
III	Program using Trigonometric and Hyperbolic Expressions, Finding Eigen values and Eigen vectors
IV	Plotting Points in the Plane and Space, Analyse data using Central Tendency and Measures of dispersion and distributions
V	Find the Laplace integral transforms for different functions, Obtain the solution of the initial value problem

Text Book: Maple and Mathematica, A Problem Solving Approach for Mathematics Second Edition, Dr. Inna Skingareva & Dr. Carlos Lizarraga-Celaya, Springer Wien New York

Outcomes : To learn a new programming language, beginner in the field of data science.
To kindle the problem solving ability of the students in mathematics.

VALUE ADDED COURSE CERTIFICATE

Course Code	Course Title	L	T	P	C
17VACRP	R Programming	4	0	0	2

Duration: 90 Hours

Objectives:

Learn the applications of mathematics in real life problems. Understand the suitable methods to adopt the problem using several mathematical concepts.

Unit I:

Simple Programs using Mathematical constant
Programs using complex functions

Unit II

Numerical solutions of nonlinear equations and systems, Solving system of linear equations using Jacobi method

Unit III:

Program using Trigonometric and Hyperbolic Expressions & Finding Eigen values and Eigen vectors

Unit IV:

Plotting Points in the Plane and Space
Analyse data using Central Tendency and Measures of dispersion and distributions

Unit V:

Find the Laplace integral transforms for different functions.
Obtain the solution of the initial value problem Books for

Reference:

1. Programming with R by S.P. Mani Sekhar, T.V. Suresh Kumar, Madhavi Kasa, Sunil Kumar S. Manvi, Cengage Learning India Pvt. Ltd, 2017
2. R for Statistics by Pierre-Andre Cornillon, Arnaud Guyader, Francois Husson, Nicolas Jegou, Julie Jossé, Maëla Klonreg, Eric Mitzner-Lober, Laurent Rouvière, Chapman and Hall, 2012
3. Statistics with R Programming by Dr. Sandip Rakshit, McGraw Hill Education (India) Pvt. Ltd, 2018

Course Outcomes:

1. To learn a new programming language, beginner in the field of data science.
2. To kindle the problem solving ability of the students in statistics.

Academic year: 2020-2021
Certificate Course on VERMICOMPOST
Subject Code: 19515VP

Aim:

- To introduce students to vermin-composting for Agricultural uses.

Objectives:

- To inculcate concepts of vermicomposting.
- To understand techniques in Vermicomposting.
- To increase employability of the students.
- To improve the soil quality by promoting the biofertilizers.
- To educate about role of Earthworm
- To learn the importance of Earthworms and help to maintain a good soil structure.
- To educate about Recycling of wastes through vermicomposting.

Course Outcomes:

At the end of this unit, you will be able to:

- Identify correct species of earth worms
- Describe Process of Vermicomposting and Inoculation of earthworms
- Describe maintaining favourable condition in to vermi bed
- Describe preparation of feed and manage Vermicomposting unit
- Describe control of predators, pest and disease attack & Describe harvest of Vermiwash

Unit I

Classification – different species of earth worms. Morphology, anatomy and Physiology of earthworms.

Unit II

Types of Vermicomposting – Role of earth worms in soil fertility – vermiculture – vermi-cast – vermi-technology and applications – Physical, chemical and biological properties of vermi-compost.

Unit III

Raw materials for composting – requirements of vermicomposting. Maintenance of composting – Collection of vermicompost – Efficiency of vermicomposting – General problems in production of vermi-composting.

Unit IV

Advantage of vermicomposting – Applications of vermicomposting – Vermicomposting of Agricultural and Urban Solid wastes – Recycling of wastes through vermicomposting.

Unit V

Small Scale or Indoor vermicomposting – Large scale or outdoor vermicomposting. Effects of vermicompost on soil properties. Vermicompost – Quality & Economics. Prospects of vermiculture as self employment venture.

About the University

Pennaiyeh Ramajayam Institute of Science and Technology (PRIST) is a deemed university in Villian, India. The Institute offers undergraduate and postgraduate courses in Engineering, Science, Education, Management, Arts, and Law, as well as research programmes.

Facilities Available

The University is housed in an independent, multi store building with state of art equipment, excellent Laboratories and infrastructure to help complete this course. Majority of scientist have been acting as monitoring the research program. Computer Library with internet facilities for students, Hostel facilities, Health centre, Sports complex, etc...

Department of Biochemistry

Life science course is very broad where one get to touch and know about all the major areas of life (biological) sciences.

The Biochemistry is focusing on some major areas like genetics, biochemistry, cell biology, molecular biology. So this course can provide much firmer hand on Biofertilizer production.

EXAMINATION

There shall be an university examination at the end of academic years.

Eligibility criteria for appearing in the in the final examination

- Minimum Attendance - 80%
 - Minimum Internal Assessment marks - 40%
 - It will be done through the whole year.
 - Candidate must obtain at least 35% marks in theory
- internal assessment to be eligible for the university examination.

Internal assessment (Theory) will be done as follows :

- a) Mid-term and term examinations = 10 marks
- b) Assignments/Projects/Class test/Clinical Presentations = 05 marks
- c) Attendance = 05 marks

Total = 20 marks

Criteria for a pass in the subject
Minimum marks in theory -45

Scheme of Examination:-

Duration of written examination - 3 hrs
Maximum marks - 100

Level of Knowledge Expected

Working knowledge with excellent technological value

Duration of the program

45 hrs add on certificate course

Course Program Outcome

- Understanding the role of worm farming in Modern Farming
- Understanding the potential of vermicompost as an alternative to chemical fertilizers
- Role of vermiculture in maintaining the health of soil and humans
- Economic importance of vermiculture
- Role of Vermiculture in protecting the environment and managing the waste

Eligibility criteria

Any graduate shall be eligible for the admission to the course Intake Capacity 15 Seats on first cum first basis (Additional admission to the course is prerogative of the school)

Course Structure and Duration

Course is 6 month duration and will be of 45 hrs imparted training programme covering theoretical and practical aspects of vermicompost

Certification

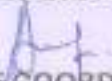

The candidates successfully qualifying the course shall be awarded a certificate to that effect in the appropriate form by School of Arts and Science, Department of Biochemistry, PRIST University, Thanjavur, Vallam.

Diploma Course on Organic Farming
Subject Code: 175150E

Aim:

To acquaint students with philosophy, objectives and principles of organic agriculture.

Course objective:

- To impart knowledge and proficiency in Organic production practices, Certification process and Marketing of organically raised agriculture products.
- To promote self employment and income generation

Course Outcome:

- Understand the concept and the importance of organic farming
- Distinguish the different streams of Agriculture.
- Maintain and preserve existing ecosystems and promote the maintenance of the balance of the recommended farming system.
- Have relevant knowledge of agricultural technology for the fertilization of the land mobilization and composting.
- Have relevant knowledge of agricultural technology for composting methods in organic farming.
- Know legislation rules on livestock in OF.

Unit : I- Introduction: Farming, organic farming, concept and development of organic farming. Principles of organic farming & Need for organic farming, Agencies and institutions related to organic agriculture.

Unit : II- Organic farming systems, Soil tillage, Choice of Varieties, crop rotation multiple and cropping systems, intercropping in relation to maintained of soil productivity by Propagation-seed, planting materials.

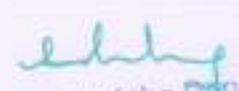

Unit : III- Plant protection- cultural, Plant protection - mechanical . Plant protection- botanical pesticides I, Plant protection- botanical pesticides II, Plant protection- botanical pesticides III. Plant protection- biopesticide. Plant protection- biocontrol agents, Plant protection- biocontrol agents.

Unit : IV- Organic crop production methods- rice, coconut, cashew, vegetables. Livestock component in organic farming, Livestock Management in organic farming.

Unit : V- Farm economy: Basic concept of economics- Demand, supply, Economic Viability of a farm. Basic production principles, reducing expenses, ways to increase returns.

ABOUT THE UNIVERSITY

PRIST University, Ponnaiyah Ramsjivam Institutions, made a foray into the Academic Domain, with the establishment of Sri Ram Institute of Computer Science and Technology in 1985. Over time, various institutions of higher learning such as Arts and Science College, College of Engineering and Technology, College of Education, Research Institution, Polytechnic College are added feathers to the PRIST crown. Today, PRIST commands a massive student base, spread across a whole array of campuses such as Puducherry, Trichy, Kumbakonam, Chennai and Madurai. The Academic research extends right from school education up to the level of the Ph.D. Doctoral programmes in a rich array of disciplines such as Medicine, Engineering, Arts & Science, education, Pharmacy, Management and Technology etc.

FACILITIES AVAILABLE.

The University is housed in an independent, multi store building with state of art equipment, excellent Laboratories and infrastructure to help complete this course. Majority of scientist have been acting as monitoring the research program. Computer Library with internet facilities for students, Hostel facilities, Health centre, Sports complex, etc...

DEPARTMENT OF BIOCHEMISTRY

Life science course is very broad where one get to touch and know about all the major areas of life (biological) sciences.

The Biochemistry is focusing on some major areas like genetics, biochemistry, cell biology, molecular biology. So this course can provide much firmer hand on fermented production.

The department of Life Science was established in the year 2008, with Biotechnology, Biochemistry and Microbiology. Department focused on research and education different courses like Undergraduate/Postgraduate/M.Phil and Ph.D programs offered. In this department there are 18 faculty members (Professor, Associate and Assistant Professor) and they having Post-Doctoral Research experience from Israel, Malaysia, China, Korea and South Africa. The thrust areas of research of the department Molecular diagnostics, Nano biotechnology, Metabolic Engineering, Bioinformatics, Biotechnology, Agro animal technologies. The department has published quality research paper in leading scientific publishers such as Elsevier, Springer, RSC, etc.

COURSE OBJECTIVE

This course is planned to give adequate knowledge on Organic Farming to train the students for self-employment.

COURSE DURATION (90 Hrs.)

COURSE CONTENT (Module 1)

EXAMINATION

There shall be an annual university examination at the end of academic year.

Eligibility criteria for appearing in the in the final examination

Minimum Attendance - 80%

Minimum Internal Assessment marks - 40%

• It will be done through the whole year.

• Candidate must obtain at least 35% marks in theory and practical separately in internal Assessment to be eligible for the annual university examination.

Internal assessment (Theory) will be done as follows:

a) Mid-term and term examinations = 10 marks

b) Assignments/Projects/Class test/Clinical

Presentations = 05 marks

c) Attendance = 05 marks

Total = 20 marks

Criteria for a pass in the subject

Minimum marks in theory - 45

Scheme of Examination:-

Duration of written examination - 3 hrs.

Maximum marks - 100

Course Program Outcome

• Students enrolled for the diploma course is Organic Farming product will following the opportunities Students will demonstrate knowledge of scientific principles related to agriculture.

• Understand what it takes to start and successfully operate a farm or educational garden project

• Use information from the course and other sources to make farm management decisions

• The ability to speak clearly about sustainable agriculture, food systems, small business management and your farm goals

Eligibility criteria

Any graduate shall be eligible for the admission to the course Intake Capacity 15 Seats on first cum first basis (Additional admission to the course is prerogative of the school)

Course Structure and Duration

Course is 12 month duration and will be of 90 hrs imparted training programme covering theoretical and practical aspects of fermentation technology

Certification

The candidates successfully qualifying the course the course shall be awarded a certificate to that effect in the appropriate form by School of Arts and Science, Department of Biochemistry, PRIST University, Thanjavur, Vallam.

SYLLABUS

Certificate Course in *Spirulina* cultivation -19516SPC
Academic year 2020-2021

Duration : 45 Hrs

Unit – I

Introduction to SCP production – Scope of *Spirulina* production, importance – morphology, taxonomy and habitat of *Spirulina*

Unit II

Biochemical composition of *Spirulina*, including proximate composition – amino acids – unsaturated fatty acids – minerals and vitamins. Human health benefits of *Spirulina*.

Unit - III

Parameters for spirulina production. Natural production – laboratory cultivation – small scale commercial production

Unit IV

Commercial and mass cultivation (tank construction, culture medium, strain selection, scaling up of the process, optimum condition) – importance of light and pH in *Spirulina* cultivation

Unit V

Harvesting *Spirulina* Biomass, drying and packing process. Prospects of *Spirulina* As self-employment.

INTRODUCTION

Spirulina, a seaweed which is a blue-green algae biomass, belongs to the class of cyanobacteria discovered by non-referenced Mexicans in the 16th century and has been used as a daily food source. The first large-scale spirulina plant was created in 1970 and is now being grown in many areas of the globe. Spirulina is a microscopic and filamentous cyanobacterium that derives its name from the spiral or helical nature of its filaments.

This alga represents an important staple diet in humans and has been used as a source of protein and vitamin supplement in humans without any significant side-effects. Currently, Spirulina can be found in health food stores and is sold mainly as a dietary supplement in the form of health drinks or tablets.

Spirulina is known as a nutrient-dense food as it is packed full of vitamins, including vitamins A, C, E and B vitamins, as well as a whole host of minerals such as calcium, magnesium, zinc and selenium. In particular, vitamin C and selenium are both antioxidants and help protect our cells and tissues from damage.

10 Benefits of Spirulina

Objective of the Programme

- Procuring the test alga and to grow it in vitro condition.
- Mass cultivation of the test alga and to assess the impact of climatic factors on yield during different months.
- Biochemical analysis of Spirulina maxima cultivated in different months.

Level of Knowledge Expected

Working Knowledge with excellent technological value

Duration of the program

45 hrs add on certificate course

Course Program Outcome

- Students enrolled for the certificate course is Spirulina cultivation will following the opportunities. Students will demonstrate knowledge of scientific principles related to agriculture.
- Students will demonstrate knowledge of Spirulina cultivation including structure, production practices, and management principles.
- Students will demonstrate effective application of upstream and downstream processing.
- Students will demonstrate harvesting and packaging of spirulina mass cultivation.

Eligibility criteria

Any graduate shall be eligible for the admission to the course Intake Capacity 15 Seats on first cum first basis (Additional admission to the course is prerogative of the school)

Course Structure and Duration

Course is 6 month duration and will be of 45 hrs imparted training programme covering theoretical and practical aspects of Spirulina cultivation.

Certification

The candidates successfully qualifying the course the course shall be awarded a certificate to that effect in the appropriate form by School of Arts and Science, Department of Microbiology, PRIST University, Thanjavur, Vallam.

Syllabus

Duration : 90 Hrs

Unit I

Agriculture: definition, meaning and its branches, Agronomy:-definition, meaning and scope of agronomy. Classification of field crops. Factors affecting on crop production. Classification of Tillage: Influence of tillage on physical properties of soil. Planting geometry and its effect on growth and yield.

Unit II

Cropping systems: Definition and types of cropping systems. Sustainable Agriculture: Introduction, definition, goal and concepts. Land degradation and conservation of natural resources. Soil and climatic requirements, cultural practices viz., selection of seeds, seed treatment, sowing method, seed rate, fertilizer recommendation, time and method of application of manures

Unit III

Bio-fertilizers, thinning, gap filling, earthing up, interculturing, weed control measures, irrigation, crop rotation, inter-mixed/relay cropping, major insect-pests and diseases, harvesting, threshing, winnowing, cleaning, drying, storage, preparation of produce for market, value addition, high yielding improved and hybrid varieties, yield, main and sub research stations.

Unit IV

Cereals–Major crops: rice, maize, **Pulses**: pigeonpea, mung bean, **Oilseeds**: groundnut, castor, sunflower and sesame. **spices**– Fennel. **Fibre** crops: cotton and sunhemp. **Commercial crop**: tobacco.

Unit V

Introduction and importance of micro organisms. Growth and development of science of microbiology. Morphological, structural, cultural and physiological characters of bacteria. Importance and functions of micro organism in relation to decomposition of organic matter. Microbial fermentation and importance of microbes in soil, food, milk and sewage water. Role of microbes in Carbon, Nitrogen, Phosphorus and Sulphur cycle. Importance, production and application of biofertilizers .

HOD

Dean

Unit VI

Scope, definition and Concept of organic farming. Objectives of organic farming. Importance of organic farming. Component of organic farming and their role in sustainable crop production. Principles of organic farming. Organic farming in relation to soil health and quality production. Nutrient management in organic farming. Disease and pest management in organic farming. Certification and accreditation process of organic product.

Unit VII

Crop Water Requirement and Management Crop water requirement – Potential evapotranspiration (PET) and consumptive use – Definition and estimation – Factors affecting water requirement – Effective rainfall – Critical stages for irrigation – Water requirement of crops – Water management for major field crops.

Unit VIII

Methods of Irrigation Scheduling of irrigation – Different approaches – Methods of irrigation: surface, sub – surface, sprinkler and drip irrigation – Micro irrigation: layout, suitability, merits and demerits – Fertigation – Water use efficiency – Methods to improve WUE – Conjunctive use of surface and ground water.

Unit IX

Introduction to post harvest technology of agricultural produce. Post harvest operations process for cereal, pulse and oil seed crops. Equipment used in post harvest operations. Study of cotton ginning. Post-harvest study of sugarcane. Study of cold storage and ware house.

About the University

Ponnasayah Ramajayam Institute of Science and Technology (PRIST) is a deemed university in Vallam, India. The institute offers undergraduate and postgraduate courses in Engineering, Science, Education, Management, Arts, and Law, as well as research programmes.

Facilities Available

The University is housed in an independent, multi storied building with state of art equipment, excellent Laboratories and infrastructure to help complete this course. Majority of scientist have been acting as monitoring the research program. Computer Library with internet facilities for students, Hostel facilities, Health centre, Sports complex, etc

Department of Life science

Life science course is very broad where one get to touch and know about all the major areas of life (biological) sciences.

The Microbiology/biotechnology/Biochemistry is focusing on some major areas like genetics, biochemistry, cell biology, molecular biology. So this course can provide much firmer hand on Agricultural Technology.

INTRODUCTION

Agriculture is the main source of national income for most developing countries. However, for developed countries, agriculture contributes a smaller percentage to their national income. The agricultural sector provides fodder for domestic animals. The cow provides people with milk which is a form of protective food.

Importance of Agriculture:

Agriculture plays a crucial role in the life of an economy. It is the backbone of our economic system. Agriculture not only provides food and raw material but also employment opportunities to a very large proportion of population. Raise the right animals with accordance to environmental factors. Today's agriculture routinely uses sophisticated technologies such as robots, temperature and moisture sensors, aerial images, and GPS technology. These advanced devices and precision agriculture and robotic systems allow businesses to be more profitable, efficient, safer, and more environmentally friendly. Agriculture is important to human beings because it forms the basis for food security. It helps human beings grow the most ideal food crops.

Benefits of modern agriculture are as under: Agricultural technologically sophisticated field that offers bright career prospects and opportunity in any country around the world, and in various sectors.

Objective the Program

- To develop appropriate technologies and equipment to help Indian farming system.
- To educate effective dissemination of agro-technologies to the farmers, entrepreneurs and agro-industries
- The main objective is improve the crop production which will strengthen the economic status of the farmers and uplift their life-style

Level of Knowledge Expected

Working knowledge with excellent technological value

Duration of the program

90 hrs add on Diploma Course

Program Outcome

- Students enrolled for the certificate course in Agricultural technology will following the opportunities.
- Students will demonstrate knowledge of scientific principles related to agriculture
- Students will demonstrate knowledge of agricultural industries including structure, production practices, and management principles.
- Students will demonstrate effective application of agricultural knowledge and resources to solve problems and perform relevant activities.
- Students will demonstrate effective communication appropriate to the discipline.

Eligibility criteria & Fee Structure

Certificate Course on Application of microorganisms in food and microbial fermentation
CODE:20516AMFMF
Academic year 2020-2021

Learning outcomes:

This course acquaints students with fermentation technology, types of fermentation that can be applied in Industry. Also they learn various production technologies for various industrial products where microbes are involved.

Unit I:

Microorganisms important in food microbiology (molds, yeasts and bacteria), oriental fermented foods.

Unit II:

Solid state and submerged fermentation, bioreactors, production and application of various organic acids (lactic acid, citric acid and acetic acid).

Unit III:

Production and application of various microbial enzymes (amylase, invertase, pectolytic, proteolytic, glucose oxidase, cellulase, glucoisomerase, lipase, lactase and catalase) and vitamins (B12, riboflavin, A).

Unit IV:

Concept of antibiosis, secondary metabolites, antibiotic fermentations ; production of β lactams (pencillins), semisynthetic pencillins and cephalosporins, amino-glycosides (streptomycin), macrolids (erythromycin) and quinines.

INTRODUCTION

Our world is surrounded by several environmental challenges that are becoming troublesome by the day. Therefore, the online course in Application of Microorganisms in Food and Microbial Fermentation. By PRIST aim to harness the beneficial properties of microorganisms to improve food production, preservation, and safety. It seeks to enhance food quality, develop functional foods like probiotics, and support sustainable, large-scale food processing through microbial fermentation techniques.

Importance of Application of Microorganisms in Food and Microbial Fermentation

The application of microorganisms in food and fermentation is crucial for enhancing food preservation, nutritional value, flavor, sustainability, and health benefits.

Course Content

- ❖ Microorganisms in Food Systems
- ❖ Microbial Fermentation Processes
- ❖ Fermented Food Products
- ❖ Microbial Fermentation and Food Safety
- ❖ Probiotics and Functional Foods

Objective the Program

- ❖ To provide knowledge on Study of microbial roles in the production of fermented foods
- ❖ To understanding microbial fermentation processes and their impact on flavor, texture, and preservation.
- ❖ To Ensuring food safety by controlling harmful pathogens in fermentation.
- ❖ To Enhancing food quality through probiotic development and nutrient enrichment.

Level of Knowledge Expected

A foundational understanding of microbiology, food science, and fermentation processes is expected for students in the application of microorganisms in food and microbial fermentation.

Duration of the program

45 hrs add on Certificate course

Course Outcome

On completion of this course, the Students will gain the ability to understand and apply microbial fermentation techniques to enhance food production, safety, quality, and sustainability.

Outcomes:

This course is designed on toxins produced by microorganisms in food, food protection by various methods including physical, chemical and most importantly food additives with emphasis on green technology for food preservation.

Unit I:

Microbial toxins (endotoxin and exotoxin) and toxoids, source and chemistry of microbial toxins in contamination of food grains and food products.

Unit II:

General principles of food protection: methods of food protection, asepsis, maintenance of anaerobic conditions, protection by use of high temperature : Thermal death time, heat resistance of microorganisms, determination of thermal death process, protection by use of low temperatures: Growth of microorganisms at low temperatures, effect of subfreezing and freezing temperatures on microorganisms.

Unit III:

Protection by drying: methods of drying, factors in the control of drying, microbiology of dried foods, food protection with modified temperature: definition, primary effect of CO₂ on microorganism, the safety of Map foods, spoilage of Map and vacuum packaged meats.

Unit IV:

Protection by food additives: the ideal antimicrobial protection, food additives, added preservatives, developed preservatives, protection by Radiation: UltraViolet radiation, ionizing radiations, Gamma rays and Cathode rays, Microwave processing.

INTRODUCTION

Our world is surrounded by several environmental challenges that are becoming troublesome by the day. Therefore, the online course in Microbial Toxins and Food Protection By PRIST. The aim of Microbial Toxins and Food Protection is to enhance food safety by identifying, understanding, and mitigating the risks associated with microbial toxins in food products to prevent foodborne illnesses and protect public health.

Importance of Microbial Toxins and Food Protection

Understanding microbial toxins is crucial for food protection as it helps prevent foodborne illnesses and ensures the safety and quality of food products.

Course Content

- ❖ Introduction to Microbial Toxins
- ❖ Mechanisms of Toxicity
- ❖ Detection Methods
- ❖ Risk Assessment and Management
- ❖ Food Safety Regulations and Best Practices

Objective the Program

- ❖ To identify and characterize various microbial toxins that can contaminate food products.
- ❖ To understand the mechanisms by which these toxins cause foodborne illnesses and their effects on human health.
- ❖ To develop strategies for detecting and mitigating the presence of microbial toxins in food systems.
- ❖ To promote safe food handling and storage practices to minimize the risk of toxin exposure.

Level of Knowledge Expected

A basic understanding of microbiology, toxicology, and food safety principles is expected for students studying microbial toxins and food protection.

Duration of the program

45 hrs add on Certificate course

Course Outcome

On completion of this course, the Students will develop the skills to identify, analyze, and manage microbial toxins in food to ensure safety and compliance with food protection standards.

Value Added Course

Course Code: 20130VAC5 Technology Enhanced Instruction Platforms

Objectives:

- Explain the aims and objectives of teaching Computer Science.
- Select and use appropriate teaching skills in their teaching.
- Write lesson plans and unit plans on their own.
- Develop programmed instruction for the lessons in Computer Science.
- Explain the various instructional media to be used in teaching Computer Science.

UNIT –I Digital Media Use and Implementation

In this first module, we begin with the foundational understanding and use of digital media teachers use for today's learners. As you work your way through each module you will gain a progressive understanding of digital media concepts and conclude with a look at several digital media tools broken down into three distinct uses.

UNIT –II Technology Tools: From Web 2.0 to 3.0 and Beyond

In module two, we will take a deeper look at some more specific digital technology tools and examples of each one. Some of the earliest forms of digital technology based learning success came from concepts that are readily used today. One of the greatest challenge of choosing the correct technology tool is knowing what's available and how to use. This module will demonstrate example of different technology tools and provide you an opportunity to build some of your own.

UNIT –III Curriculum Design: Engage, Collaborate, and Demonstrate

The first three weeks of the course have introduced you to several new digital learning elements including software, web 2.0, and websites to provide diverse options for learning. This module will focus exclusively on the implementation strategy of digital learning. Instructional designers, technologists, teachers, and trainers should really enjoy the information in this module.

UNIT –IV Audio Tools and Learning Implementation

There are many types of learners. Some do well with kinesthetic, hands-on assignments, while others need visual aids to retain information. Some learn best through the arts, while others need a more logical approach. Audio learning adds so many important elements to the overall learning experience and use of digital media tools. In this module, you will explore some examples of effective digital media for creating audio and implementation strategies to enhance the overall experience for end-users.

UNIT –V E-Learning Author Tools and Instructional Design Strategy

Module seven will focus on the digital media use associated with author tools for developing e-learning. E-learning can be viewed as multiple specializations including the development of a module and the instructional design of an e-learning module. In this module, you will explore different technologies used in the development of digital media learning tools like e-learning and apply digital media design strategies to develop instructional design assets. As you move into the different content areas of this module, reflect on the information you have learned in this course and how each element ties to the foundation of instructional design practices.

outcomes

Upon completion of this course, you will learn:

- How to design and use instructional materials to enhance online teaching and learning
- Curriculum design techniques to develop technology-enhanced learning experiences
- How to engage stakeholders to collaborate, design and evaluate learning experiences and programs
