Report on Awareness of Recent Trends and Technology in Software Development

On January 20, 2020, the Computer Science Department of PRIST Deemed to be University organized an online seminar via Microsoft Teams titled "Awareness of Recent Trends and Technology in Software Development." The event aimed to inform students and faculty about the latest advancements and emerging trends in the field of software development.

The seminar began with an introduction to the evolving landscape of software engineering, emphasizing the rapid pace of technological innovation. Key topics included the growing importance of DevOps practices, which streamline the software development lifecycle through continuous integration and continuous deployment (CI/CD) methodologies. The integration of Artificial Intelligence (AI) and Machine Learning (ML) in software systems was highlighted, showing how these technologies are revolutionizing areas such as predictive analytics, automation, and decision-making processes.

Another significant trend discussed was the rise of microservices architecture, which allows developers to build scalable and maintainable applications by breaking them down into smaller, independent services. The speakers also touched on cloud computing's role in modern software development, particularly the benefits of using cloud platforms for flexible and cost-effective solutions.

Participants were also introduced to new programming languages and frameworks that are gaining popularity, such as Rust, Go, and Flutter, which address various challenges in security, performance, and cross-platform development.

The seminar concluded with a Q&A session, where attendees engaged with the speakers, gaining further insights into the practical applications of these technologies. The event was well-received, providing valuable knowledge to all participants, ensuring they remain at the forefront of software development trends.
