## GUEST LECTURE ON RECENT TRENDS IN AZOLLA CULTIVATION.

### About the course:

Azolla prefers shade and requires light (30-50% light required for its growth) for photosynthesis. Azolla is a water based crop; one should ensure at least 5 inches of water in pond for proper growth. Azolla grows well where the ideal temperature range is 20-35°C. It requires a water pH value of 5 to 7 and relative humidity of 80-90%.

### STEPS IN AZOLLA CULTIVATION

Size of the tank depends quantity of feed to be harvested. For small holders a pond of about 2m length and 1m width is sufficient. The ground is levelled and bricks are laid in required dimension.

- 2) Old plastic sacs or sheets are placed in the bottom of the pond
- 3) Then the pond is covered with 150 gauge durable plastic sheets
- 4) Secure sides of the plastic sheets by placing bricks over the side walls
- 5) About 25 kg of clean and fertile soil is spread uniformly across the pond
- 6) Then, a mixture of 5 kg cowdung and 30g rajphos/musoorie phos is applied uniformly
- 7) Water is maintained at a depth of 10 cm in the pond
- 8) 500g of azolla culture is required per square meter of the pond
- 9) Azolla will fully cover the pond by 1-2 weeks and can start harvesting it.

### Harvesting of Azolla .

Azolla will be ready for harvest by 2-3 weeks. Plastic sieves can be used for harvesting. One can obtain an average of 1kg azolla per day from a pond of above mentioned dimensions. Harvested azolla can be fed directly or mixed with nutrients and fed to livestock like cattle, sheep, goat, poultry etc. Azolla can also be fed in dry forms. The leaves are to be cleaned with fresh water before feeding.

### Maintenance of azolla.

- Apply 1kg cow dung and 10-20g rajphos once in 2 weeks
- Remove one fourth of water from the pond and refill it with fresh water once in 2 weeks
- Remove the soil and add 5 kg fresh soil to the pond
- The pond should be emptied once in 6 months and cultivation of azolla is restarted with fresh culture and soil.

### Care to be taken

- Maintenance of pure culture free from contamination is essential for good yield.
- Azolla should be harvested regularly to avoid overcrowding.

## GUEST LECTURE ON RECENT TRENDS IN MICRO GREENS

### About the course:

Microgreens are young, tender, edible crops that are harvested as seedlings. These tiny plants are grown to the first true leaf stage. They should not be confused with sprouts, which are germinated seeds lacking true leaves. Microgreens are sold as a raw product for use in salads, on sandwiches, and as a garnish.

### Micro green cultivation:

- Microgreens are young vegetable greens that are approximately 1–3 inches (2.5–7.5 cm) tall. They have an aromatic flavor and concentrated nutrient content and come in a variety of colors and textures
- Microgreens are considered baby plants, falling somewhere between a sprout and baby green.
- That said, they shouldn't be confused with sprouts, which do not have leaves. Sprouts also have a much shorter growing cycle of 2–7 days, whereas microgreens are usually harvested 7–21 days after germination, once the plant's first true leaves have emerged.
- Microgreens are more similar to baby greens in that only their stems and leaves are considered edible. However, unlike baby greens, they are much smaller in size and can be sold before being harvested.
- Microgreens are young vegetable greens that fall somewhere between sprouts and baby leaf vegetables. They have an intense aromatic flavor and concentrated nutrient content and come in a variety of colors and textures

#### AWARENESS PROGRAMME

The School of commerce and management is arranged Department of Commerce health development programmed for the under graduate students on 18.06.2019

The programmed was led by the DR.KG SELVAM, DEAN - Department of management Soft skill is a term often associated with commerce department. The PRIST deemed to be university -vallam student's welfare in soft skill development aim and process of assigned Problem-solving skills are important in every career at every level. As a result, effective problem solving may also require industry or job-specific technical skills. For example, a registered nurse would need active listening and communication skills when interacting with patients but would also need effective technical knowledge related to diseases and medications. In many cases, a nurse would require to know when to consult a doctor regarding a patient's medical needs as part of the solution

Many instructors design opportunities for students to solve "problems". But are their students solving true problems or merely participating in practice exercises? The former stresses critical thinking and decision making skills whereas the latter requires only the application of previously learned procedures.

#### ABOUT BLOCK CHAIN TECHNOLOGY

Blockchain technology is an advanced database mechanism that allows transparent information sharing within a business network. A blockchain database stores data in blocks that are linked together in a chain.

A blockchain is “a distributed database that maintains a continuously growing list of ordered records, called blocks.” These blocks “are linked using cryptography. Each block contains a cryptographic hash of the previous block, a timestamp, and transaction data.

Blockchain is a type of shared database that differs from a typical database in the way it stores information; blockchains store data in blocks linked together via cryptography. Different types of information can be stored on a blockchain, but the most common use for transactions has been as a ledger.

Internet of money (cryptocurrencies) - Phase 1 • Internet of assets (Value registry) - Phase 2 • Internet of Entities (Value ecosystem) - Phase 3 • Value web = Interoperable blockchains 1 + 2 +3 Page 19 • Value can be transferred between different types of blockchains. Devs are now working on the interoperable ledgers.
