

PONNAIYAH RAMAJAYAM INSTITUTE OF SCIENCE & TECHNOLOGY (PRIST)

Declared as DEEMED-TO-BE-UNIVERSITY
U/s 3 of UGC Act, 1956

6.2.2 Institution implements e-governance in its operation. e-governance is implemented covering the following areas of operations

4. EXAMINATION

Dr d
IQC

1. Introduction:

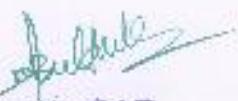

Examination is considered to be one of the integral elements of the teaching learning process. Examination plays an important role in imparting education and knowledge to students. Examination is an instrument to evaluate the knowledge, understanding and learning of students. For Teachers, Examinations provides feedback to evolve their way of teaching. In the last couple of decades, higher education has witnessed tremendous growth in terms of number of students enrolled, number of courses offered, reach of institutes etc. As a result of this growth the examination system at Universities has becomes quite complex and complicated. One of the major problems faced by a university is to conduct infallible examination and provide tamper proof certificates.

With the passage of the growing development in the world of education across the globe, changes have also occurred in the system and procedure of examinations as well. The main function of education is to develop the students thinking capabilities along with the polishing of the skills, so is the role played by the examination system in sharpening their talents. As the education system is changing rapidly according to the changing needs of the time, therefore there is also a need for strengthening the examination system to cope with the emerging education system.

PRIST, being an institute with the most ambitious visions of transforming into an institution of world class stature in the near future, is committed to incorporate the many value addition for our Academic programmes. In this context, PRIST feels proud in presenting this Examination Automation Manual.

REGISTRAR,
Pannaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University
U/s 3 of the UGC Act. 1956),
THANJAVUR - 613 403, TAMIL NADU.

2. COE Module

The COE module deals with examination related information of all the students who are appearing for the semester examination. This module helps in generating the timetable, students list, attendance sheet, hall ticket.

The faculty can enter attendance and marks of the students periodically and also can obtain the final results of the examination. In our university the examination process is automated starting from preparation for exams to publication of results. The system provides facility to select elective papers of student's interest if there is any.

Based on the academic calendar COE office programmer will set the dates for End Semester Exams in the Semester Exam Time Table tab. The timings for the End Semester Exam were fixed by using the same tab. This module helps the student to register the subjects which they are going to appear in the semester examination. In the next stage halftickets for the examinations are generated automatically.

Once the examinations are conducted, attendance details and marks are entered in the software. Based on these inputs the data is processed automatically and the result is generated. This system contains option to enter exam schema for each subject, exam details for each batch with pass percentage. Mark entries are done using their names or register numbers. COE module. The module generates mark sheet automatically with or without photo, consolidated marksheets and provisional certificate once the student completes their course.

REGISTRAR,
Ponnaiyah Ramajayam Institute of
Science & Technology (PRIST),
(Institution Deemed to be University)
L13 3 of the UGC Act, 1956),
THANJAVUR - 613 403, TAMIL NADU.

These marksheets are assigned with a unique serial number for each student which can be automatically assigned through the software. Mark and Grade statements are generated automatically for publication of results. This module has high confidentiality as only authorized users can access the examination software. Mark entry is done by the examiners itself in the centralized valuation process which will be verified and approved by the Camp Officers, so that no alterations can be done. Even if there is any need for modification, it is done with the approval of the Controller of Examinations

The screenshot shows the software's main menu with various icons for different functions like Student Details, Exam Results, and Academic Calendar. The central panel displays a 'Mark Entry' form for a student named 'S. SURESH'. The form includes fields for Name, Date of Birth, Address, and Contact Number. Below the form is a table titled 'Subject Wise Marks' with columns for Subject, Marks, and Grade. The table lists subjects such as English, Mathematics, etc., with their respective marks and grades.

This screenshot shows the 'Exam Result' screen. It features a large table with columns for Subject, Marks, and Grade. The table contains numerous entries, likely representing individual student results. The background of the table cells is color-coded in shades of pink and purple.

This screenshot shows the 'Report Generation' screen. On the left, there is a circular stamp with the text 'THANJAVUR 613 403' and 'PONNALIRAJAH RAMAJAYAM INSTITUTE OF SCIENCE & TECHNOLOGY'. A green arrow points from the text 'COE' to this stamp. On the right, there is a large table with rows of data, each starting with a code like '00001', followed by subject names like 'Mathematics', 'Physics', etc., and other details. The table has many rows, indicating multiple students or records.
